THE CHEMICAL NEWS

AND JOURNAL OF PHYSICAL SCIENCE.

Edited by SIR WILLIAM CROOKES, O.M., LL.D., D.Sc., F.R.S., etc.

Published every FRIDAY, Price 4d., by post 4½d. Subscriptions, £1 per annum.
Payable in advance.

The CHEMICAL NEWS, now established seventy years, circulates among the Universities, Polytechnics, Laboratories, and private and professional Scientific Chemists throughout the civilised World. Being an old established authority and record of the progress and development of Chemical and allied Sciences, and having maintained its present eminent position and influence throughout its career, the CHEMICAL NEWS is unquestionably an invaluable and necessary medium for publicity by those wishing to bring their discoveries, manufactures, or wants to the notice of Scientific Chemists and expert investigators throughout the world.

Subscription (which can commence with any number and for any period), £1 per annum, including postage, or a proportionate part for any period less than one year.

A stock of the back issues of the CHEMICAL NEWS, with the exception of some of the very early numbers which are out of print, is kept at the office, and can be purchased on application to the Manager.

Estimates for extended periods of advertising special Display Advertisements, reserved positions or spaces, and insets of printed matter as Supplements, will be promptly submitted by the Advertisement Manager on receipt of instructions.

SCALE OF ADVERTISEMENT CHARGES.

	£	s.	d.
One Page (Companies' Prospectus, &c., Advertisements)	6	6	0
„ (Ordinary Trade Advertisements)	5	0	0
Half-page, or Whole Column	2	15	0
Quarter-page, or Half-column	1	10	0
One-eighth Page, or Quarter-column	0	17	6
One inch in Column	0	10	0

Business Cards, Trade and other brief announcements, occupying space not exceeding 8 lines in column :

Six Insertions, 5s. each ; thirteen, 4s. 6d. each ; twenty-six, 4s. each ; fifty-two, 3s. 6d. each. Payable in advance.

(SPECIAL DEDUCTIONS MADE FOR A SERIES OF INSERTIONS.)

*Cheques and Post Office Orders to be made payable to SIR WILLIAM CROOKES, and crossed
"London County and Westminster Bank."*

REYNOLDS & BRANSON LTD.,

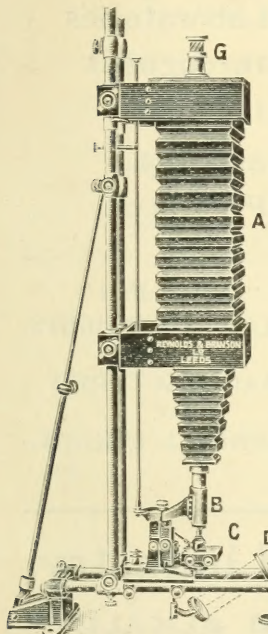

Chemical and Scientific Instrument Makers to His Majesty's Government (Indian, Home and Colonial).

MANUFACTURERS AND EXPORTERS of Chemical, Physical, Optical, and Photographic Apparatus, Pure Chemicals and Reagents for Research Work, Laboratory Fittings, Optical Lanterns, &c.

Recent Awards:—GRAND PRIX, Turin. GOLD MEDALS, London and Allahabad.

The "RYSTOS" PHOTO-MICROGRAPHIC APPARATUS

as supplied to leading metallurgical works, &c.

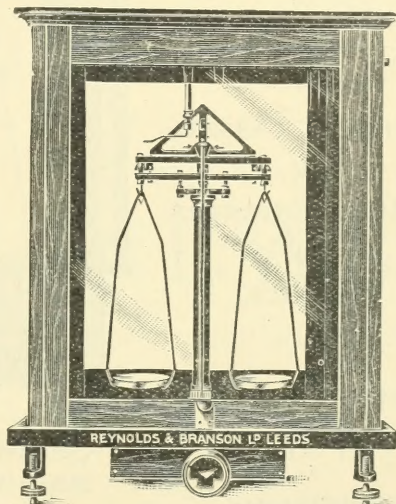

A perfectly rigid apparatus which can be used in either a vertical or horizontal position. Suitable for Biologists, Brewers, Metallurgists, and others to whom this alternative arrangement is of importance. The apparatus will give photographic enlargements 1000 or more diameters.

Price with camera, half-plate size and one double dark slide ... **£11 5 0**

"RYSTOS" MICROSCOPE as "B" in illustration with mechanical and focussing movements to stage and eyepiece ... **£8 10 0**

Descriptive circular including other designs and accessories, post free on application.

"Rystos" Analytical Balance with Magnalium Beam.

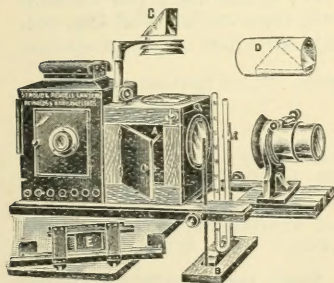

Improved vertical movement of rider hook, rider scale from end to end of beam, and plumb line. The bearings are agate throughout; the beam of hard magnalium. Base of black crystal. Mahogany case with counterpoised doors and brass levelling screws.

To carry 200 grammes, sensitive to 1-5th milligramme, or 1-10th milligramme with a less load ... **£7 0 0**

To carry 300 grammes, very sensitive, 1-10th milligramme showing $\frac{1}{2}$ degrees, extra large case ... **£10 10 0**

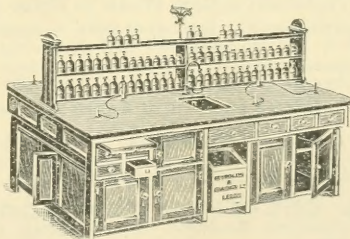

Ditto, ditto, to carry 200 grammes, with straight beam, of cheaper construction ... **£5 7 6**

STROUD & RENDELL SCIENCE LANTERNS.

The "University" Lantern, with Russian iron body, sliding baseboard, two superior objectives, plane silvered mirror "A," which is moved by a knob causing the rays to be reflected upwards for the projection of objects in a horizontal plane, condensers $\frac{1}{4}$ in. diam., prism with silvered back which can be used at "C," or as an erecting prism in mount "D," lime-light burner, slide carrier. Price complete in travelling case, without reversible adjustable stage "B," ... **£10 7 6**

Ditto, ditto, with "Phoenix" Arc Lamp ... **11 15 0**
Reversible adjustable stage "B" for supporting apparatus, etc. ... **7 6**

LABORATORIES fully equipped with BENCHES, FUME CHAMBERS, SCIENTIFIC APPARATUS and CHEMICALS.

GROUND PLANS AND ESTIMATES ON APPLICATION.

Fittings made in parts and numbered for export.

CATALOGUES POST FREE.

Chemical and Physical Apparatus, &c. 12th Edition, 1,500 Illustrations, 600 pages. (Free to customers.)
Chemical Apparatus and Chemicals. Abridged List, 44 pages.
Balances and Weights. 18 pages, illustrated.
Mathematical Drawing and Surveying Instruments. Illustrated, 13 pages.
Mechanical Models for teaching Machine and Building Construction, &c., 22 pages.

Microscopes and Accessories, Dissecting Instruments, &c. Illustrated, 36 pages.
Optical and Science Lanterns, Compressed Gases and Lantern Slides, including Technical Slides. Also Geographical Slides for Standards I. to VII. Geological, &c., 9th Edition, 223 pages.
Opera and Field Glasses, Telescopes, Spectacles, &c. Illustrated, 11 pages.
Handy Guide to Photographic Requisites. A complete list of Photographic Apparatus, Materials, &c. 28th Edition, 104 pp.

14, Commercial Street, Leeds.

PREFACE.

It cannot be doubted that there will be differences of opinion as to the merits of this Index, nor hoped that users of it will have no adverse criticisms to offer, but the methods adopted in it are believed to be those which in the main will prove to be the most convenient and time-saving. The Index includes both subjects and authors. Under the names of the latter all contributions they have made to the *CHEMICAL NEWS* are enumerated, as well as any personal notes and reviews of their publications, or abstracts of their papers, which may have appeared in its pages. When an author has published work in collaboration with another, as well as in his own name only, it is given under separate headings. Again, a large subject such as "Acid" is sub-divided as far as possible. The individual acids are given separately, as well as the word used in its general sense, while "Acids" also constitutes another heading. "Alcohol" and "Alcohols," "Water" and "Waters," and metals and their salts are similarly treated. A complete list of Book Reviews and Notices is given under "Book" and every notice also appears under the name of the author of the Book. In indexing articles and papers the spelling and nomenclature originally used by the authors are exactly followed; hence, "sumac" and "sumach" will be found, and "radicle" and "radical." Where cross references have been thought to be necessary they have been inserted, and every effort has been made to enable readers of the *CHEMICAL NEWS* to look up quickly and easily any subjects which have appeared in its pages, however fragmentary and incomplete their knowledge or recollections of them may be.

ADDENDA & CORRIGENDA.

Page. Column.

- 7 1 Between lines 1 and 2, *add* Preparation from benzotrichloride and water, **43**, 280
- 11 2 Line 15, *add* —Thermic value, **61**, 61
- 12 1 Line 50, after copper *add* **42**, 8;
- 14 1 Line 29 from bottom, *add* Thermic value, **61**, 61—
- 19 3 Line 14 from bottom, *add* As a medicament, **32**, 180—
- 20 2 Line 38, *add* Tests for, **33**, 90—
- 20 3 Line 15, *add* Action of strong, on salts, **31**, 245—
- 21 1 Between lines 21 and 22, *add* Apparatus for manufacture, **16**, 13—
- 22 1 Line 35, *add* Liquid, **15**, 178—
- 22 1 Line 52, after **4**, 83 *add* ; **77**, 133
- 24 2 Between lines 7 and 8, *add* Of oxalic series, thermic value, **61**, 61—
- 28 2 Line 3 from bottom, *for* Adams, J., *read* Adams, Isaac, Jun., and J. M. Merrick.
- 28 2 Line 2 from bottom, *before* Presence *add* Adams, James,
- 30 3 Line 28, *add* Condensation on surface of platinum, **31**, 55—
- 31 2 Line 42, *for* **28** *read* **38**
- 34 1 Line 14 from bottom, *add* Test for, **47**, 277—
- 41 1 Line 12, *add* Self-hard, **86**, 271—
- 42 1 Line 47 from bottom, *add* Determination as phosphate in ore and blast-furnace cinder, **82**, 8—
- 47 2 Line 12 from bottom, *after* 255 *add* , 266
- 47 3 Line 29, *add* Action on sodium phosphate, **36**, 88—
- 48 3 Line 10, *add* Salts, eliminating, **86**, 271—
- 50 1 Line 16, *add* Dissociation by heat, **61**, 153—
- 54 1 Line 14 from bottom, *add* Hypochlorous, preparation, a lecture experiment, **55**, 249—
- 55 3 Line 14, *add* Tests for, **33**, 90—
- 61 3 Line 44, *for* **78**, 154, *read* **78**, 1, 154—
- 62 3 Line 47, *for* **73** *read* **37**
- 64 1 Line 57, *for* 293 *read* 203
- 66 3 Line 15, after 71 *add* , 140
- 106 2 Line 16 from bottom, *after* 264; *add* **25**, 22; and *after* 83 *add* , 131
- 122 3 Line 26 from bottom, *for* Electri-chemistry *read* Electro-chemistry
- 133 3 *For* Pepsine, **5**, 255 *read* Pepsine, **5**, 235
- 144 3 Line 24 from bottom, *for* **52**, 213 *read* **52**, 43
- 162 1 Line 49, *for* 52; *read* 53;
- 167 1 Line 17, *for* **39**, 169 *read* **39**, 161, 169
- 173 1 Between lines 15 and 16, *add* Method of extracting phosphorus from bones, **3**, 270—Use of carbon chloride as agent in separating methylene from ethylic alcohol, **71**, 270—

Page. Column.

- 170 2 *Under* Heading "Cattle Plague" *add* Report on use of disinfectants in arresting spread of, **13**, 242, 268, 277, 291—
- 176 3 *add* Cave, mammoth, **47**, 138
- 180 3 Line 43, *after* **53**, 213; *add* **59**, 46;
- 187 2 Between Lines 17 and 18 from bottom, *add* Behaviour of solutions of, when heated, **43**, 280—
- 197 1 Line 35, *for* 105 *read* 195
- 197 2 Line 6 from bottom, *add* Action of cyanide of potassium on iodide of allyl, **26**, 60—
- 229 3 Line 23 from bottom, *add* Annealing of glass, **27**, 94—
- 230 2 Line 48, *after* **61**, 265 *add* : **69**, 73
- 231 3 Line 30 from bottom, *for* **27** *read* **37**
- 238 1 Line 25 from bottom, *for* **10**, 83 *read* **10**, 183
- 240 3 After bottom line *add* a-Didnitrophenylether, **44**, 258
- 244 3 *Add* Diphenylsebacamide and aniline sebate, **55**, 296
- 258 3 After last line, *add* Edser, E., and Herbert Stansfield (*see* Stansfield, H.)
- 274 2 *add* Euphorbon, **37**, 263
- 278 1 Line 45, *for* 239 *read* 230
- 299 1 Line 4 from bottom, *for* 216 *read* 261
- 301 3 Between lines 25 and 36 from bottom, *add* Hydrogen, silicated, **15**, 178—
- 302 1 Delete line 35
- 335 3 Line 21, *add* ; **74**, 208
- 386 1 Line 2, after physiology, *add* **25**, 179;
- 391 3 *add* Kingstead Chalybeate Spring, analysis, **44**, 140
- 402 1 Line 26 from bottom, *after* Land, W. J., *add* Atmospheric washing bottle, **27**, 185—
- 421 1 Line 46, *for* **44**, 168 *read* **64**, 168
- 446 2 Line 34 from bottom, the reference is **21**, 82
- 464 3 Line 15 from bottom, *add* Of Cacheuta, selenides from, **15**, 5—
- 485 3 Line 14 from bottom, *for* **21**, 277 *read*, **21**, 280
- 505 1 Line 38, *for* **20**, 60; *read* **20**, 69
- 570 1 Line 29 from bottom, *for* 329 *read* 239
- 573 3 Between lines 22 and 23, *add* composition, **60**, 121—Salt, refraction
- 575 1 Line 28, *for* 200; *read* 290;
- 576 1 Line 29 from bottom, *for* 218 *read* 158
- 633 1 Line 37 from bottom, *for* Reaction of, **38**, 298 *read* Reactions, **4**, 75; **38**, 298
- 653 3 Line 3 from bottom, *for* **22**, 208 *read* **22**, 298

GENERAL INDEX

TO THE

CHEMICAL NEWS

(VOLS. I.—C.).

The Volumes are indicated by black type; the pages by small type. (Thus: **75**, 12, 123).

- Abstracts of chemical papers, **79**, 130, 142.
- Abt, W., Benzoylen urea, **59**, 169.
- Abydos, Egyptian tombs of, fatty matters in, **73**, 101.
- Abyssinian expedition, photography in connection with, **18**, 292.
- Acacatechin, **91**, 159.
- Acacia charcoal (see Charcoal)
- Academic chair, vacant, **16**, 264.
- Academy of Medicine, **43**, 187; **52**, 13; **55**, 141, 202; **59**, 11.
- Academy of Sciences, Paris, **12**, 10, 20, 32, 45, 57, 69, 93, 106, 119, 130, 155, 169, 180, 191, 202, 212, 228, 238, 251, 262, 274, 287, 299; **13**, 5, 21, 30, 45, 56, 69, 81, 95, 96, 104, 116, 128, 139, 152, 165, 178, 189, 201, 213, 223, 237, 247, 261, 273, 286, 298; **15**, 4, 19, 31, 45, 53, 80, 105, 118, 130, 156, 171, 184, 210, 224, 238, 249, 264, 287, 317; **16**, 11, 22, 35, 58, 73, 83, 112, 132, 155, 182, 207, 230, 264, 279, 312; **39**, 256; **41**, 92; **75**, 47, 177; **93**, 80;—Distribution of prizes, **26**, 276—President’s address, **75**, 23.
- Academy of Sciences of Vienna, **51**, 103; **72**, 289.
- Academy of Sciences, United States, **7**, 276.
- Accident in chemical works at Runcorn, **18**, 237.
- Accidents, industrial, in Germany for 1895, **74**, 205.
- Accumulator, electric, **89**, 287—For rapid and heavy discharges, **78**, 27—Industries, Limited, **84**, 51—Lead, total and free energy of, **88**, 34, 316—Luminous, **73**, 185—New form, **72**, 211—Oxyhydrogen, **71**, 309.
- Accumulators, Condition of charge and discharge in, **52**, 82—Electric, regulations for manufacture, **89**, 35—Variations of electromotive force in, **49**, 148.
- Accuracy, **19**, 1.
- Acconitic acid (see Acid)
- Acena, R., De la (see De la Acena, R.)
- Acenaphthene, **27**, 94; **73**, 254—acid (see Acid)—4-Chloro- (see 4-Chloro-acenaphthene)—Conversion of ethylnaphthalin into, **25**, 310—Mononitro-, **56**, 47—Oxidation products, **60**, 59.
- Acenaphthylmethane, phenyl- (see Phenylacenaphthylmethane)
- Aceta-anilides, trihalogen- (see Trihalogenaceta-anilides)
- Acet-acetic acid (see Acid)—Ester (see Ester)—Ether (see Ether)
- Acetal and monochloral acetal, **74**, 37—Brom- (see Bromacetal)—Bromo- (see Bromoacetal)—Dimethyl- (see Dimethylacetal)—Ethylic, of tetrolic aldehyde, **100**, 207—Isobutyric, preparation, **43**, 232; **44**, 160—Monochloric, **74**, 37—Qualitative detection, **48**, 237—Resoreinic, **55**, 17—Trichloric, **38**, 46—Trichlorinated, from ethyl, **18**, 259—Trichlorurated, **26**, 145.
- Acetaldehyde and aldehyde ammonia, cyan derivatives of, **28**, 204—Condensation and relation to biochemical synthesis of fatty acids, **98**, 268—Met- (see Metacetaldehyde)—Solution, action of hydrogen sulphide on, **89**, 260—Thermal decomposition, **91**, 267—Vapours, behaviour with electrical discharges of high frequency, **93**, 288.
- Acetaldehydephenylhydrazine, **91**, 277.
- Acetaldoximes, **65**, 246; **66**, 34.
- Acetals, formation and decomposition, **83**, 118—Formation and hydrolysis, **97**, 310—Heat of formation compared with that of their isomeric compounds, **83**, 191—Nitrobenzoic, reduction, **89**, 119—Of acrolein (see Acrolein)—Of binaphthylol (see Binaphthylol)—Of monovalent alcohols (see Alcohols)—Of ortho-substituted aromatic aldehydes (see Aldehydes)—Of phenols (see Phenols)—Of polyvalent alcohols (see Alcohols)—Of polyatomic alcohols (see Alcohols)
- β -Acetatic ethers (see Ethers)
- Acetalyl sulphide, **99**, 299.
- Acetamide, **87**, 152—Action of chlorine on, **31**, 276; **33**, 256—Action of chlorodinitrobenzene on, **82**, 160—Action of dinitro-chloro-benzol on, **34**, 270—Action of nascent hydrogen on, **50**, 114—Action of nitrous acid on, **34**, 163—Action of sulphide of carbon on, **20**, 72—And ethylate of sodium, **27**, 302, 318; **28**, 7—And phenanthraquinone, **58**, 241—Behaviour when heated with sodium alcohol, **27**, 292—Brominated, **99**, 108—Chlor- (see Chloracetamide)—Compounds, molecular, **83**, 105—Compounds with metallic chlorides, **53**, 60—Di- (see Diacetamide)—Electrical conductivities of some salt solutions in, **92**, 245—Iod- (see Iodacetamide)—Monochlor-ethyl- (see Mono-chlor-ethyl-acetamide)—Naphthyl-chlor- (see Naphthyl-chloracetamide)—Nitr- (see Nitracetamide)—Nitrosopropyl-, (see Nitrosopropylacetamide)—Of mercury (see Mercury acetamide)—Of sodium (see Sodium acetamide)—Preparation, **33**, 65; **36**, 102; **48**, 58; **97**, 104—Sulph- (see Sulphacetamide)—Transformation into ethylamine, **80**, 56.
- Acetamido-*p*-benzoyl-naphthol, **87**, 263.
- Acetamino orthophenyl acetate (see Acetate)
- Acetaminophenol, trinitro- (see Trinitro-acetaminophenol)
- Acetanhydride of phthalamide, products of action of, **95**, 24.
- Acetanhydrotic acid (see Acid)
- Acetanilide, **9**, 104; **46**, 291; **87**, 152—Action of phosphorus pentachloride on, **55**, 309; **57**, 255—Alkaloidal reactions of, **74**, 62—And its homologues, action of ethyl oxalate on, **94**, 44—Chlorination of, **99**, 246—Detection of phenacetine in, **58**, 257—Di- (see Diacetanilide)—Dichlor- (see Dichloracetanilide)—Metanitroso- (see Metanitrosoacetanilide)—Of methyl (see Methylacetanilide)—Paranitroso (see Paranitrosoacetanilide)—Reaction for, **61**, 217—Thio- (see Thioacetanilide)—Transformation of acetophenoxime into, **90**, 7.
- Acetanilide Dichloride, Para-iodo- (see Para-iodoacetanilide dichloride)
- Acetanilides, Chlor- (see Chloracetanilides)—Chlorobromo- (see Chlorobromoacetanilides)
- Acetate, Acetamino-orthophenyl, nitration, **82**, 254—Aceto- (see Aceto-acetate)—Benzhydrol, **44**, 93—Butyl monochlor- (see Butyl)—Chlor- (see Chloracetate)—Chromic, **80**, 183—Chromic, isomeric forms of, **80**, 95, 123—Chromous, action of carbonates on, **58**, 30—Cinnamyl-dieth- (see Cinnamyl-diethacetate)—Cupric, phenomena and products of decomposition of normal, when heated, **86**, 253—Cyan (see Cyanacetate)—Cyanoceto- (see Cyanocetoacetate)—Detection methods, **91**, 28—Ethylbenzoyl- (see Ethylbenzoylacetate)—Ethyl cyano- (see Ethyl)—Ethyl benzylideneanilineacetate (see Ethyl)—Ethyl- α -cyano- γ -phenylaceto- (see Ethyl- α -cyano- γ -phenylaceto-acetate)—Ethyl diazo- (see Ethyl)—Ethyl-dichlor- (see Ethyl-dichloracetate)—Ethyl dinitro- (see Ethyl)—Ethyl hexahydrobenzoyl- (see Ethyl)—Ethyl iod- (see Ethyl)—Ethyl methylaceto- (see Ethyl)—Ethyl methylsodio-cyan- (see Ethyl)—Ethyl-*B*-naphthoyl- (see Ethyl-*B*-naphthoyl-acetate)—Ethyl nitro- (see Ethyl)—Ethyl oxal- (see Ethyl oxalacetate)—Ethyl piperonyl (see Ethyl piperonyl-acetate)—Ethyl sodio-cyan- (see Ethyl sodio cyanacetate)—Ferric, action, **74**, 270—Hydric, from urine, **21**, 247—Menthyl aceto- (see Menthyl acetoacetate)—Menthyl cyano- (see Menthyl cyanoacetate)—Menthyl Formylphenyl- (see Menthyl)—Menthyl hydroxymethylene-phenyl- (see Menthyl)—Mercuric, action on benzeneazobenzophenols, **100**, 230—Mercuric, and diazomethane, action of, **97**, 166—Mercuric, oxidation of pinene with, **99**, 106—Methylbutyryl- (see Methylbutyryl-acetate)—Methyl diethylaceto- (see Methyl diethylacetoacetate)—Methyl dimethylaceto- (see Methyl dimethylacetoacetate)—Methyl oxymethylene-cyan- (see Methyl oxymethylene cyanacetate)—Monochlor-, of amyl (see Amyl monochlor-acetate)—Of acetamino orthophenyl (see Acetamino orthophenyl acetate)—Of alumina (see Alumina acetate)—Of ammonium (see Ammonium acetate)—Of amyl (see Amyl acetate)—Of barium (see Barium acetate)—Of benzyl (see Benzyl acetate)—Of calcium (see Calcium acetate)—Of chromium (see Chromium acetate)—Of cobalt (see Cobalt acetate)—Of copper (see Copper acetate)—Of cyanogen (see Cyanogen acetate)—Of ethyl (see Ethyl acetate)—Of iron (see Iron acetate)—Of isopropmycel (see Isopropmycel acetate)—Of lanthanum (see Lanthanum acetate)—Of lead (see Lead acetate)—Of lime (see Lime acetate)

—Of magnesia (*see* Magnesia acetate)
 —Of manganese (*see* Manganese acetate)
 —Of methyl (*see* Methyl acetate)
 —Of nickel (*see* Nickel acetate)
 —Of phenyl (*see* Phenyl acetate) — Of potash (*see* Potash acetate) — Of potassium (*see* Potassium acetate) — Of silver (*see* Silver acetate) — Of soda (*see* Soda acetate) — Of sodium (*see* Sodium acetate) — Of uranyl (*see* Uranyl acetate) — Of zinc (*see* Zinc acetate) — Phenol amido- (*see* Phenol amidoacetate) — Phenol monochlor- (*see* Phenolmonochlor acetate) — Phenyl chlor- (*see* Phenylchloracetate) — Phenyl para- (*see* Phenyl para acetate) — Phenyl, action of sodium on, **41**, 222 — Potassium-phenyl- (*see* Potassium-phenyl-acetate) — Thiacet (*see* Thiacet-acetate)

Acetates, acetyl- (*see* Acetylacetates) — Acid, **35**, 243; **36**, 205; **37**, 42 — Acetic acid in, **58**, 60 — Acylacetyl- (*see* Acylacetylacetates) — C-Acylacetyl- (*see* C-Acylacetylacetates) — Alkaline (*see* Alkaline acetates) — Bromo- (*see* Bromo-acetates) — Chloro- (*see* Chloroacetates) — Commercial, estimation of acetic acid in, **81**, 259 — Cyan- (*see* Cyanacetates) — Ethylacetyl- (*see* Ethylacetylacetates) — Ethyl sodacetyl- (*see* Ethyl sodacetylacetates) — Glucosidic, hydrolysis, **90**, 32 — Halogen substituted, **91**, 197 — Menthyl acetyl- (*see* Menthyl acetylacetates) — Menthylacetyl- (*see* Menthylacetylacetates) — Menthylbutyryl- (*see* Menthylbutyrylacetates) — Metallic, and phenylhydrazine compounds, **76**, 210 — Methyl acetyl- (*see* Methyl acetylacetates) — Methyl acylacetyl- (*see* Methyl acylacetylacetates) — Methylbutyryl- (*see* Methylbutyrylacetates) — Methylsodacetyl- (*see* Methylsodacetylacetates) — Of alkaline earths, **89**, 34 — Of iron (*see* Iron) — Of mercury (*see* Mercury) — Reaction on lead salts, **27**, 130 — Reversible, decomposition by water, **55**, 272 — Simultaneous action of, and of ferrocyanide of potassium upon indigo, **38**, 22 — Sodacetyl- (*see* Sodacetyl acetates) — Solubility of sulphate of lead in, **28**, 264 — Trichlor- (*see* Trichlor acetates)

Acethydrindamides, phenylchloro- (*see* Phenylchloroacethydrindamides)

Acetic acid (*see* Acid) — Acids (*see* Acids) — Ester (*see* Ester) — Ether (*see* Ether) — Ethers (*see* Ethers) — Ferment (*see* Ferment) — Fermentation (*see* Fermentation) — Anhydride (*see* Anhydride) — Chloride (*see* Chloride) — Ethers of dulcite (*see* Dulcite ethers) — Acetic-hydriodic acid (*see* Acid) — Series, acids of (*see* Acids) — Sulphide (*see* Sulphide)

Acetimidic, chlor- (*see* Chlor-acetamide)

Acetine, hept- (*see* Heptacetine) — Tri- (*see* Triacetin)

Acetnaphthalid, **24**, 264

Acetoacetate, cyano- (*see* Cyanoacetoacetate) — Ethylic, **73**, 196 — Ethylic, Enolic and ketonic forms of, **22**, 235 — Ethyl benzylideneaniline (*see* Ethyl) Ethyl- α -cyano- γ -phenyl- (*see* Ethyl- α -cyano- γ -phenylacetoacetate) — Ethyl methyl- (*see* Ethyl) — Menthyl (*see* Menthyl) — Methyl diethyl- (*see* Methyl) — Methyl-dimethyl- (*see* Methyl-dimethyl-aceto-acetate) — Of ethyl (*see* Ethyl)

Acetoacetic acid (*see* Acid) — Ester (*see* Ester) — Esters *see* Esters

Acetoalcoylacetylacetic ethers (*see* Ethers)

Acetoanilide, di- (*see* Diacetoanilide)

Aceto-arsenite, cuprio, homologues of, **21**, 265

Acetobutyl alcohol (*see* Alcohol)

Acetobutyric acid (*see* Acid)

Aceto-chloral, preparation from aldehyde, **23**, 227

Acetochlorhydrine, **19**, 299; **20**, 130; **21**, 58

Aceto-chlorhydrase, action of fuming nitric acid on, **27**, 106

Acetoguanamine, **77**, 152

Acetohydroquinone, formation of, **79**, 191

Acetol and its ether salts, action of organo-magnesium derivatives on, **88**, 293 — Aqueous solutions of, action of alkalis on, **91**, 260 — Formation from sugar, **48**, 304 — Hydrogenation, **86**, 317 — Oxidation, **90**, 293 — Preparing, **92**, 21 — Acetoether, methylic, **89**, 251

Acetol hydrates, **91**, 222

Acetolate of methyl (*see* Methyl)

Aceto-metanitrobenzoic anhydride (*see* Anhydride)

Acetometer, Otto, modification of, **56**, 67

Acetonalkamine, Tri- (*see* Triacetonalalkamine)

Acetonamin, methyl-di- (*see* Methyl-diacetonamin)

Acetonate, Thorium acetyl- (*see* Thorium)

Acetonates, acetyl- (*see* Acetylacetates)

Acetone, **1**, 216; **5**, 122; **61**, 160, 191 — Acetonyl (*see* Acetonylacetone) — Acetyl- (*see* Acetylacetone) — Acid (*see* Acid) — Action, **57**, 117 — Action of ammonia on, **29**, 230; **31**, 109 — Action of anhydrous aluminium chloride upon, **46**, 184 — Action of boron fluoride upon, **40**, 89 — Action of bromine upon, **35**, 85 — Action of ethyl- and di-ethylamine upon, **43**, 131 — Action of hypophosphorus acid on, **84**, 83 — Action of sodium on, **95**, 244, 256 — Action on aniline, **53**, 48 — Addition under influence of caustic alkalis, **48**, 204 — Alcohol of, **43**, 131 — Aldehyde of, formation, **45**, 87 — Allyl derivatives, **36**, 264 — Ammonia derivatives, **30**, 275 — And camphoric acid, compound, **74**, 288 — And hippuric acid, condensation, **99**, 296 — And hydroferrocyanic acid compounds, heat of formation, **88**, 70 — And hydroxylamine chlorhydrate, equilibrium between, **91**, 293 — And iodine, dynamics of reaction between, **100**, 264 — And malonic acid, A β -lactonic acid from, **97**, 94 — Anisyl- (*see* Anisylacetone) — Chlorine derivatives, **26**, 252, 300; **27**, 22 — Chlorobrom (*see* Chlorobrom)

Condensation of formaldehyde with, **90**, 265 — Condensation products, **33**, 138; **55**, 284 — Conversion into hydride of hexylene, **25**, 178, 311 — Conversion of aldehyde into, **20**, 60 — Conversion of glycerin into, **27**, 117 — Cyanogen derivatives, **26**, 229 — Cyclohexyl- (*see* Cyclohexylacetone) — Decahydro- α -naphthyl- (*see* Decahydro- α -naphthylacetone) — Derivatives, **13**, 246; **21**, 216; **27**, 71 — Detection, **68**, 281 — Determination, **58**, 84; **62**, 166; **63**, 236; **64**, 61; **67**, 253; **74**, 246, 265 — Di- (*see* Diacetone) — Diacetyl- (*see* Diacetylacetone) — Dichlor- (*see* Dichloracetone) — Di-iso-propyl- (*see* Di-iso-propyl-aceton) — Dimethyldiacetyl- (*see* Dimethyldiacetylacetone) — Dioxethylic, **59**, 72 — Dioxy- (*see* Dioxyacetone) — Dithioacetyl- (*see* Dithioacetylacetone) — Dithiobenzoyl- (*see* Dithiobenzoylacetone) — Duplo-thi- (*see* Duplo-thiacetone) — Estimation of albuminoid and gelatinous matter by means of, **94**, 24 — Ethylacetyl- (*see* Ethylacetyl-acetone) — Ethylic, action of fuming sulphuric acid on, **84**, 304 — Hydration, formation of dimethylisopropyl-carbinol during, **90**, 45 — Formation of hexamethylbenzin by decomposition of, **39**, 9 — In commercial wood-spirit, **45**, 152 — In diabetetic urine, **35**, 29 — In ethylic alcohol, **79**, 251 — In liquids, **53**, 96 — In manufacture of varnish, **11**, 128 — In methylic alcohol, **43**, 258; **79**, 252 — In urine, **68**, 281; **76**, 241 — In

urine, detection, **90**, 148 — In urine, sodium nitro-prusside as a reagent for, **48**, 160 — In varnish manufacture, **11**, 128 — In water, **79**, 252 — Iod- (*see* Iodacetone) — Isomeric nitroso-ethers of, **48**, 304 — Lävulosedi- (*see* Lävulosedi-acetone) — Methylacetyl- (*see* Methylacetylacetone) — Methylbromophenyl- (*see* Methylbromophenylacetone) — Mono-chlor- (*see* Monochloracetone) — Natural non-saturated, **69**, 241 — Nitr- (*see* Nitracetone) — Nitro- (*see* Nitroacetone) — Oils (*see* Oils) — Orthoxyphenoxy- (*see* Orthoxyphenoxyacetone) — Oxydibenzal- (*see* Oxydibenzalacetone) — Pentabromated, **30**, 20 — Pentachloric, **48**, 34 — Phenanthraquinone, condensation, **62**, 258 — Piperonylidene- (*see* Piperonylideneacetone) — Poly- (*see* Polyacetone) — Producing by synthesis, **11**, 225 — Products of oxidation of, **21**, 143 — Propylic, action of fuming sulphuric acid on, **84**, 304 — Relations of contraction on mixing with water, **74**, 293 — Sodium acetyl- (*see* Sodium acetylacetone) — Solubility, **65**, 255 — Solution, electro-deposition of some metals from, **100**, 310 — Sulph- (*see* Sulphacetone) — Sulpho-cyan- (*see* Sulpho-cyanacetone) — Synthesis, **52**, 188 — Tetramethyl-dioxy- (*see* Tetramethyl-dioxyacetone) — Thiobenzoyl- (*see* Thiobenzoyl-acetone) — Triazo- (*see* Triazoacetone) — Trichlor (*see* Trichloracetone) — Trichlorated, isomer of, **91**, 83

Acetone-benzil anhyd- (*see* Anhydride-tous benzil) — $\alpha\beta$ -Dimethylanhydro- (*see* $\alpha\beta$ -Dimethylanhydroacetone-benzil) — Methylanhydr- (*see* Methylanhydroacetonebenzil)

Acetonedicarboxylate of ethyl (*see* Ethylacetonedicarboxylate)

Acetonedicarboxylic acid (*see* Acid) — Sodium ethers (*see* Sodium ethers)

Acetone-dicarboxylate, methylic, condensation, **82**, 240

Acetone-dicarboxylate of ethyl (*see* Ethylacetonedicarboxylate)

Acetone dicarboxylic acid- (*see* Acid)

Acetone hydrates, **80**, 244

Acetone-hydroxylamine, di- (*see* Diacetonehydroxylamine)

Acetone-semicarbazine, **87**, 152

Acetone-urea, diabetie, **44**, 274

Acetones, acetylenic, **88**, 305 — Acetylenic, decomposition by alkalis, **82**, 279 — Acetylenic, syntheses, **85**, 60 — Acidimetry of, **82**, 315 — Action of halogen derivatives of on aromatic amines, **96**, 83 — Action of heat on, **54**, 33, 261 — Acyl- (*see* Acylacetones) — Alcoylacetyl- (*see* Alcoylacetylacetones) — Aromatic, organo-metallic compounds, **65**, 311 — Combustion-heat of, **49**, 125 — Determination of a particular case of isomerism among, **51**, 23 — Diatomic, action of ethylic mercaptan on, **82**, 291 — Fatty, synthesis of unsaturated, **100**, 207 — Ethylenic, β -oxalcoyl and β -oxyphenol, **90**, 117 — Halogen compounds of, electrolytic preparation, **84**, 304 — Hydrocarbides, etc., synthesis of, **36**, 22 — Nitrogenous acids derived from, **38**, 21; **45**, 99 — Of acetylenic function, **87**, 311 — Of acetylenic series, **82**, 255 — Of fatty series, latent heats of evaporation, **72**, 233 — Of phenylacetic acid, oxidation, **26**, 48 — Preparation, **21**, 216; **58**, 281 — Preparation from mercuriodiphthal, **21**, 203 — Reaction, **77**, 236 — Transformation into alcohols, **6**, 148

Acetonic acid (*see* Acid)

Acetonin, **28**, 205

Aceto-nitrilide and nitrilide, action of potassium nitrite on, **37**, 113

Aceto-nitrates of iron (*see* Iron)

Acetonitrile, **27**, 117 — And silicon halides, **99**, 19 — Anilido- (*see* Anilido-acetonitril) — Ethoxy- (*see* Ethoxyacetonitril)

- trile) — Iodo- (see Iodoaceto-nitrile)
 — Mono-substituted haloid derivatives of, 54, 157—Phenyl (see Phenyl-aceto-nitrile) Synthetic, 55, 222—Trichloro- (see Trichloroacetonitrile)
 Acetonitriles, chlorinated, and phenyl boiling points in, 52, 71—Tolyl (see Tolylacetonitriles)
 Acetonosocericine, 66, 21, 257
 Aceton sulpho acids (see Acids)
 Acetonylacetone, condensation with hydrazine hydrate, 83, 222
 Acetonylaloxalic acid (see Acid)
 Aceto-para-aminoacetophenone, Trans-formation of diacetanilide into, 86, 45
 Acetophenone, 23, 179; 36, 251—Aceto-*p*-amino (see Aceto-*p*-amino acetophenone)—Amino- (see Amino acetophenone)—Ammonia, and phenanthraquinone, interaction, 80, 18—Action of hypophosphorous acid on, 88, 83—And benzaldehyde, oxidation of hydroxy-derivatives of, 100, 31—Benzal- (see Benzalacetophenone)—Benzylidene- (see Benzylidene acetophenone)—Brom- (see Bromacetophenone)—Chlorine derivatives, 35, 141—Condensation with benzal-propionophenone, 87, 88—Cyan- (see Cyanacetophenone)—Derivatives, 37, 5—Desal (see Desalacetophenone)—Dialkyl (see Dialkyl acetophenones)—*o*-*D*-bromo benzyl (see *o*-*D*-bromobenzylacetophenone)—Fixation by benzoylacrylic acid, 98, 21—Hexahydro- (see Hexahydroacetophenone)—Hydroxy-, derivatives of, 100, 31—Mono chlor- (see Monochlor-aceto phenone)—Of mono alkyl (see Monoalkyl)—Of trialkyl (see Trialkyl)—Orthohydroxy (see Orthohydroxyacetophenone)—Products of reduction with sodium amalgam, 28, 19—Dichloride, Para-iodo- (see Para-iodoacetophenone)
 Acetophenones, Triacetyl- (see Triacetylacetophenones)
 Acetoxylacetone, transformation into acetanilide, 90, 7
 Acetylphenylaloxalic acid (see Acid)
 Acetylpyridine, 23, 110
 Aceturic acid (see Acid)
 Aceto-propyl alcohol (see Alcohol)
 Acetopropylsulphates, 11, 129
 Aceto-sulphonyl chloride of, 17, 128
 Acetoxylacetone, 87, 150
 Aceto-urea anhydride (see Anhydride)
 Aceto-sulphates of cellulose (see Cellulose)
 Aceto-urea anhydride, see Meta-aceto-sulphate
 Acetoxime, 43, 106; 87, 152—Influence of acids and alkalis on velocity of formation of, 97, 11
 Acetoximic acids (see Acids)
 —Acetoxy-ketones, constitution, 97, 46
 Acet-toluide, chlorisation, 83, 143
 Acetoxy- (see Aceto-)
 Acetyl acid (see Acid)—Benzoyl- (see Benzoyl-acetyl)—Chlor- (see Chlor-acetyl)—Chlorated, and urea combination, 27, 142—Derivatives of, 22, 412—Derivatives of benzacetonine, 71, 90—Derivatives of cellulose (see Cellulose)—Derivatives of oxycellulose (see Oxycellulose)—Derivatives of dextro-ac-tetra-hydro-naphthylamine (see Dextro-ac-tetra-hydro-naphthylamine)—Derivatives of starch (see Starch)—Determination by means of magnesia, 41, 141—Di- (see Diacetyl)—Dichlor- (see Dichlor-acetyl)—Groups, determination, 90, 7—Groups, estimation, 91, 150—Magnetic rotation of compounds supposed to contain 70, 20—Mercur- (see Mercur-acetyl)—Methyl- (see Methyl-acetyl)—Trichlor- (see Trichlor-acetyl)—Values, Benedikt's 61, 238, 286
 Acetylacetate of ethyl (see Ethyl)
 Acetylacetates, acyl- (see Acylacetylacetates)—Ethylacetyl- (see Ethylacetylacetates)—Ethyl sod- (see Ethyl)—Menthyl acyl (see Menthyl-
 Methyl-acyl- (see Methyl-acyl-acetyl acetates)—Methylead- (see Methyl sodacetylacetates)—Of ethyl (see Ethyl)—Of menthyl (see Menthyl)—Of methyl (see Methyl)
 Acetylacetic acid (see Acid)—Ether (see Ether)—Ethers (see Ethers)
 Acetylacetic nate, Thorium (see Thorium)
 Acetylacetones, 80, 123
 Acetylacetone, 90, 19—Action of sulphur-etched hydrogen on, 84, 60—And derivatives of substitution, action on diazoic and tetrazoic chlorides, 86, 252—Di- (see Diacetylacetone)—Dimethyl-di- (see Dimethylacetylacetone)—Dithio- (see Dithioacetylacetone)—Ethyl- (see Ethylacetylacetone)—Homologues, 55, 188—Metallic derivatives, 56, 230—Methyl- (see Methyl acetylacetone)—Of sodium (see Sodium acetylacetone)—Products of condensation of chlorides of *o*- and *p*-nitrated benzile with, 98, 60—Synthesising higher homologues of, 82, 59
 Acetylacetones, alcoyl (see Alcoylacetylacetones)
 Acetylaldehyde, Triazo- (see Triazoacetylaldehyde)
 Acetylalmino, nitroso- (see Nitroso-acetyl amino)
 Acetylaminophenol, trinitro- (see Trinitro acetylaminophenol)
 Acetylation, acids as accelerators, in, 99, 207—Of amides (see Amides)—Of amino-groups (see Amino-groups)—Of arylamines (see Arylamines)—Of cellulose (see Cellulose)
 Acetylbenzol, 20, 202
 Acetylbenzoylthane, di- (see Diacetyl benzoylthane)
 Acetyl bromide, action of bromated, on zinc methyl, 26, 255—Brom- (see Brom-acetyl-bromide)—Derivatives, 9, 285—Trichlor- (see Trichloracetyl bromide)
 Acetyl-bromide, brom- (see Bromacetyl bromide)—Bromide, derivatives, 9, 286
 Acetyl-bromo-aminobenzenes, action on amines and phenylhydrazine, 83, 117
 Acetylcamphor, Formation, 91, 105
 Acetylcarbinol, 60, 280; 63, 175—Behaviour on oxidation, 43, 47—Methyl (see Methyl-acetylcarbinol)
 Acetyl-chloral-alcoholate, Behaviour with potassium cyanide and alcoholic potass, 37, 274
 Acetylchloramine, phenyl- (see Phenyl acetylchloramine)
 Acetyl chloride, action of zinc on, 27, 117—Action on acetate of phenyl, 77, 236—Action on acetoximes, 56, 21—Action on dibasic acids, 35, 105; 36, 243—Action on dried copper sulphates, 80, 198—Action on fumaric acid, 45, 160—Action on phosphorus acid, 10, 91—Action on pyridine, 53, 142—Action on sodium salt of diacetylacetone, 90, 19—And titanium chloride, compound, 42, 166—Derivatives of, 9, 286—Trichlor- (see Trichloracetyl chloride)
 Acetylchloraminobenzene, preparation, 83, 46
 Acetylchloro aminobenzenes, action on amines and phenylhydrazine, 83, 117—Transformation into isomeric chloroacetanilides, 86, 279
 Acetyl-cyanacetic ether (see Ether)—Ethers (see Ethers)
 Acetyl cyanide, 33, 75—Conversion into ketonic acid, 38, 19
 Acetyl fluoride, 65, 251, 263
 Acetyl-furfuran, 77, 45
 Acetyl-gaiacol, nitration, 89, 287
 Acetyl iodide and metals, reciprocal action between, 26, 83 Trichloro (see Trichloracetyl iodide)
 Acetylketen, 97, 247
 Acetyl-lactic acid (see Acid)
 Acetyl methane, dinitrophenyl-di- (see Dinitro-phenyl-diacetyl-methane)
 Acetyl-methyl-heptenone, 76, 183
 Acetylmethylphenylfurfuran, 85, 228
 Acetyl monochloride, 29, 99
 Acetylmorphine, Tri- (see Triacetyl-morphine)
 Acetyl nitrate, 95, 83, 215
 Acetylanthranilidene, 82, 255
 Acetylmetallic radicals (see Radicals)
 Acetylorthosaminophenol, di- (see Diacetylorthosaminophenol)
 Acetyloxamate of ethyl (see Ethylacetyl-oxamate)
 Acetyl-pentane, *a-w*-di- (see *a-w*-Diacetyl-pentane)
 Acetyl-pentane, dimethyl-di- (see Dimethylacetyl-pentane)
 Acetyl-phenyl acetylene (see Acetylene)
 Acetylpimelate, dimethyl-di- (see Dimethylacetylpimelate)
 Acetylpropionate, ethyl-di- (see Ethyl-di-acetylpropionate)
 Acetylpropylene, synthesis, 83, 166
 Acetylstyrene, α -Benzoyl-trimeth- (see α -Benzoyl-trimeth-acetylstyrene)
 Acetyl-tartrates, di- (see Diacetyl-tartrates)—Dimonochlor- (see Dimonochloracetyl-tartrates)—Mono- (see Mono-acetyl tartrates)
 Acetyl thiocyanate and certain bases, influence of temperature on interaction of, 91, 127—Tautomerism of, 91, 197
 Acetyl trimethylene-carboxylic acid (see Acid)
 Acetyl-urea and its derivatives, 41, 197—Brom- (see Bromacetyl urea)
 Acetyl-ureas, cyan- (see Cyan-acetyl ureas)
 Acetyluethrane, ammonia and substituted ammonias on, 77, 162
 Acetylene, 3, 327; 17, 59; 33, 42; 75, 275
 Acetylene, Acetyl-phenyl, 81, 264—Acid nature, 87, 263—Action of anhydrous aluminium chloride on, 81, 286—Action of copper on, 81, 95—Action of dicarbonic acid on, 35, 217—Action of hydrogen on, 20, 130—Action of hypochlorous and hypobromous acids on, 81, 300—Action of light on, 78, 9—Action of metallic magnesium on, 100, 317—Action of metals on, 82, 94—Action of reduced nickel on, 82, 80—Action of sodium on, 77, 177—Action of sulphuric acid on, 35, 103; 36, 80—Action on acetates of mercury, 86, 253—Action on aceto-hypochlorous anhydride, 21, 262—Action on ammonium compounds of alkalis, 79, 47—Action on ammonium metals, 81, 106—Action on anhydrous iodine acid, 93, 44—Action on aqueous and hydrochloric acid solutions of mercuric chloride, 91, 196—Action on benzene, 55, 284—Action on cesium-ammonium and rubidium ammonium, 87, 311—Action on copper, 81, 287—Action on cuprous chloride dissolved in potassium chloride, 82, 29—Action on iron, nickel and cobalt, 74, 1—Action on mercuric chloride solutions, 91, 3, 33—Action on nitrate of mercury, 80, 11, 47—Action on oxides of copper, 81, 7—Action on silver nitrate, 76, 35—Analysis of, 80, 85—And air, action of certain metals on mixture of, 52, 35—And air, explosive mixture of, 73, 222—And calcium carbide, synthesis, 97, 167—And copper and silver, compounds of, 65, 169, 203—And cuprous chloride, compound, 78, 196—And cuprous chloride and potassium chloride, crystalline compounds, 82, 48—And oxvechloride of copper, combination, 78, 243—Application to lighting purposes, 76, 146—As reagent in quantitative analysis, 79, 85—Behaviour with electrical discharges of high frequency, 93, 288—Benzoylphenyl, 81, 264—Bunsen burner for, 75, 260—Chemical properties, 2, 11—Chlorination, 78, 196; 79, 50—Combustion, 73, 47; 92, 235—Combustion by means of oxygen, 93, 81—Combustion in air enriched with

- oxygen, 82, 187—Condensed by the effluve, 62, 213, 322—Conductivity of solutions of in water, 74, 18—Cyanogen, &c., detonation of, 44, 266—Decomposition during combustion, 85, 83—Detection, 81, 290—Derivatives of, 32, 147; 47, 224—Determining, 76, 107—Dibrom—(see Dibrom-acetylene)—Dimethyl—(see Dimethylacetylene)—Drawbacks to use of, 80, 85—Ethyl—(see Ethyl-acetylene)—Ethyl-phenyl—(see Ethyl-phenylacetylene)—Ethyl-propyl—(see Ethyl-propyl-acetylene)—Explosibility at low temperatures, 79, 117—Explosion with oxygen, 74, 268—Explosive properties, 74, 188, 269—Formation of, 49, 21, 65, 37—Formation at expense of iodoform, 49, 163—Formation by means of electric discharges not attended with sparks, 25, 310—Formation in incomplete combustions, 13, 31, 77—Gas, 76, 80; 81, 278—Gas, application to heating of germination stoves, 89, 215—Generation, laboratory method, 81, 243—Generators, after formation of gas in, 80, 115—Hexahydrophenyl—(see Hexahydrophenylacetylene)—Hydration, 70, 12—Hydrogenation, 79, 276; 82, 1, 24, 58—In air, 74, 90—In flames, 65, 153—In gaseous mixtures, 29, 264—Industry, 81, 278—Lamp, Gossarts', 76, 182—Lighting at a London Board School, 85, 108—Lighting with, 74, 12—Liquefaction, 36, 232—Liquefied and solidified by electric effluve, 29, 132—Liquid, physical properties of, 40, 136—Mercury compound of, 19, 28—Metallic derivations of, 80, 133—Mono-chlor—(see Mono-chlor-acetylene)—Monosodic preparation, 77, 177—Naphthyl—(see Naphthyl-acetylene)—Photometric standard with, 73, 59—Polymers, 14, 152, 165, 254, 278—Preparation, 13, 155, 180; 66, 233; 67, 25, 94—Properties of, 13, 134—Purification, 79, 88; 80, 40, 114; 81, 264—Purification by acid solutions of chromic acid, 81, 291—Raw ammonia in, 80, 115—Raw, purification, 82, 95—Reactions with cuprous chloride dissolved in neutral solutions of potassium chloride, 84, 24—Series, acids of, (see Acids)—Series, esters of, condensation of phenols with, 82, 238, 239; 83, 117, 297—Series, hydrocarbons of, hydration by cadmium, zinc and magnesium salts, 100, 268—Sodium (see Sodium)—Storing, 75, 179—Synthesis, 97, 167—Synthesis by direct combination of carbon with hydrogen, 5, 184—Synthesis of acetic acid from, 20, 153; 21, 274—Synthesis of phenol by, 79, 47—Synthetic formation, 65, 175—Theory of luminosity, 73, 68—Toxicity of, 72, 233, 306—Use of chloride of lime as purifying material for, 83, 119—Uses of, 75, 24—Velocity of detonation of, 80, 159
- Acetylene bibromide, action in pyrocatechin, 79, 311
- Acetylene bromide, formation, 19, 273
- Acetylene carbide, 64, 310
- Acetylene chloride, 21, 107—And synthesis of Julin's chloride, 20, 117, 227
- Acetylene copper, composition, 29, 264
- Acetylen-dicarboxylic acids (see Acids)
- Acetylene dicarboxylate of ethyl (see Ethyl)
- Acetylene hydrate, 71, 317
- Acetylene hydriodates, 12, 202
- Acetylene perbromide, action of chlorine on, 31, 140
- Acetylene tetrabromide and aluminium chloride, action on toluene, 92, 81—And ethylic malonate, interaction of, 79, 8
- Acetylene tetrachloride, action of aluminium on, 79, 118—Action of bromine on, 79, 118—Action of chlorine on, 79, 59—Preparation, 79, 59
- Acetylene urea, 36, 121, 247, 253; 39, 84
- Acetylenes, mono-substituted, action of hypochlorous and hypobromous acids on, 81, 300
- Acetylenic Acetones (see Acetones)—Acetylides (see Acetylides)—Acids (see Acids)—Alcohols (see Alcohols)—Aldehydes (see Aldehydes)—Amides (see Amides)—Carbides (see Carbides)—Ethers (see Ethers)—Ketones (see Ketones)—Nitriles (see Nitriles)—Nitrites (see Nitrites)
- Acetylic radical (see Radical)
- Acetylids, cuprous, modification of McLeod's method for formation of, 49, 127—Mercuric, 69, 81—Of barium (see Barium)—Of copper (see Copper)—Of strontium (see Strontium)
- Acetylides, acetylenic, preparation, 88, 46—Acetylenic, preparation and properties, 87, 311—Double, 90, 140
- Ach, F., and E. Fischer, 1,9-Dimethyluric acid and 1,7,9-Trimethyluric acid, 80, 231
- Acheson, E. G., Carborandum, 68, 179
- Graphite formation and manufacture, 79, 290
- Achyranthes aspera, composition of the ash, 64, 164
- Acamides, action of pentachloride of phosphorus on, 25, 155
- Acichloride of selenium (see Selenium)
- Acichlorides, molybdic, 42, 13
- Acid action on different drawing paper, 65, 91, 116—And ketonic functions in the same molecule, influence of juxtaposition of, 93, 223—And salt, inequality and loss of, near the poles of a galvanic battery, 24, 35—Compounds of hydrogen, combination heats of, 51, 203—Compounds of some natural yellow colouring matters, 71, 315; 74, 252—Distribution among several bases in solution, 32, 50—In nature, 73, 12—Filtering, glass cloth for, 72, 306—For etching copper, 66, 62—Formation heats of, 62, 12—From aloes, 25, 179; 27, 265; 30, 31—From sulphur, 20, 70—From toluol, 4, 83—Functions of weak acids, reagent permitting detection of, 53, 87—Hydrates of, 53, 60—In fatty oils, 33, 117—In gastric juice, 30, 200; 31, 218—In juice of beetroot, 49, 94—In milk of mares, 33, 108—In reaction of sugar and potassium permanganate, discovery of a third, 33, 91—In tobacco leaf, new, 48, 304—Isomeric with campholic acid, 71, 13—Isomeric with itaconic acid, 48, 214—Manufacture, chemistry of, 26, 307; 27, 11—New, 32, 219; 70, 98—New, by oxidation of nitrobenzene, 3, 297—New, homologous with anisic acid, 2, 273—Obtained by action of potassa upon a mixture of acetone and chloroform, 55, 153—Of benzoin resin, 2, 252—Of gastric juice, 37, 153—Of milk, 44, 48—Of tin, new, 59, 120—Of uranium, new, 32, 219—Poisoning with, 49, 58—Product in leaves of vegetables, 36, 153—Reaction in certain kinds of paper, cause of, 46, 183—Reaction of animal tissues after death, 42, 164—Reaction of flowers, 40, 57—Solution, absorption of ammonia by, 58, 6—Solution, preparation of a standard, by direct absorption of hydrogen chloride, 78, 7—Solutions, action upon stannous oxide, 45, 152—Solutions, glass and platinum forceps for manipulating in, 18, 155—Solutions of their chlorides, action exerted by certain metals upon, 69, 8—Solutions, precipitation of quinine from, by iodide of potassium, 23, 83—Solutions, "Standard," 72, 5, 84—Use of word, 11, 295—Weak character, relative strengths of compounds of, 67, 285
- Acid, abietic, 40, 265; 43, 258—Constitution, 89, 259
- Acid, acetic, from acetic acid, synthesis, 11, 21
- Acid, acenaphthen, 27, 94; 30, 167
- Acid, acetic, in urine, reaction for, 74, 318
- Acid, acetanhydrocitric, 67, 191
- Acid, acetic, 4, 290; 18, 238; 37, 276; 73, 254—Acetic acid from, synthesis of, 11, 21—Action of copper on aqueous solutions of, 53, 96—Action of crystalline, on laevo-rotatory camphene, 56, 15—Action on bacteria in Thames water, 75, 171—Action on oil of turpentine, 53, 100, 130, 252—Action on phenyl thio-carbimide, 63, 224—Action on sucrose, 71, 215—And acetate of sodium, solution of iron anode in, solution of, 80, 221—And butyric acid, separation, 81, 259—And formic acid, mutual displacement, 31, 251—And formic acid, separation, 55, 229; 81, 259—And nitric acid, combination, 87, 110—And potassium acetate, action of potassic bichromate on, 41, 36—And propionic acid, separation, 81, 259—And sodium hyposulphite, aqueous solutions of, refraction indices of, 42, 184—Anhydrous, 31, 172—Anhydrous, action of chloride of zinc on, 6, 107—Anhydrous, action of chlorine on, 6, 120—Anhydrous, action on ammonium sulphocyanide, 28, 98—Anhydrous, and a compound of picric acid, 28, 81, 108—Anhydrous, and iodine, action of hypochlorous acid on a mixture of, 20, 118—Anhydrous, chemical function of, 39, 239—Anhydrous, combination of stannic acid with, 26, 22—As a menstruum for exhausting ipecacuanha, 2, 271—Behaviour of dolomite with, 46, 12—Benzylised and dibenzylised, 28, 204—Bromated derivatives of, hydrated, 22, 70—Bromised ethers of, 30, 64—Chlorinised, 48, 270—Combinations of pyridine and of trimethylamine with, 77, 249—Compounds with arsenious, boracic, tartaric, and sulphuric acids, 4, 333—Detection, 57, 83—Detection of sulphuric acid in, 14, 152—Determination, 17, 102; 53, 23—Determination of aqueous solutions of, 67, 61—Dibromide of, 37, 173—Distillation, 73, 58—Electrolysis of substituted derivatives of, 23, 311—Estimation, 54, 34; 82, 227—Estimation of formic acid in presence of, 78, 245—Fermentation, influence of boracic acid upon, 40, 45—Free sulphuric acid in, 14, 152—From distillation of resin, 23, 32—From urine, 21, 247—Glacial, action of, 58, 171—Glacial, estimation, 21, 286—Glacial, furfural on, 39, 163—Glacial, impurities in, 40, 78—In acetate of lead, 23, 102; 29, 66; 41, 110—In acetates, 58, 60—In barberries, 23, 71—In chloroform solution, molecular complexity, 85, 162—In commercial acetate of lime, 18, 250, 274—In commercial acetates, estimation, 81, 259—In milk, 27, 184, 269—In plants, 47, 282—In presence of mineral acids, 31, 173—In separation of iron from manganese, 40, 273—In sub-acetate of lead, 41, 110—In vinegar, 36, 242; 37, 173—In wines, 7, 201; 21, 167; 26, 157; 29, 55—Mercurio-monomethyl and mercurio-ethyl, 22, 35—Molecular compound with bromine and hydrobromic acid, 29, 197—Of three Pharmacopoeias, 8, 287—Oxidation in the cold, 32, 239—Oxidation into oxalic acid, 19, 250—Oxyphenoxy-, 82, 43—Phenyloxy-, 82, 43—Phosphate of lime in, 22, 178—Plant, 51, 227—Preparation from amyl alcohol, 13, 246—Production, 66, 39—Properties, 71, 313—Recognition of mineral acids in presence of, 74, 276—Reduction of chromic acid by, 79, 157—Separation of ethylic alcohol from, 74, 110—Series, lower ethereal salts of acids of, 68, 253—Series, solubilities of calcium salts of acids of, 85, 103—Solubility of sulphur in, 35, 163—Specific heat of superfluid, 72, 98—Synthesis of, 27, 131—Synthesis from acetylene, 20, 153; 21, 274—Synthetic, 55, 272—

Testing, 19, 60; 20, 60, 117—Thermal properties of, 54, 10—Vapour-densities, 40, 223, 282, 294—Vapour density, 21, 109, 22, 154, 202—Vapour pressure, 50, 255—Vapours: injurious action, 21, 275—With bromine and hydrobromic acid, 40, 108
 Acid, acetic-hydriodic, action of glacial on quinine, 92, 105
 Acid, acetoacetic, derivatives, 68, 134
 Acid, acetoaldehydic, 74, 253
 Acid, acetone dicarboxylic, reaction, 79, 108, 200
 Acid, acetone dicarboxylic, halogen derivatives, 79, 200
 Acid, acetic, 16, 2, 8; 19, 60
 Acid, acetonoxallic, ethyl esters of, 94, 44
 Acid, acetone sulpho, 21, 202
 Acid, acetophenylloxalic, ethyl esters of, 94, 44
 Acid, aceto-propionic, 40, 157
 Acid, aceto-sulpho, 23, 311
 Acid, acetic, synthesis, 18, 20
 Acid, acetylacetic, action of chloride of tetrazodiphenyl on, 79, 144
 Acid, acetyl-lactic, 91, 211
 Acid, acetyl-trimethylene-carboxylic, 62, 175
 Acid, acetic, 27, 196
 Acid, acetic, 34, 270; 59, 190—Action of hydrobromic acid on, 35, 29—And alkyl derivatives, formation and constitution, 93, 152—And glutamic acid, 93, 244, 265—Anhydrous derivatives, 66, 291—Isomer of, 52, 71—Preparation, 55, 309
 Acid, acrylic, 26, 35; 27, 95; 28, 21; 35, 263—Constitution of substituted, 47, 52—Conversion of allylic alcohol into, 24, 135—Derivatives, 74, 253—Formation, 21, 239—Position formulae of, 29, 146; 30, 144
 Acid, acyclic and cyclic, mixed anhydrides of, 80, 255
 Acid, acylacetic, active, 72, 169
 Acid, adipic, alkyl substitution products of, 82, 314—Examination, 82, 11—Formation of 4-phenylpyrrolidine-2:5-dicarboxylic acid from, 99, 106—Homologues of, 70, 267—Obtained from camphor, 43, 105—Preparation, 71, 34; 81, 108—Preparation, secondary products of, 90, 105—Synthesis, 83, 118
 Acid, adipic, formation from mucic acid, 20, 105—Preparation, 94, 143
 Acid, aldehydic, of milk, 27, 269
 Acid, aldehydic, optically active esters of, 36, 20, 20
 Acid, aldehydic, 63, 73
 Acid, allantoic, 89, 143
 Acid, allophanic, ether of, synthesis of, 18, 7
 Acid, allotelluric, 85, 312
 Acid, allyl-succinic, 98, 213
 Acid, allyl-sulphonic, and its salts, 25, 202
 Acid, amaric, and its homologues, 36, 264
 Acid, amido-benzoic, 20, 60—Action of cyanogen upon, 39, 171—Isomeric, 38, 113—Isomeric, Reactions, 65, 168, 161
 Acid, amido-benzo-sulpho, 25, 35, 94
 Acid, amido-butyric, formation, 57, 262; 58, 241
 Acid, amido-camphoric, 25, 46
 Acid, amido-caryolic, 30, 84; 32, 41
 Acid, amido-dicyanic, 21, 191
 Acid, amido-meta-xylo-sulphonic, 48, 106
 Acid, amidophosphoric, 68, 9, 17, 28
 Acid, amido-phthalic, ethyl-ether of, 35, 84
 Acid, amido-sulpho-benzidic, 25, 118
 Acid, amido-sulphonic, 35, 40; 38, 10; 74, 277—Molecular conductivity, 74, 277—Physiological action, 74, 277
 Acid, amidotartaric, products of decomposition, 85, 228
 Acid, amido-valeric, normal, 45, 119
 Acid, aminodicarboxylic, derived from pinene, 94, 228
 Acid, aminophanylarsonic, isomeric, 93, 7

Acid, aminopinenedicarboxylic, condensation products from, 97, 307
 Acid, aminopyromucic and furfuran-amine, derivatives, 88, 35
 Amygdalonic, 22, 83—Fractional hydrolysis, 90, 276
 Acid, amylic, active, 70, 269
 Acid, amylenedisulphuric, 19, 275
 Acid, amoxypropionic, preparation, 83, 107
 Acid, amylopropionic, hydration, 83, 263
 Acid, anacardio, 56, 22
 Acid, angelic, bibromide of, 32, 8—Isomer of, 39, 251, 289—Preparation, 88, 221—Reduction to valerianic acid, 21, 70
 Acid, angelic, 40, 33
 Acid, anhydrobrazilic, synthesis of, 97, 129
 Acid, anhydrous, of fatty and aromatic series, formation by action of phosphoric acid upon their hydrates, 33, 117
 Acid, anisic, new acid homologous with, 2, 273—Passage of anethol to, 83, 102—Reduction products of, 91, 56—Synthesis, 87, 118
 Acid, anthracen-carbonic, 21, 70
 Acid, anthracen-sulpho, formation of alizarin from, 32, 241, 254
 Acid, anthracinon sulphuric, 30, 100
 Acid, anthraflavin, 23, 157; 24, 226; 26, 261; 34, 173; 38, 10, 25—From meta-oxo-benzoic acid, 38, 60
 Acid, anthraflavinic, 26, 252
 Acid, anthranilic, 50, 296—Action of cyanogen on, 20, 202; 21, 6—Malonic ether of, formation of indigo from, 84, 243
 Acid, anthraquinon-disulphonic, derivatives, 48, 305
 Acid, antimonie, 22, 58—And vanadic acid, estimation in presence of one another, 100, 225—Composition of hydrate of, 25, 106—New soluble, and its antimonates, 79, 227
 Acid, antimonious, dimorphism of, 10, 194—Isomorphism of, 20, 106
 Acid, apocrenic, 24, 85
 Acid, Arabic, in beet sugar, 27, 322
 Acid, arachic, derivatives, 38, 307
 Acid, aromatic, new, 11, 152—Synthesis, 21, 95, 118, 203, 239
 Acid, arsenic, 1, 118; 51, 262—Absorption from solution by charcoal, 17, 157—Acidimetry of, 84, 47—Action of hydrogen sulphide on, 56, 257—Action of perchloride of phosphorus on, 1, 118—Action of sulphuretted hydrogen on, 57, 54—And vanadic acid, estimation in presence of one another, 100, 225—Anilide of, action of heat on formation of, 8, 20—Behaviour with hydrochloric acid, 24, 35—Behaviour with sugar, 46, 13—Compounds with molybdc acid, 30, 20—Crystallised, action on pinene, 85, 119—Estimation, 83, 15—Ethers of, 16, 12—Hydrates of, 53, 11; 97, 239—Manufacture, 12, 171—Nitrate of silver test for, 19, 263—Normal, saturation of, 54, 225, 250, 322—Preparation of aniline red by, 3, 207—Preparation of fuchsine without, 26, 301—Production of aniline colours without, 31, 83; 32, 146—Quantitative determination of arsenious acid in presence of, 42, 222—Recognised by silver reaction, 47, 155—Reducing action of electrolytic hydrogen on, 99, 157—Reduction, 70, 207—Reduction in analysis, 62, 55—Reduction of solutions of, 51, 122
 Acid, arsenio-molybdc, compounds, 29, 288
 Acid, arsenious, 1, 203; 17, 144; 51, 284; 91, 11—Absorption by charcoal, 17, 157—Action of chlorine upon, 11, 138—Action of manganous organic compounds on, 88, 222—Action of ozone on, 26, 105—Action of perchloride of phosphorus on, 1, 118—Alteration, 23, 263—And permanganate, mutual reaction of, 85, 224—Arsenic

obtained from, by baryta, 43, 22—Behaviour of iodine with, 30, 275—Capacity for bases, 5, 320—Compound with acetic acid, 4, 333—Crusts, method of obtaining, 1, 200—Dimorphism of, 10, 194—Distribution of arsenic in organism after ingestion of, 40, 181—Esters of, 97, 309; 100, 32—Estimation of bromic acid by action of, 86, 216, 224—Ether of, 22, 96—Hydrated sesquioxide of iron as antidote for, 2, 114—In animal organism, 68, 281—Influence upon waste of animal tissue, 2, 245—Isodimorphism of, 20, 106—Luminescence of, 91, 233—Mineralisation of, 4, 262—Prismatic occurrence, 17, 128—Quantitative determination in presence of arsenic acid, 42, 222—Reagent for, 6, 301—Reducing action of electrolytic hydrogen on, 99, 157—Solubility in water, 29, 93—Useful application of, 20, 238—Volatilisation of, 38, 165
 Acid, asparaginic, 20, 214; 23, 119, 300; 26, 119
 Acid, aspartic, 35, 11—Products of action of urea upon, 32, 73—Rotation of, 74, 105
 Acid, atracrylic, 20, 34, 119; 27, 106
 Acid, avic, in an albatross, 23, 299—In a sample of guano manures, 28, 8
 Acid, azelaic, 40, 241; 78, 60—Compounds of, 92, 21—Preparation, 81, 215—Production of hydride of beryllium from, 12, 262—Synthesis, 69, 36
 Acid, azobenzol-sulpho, 23, 47
 Acid, azobenzol-sulphuric, 22, 35
 Acid, azodacrylic, 12, 93
 Acid, azohydric, 62, 262; 64, 284
 Acid, barbituric, electrolytic reduction, 86, 216—Salts, constitution, 99, 248—Series, studies in, 96, 230; 99, 234
 Acid, benzal-malonic, halogen substituted derivatives, 56, 236
 Acid, benzeneazosalicylic, nitration, 82, 276
 Acid, benzenearthdisulphonic, 82, 48
 Acid, benzene sulphonic, benzene-sulpho-hydrate from, 35, 241
 Acid, benzene sulphonic, isomorphous derivatives of, 100, 222; Replacement of Br and SO₃H by H in the, 35, 123—Silver salts of, action of bromine on, 35, 40
 Acid, benz-hydroxanic, 91, 293
 Acid, benzhydryl-propionic, formation, 45, 130
 Acid, benzilic, 21, 286; 22, 167; 28, 280—Preparation, 98, 12
 Acid, benzoic, 3, 258; 11, 116, 242; 19, 276; 20, 33; 21, 142; 63, 37—Absorption spectra of, 95, 91—Action in birds, 36, 254—Action of formate of soda on, 28, 97, 279—Action of fusing caustic potassa upon, 26, 156—Action of hydrogen peroxide on, 53, 207; 83, 208—Action of nascent hydrogen on, 10, 350—Action of sulpho-cyanates on, 27, 117—Action on naphtha-quinon, 43, 141—Action on leucin, 38, 306—And dulcitol combinations, 26, 145—And hippuric acid, separation in fever, 43, 259—And its ether, nitration, 81, 287—Artificial production from naphthaline, 16, 206—Conversion into meta-chlororthoxybenzoic acid, 27, 168—Corresponding term to, in naphthalic series, 17, 155, 164—Crystalline, from benzoic, 27, 244—Curious reaction, 28, 13—Curves of solubility, 39, 104—Derivatives, 5, 55; 39, 74—Dichloric, 20, 190—Di-nitric, 21, 203—Di-ortho-substituted, 91, 150—From urine of horses and cattle, 23, 287—Hexachloride of, 82, 252—In ammoniacal gas-water, 26, 228—In juice of cranberries, 40, 46—In milk, 47, 83, 224, 282, 284—Isomeric compounds derived from, 17, 143—Motions on surface of water, 10, 25—Odour of, 69, 131—Organo-metallic compounds of

- 89, 83—Physical properties of, 91, 56
—Radical of, 13, 262—Reaction, 28, 13—Reducing agent in urine containing, 43, 37—Separation in fever, 43, 259—Series, isomerism in, 20, 189—Synthesis of, 36, 195—Synthesis of chloride of, 9, 225—Transformation of benzol into, 7, 79—Trichloro, 20, 190—Tri-nitrided, 21, 203
- Acid, benzoile-paraphenolsulphuric, 18, 235
- Acid, benzol-sulpho, 23, 252—Bromated, 25, 71
- Acid, benzol-sulphinic, action of nitrous acid on, 38, 10
- Acid, benzolsulphurous, 15, 253, 323
- Acid, benzoyl-acetic, and derivatives, 49, 212; 51, 101, 126; 53, 56; 63, 175
- Acid, benzoylacrylic, 99, 299—Fixation of acetophenone by, 98, 210—Fixation of hydrocyanic acid by, 97, 276
- Acid, benzoylbenzoic, 70, 62—Tautomerism of, 81, 22
- Acid, benzoyl-carbonic, 36, 224
- Acid, benzoylethylloxysulphocarbamic, 79, 103
- Acid, benzoilmic, 5, 126
- Acid, benzyl acetic, 35, 216
- Acid, *dl*-benzylethylpropylisobutylsilicanesulphonic, resolution of, 99, 69
- Acid, benzylic, 20, 179
- Acid, benzyl-iso-phthalic, 34, 270
- Acid, benzyl-sulpho, 25, 191; 26, 94
- Acid, beta-naphthol-beta-sulphonic, 61, 193
- Acid, beta-naphthol-sulphonic, 44, 46—Action of bromine on, 54, 256
- Acid, bibasic, formation of anhydrides of, 50, 271
- Acid, bibrom-propionic, 25, 130—Maleic and malic acids from, 41, 252—Acid, β bibromopropionic, monobrom-acrylic acid from, 27, 305
- Acid, α -bibromopropionic, obtained from propionic acid, 27, 305
- Acid, bibromo-succinic, action of bromine on, 27, 24; 29, 273—Action on the pyridic and quinolic bases, 89, 34—Isomers of, 27, 153
- Acid, bichloroacetic, 10, 42; 12, 275—Action of cyanide of potassium on, 25, 118; 28, 264
- Acid, bichloro-propionic, from glyceric acid, 40, 24
- Acid, bichromic, heavy metallic salts of, 72, 281
- Acid, biethyl-protocatechutic, 24, 71, 145
- Acid, bile, tests for, 7, 48
- Acid, bilic, 40, 204
- Acid, bimethyl-protocatechutic, 24, 71, 145
- Acid, bioxybenzoic, 24, 72
- Acid, bioxy-fumaric, 41, 172
- Acid, bipropargyl octadienedioic, magnesium derivatives of, 100, 12
- Acid, bismuthic, 7, 135; 50, 12; 65, 11, 119
- Acid, bismuthogallic, constitution, 89, 23
- Acid, bismuthoprotocatechutic, 90, 244
- Acid, boracic, 37, 112; 57, 162—Amount of water expelled by from hydrates of potassa, soda, and baryta, 3, 368—As a preservative, 41, 152—Behaviour towards oxide and borate of copper and ammonia, 20, 166—Compound with acetic acid, 4, 333—Determination, 31, 150; 46, 286—Estimation, 15, 255; 58, 175—Ethers of, 21, 178—Flame, reaction of, 38, 34—From boronatro-calcite, 30, 82—Fused, and its temper, 32, 71—In sea-water, 4, 16—Influence on acetic fermentation, 40, 45—Lagoons of Maremma, 2, 21—Minerals of Peru, 18, 203—Qualitative reaction for, 35, 204—Sensitivity of Bunsen gas-burner flame for, 27, 117—Spectrum, 27, 184—Stassfurtite in preparation of, 33, 260—To preserve milk and beer, 26, 144—Turner's method of detecting, 35, 127
- Acid, boric, 36, 182, 214; 44, 166; 46, 36; 59, 58; 89, 262; 91, 11—Action on alkaline peroxides, 90, 304—Action on coloured reagents, 51, 56—Action on germination, 65, 73—Action on iodides, 88, 269—And alkaline borates, action on plants, 34, 205—And lithia in Dead Sea, 45, 247—And strong acids, simultaneous volumetric estimation, 89, 60—Apparatus for detection, 73, 230—Basicity of, 23, 131—Blowpipe tests for, 35, 187, 209—Colour reactions with, 87, 27—Complex acids containing, 42, 282—Crystalline, water in, 53, 67; 55, 246—Decomposition, 36, 121—Detection, 73, 230—Detection and estimation, 95, 52, 61, 73—Determination, 54, 25; 55, 100; 64, 49; 70, 277; 72, 166—Electro-conductivity, 64, 322—Estimation, 55, 7; 57, 158; 78, 271; 79, 23, 99, 102, 111; 80, 65; 81, 251; 82, 243; 87, 27, 96—Estimation by action of arsenious acid, 86, 216, 224—Estimation, volumetric, 81, 131—Estimation in boracite, 81, 40—Flame, reaction of, 38, 34—For preserving food, 51, 94—In alkalimetry, 49, 22; 52, 320—In borosilicates, 50, 40—In Dead Sea, 45, 247—In foods, 62, 50; 75, 121—In fumaroles of Tuscany, 23, 262—In glasses and enamels, 64, 306—In milk, 47, 83, 224, 284; 76, 83—In mineral waters, 54, 25—In nature, 73, 12—In vinification, 42, 250—Of a non-volcanic origin, 51, 213—Poisoning by, 51, 191—Properties of, 36, 287—Reactions in presence of mannite, 37, 133; 38, 25—Separation, 55, 7—Solubility in hydrochloric acid, 88, 210—Spectra of, 29, 66
- Acid, boro-deci-tungstic, and its sodium salts, 42, 210, 221
- Acid, brasiliac, constitution, 85, 8
- Acid, brazilinic, synthesis, 96, 317; 97, 129
- Acid, brom-acetic, action of hexamethyl-phenetramine on ethers of, 83, 23
- Acid, bromanilic, action of hydrazines on, 80, 220
- Acid, brom-benzoic, 23, 227—Salicylic acid from, 25, 227
- Acid, brom-ethyl-acrylic, decomposition by caustic potassa, 43, 83
- Acid, bromhydric, 21, 154, 226—Action on acetate of ethyl, 8, 268—Preparation, 23, 226
- Acid, bromic, oxidation phenomena produced by, 97, 209—Recognition, 47, 209—Reduction, 77, 149
- Acid, bromobenzoic, conversion into isophthalic acid, 23, 227—Iodation of, 65, 64—Preparation, 20, 59
- Acid, bromo-butyric, 53, 110—8, 90, 293
- Acid, bromo-campho-carbonic, 28, 204
- Acid, bromo-camphorenic, constitution, 80, 265
- Acid, bromocamphoric, 20, 286; 71, 122, 256—Derivatives, 71, 256; 72, 315
- Acid, bromocamphorsulphonic, oxidation products of, 73, 208
- Acid, bromo-citraconic, 39, 196
- Acid, bromo-fulminic, 52, 213
- Acid, bromogallic, 22, 130
- Acid, bromo-gem-dimethylsuccinic, elimination of hydrogen bromide from, 88, 291
- Acid, bromo-isopropionic, 87, 59
- Acid, bromo-naphthalene sulphonic, 54, 256; 60, 57
- Acid, bromo-naphthalic, and bibrom-naphthoquinone, 38, 141
- Acid, bromo-nitro-benzol-sulpho, 22, 215
- Acid, bromonitrous, decompositions, 19, 261
- Acid, bromophenol-sulphonic, 25, 284
- Acid, bromophthalic, 19, 214
- Acid, bromophenyl mercapturic, 40, 110
- Acid, bromopivalic, and derivatives, 90, 244
- Acid, bromosuccinic, action on the pyridic and quinolic bases, 89, 34—And its salts, products of decomposition in aqueous solution, 90, 94
- Acid, bromo-tolunitro-salicylic, action of naphthylamine on, 79, 251
- Acid, bromosulphobenzoic, 23, 228
- Acid, bromo-toluol-sulpho, 20, 189
- Acid, butanoloic, 71, 173
- Acid, butyric, 1, 59; 5, 122; 26, 227; 27, 131; 52, 262, 274—Acids $C_8H_{14}O_4$, formed from, 43, 12—Among the pro-
- ducts of the destructive distillation of wood, 14, 257—And acetic acid, separation, 51, 259—And water, solidification of mixtures of normal, 99, 299—Behaviour, 64, 201, 212, 224—Conversion into butyl-alcohol, 20, 263—Coumaric, hydride of, 18, 233—Detection in glycerine, 21, 58—Estimation, 72, 289—Oxidation, 17, 154—Oxidation by nitric acid, 30, 81—Synthesis, 10, 205, 241, 244—Synthesis of normal, 25, 202—Transformation of normal into isobutyric acid, 33, 261
- Acid, butyrylpyruvic, derivatives, 86, 11
- Acid, $C_{11}H_{20}O_2$, oxidation in crude petroleum, 35, 142
- Acid, cacodylic, 83, 143—Action on animal organism, 40, 100—Action on antimony trichloride, 100, 72—Heat of neutralisation and acidimetry of, 81, 24—Reaction, 87, 101
- Acid, cafetaninic, 14, 231; 76, 82—In Virginian creeper, 52, 65
- Acid, caffeic, preparation, 21, 143
- Acid, camphanic, constitution, 83, 116
- Acid, camphic, 26, 145; 33, 65—Transformation into camphor, 39, 251
- Acid, camphocarbonic, homologous ethers of, rotatory power of, 87, 94
- Acid, campholic, 76, 78
- Acid, campholenic, constitution of inactive, 74, 37
- Acid, α -campholenic racemic, derivatives, 89, 191
- Acid, campholic, acid isomeric with, 71, 13—Ethers of, 70, 26—Racemic, 99, 216—Synthesis by means of camphoric acid, 81, 118
- Acid, campholytic, 81, 141
- Acid, α -Campholytic, derivatives, 89, 191
- Acid, camphopyric, bromo-derivatives, 81, 116; 92, 244
- Acid, camphoric, 18, 150; 23, 218; 24, 33; 26, 36, 71, 229; 44, 251; 66, 50; 68, 222; 74, 286; 78, 60; 79, 119—Acid functions of, 68, 222—And acetone, compound of, 74, 288—And combinations, 20, 204—And its amides, action of dehydrating bodies upon, 40, 44—Aromatic amides and imides of, 96, 278—Basicity of, 25, 46—Bromo-derivatives, 81, 116—Composition, 79, 119—Constitution, 72, 187; 74, 286; 77, 81; 81, 142; 82, 279—Decomposition, 76, 206—Derivatives, 73, 267; 75, 307; 79, 8—Ethers of, 70, 26—Methyl salts of, 66, 158, 202—New acid from, 65, 165, 212—Synthesis of, 76, 297; 80, 9; 82, 31; 87, 140—Synthesis of campholic acid by means of, 81, 118—Synthesis of an isomeric of, 76, 297—Synthesis of phorone of, 81, 118
- Acid, camphoro-carbonic, 45, 120
- Acid, camphorenic, 75, 163; 80, 9—Constitution, 51, 27; 74, 286
- Acid, camphoro-xalic, and amines, condensation compounds, 93, 72, 86, 102, 111, 123, 136
- Acid, camphor- β -sulphinic, and camphorylsulphonium bases, 95, 104
- Acid, camphorsulphonic, derivatives, 74, 288
- Acid, camphoryldithiocarbamic, 96, 276
- Acid, cantharic, 39, 195
- Acid, capric, derivatives, 23, 213—New source, 56, 189
- Acid, caproic, preparation of normal, 68, 81—Synthesis, 10, 205, 241, 244
- Acid, capronic, 29, 73—From hexyl-alcohol, 26, 11—Normal, electrolysis of, 54, 189—Oxidation by nitric acid, 30, 83
- Acid, caproylacetic, 83, 263
- Acid, caprylic, synthesis, 83, 259; 89, 226
- Acid, carballylic, isomer of, 60, 317
- Acid, carbanic, and natural leucine, union, 91, 83—Conversion of urea into, 20, 166—In urine, detection, 68, 282
- Acid, carbanido-sulphon-acetic, 43, 234
- Acid, carbo-caprolactonic, 48, 213
- Acid, carbo-glucosic, formation, 44, 251

- Acid, chlorauric, action of silver nitrate on, 98, 23
 Acid, chlorbenzoic, bromated, 26, 94
 Acid, chlorbenzol-sulphuric, 15, 267
 Acid, chlorcamphoric, 72, 316
 Acid, chlorcamphorsulphonic, *d*-, and *d*-, and *l*-methyl-hydrindamines, isomeric salts of, 89, 19
 Acid, chloro-carbonic, formation, 9
 182
 Acid, chloro-chromic, action on anthracene, 35, 145—Action on aromatic hydrocarbons, 21, 23—Action on benzol, 21, 12—Action on organic bodies, 35, 55—Formation of quinous, 35, 125—Preparation, 52
 35—Reactions, 50, 233 Salts of, 42, 14—Test, 17, 241
 Acid, chloro-fulminic, 52, 213
 Acid, chlorofumic, 58, 21—Pyrazolone derivatives from, 74, 252
 Acid, chloromaleic, 58, 21—From benzol, 22, 178—From tartaric acid, 7, 233
 Acid, chloro-naphthalene sulphonic, 54, 259
 Acid, chloronitrous compound with sulphuric acid, 11, 22
 Acid, chloro-phenol sulpho, 21, 70
 Acid, chlorophthalic, 53, 227
 Acid, chloroplatinous, preparation, 71, 185
 Acid, chloro-propionic, action of ammonia on, 22, 287
 Acid, chlorosulphonic, action on naphthalene and sulphonic acids, 54, 255—Action on paraffins and other hydrocarbons, 79, 92
 Acid, chlorosulphuric, 27, 46—Reactions, 20, 174
 Acid, chlorous, 18, 235; 20, 179—Action on naphthalene, products of, 20, 165—Action on organic matters, 1, 107
 Acid, chloroxynaphthalic, 3, 351—Blue colour obtained by reduction of, 13, 103—Manufacture, 12, 33
 Acid, chlorallylic, amido-acids from, 17, 65—Bromated, 26, 94—Preparation, 17, 10
 Acid, chlorstannic, 39, 262
 Acid, cholic, 38, 300 Oxidation products of, 43, 47
 Acid, cholecamphoric, 43, 259
 Acid, cholic, 23, 214; 28, 280; 29, 51, 102; 54, 109—Oxidation, 41, 172—Oxidation product of, 40, 300
 Acid, chromic, 26, 168; 33, 238; 59, 157; 65, 153—Absorption spectrum, 54, 44—Action of chloride of, on hydrocarbons, 22, 96—Action on aniline, 11, 262—Action on Caro's reagent, 87, 111—Action on diphenylcarbazine, 91, 32—Action on oxide of carbon, hydrogen, marsh gas, and ethylen, 25, 227—Action on peroxide of hydrogen, 87, 32—Action on vegetable alkaloids, 6, 176, 107—And chromates, 45, 176—And chromates, detection, 39, 135—And combustion of glycerin, 55, 2, 34, 46—And titanate acid, combinations, 78, 25—And vanadic acid, separation, 69, 54—As a reagent for malic acid, 36, 109—Bacterial action, 74, 184—Bleaching palm oil by, 17, 120—Combination with wool and silk, its applications in dyeing, 30, 185—Combustion of carbo-hydrates of, 52, 207—Constitution, 93, 257; 94, 215—Crystallised, 13, 264—Decomposition by hydrogen peroxide, 92, 281; 98, 233—Detection by means of peroxide of hydrogen in presence of vanadic acid, 87, 15—Detection of chromium as, 47, 248—Double salt of, 40, 216—Double salt of, photographic application, 9, 278—Employment to distinguish silver, 1, 312—Estimation, 19, 238—Estimation in chromates, 47, 86—Hydrated, preparation, 50, 66, 236—Manufacture, 11, 72—Oxidation by in presence of other acids, 88, 221—Oxidation of ortho-tolulic acid by, 29, 165—Poisoning with, 49, 58—Preparation, 28, 242—Pure, preparation, 24, 228—Pure, specific gravity, 24, 228—Reaction with hydric peroxide, 34, 19—Recovery from residues containing chromic oxide, 82, 24—Reduction, by acetic acid, 79, 157—Separations from, 77, 49, 131, 179, 216—Use of diphenylcarbazine for detection in cotton dyed with chrome yellow, 85, 167—With aniline, 56, 24
 Acid, chromopyrosulphuric, 63, 62
 Acid, chromosulphochromic, 63, 13
 Acid, chromosulphuric, 65, 137, 147—Colloidal, 74, 121
 Acid, chrysamic, 13, 281
 Acid, chrysanic, 23, 226; 24, 72, 275; 25, 244, 299; 39, 171
 Acid, chrysinic, 11, 71
 Acid, chrysophanic, 20, 178; 21, 12
 Constitution, 88, 268; 100, 33—In soap powder, 39, 42
 Acid, cinchononic, 42, 186—Behaviour when melted, 44, 83—Formation from quinin, 40, 205
 Acid, cinnam-hydroxamic, amidoid derivatives of, 32, 227
 Acid, cinnamic, 21, 280, 25, 107; 63, 275—Action of nascent hydrogen on, 6, 107—Addition of bromine to, 95, 32, 26—Derivatives, 19, 214; 22, 35, 35, 164—Derivatives obtained during experiments on the synthesis of tyrosine, 48, 183—Formation, 32, 258—Halogen derivatives of, 100, 231—History of, 1, 245—Hydrocarbons obtained from homologues of, 36, 211—Series, alioisomerism in, 60, 210—Synthesis, 48, 106—Synthesis of acids homologous with, 20, 60; 21, 101
 Acid, cis-caronic, synthesis, 77, 209
 Acid, cis-methylisopropylsuccinic, 73, 152
 Acid, cis-phenylbutanetricarboxylic, 80, 240
 Acid, citra-bibrom-pyrotartaric, isobutyric acid from, 26, 23
 Acid, citraconic, and mesaconic acid, relations between, 35, 164
 Acid, citrazinic, 68, 96, 223, 303; 70, 254; 74, 254; 76, 249—And alkyl derivatives, formation, 93, 152—Constitution, 81, 79—Synthesis of dipyrilid derivatives from, 79, 210
 Acid, citric, 5, 122; 21, 155; 29, 73; 31, 274; 32, 302; 34, 270; 45, 130; 59, 190; 65, 167; 75, 162; 98, 95—Action of hydrobromic acid on, 24, 73—Action of sulphuric acid upon, 44, 274—Action on metallic sulphides, 3, 65—And tartaric acid, separation, 5, 196—Tartaric and malic acids, distinction, 57, 230—Anhydrous derivatives, 66, 291—As a constituent of imperfectly ripe mulberry juice, 37, 6—Chemistry of, 46, 239—Constitution, 27, 109; 29, 42, 56, 77—Detection of small quantities, 67, 85—Detection of tartaric acid in 50, 236—Determination, 27, 308; 64, 225; 73, 237—Estimating, 22, 228, 240; 26, 50—Examination, 50, 176—Formation, 72, 31, 165, 190, 235, 257, 268—Formation of crystallised oxalate of manganese during permanganic oxidation of, 81, 203—From cane sugar, 71, 296; 72, 100—Inferior homologue of, 80, 35—Influence on chemical reactions, 8, 280, 306—Manganic oxidation, 81, 35—Manufacture, 13, 40, 83, 100—Neutralisation heat of, 54, 297—New source, 19, 36—Preparation, 68, 109—Reaction, 77, 298—Recognition, 51, 285—Substitution products of, and an attempt at its synthesis, 32, 227—Synthesis of, 62, 296; 64, 284—Tartaric acid in presence of, 80, 6—Testing for tartaric acid, 25, 23—Titration with potassium permanganate, 44, 66—Valuation, 47, 71
 Acid, citronellalidenecyanacetic, 80, 258
 Acid, cobaltic, 11, 145
 Acid, cocotannic, 4, 47
 Acid, collic, and its aldehyde, 2, 324
 Acid, colloidal, in human urine, 10, 14
 Acid, comenic, nitrogenous derivatives, 52, 303
 Acid, complex, 82, 94
 Acid, copper tetrasulphide hydrogen, salts of, 95, 191
 Acid, cotarnic, synthesis of, 100, 289
 Acid, crenic, 24, 85
 Acid, creosotic, 20, 203
 Acid, cresyl-disulphurous, 28, 315
 Acid, cresyl-purpuric, 20, 119; 21, 46
 Acid, crithmic, 14, 85
 Acid, crotoconic, 35, 217
 Acid, crotonic, formation of amido-butyric acid by fixation of ammonia on, 58, 231—Method of forming, 30, 65—Separation of β - from α -89, 140—Solid, 21, 203—Synthesis of, 20, 59
 Acid, cumaric, 23, 46, 262—Constitution, 19, 73, 193
 Acid, cumidic, 23, 204
 Acid, cuminic, derivatives, 22, 47
 Acid, cumo-phenol carbonic, 39, 149
 Acid, cupric, formation, 96, 149
 Acid, cyanacetic, 17, 10
 Acid, cyan-carbonic, ether derivatives, 27, 307
 Acid, cyanhydric, 17, 34—Action on epithylene 91, 130—Chlorhydrate of, 17, 143—In tobacco smoke, 21, 167
 Acid, cyanic, 74, 121—Constitution 85, 66—Polymerisation of, 85, 69—Union with amides of aromatic series, 23, 142
 Acid, cyano-acetic, 56, 12—Action of mustard oils on ethyl esters of, 97, 129
 Acid, cyanocamphacetic, 91, 304
 Acid, cyanocampho- α -isobutyric, 91, 304
 Acid, cyanonaphthalene-sulphonic, 55, 136
 Acid, cyano- α -propionic, 91, 304
 Acid, cyanuric, 85, 69—Absorption spectrum and constitution attributed to, 79, 101—As pseudo acid, 93, 17—Constitution, 85, 66—Preparing, 72, 57
 Acid, cyclic and acyclic acid, mixed anhydrides of, 80, 255
 Acid, cyclobutane-1,3-dicarboxylic, and derivatives, 99, 307
 Acid, cyclohexanone-3-carboxylic, synthesis of, 100, 289
 Acid, cyclopent, 22, 2
 Acid, cymen-carbonic, 31, 218; 41, 36
 Acid, cynurenic, 40, 301; 43, 25
 Acid, daturic, 71, 161
 Acid, decane-dicarboxylic, normal, 84, 263
 Acid, dehydracetic, 55, 115; 82, 22—Interactions of, 64, 18—Isomeric change of, 95, 178—Salts of, 69, 81
 Acid, dehydromucic, 38, 106—And its salts and ethers, preparation, 86, 318—Derivatives and decomposition-products, 45, 88—Preparation and reduction, 81, 83
 Acid, desmotroposantonous, action of diazo salts on, 86, 71
 Acid, desoxalic, 23, 71; 40, 76
 Acid, desylencacetic, 73, 254
 Acid, dextro-benzylidene-campholic, action of hydrobromic acid on, 81, 299
 Acid, dextro-camphoric, mixed function derivatives of, 92, 259
 Acid, dextro-lactic, 91, 176
 Acid, dextronic, 25, 179, 263
 Acid, diabenzoic, 21, 216
 Acid, diacetylglyceric, 75, 128—Amyl derivatives of, 75, 128—Etheral salts of, 68, 274
 Acid, dialcylamidobenzoylbenzoic, derivatives, 85, 166
 Acid, dialcylamido-M-oxylbenzoylbenzoic, derivatives of tetrachlorised, 85, 166
 Acid, dialcylbenzylbenzoic, 80, 72
 Acid, dialkylloxysuccinic, production of optically active, from malic and tartaric acids, 79, 55
 Acid, diallyl oxalic, 35, 113
 Acid, diamido-benzoic, 22, 83
 Acid, diamido-diphenyl-dicarboxic, 80, 24

- Acid, diamido-nitrophenylic, from pierio acid, 22, 35
 Acid, diamido-sulpho-benzide-dicarboxylic, 35, 123
 Acid, diaminophosphoric, 4, 226
 Acid, dibenzohydroxamic, 91, 293
 Acid, dibenzoylglyceric, amyl derivatives of, 75, 188—Etc., ethereal salts of active and inactive, 73, 81
 Acid, dibenzoylsuccinic, absorption curves of ethyl esters of, 81, 141
 Acid, dibenzylacetic, 35, 244
 Acid, dibenzylcarbonic, 26, 300
 Acid, dibenzyl disulpho, 28, 99—Splitting up of, 29, 254
 Acid, dibromacetic, 21, 239; 31, 65
 Acid, dibromobarbituric, action upon sulpho-urea and the sulpho-cyanides, 49, 94
 Acid, dibromobenzoic, 23, 207
 Acid, dibromomaleic, 40, 24
 Acid, dibromo-mesitylenic, 46, 281
 Acid, dibromo-benzol-sulpho, 24, 288
 Acid, dibromocamphorsulphonic, 79, 125
 Acid, dibromo-dimethyl-amidobenzoyl-benzoic, 94, 12
 Acid, dibromogallie, 66, 185
 Acid, dibromopropionic, 69, 168
 Acid, dibromo-succinic, isomer of, 27, 153
 Acid, diaminophenylarsinic, 98, 315
 Acid, dicarboxylic, action on acetylen, 35, 217—New process for, 71, 174
 Acid, dicarboxylglutamic, 66, 288
 Acid, diethoxysuccinic, and derivatives, optically active, 83, 298
 Acid, dichloroacetic, 27, 117—Butylic, ethers of, 54, 205—Preparation from chloral, 34, 284
 Acid, dichloro-acrylic, 43, 82
 Acid, dichloro-2,3-butanolic, 80, 95
 Acid, dichlorodimethylamidobenzoylbenzoic, 81, 168
 Acid, dichloride benzoic, 20, 190, 322—And paradichlorbenzoic, identity of, 19, 281
 Acid, dichlorogallie, formation of, 74, 49
 Acid, dichloro-lactic, 43, 61
 Acid, 1,2-dichloro-ortho-phthalic, 86, 264
 Acid, dichlorophenol-sulphuric, action of nitric acid on, 23, 249
 Acid, dichloro-propionic, 35, 40; 37, 7—Action of molecular silver on, 36, 213—From pyruvic acid, 37, 238
 Acid, dichloro-salicylic, 38, 220
 Acid, diaminohydroxamic, amidoid derivatives, 32, 227
 Acid, dicyanacetic, 25, 263
 Acid, dicyanuric, 53, 143
 Acid, diethyl amido-benzoylbenzoic, 70, 209, 94, 1—Tetrachlorised, and derivatives, 84, 232
 Acid, diethylamidopropionic, 64, 152
 Acid, diethylamidopropionic, 60, 72
 Acid, diethyliden-lactamic, 24, 265
 Acid, diethylisossuccinic, 91, 33
 Acid, diethyl-oxy-butyric, 36, 254
 Acid, diethylphosphoric, 61, 272
 Acid, digallie, 39, 22; 42, 36—And tannin, identity of, 80, 183
 Acid, diglutaric, synthesis, 87, 99
 Acid, diglycolic, 23, 83, 204
 Acid, diglycolic, and its homologues, 96, 70; 97, 72
 Acid, dihydrobraziliac, synthesis of lactones of, 96, 117; 97, 109
 Acid, dihydrocamphoric, preparation of a methyl-iso-propyl-adipic acid identical with, 86, 24
 Acid, dihydrocamphoric, synthesis of racemic, 97, 117
 Acid, dihydrohematocoxylonic, synthesis of lactones of, 96, 117; 97, 112
 Acid, 2,3-dihydro-3-methylindene-2-carboxylic, resolution into its optically active isomerides, 93, 105
 Acid, dihydronaphthalic, optically active, 94, 252
 Acid, dihydronaphthosic, synthesis of, 48, 237
 Acid, dihydroxy-benzoic, 46, 219
 Acid, $\alpha\beta$ -dihydroxybutyric, resolution into its optically active constituents, 89, 93
 Acid, dihydroxyfumaric, affinity constants of, 77, 235
 Acid, dihydroxymaleic, 91, 266—Affinity constants of, 77, 235
 Acid, $\alpha\alpha'$ -dihydroxysebacic, and its diacetyl derivatives, 96, 29
 Acid, dihydroxystearic, products of action of fused potash on, 81, 202
 Acid, dihydroxytartaric, 70, 302; 76, 299—Affinity constants of, 77, 235—Properties and relationships of, 77, 234
 Acid, di-iodoisonicotinic, formation, 81, 79
 Acid, di-isoamylacetic, 79, 300
 Acid, dilactylic, inactive, 95, 263
 Acid, dilute, apparent diminution of energy of, in presence of a neutral salt of this acid, 89, 250
 Acid, dimethoxypropionic, derived from d -glyceric acid, ethereal salts and amide of, 91, 292
 Acid, dimethoxysuccinic, optically active, and derivatives, 83, 298
 Acid, dimethylacrylic, 40, 157; 63, 261—Synthesis of, 42, 210—Transformation into dimethylpyruvic acid, 83, 131
 Acid, dimethyladipic, separation of $\alpha\alpha'$ - and $\beta\beta'$ -, 94, 228
 Acid, $\alpha\alpha'$ -dimethyladipic, synthesis, 89, 168; 90, 70
 Acid, $\beta\beta'$ -dimethyladipic, and $\alpha\beta\beta'$ -trimethyladipic acid, synthesis, 91, 134—Synthesis, 90, 304
 Acid, dimethylamidobenzoylbenzoic, 70, 73—Derivatives, 83, 191—Tetrachlorised, and derivatives, 84, 232
 Acid, dimethylaniline phthaloylic, 79, 144
 Acid, dimethyl-bibarturic, 44, 237
 Acid, $\alpha\delta$ -dimethylbutane- $\alpha\delta\delta$ -tricarboxylic, 95, 92
 Acid, dimethylcampholic, and dimethylcamphor, 100, 84
 Acid, 1:2-dimethylcyclopropane-1:2-dicarboxylic, 96, 268
 Acid, $\alpha\delta$ -dimethylglutamic, formation, 92, 257
 Acid, dimethylglutamic, synthesis of the cis- and trans-modifications of, 85, 289
 Acid, dimethylglutaric, 69, 202; 79, 167; 85, 275—Cis- and trans-, 87, 19—Synthesis, 86, 289
 Acid, $\alpha\alpha'$ -dimethylglutaric, synthesis, 89, 168
 Acid, $\beta\beta'$ -dimethylglutaric, electrolysis of salts of, 93, 198
 Acid, dimethylhexamethenylmalonic, synthesis, 74, 279
 Acid, dimethylhexanoic, $\gamma\gamma'$ -, synthesis, 81, 46
 Acid, dimethylisocrotonic, 81, 215
 Acid, dimethyl-levulic, 79, 287— $\beta\beta'$ -, synthesis, 81, 46
 Acid, dimethyl-malonic, 44, 237
 Acid, 1:3-dimethyl-4-phenylacetic, transformation of pinonic acid into, 99, 204
 Acid, $\alpha\delta$ -dimethyl- p -phenylenediamine-thiosulphonic, action of formaldehyde on, 94, 171
 Acid, dimethylpicmic, 70, 286
 Acid, dimethylpyroarsinic, 90, 148
 Acid, dimethylpyruvic, 83, 263—Transformation of dimethylacrylic acid into, 83, 131
 Acid, dimethylsuccinic, 62, 237; 79, 55—Preparation and etherification, 77, 157—Synthesis under the influence of light, 86, 60
 Acid, dimethyltricarballic, synthesis, 82, 57
 Acid, 1:9-dimethyluric, 80, 231
 Acid, dimethylvioluric, action of barium hydroxide on, 86, 291
 Acid, dinitro-anisic, 36, 41
 Acid, dinitrobenzoic, 23, 47; 36, 231; 42, 100
 Acid, dinitrocinamic, 48, 304
 Acid, dinitrodibenzoyldisulphonic, 78, 280
 Acid, dinitro-ethyllic, 41, 201
 Acid, dinitro-heptylic, action of sodium amalgam on, 27, 265
 Acid, dinitrostilbenedisulphonic, oxidation of paranitrotoluenedisulphonic acid to, 77, 236—Reduction, 83, 221
 Acid, dioxybenzoic, 24, 72, 145; 39, 41—Derivatives, 26, 156—Or proto-catechic acid, 82, 107
 Acid, dioxy-3,4-butyric, lactone of, 98, 47
 Acid, dioxyisopropylhypophosphorous, 84, 292
 Acid, dioxy-maleic, preparation and properties, 30, 274
 Acid, dioxyphosphinic, 61, 126
 Acid, dioxystearic, 61, 57; 71, 306—Fission of, 74, 12
 Acid, dioxy-tartric, 85, 155
 Acid, dioxytartaric, action of aniline on, 78, 279
 Acid, diphenyl-acetic, 28, 280
 Acid, 1:3-diphenylbarbituric, and coloured derivatives, 94, 45; 96, 230—Azo-derivatives of, 96, 8
 Acid, diphenyl-glycolic, 22, 167
 Acid, diphenyl-glycolic, 35, 142
 Acid, diphenyl-methyl-acetic, 39, 171
 Acid, 1:3-diphenyl-2-thiobarbituric, and coloured derivatives, 99, 234
 Acid, dipropylmaloadic, 67, 289
 Acid, dipyrromucyl tartaric, ethyl and methyl salts of, 83, 117
 Acid, disuccinic, 6, 311
 Acid, disulpho-anthracenic, 25, 180
 Acid, disulphobenzoic, 24, 72, 145
 Acid, disulphobenzolic, 35, 8, 241
 Acid, disulphonic, 62, 174—Toluen, 35, 164
 Acid, disulpho-phenanthrenic, 42, 109
 Acid, disulpho-resorcinic, 40, 216
 Acid, disulphuric, 76, 110
 Acid, ditartaric, 6, 311
 Acid, dithiobenzoic, 22, 23
 Acid, dithionic, analysis, 94, 223—Formation, 87, 48—In oxidation of sulphurous acid, 75, 139—Oxidation of sulphurous acid to, by metallic oxides, 84, 287—Separation from other acids of sulphur, 83, 5
 Acid, ditheocyanic, 33, 19
 Acid, ditheocyanic, composition, 88, 251—Modifications produced by light and heat, 34, 272
 Acid, elaidic, action of nitric acid on, 80, 252—Action of sulphuric acid on, 77, 120—Stereoisomerism of, 66, 98
 Acid, elatrig, 100, 84
 Acid, elatrig, 40, 216—Constitution, 91, 290—Derivatives, 35, 8—Formation by means of gallic acid, 19, 41; 20, 299—Reaction of, 93, 209—Reduction by zinc powder, 38, 48
 Acid, erythric, synthesis of lactone of, 92, 57
 Acid, erythrophenic, coloured reactions of phenate of ammonia in connection with, 29, 113
 Acid, ethanetetra-carboxylic, ethereal salts of, 72, 48
 Acid, ethoxy-propionic, rotatory powers of optically active, 79, 153
 Acid, ethoxysuccinic, optically active, 67, 36
 Acid, ethylacetylacetic, constitution, 69, 265
 Acid, ethyl-amido-propionic, 51, 35
 Acid, ethyl-benzoic, 20, 202
 Acid, ethyl-benzol sulphonic, 31, 41
 Acid, ethyl-crotonic, 28, 204
 Acid, ethyl-diacetic, 24, 97
 Acid, ethylen-lactic, 37, 250
 Acid, ethylen-protecathectic, 28, 83
 Acid, ethylen-protecathectic, 24, 107
 Acid, ethylerythric, 91, 176
 Acid, ethylhomocamphoric, 89, 168
 Acid, ethyl-hyposulphurous, 20, 19
 Acid, ethyl-lactic, 3, 327
 Acid, ethyl-malonic, thermic data relating to, 78, 23
 Acid, ethyl-sulphacetic, 32, 8
 Acid, ethyl-oxybenzoic, 20, 276; 21, 191
 Acid, ethyl-phenol sulphonic, 31, 41
 Acid, ethyl-phosphoric, heat of neutralisation, 77, 262

- Acid, ethyl-pyrophosphoric, 16, 24
 Acid, ethyl-sulphuric, 35, 108
 Acid, ethyl sulphuric, action of heat on, 82, 253—Formation, 20, 166
 Acid, α -ethyltricarballic, synthesis, 84, 274
 Acid, eupitonio, 41, 122—As a volumetric indicator, 42, 36
 Acid, euristic, derivatives of, 16, 266
 Acid, euxanthinic, 22, 201
 Acid, fatty 62, 110—New unsaturated, 65, 62
 Acid, fencholenic, 79, 223
 Acid, ferri-cyanic, action upon amines, 41, 123
 Acid, ferric, formation, 20, 71
 Acid, ferri-hydrocyanic, and ferro-hydrocyanic acid, chemical equilibrium between, 89, 199
 Acid, ferri-sulphuric, 88, 107
 Acid, ferro-cyanic, action upon amines, 41, 123
 Acid, ferro-hydrocyanic, and ferri-hydrocyanic acid, chemical equilibrium between, 89, 199
 Acid, ferula, synthesis, 36, 51
 Acid, flavellagic, reaction, 93, 209
 Acid, fluorbenzoic, 22, 24
 Acid, fluor-benzol-sulphonic, 40, 77
 Acid, fluosilicic, action on salts of cerium, 30, 176—Bleaching with, 16, 82—For sugar refining, 19, 250
 Acid, fluosulphuric, 68, 276
 Acid, formaldehyd-trioxyfluorone-dicarboxylic, 78, 267
 Acid, formaldehydtrioxyfluorondicarboxylic, 77, 225
 Acid, formic, 4, 310; 10, 258; 21, 58; 23, 22, 227; 37, 174, 276; 41, 185—Acetone of, 19, 249—Action on citrene, 57, 263—Action on French oil of turpentine, 57, 51—Action on terebenthines, 58, 11—Action on turpentine, 68, 26—And acetic acid, mutual displacement, 31, 251—And acetic acid, separation, 55, 229; 81, 259—Atmospheric, 88, 35—Bacterial decomposition, 83, 104—Combinations of pyridine and of trimethylamine with, 77, 249—Constitution, 99, 176—Conversion into methaldehyde, 24, 204—Conversion into methylic alcohol, 24, 157—Crystalline, industrial preparation, 44, 60—Decomposition, 10, 274; 26, 300; 47, 223—Decomposition by the effluve, 47, 93—Determination, 34, 32; 70, 225, 276; 74, 49—Determination with potassium permanganate, 94, 242—Estimation, 76, 296—Estimation in presence of acetic acid, 78, 245—Evaporation heat of, 74, 11—Formation, 26, 300—From carbonic acid, 21, 178—Heat of combustion, 10, 258, 274, 285; 28, 19, 108—In plants, 47, 282—Ketone of, 18, 235—Lead-salts of, 21, 94—Manufacture, 28, 264—Mixed anhydrides of, 80, 22—Preparing, 5, 227; 12, 119, 149; 33, 170; Preparing, concentrated, 59, 37; Preparing, highly concentrated, by means of dehydrated oxalic acid and polyatomic alcohol, 31, 280—Properties, 13, 6, 169—Reduction of erythrite by, 27, 106—Reduction of mannite by, 51, 190—Series, catalysis of acids of, 100, 183—Specific heat of super-fused, 72, 98—Synthesis of, 10, 201; 12, 13; 14, 282; 42, 109; 85, 107—Synthetic formation of, 41, 219—Titrimetric determination, 94, 171—Vapour-densities of, 40, 222, 233, 282, 294
 Acid, form-benzolic, derivatives, 13, 116
 Acid, frangulinic, a derivative from an-thracene, 24, 265—And franguline, 27, 106
 Acid, free, 46, 25—And combined, determination, 65, 37—Congo-red as a reagent for, 54, 100—Estimation and relation to total acidity in super-phosphate, 91, 215—From bees-wax, 70, 148—In superphosphate, 25, 252; 85, 195—Test for presence of, 17, 133—Volumetric estimation in presence of copper and other metallic salts, 95, 253—Volumetric estimation in presence of iron salts, 93, 104
 Acid, fuchsic, generation, 2, 215
 Acid, fulminic, 53, 48—Derivatives of, 25, 131 Formula, 2, 94—Properties possessed by salts of, 33, 47
 Acid, fulminuric, chloro-, and bromo-, 52, 213
 Acid, fumaric, 24, 300—Action of acetyl chloride on, 45, 160—And maleic acid, relations between, 35, 164—Ethyl ethers of, 26, 229—Synthesis, 61, 175
 Acid, fumic, 4, 136
 Acid, fufur-angelic, 36, 52
 Acid, gallic, 24, 21, 230, 241, 253; 26, 12; 43, 84—Absorption by organic colloids, 93, 255—Action of bromine on, 29, 95; 30, 246—Action of hydrated oxide of bismuth on acid isomers of, 89, 227—Action of formaldehyd on, 77, 225—Action on alkaloids, 75, 202—Action on quinoic acids, 76, 70—And tannic acid, relation between, 24, 216—Anilide of, 68, 293—Bromo-derivatives, 16, 24, 66—Chloridation of, 74, 40—Condensation product from, 35, 9—Conversion into tannin, 17, 59—Derivatives, 22, 288; 84, 293—Determination, 29, 241—Estimation, 9, 253; 80, 111—Ethers (see Ethers)—Formation of ellagic acid by means of, 19, 41; 20, 299—Oxidation, 64, 285—Reaction, 29, 161; 44, 225; 50, 188; 51, 84; 74, 283—Reaction of formic aldehyde on, 78, 267—Tests for, 48, 31; 59, 52—Thermic examination, 83, 11—Transformation, 64, 85
 Acid, gallotannic, constitution, 97, 133—Estimation, 64, 51—Influences modifying specific rotatory power of, 78, 251—Methylation, 91, 231—Optical activity of, 78, 251; 79, 142—Solubility in ether, 2, 270
 Acid, geranic, synthesis of, 73, 119
 Acid, gluconic, 42, 186; 55, 117—Basicity, 23, 287
 Acid, glutaric, 91, 160—Alkyl derivatives of, 92, 256—And acetic acid, 93, 244, 265—Constitution, 92, 256
 Acid, glutaminic, 20, 214; 23, 300; 33, 19
 Acid, glutaric, alkyl substitution products of, 82, 314—Cis- and trans-forms of substituted, separation of, 87, 19—Cis-methylisopropyl, 81, 261—Conversion into trimethylenedicarboxylic acid, 91, 160—Derivatives, 74, 253—Trans-methylisopropyl, 81, 261
 Acid, glyceric, 25, 167; 63, 135; 75, 128—Action of iodide of phosphorus on, 6, 179—Active, 68, 273—Amide, anilide and toluidides of, 83, 59—Amyl derivatives of, 75, 128—Dichloropropionic ether prepared from, 29, 73—Ethereal salts of, 67, 156—Inactive, resolution by fermentation and by brucine, 91, 210—Monochloro-lactic acid and bichloropropionic acid from, 40, 24—Preparation, 59, 93; 73, 293—Salts of, active and inactive, 67, 92
 Acid, glycerinic, dry distillation of, 35, 105
 Acid, glycerin-iodopropionic, conversion products when treated with moist oxide of silver, 27, 95—Solvent action on metallic and calcareous oleates and on sulphate of lime, 27, 208
 Acid, glycerarsenic, 85, 96
 Acid, glycerophosphoric, and its salts, 33, 198; 80, 219—Heat of, 77, 36—Neutralisation by alkalis, 77, 36
 Acid, glycerophosphorous, and glycerophites, 84, 242
 Acid, glycidic, 54, 178
 Acid, glycolic, preparation, 23, 214
 Acid, glycolic, 21, 58; 22, 82; 61, 205—Aromatic, 23, 22—Combustion heat of, 168, 172—Destructive distillation, 19, 251—Diphenylen, 35, 142—Molecular constitution, 3, 81—Neutralisation by bases, 47, 142—Obtaining, 35, 115—Preparation, 37, 110; 65, 214; 43, 174—Salts formed by, 47, 164—Series, oxidation of secondary oxy-acids of, 35, 241—Transformation of glycolide into, 47, 305—Transformation of glyoxal into, 49, 157
 Acid, glycolinic, 10, 307
 Acid, glycuronic, simple test for, 98, 24
 Acid, glyoxylic, 13, 42; 17, 173; 21, 58; 31, 65; 35, 263, 38, 304; 40, 191—Chemistry of, 83, 73, 85—Condensation with ketones, 99, 299—History of, 90, 253
 Acid, graphitic, methods of preparing, 82, 12
 Acid, gummic, and its combinations, 19, 203
 Acid, gymnemic, 59, 159
 Acid, hemipinic, 81, 131
 Acid, heptic, physical properties, 91, 56
 Acid, heptylic, 27, 94, 106—From hexyl-alcohol of heracleum oil, 26, 230
 Acid, hexahydrobenzoic, physical properties, 91, 56
 Acid, hexahydro-oxybenzoic, derivatives, 100, 280
 Acid, hexahydrophenylpropionic, and hexahydrophenylacetylene, 100, 316
 Acid, hexahydropermellitic, 87, 295
 Acid, hexahydroterephthalic, synthesis, 65, 83
 Acid, hexahydro-toluic, 70, 287
 Acid, hexamethylenecarboxylic, 87, 295
 Acid, hexamethylenetetracarboxylic, Cis- and trans- modifications, 87, 295
 Acid, hexylic, preparation of normal, 68, 85
 Acid, hippuric, and acetone, condensation, 99, 296—And benzoic acid, separation in fever, 43, 259—And derivatives, 19, 70; 36, 183—Estimation, 83, 121—In urine, 5, 51—In urine of dogs, 37, 275—In urine of herbivora, 40, 46; 41, 23—Products arising from action of sodium amalgam on, 12, 46—Reaction, 28, 13 Synthesis, 16, 208—Test for, 98, 181
 Acid, homosallantoic, and pyruvic, 84, 231
 Acid, homocamphoric, derivatives, 81, 297
 Acid, homocamphoronic, 80, 9
 Acid, homophthalic, 78, 280
 Acid, homo-protocatechuic, 35, 39
 Acid, homo-vanillic, 35, 39
 Acid, humic, 17, 70; 30, 9; 63, 297—Action on atmospheric nitrogen, 43, 217—Spontaneous oxidation, 65, 61; 66, 173
 Acid, hydnoearpic, constitution, 95, 138
 Acid, hydraerylic, and derivatives, 27, 95
 Acid, hydrazine carbonic, 91, 33
 Acid, hydrazo diacetic, 12, 93
 Acid, hydrazoic, 63, 143; 95, 167—Preparation, 98, 222—Reduction, 88, 266—Synthesis, 92, 70
 Acid, hydric, water viewed as, 2, 326
 Acid, hydriodic, 14, 24; 66, 150—Action, 63, 177, 261—Action of heat on, 16, 12—Action of light on, 36, 62—Action of liquid on ethyl ether, 80, 15—Action of phosphorus on, 42, 329—Action on allyl iodide, 58, 220—Action on hydrocyanic acid, 12, 93—Action on hydrophthalic acid, 24, 22—Action on leucin and tyrosin, 19, 10—Action on mannite and melanpyrin, 12, 93—Action on metallic sulphates, 36, 178—Action on organic chlorides, 19, 203—Action on polyatomic acids, 9, 210—Action on quercitron, 33, 231—Action on sulphurous acid, 82, 28; 83, 83—And chloric acid, interaction, 88, 276—And hydrocyanic acid, compound of, 12, 195, 202—And morphine compounds, 35, 85—And ammonia compounds, 43, 195—And nitric acid, re-

- action between, 87, 150—And persulphate of potassium, reaction between, 88, 171—Behaviour of the iodo-substitution compounds towards, 9, 210—Determination, 66, 38—Dissociation in presence of an excess of one of its elements, 36, 54—Elimination, 94, 255—Etherification, 42, 48—Gaseous, action, 73, 203—Gaseous, preparation, 31, 130—Haloïd compounds of ethylene and propylene with, 22, 209—Influence on oxidation of sulphurous acid, 89, 238—Liberation of iodine from, 99, 218—Phenomena of transposition produced by means of, 78, 35—Preparation, 19, 101, 35, 108; 41, 80—Preparation of an aqueous solution of, 19, 207—Preparation of solutions of, 93, 106—Preparation with amorphous instead of normal phosphorus, 3, 344—Preservation, 19, 132—Reactions, 15, 4; 66, 50—Recognition, 47, 200—Reducing action of, at low temperatures, 32, 156—Reduction of vanadic acid by, 74, 202—Specific gravity of aqueous, 23, 253—Specific gravity, percentage and composition at various temperatures, 21, 286
- Acid, hydrobromic, 48, 83; 61, 216; 63, 225; 73, 221—Action of phosphorus upon, 42, 329—Action of silver on, 84, 94—Action on acetic acid, 35, 29—Action on aromatic nitroso-derivatives, 80, 231—Action on azoxy benzide, 21, 299—Action on citric acid, 24, 73—Action on codeia, 23, 133, 302—Action on dextro-benzylidene camphor, monobromo-benzyl camphor, dextro-benzylidene camphol and phenyloxhomo-camphol acids, 81, 299—Action on mononitronaphthalene, 24, 300—Action on monopersulphuric acid, 87, 95—Action on nitrobenzol, 19, 261—Action on polyatomic acids, 9, 210—Action on triacetin, 90, 328—And hydrocyanic acid compounds, 48, 204—As a reagent for copper, 43, 117—Compounds with acetic acid, 29, 197—Compounds with ammonia, 43, 195—Compounds with morphine, 35, 85—Etherification, 42, 35—Influence on velocity of reaction of bromine on trimethylene, 82, 94—Laboratory process for, 64, 215—Precipitation of barium bromide by, 92, 102—Preparation, 6, 279; 41, 80; 47, 166; 49, 201; 50, 34; 61, 216; 81, 152—Preparation of gaseous, 33, 43—Preparation of hydrated, 21, 286—Preparation with amorphous instead of normal phosphorus, 3, 344—Production, 54, 25—Recognition, 70, 4, 148—Reduction of vanadic acid by, 74, 202—Specific gravity of aqueous, 23, 242—Specific gravity, percentage, and composition at various temperatures, 21, 286**
- Acid, hydrochloric, 22, 227; 32, 83; 46, 233; 57, 70, 220; 58, 232; 60, 121; 72, 221—Action of aqueous on bismuthous oxide, 39, 183—Action of cyanogen on, 19, 84—Action of dry, 72, 126—Action of dry gaseous on sulphates, 39, 74—Action of dry on silver, 80, 304—Action of gaseous, 70, 197—Action of gaseous on iron, 53, 130—Action on aceto-benzoic anhydride, 50, 61—Action on alkaline sulphites, 75, 35—Action on aromatic nitroso-derivatives, 80, 231—Action on chemical compounds, 37, 215—Action on codeia, 19, 302; 27, 129, 287—Action on lead, 50, 120—Action on lead chloride, 42, 204; 43, 195—Action on manganese dioxide, 39, 225; 96, 311—Action on metallic chlorides, 43, 94—Action on metallic sulphates, 36, 178—Action on nitrates, 76, 23—Action on monopersulphuric acid, 87, 95—Action on nitrobenzol, 19, 261; 21, 34—Action on organic amides, 43, 188—Action on osseine, 21, 274—Action on platinum and gold, 90, 10—Action on resorcin, 36, 80—Action on salts of sulphuric acid, 39, 84—Action on solubility of chlorides, 55, 128—Action on stannous sulphide, 48, 34—Action on sucrose, 71, 215—Action on the sulphates of aluminium, chromium, and iron sesquioxides, 86, 95; 87, 74—Action on trimetin, 90, 328—Action which vapours of exert on mercury, 11, 92—Addition to isobutylene oxide, 93, 153—Affinity of alkaloïds for, 98, 272—And alcohol, behaviour of ethylene cyanide and hydrocyanic acid with, 48, 214—And aluminium chloride, products of action of on benzene, 97, 239—And ammonia, combinations, 39, 162—And chlorine, 67, 240—And chlorine, methods of producing, 60, 221—And chloro-aluminic ferments, compounds, 91, 211—And ethyl alcohol, reaction between, 82, 205—And hydrocyanic acid, compounds, 48, 204—And hydrofluoric acid, equilibria between, 49, 167—And native peroxide of manganese, purification of manganic chloride obtained from residues of chlorine with, 35, 196—And oxygen, action of a mixture of on metals, 89, 33—And oxygen, chlorating properties of a mixture of, 86, 35—And potassium permanganate, interaction in presence of ferric chloride, 93, 59—And snow, congelation of mercury by mixture of, 33, 86—And terpenes, compounds, 39, 256—And water, simultaneous synthesis of, 60, 246—And zinc chloride, compounds, 53, 262—Arsenic in, 2, 107; 22, 214—At a high temperature, reactions between oxy-salts and sulphide of carbon, sulphuretted hydrogen, and, 14, 142—Behaviour of acrolein towards, 11, 237—Behaviour of arsenic acid with, 24, 35—Chlorine from, 23, 71—Conversion of chlorine into, 73, 197—Cure for consumption, 2, 59—Decomposition of compounds of aromatic series by, 32, 61—Decomposition of metallic sulphides with, 30, 65—Decomposition of silver fulminates by, 50, 256—Density, 25, 178—Detection, 41, 176; 69, 288, 293—Detection in cases of poisoning with that acid, 24, 252—Determining, 47, 218; 59, 145; 62, 166; 66, 38; 68, 66, 174—Determining amount condensed during decomposition of common salt in alkali works, 8, 269, 293—Dry, 72, 126; 39, 74—Electrolysis, 19, 289; 46, 208; 77, 213—Equilibrium of, 100, 220—Etherification, 42, 46—Etherification by means of, 20, 23; 37, 7—Filter-paper washed with, 47, 248—For alkalimetry, 23, 107—Free, 18, 237—Free, detection on admixture with chlorides, 36, 166—Free, detection in a solution of ferric chloride, 41, 196—Free, determination, 61, 38; 63, 249—Free, estimation, 18, 237, 250—Free, examination for, in gastric liquid, 74, 99—Free from arsenic, preparation, 7, 76; 20, 180—Free, in gastric juice, 19, 229; 84, 243—Free, reagent for, 59, 145—Gaseous, action of, 70, 197—Heat set free by action of oxygen upon, 23, 99, 180—Hydrogen sulphide and the salts of antimony, reciprocal action between, 53, 160—Iceland spar method for standardisation, 87, 5—Impurities in, 51, 83; 54, 84—In gastric liquid, 74, 99—In solution of ferric chloride, detection, 41, 196—Influence in titrations by sodium thiosulphate, 80, 27—Influence of neutral salts on, 54, 298—Manufacture, 6, 141; 73, 258—New crystalline hydrate of, 33, 42—Physical constants of liquid, 41, 75—Poisoning by, 1, 96—Preparation, 5, 41; 20, 197; 22, 227; 26, 216; 46, 184; 50, 174, 188—Preparing tenth-normal, fifth-normal, etc., 83, 306—Purification, 27, 256—Purification from arsenic, 85, 261—Purification of commercial arseniferous, 11, 73—Reactions of soda and potash with, 3, 31—Recognition, 47, 209—Reducing action on nitrated bodies, 11, 118—Reduction of vanadic acid by action of, 87, 133—Selenium in, 48, 193—Separation of aluminium by, 78, 53—Separation of aluminium and glucinum by, 85, 156—Separation of metals precipitated by, 51, 97—Solubility of boric acid with, 83, 210—Solubility of copper in, 14, 34—Solubility of ether in aqueous, 35, 87—Solubility of silicofluoride of potassium in, 19, 180—Solubility of stannic oxide in, 40, 25—Solubility of sulphate of lead in, 5, 52—Solubility of sulphide of antimony in, 3, 114—Solubility of xanthin (uric oxide) in dilute, 17, 175—Solutions, 94, 222—Solutions, preparing standard, 100, 167—Thallium in, 7, 194—Treating poor lead ores by, 10, 264—Volumetric analysis, 20, 71—Yellow, 48, 94, 169, 236**
- Acid, hydrocinnamic, synthesis, 19, 251; 23, 23**
- Acid, hydrocyanic, 23, 262**
- Acid, hydrocyanic, 9, 238, 248; 10, 291; 37, 174; 59, 228; 87, 185—Action of bichloride of mercury on, 11, 6—Action of dilute, on aldol, 50, 187—Action of haloïd acids on, 45, 161—Action of hydriodic acid on, 12, 93—Action on aldehyde ammonia, 95, 36—Action on aldol, 50, 187—Action on amines, 41, 123—Action on ammonium aldehyde and analogous combinations, 89, 22—Action on cepic ether, 82, 183—Action on diazo-compounds, 40, 301—Action on chloral and croton-chloral, 33, 18—And cyanides, formation-heat of, 42, 83—And ethylene cyanide, behaviour with hydrochloric acid and alcohol, 48, 214—And hydriodic acid, compound of, 12, 195, 202—Cause of spontaneous alteration of anhydrous, 34, 92—Chemico-legal detection of, 50, 60—Compounds with hydrochloric and hydrobromic acids, 48, 204—Constitution, 85, 66—Cryoscopic experiments in, 91, 201—Detection, 19, 157, 180; 57, 231—Detection in chemico-legal investigations, 48, 109—Determination, 47, 218; 68, 66; 70, 292; 88, 239—Evolution from nitro- and dinitro-benzol and similar compounds, 25, 287—Fixation by benzoyl acrylic acid, 97, 276—Formation, 20, 34; 68, 75; 81, 83; 99, 118—Formation heat of, 42, 83—Formation in electric arc, 39, 282—From bitter Cassava root, 10, 236—Generation, 26, 216—Hydrates, 19, 273—In plants, 78, 60—In tobacco smoke, 1, 209—New body with same composition as, 27, 117—Poisoning with, 21, 130—Preparation, 13, 216—Preparation of pure anhydrous, 73, 71—Preservation, 25, 286—Recognition, 47, 209—Sensitiveness of reactions for, 38, 275—Series of bodies homologous to, 16, 209, 308, 319—Solvent and dissociating properties of liquid, 87, 82—Spontaneous decomposition of, 42, 73—Sulphuretted derivatives of, 30, 145—Various properties of, 46, 23**
- Acid, hydro-ferro-cyanic, 43, 178; 50, 309; 82, 241—Action on amines, 41, 123—And organic bodies, compounds, 88, 50—Compounds of amine bases of, 37, 63—Compounds with ether and acetone, heat of formation, 88, 70—Heat of neutralisation, 88, 70**
- Acid, hydrofluoric, 19, 74; 26, 47, 205; 61, 205; 63, 11, 284; 72, 278; 74, 36, 45—Action of monopersulphuric acid on, 87, 95—Action on glass, 80, 291—Action on nitrogen tetrasul-**

- phide, 91, 223—Action on silica and silicates, 54, 102—And fluorides, preservation of, 49, 201—And hydrochloric acid, equilibrium between, 49, 167—And other acids, reciprocal displacement between, 49, 167—Antidote for, 8, 17—Bottles of lead for, 67, 216—Decomposition, 54, 80—Engraving on glass with, 16, 82—Estimation of free, 24, 85—Etching with, 92, 295—Etherification, 68, 318—Filter-paper washed with, 47, 248—For detection and estimation of silica, 11, 194—In aqueous solutions, 22, 83—In gastric liquid, 74, 99—Molecular weight, 44, 164—Purification, 60, 252—Solution in water, 47, 305; 48, 59—Use for decomposition of natural and factitious silicates, 30, 191—Volatilisation of silica with, 80, 292—Volume composition, 81, 144—Wounds, treatment, 44, 92
- Acid, hydro-fluosilicic, 4, 255; 22, 179—Analysis, 94, 291—Crystalline, 42, 13—Reaction of ethyl bases with, 5, 143—Titration, 94, 241
- Acid, hydronitric, 77, 181—And the inorganic trinitrides, 90, 272, 287, 298, 311, 321—Anhydrous, electrolysis of a solution of potassium trinitride in, 99, 254, 290—Preparation from sodium trinitride, 90, 312
- Acid, hydroparacoumaric, 90, 225—And phloretic acid, identity of, 82, 58—Synthesis, 19, 261
- Acid, hydrophthalic, 16, 84—Action of hydriodic acid on, 24, 22
- Acid, hydropiperic, 4, 315
- Acid, hydroselenic, and hydrosulphuric acid, heat of combination of, 20, 23—Decomposition by mercury, 40, 240—Formation heat, 54, 80
- Acid, hydrosulphocyanic, compounds isomeric with, 20, 202—Determination, 61, 37; 68, 66—Transition of sulphide of carbon into, 31, 269
- Acid, hydrosulphuric, action on perchloride of iron, 1, 84—Action on pyridine, 82, 35—And hydroselenic acid, heat of combination of, 20, 27—Apparatus, 52, 178—Basicity and rational formulæ of, 21, 203—Behaviour of iodine towards, 20, 166—Estimation in mineral waters, 28, 123—Preparation, 24, 162—Synthesis, 21, 46
- Acid, hydrosulphurous, 24, 133; 44, 143; 82, 231—Decolouration of indigo by, 34, 250
- Acid, hydroxybutyric, resolution into optically active components, 86, 23
- Acid, hydroxycamphorcarboxylic, 83, 104
- Acid, hydroxydibromocamphorsulphonic, 78, 20
- Acid, hydroxydimethylglutaric, synthesis, 86, 289
- Acid, hydroxylauric, 90, 35
- Acid, hydroxyl-caprylic, 30, 84
- Acid, 5-hydroxy-meta-toluic, reduction, 100, 265
- Acid, 4-hydroxy-ortho-toluic, reduction, 100, 265
- Acid, 6-hydroxy-ortho-toluic, reduction, 100, 265
- Acid, hydroxystearic, 89, 294
- Acid, hydroxy- α -trimethylglutaric, B-synthesis of the cis- and trans-modifications of, 87, 295
- Acid, hydruilic, functions, 66, 297
- Acid, hyperiodic, 27, 117
- Acid, hyperuranic, 88, 245
- Acid, hypertungstic, 88, 245
- Acid, hypervanadic, 88, 245
- Acid, hypobromic, action on acetylene, 81, 300
- Acid, hypobromous, 1, 38; 6, 248, 253—Action on acetylene, 81, 300—Action on piperazine, 91, 278—Transformation of dibromethylen into a keton with four atoms of carbon by means of, 39, 73
- Acid, hypochloric, as oxidiser and solvent, 4, 57—Behaviour with brucine and its salts, 21, 167
- Acid, hypo-chloro-nitric, 44, 48
- Acid, hypochlorous, action on acetylene, 81, 300—Action on butylen, 20, 118, 165—Action on chinoline derivatives, 53, 119—Action on essence of turpentine and camphor, 17, 9—Action on metallic chlorides, 86, 179—Action on mixture of iodine and anhydrous acetic acid, 20, 118—Addition to propylene, 85, 264—And chloride of allyl, 22, 36—Combination of allylic compounds with, 21, 202—In chlorine water, 67, 85—Preparing, 94, 194—Products of addition of to non-saturated compounds, 33, 251
- Acid, hypogaecic, 16, 218
- Acid, hypogallic, 21, 132, 252
- Acid, hypodious, 16, 298; 75, 97; 76, 17, 27; 85, 163—Action of nascent upon acids of formula $RCH=CH \cdot CH_2 \cdot CO_2H$, 97, 119, 179—Fixation, 94, 255—In nascent state, action on acids containing the ethylenic function, 94, 170
- Acid, hyponitric, 3, 158; 12, 20
- Acid, hyponitric, 24, 157; 44, 48, 83
- Absorption spectrum of fluid, 22, 240
- Behaviour of vapours of, 21, 167
- Behaviour with sulphuric acid, 45, 276—Conversion into nitric acid, 24, 108—Determination in a gaseous mixture, 47, 155—Obtaining from nitrate of soda, 9, 47
- Acid, hyponitrous, 36, 213; 52, 321; 75, 232, 244, 255, 268; 76, 118—Decomposition, 97, 82—Decomposition in presence of mineral acids, 96, 20
- Acid, hypophosphoric, 36, 121; 45, 152; 46, 114; 52, 292; 53, 93, 264—Decomposition products, 53, 262—Ethers, 53, 191—Hydrates of, 53, 66—Molecular weight, 94, 242—Molecular weight and hydrate of, 98, 222—Salts, 65, 287—Use in agriculture, 21, 59
- Acid, hypo-phosphorous, 2, 175; 30, 207; 59, 37—Action of air on, 19, 191—Action on acetone, 84, 81—Action on diazoic compounds, 87, 96—Action on diethylketone and acetophenone, 88, 84—And iodine velocity and mechanism of reaction between, 96, 241—And its salts, 38, 234—Catalytic oxidation by copper, 99, 168—Derivatives, phosphorous, 90, 57—Oxidation, 61, 216—Precipitation of copper by, 17, 160—Preparation of, 2, 175, 186—Preparation and properties, 89, 297—Reducing power of, 26, 285
- Acid, hyposulphuric, basicity, 51, 284
- Acid, hyposulphurous, 11, 53; 19, 253—In urine, detection, 57, 71—Estimation, 81, 40—Production and stability, 88, 70
- Acid, hypovanadic, compounds with oxygenated acids, 96, 12—Double sulphites of, 95, 298—Isomeric modification of hydrated, 97, 179—Preparing hydrated, 94, 290
- Acid, ilmenic, in Greenland columbite, 14, 33
- Acid, ilmenium, and niobium acid, separation, 22, 166
- Acid, imido-sulphonic, 33, 260
- Acid, iminothiocarbamic, acyl- β -derivatives of, 95, 236
- Acid, indoxylie, 99, 236
- Acid, infracampholenic, 82, 312
- Acid, isohydric, action on leucin and tyrosin, 19, 10—Preparation, 17, 57
- Acid, iodic, 21, 154, 214, 250; 35, 196—Action of acetylene on anhydrous, 93, 44—Action of pyrogallie acid on, 28, 81—Action of reducing agents on, 70, 163—Action of sulphonic acid and iodine on, 74, 293—Action on uric acid, 83, 181—And iodine, determination of combined, 66, 224—Anhydrous crystallisation, 59, 313—Application, to analysis of iodides, 75, 196—Basicity and constitution, 29, 165—Behaviour of sulphurous acid to, 4, 83—Combinations with other acids, 74, 84—Detection in nitric acid, 72, 37—Detection in presence of chloric, bromic, perchloric, and periodic acids, 82, 226—In nitrate of soda, estimation, 81, 75—In iodised flames, formation, 31, 207—Non-production of ozone in crystallisation of, 40, 257—Preparation, 2, 47; 18, 73; 83, 57—Oxidation phenomena produced by, 97, 299—Properties, 22, 251—Recognition, 47, 209—Specific gravity and volume of, 29, 155—Test for morphia, 8, 267—Titration of sodium thiosulphate with, 76, 178; 77, 213
- Acid, iodoanisic, substitution and formation, 1, 204
- Acid, iodo-benzoic, substitution and formation, 1, 204
- Acid, iodo-benzol parasulphuric, 27, 70
- Acid, iodo-butyric, 53, 119
- Acid, iodo-propionic, 29, 298—Action of ammonia on, 22, 287
- Acid, iodo-salicylic, 46, 219
- Acid, iodotolulylic, substitution and formation, 1, 204
- Acid, iodous, formation by action of ozone upon iodine, 36, 256
- Acid, ipomeic, 29, 259
- Acid, isanic, 74, 49
- Acid, isatic, 51, 190—Chinolin derivatives, 53, 131
- Acid, isatinic, constitution, 21, 95
- Acid, isatoic, and derivatives, 53, 143
- Acid, isethionic, 16, 292; 22, 153, 312—Synthesis of, 18, 31; 19, 10
- Acid, isomylmalonic, thermic constants of, 78, 328
- Acid, iso-anthraflavic, 34, 173
- Acid, isobutyric, 23, 94—Action on aniline, 54, 8—From citra-bibromopyrotartaric acid, 26, 23—Transformation of normal butyric acid into, 33, 261
- Acid, isocamphoronic, constitution, 80, 239—Synthesis, 82, 314
- Acid, isocitric, 19, 287
- Acid, isolauroic, 75, 179—And isolauroic, 93, 280—Constitution, 81, 101
- Acid, isolauronic, 78, 250; 79, 119; 81, 141—Synthesis, 87, 149
- Acid, isomalic, 36, 153; 44, 227
- Acid, isomeric, $C_7H_7O_3$, products of iodisation, 25, 287
- Acid, isononylic, 30, 229
- Acid, isophthalic, 21, 191—Absorption spectra, 95, 92—Conversion of bromobenzoic acid into, 23, 227—Derivatives of, 46, 172—Reduction, 91, 291
- Acid, isopropylglutaric, 74, 107; 79, 223
- Acid, isopropylsulphonic, 26, 94
- Acid, isopurpuric, and salts as dye materials, 26, 130
- Acid, isopyromucic, 81, 95; 84, 72; 86, 24; 99, 108—Action of pentachloride of phosphorus on, 88, 281—Acyl derivatives of, 86, 36—Ethers of, 89, 22
- Acid, isopyrotartaric, 82, 231
- Acid, iso-succinic, 35, 194—Synthesis, 40, 204
- Acid, iso-uric, 29, 37
- Acid, itaconic, and its isomers, derivatives by addition to, 25, 119—Electrolysis, 24, 313; 27, 35—Non-saturated acid isomeric with, 48, 214
- Acid, α -keto-adipic, 99, 294
- Acid, keto-hexahydrobenzoic, 89, 141
- Acid, keto-lactonic, 76, 251
- Acid, ketonic, 72, 235—Conversion of acetyl cyanide into, 39, 10—Optically active esters of, 86, 12, 20
- Acid, ketopinic, 74, 354; 75, 162; 76, 78
- Acid, keto-tartric, 85, 155
- Acid, komanic, action of hydroxylamine and ethylamine on, 50, 117
- Acid, komenaminic, product of action of phosphorus pentachloride upon, 50, 69

- Acid, kromenic, 45, 12
 Acid, krosatonic, 27, 28; Preparation from xylol, 21, 24
 Acid, kryptophanic, 21, 115
 Acid, kynuric, sensitive reaction for, 49, 225
 Acid, lactic, 2, 287; 3, 70; 10, 208; 22, 264; 23, 282, 283; 47, 247; 56, 28; 80, 318; 83, 240—Action of galvanic current on, 1, 274—Anhydrides of, 23, 71; 26, 228—Conversion into dichloroacetone, 24, 145—Decomposition, 19, 10—Destructive distillation of, 19, 251—Dilactide of inactive, 91, 143—Formation by action of caustic potash on pentoses, 88, 180—In beer, 24, 120; 75, 180—In chromates, 47, 80—In lapa series, 6, 115—Industrial production, 64, 62—Influence of acidic oxides on specific rotation of, 85, 225—Influence of molybdenum and tungsten trioxides on specific rotations of, 87, 81—Modifications, 20, 285—Molecular constitution, 3, 81—Of allyl series, 29, 264—Of fermentation, decomposing, 90, 70—Optically active, ethereal salt of, 73, 229—Resolution of, 66, 33; 68, 253—Resolution by morphine, 93, 289—Synthesis of anhydrous, 20, 60—Transformation into propionic acid, 1, 264; 26, 59—Transition from propionic acid to, 4, 290; 70, 293
 Acid, l-lactic, asymmetric synthesis, 92, 236
 Acid, lactic, basicity of, 23, 287—Conversion into lactones, 51, 250
 Acid, α -lactonic, from acetone and malonic acid, 97, 94
 Acid, lactylactylactic, 91, 143
 Acid, laurocamphoric, 99, 95
 Acid, laevo-lactic, 93, 153—Dilactide of, 93, 176
 Acid, laevo-tartaric, preparation of, 47, 174
 Acid, laevulinic, 64, 261
 Acid, lauric, 23, 299
 Acid, lapachic, 61, 5, 6; 65, 309
 Acid, lapacic, 41, 36
 Acid, lactic, 6, 112
 Acid, lauric, derivatives, 90, 35
 Acid, lauronic, 77, 198, 210
 Acid, leucic, 4, 287; 7, 44—And its salts, 5, 42—Nitrile, 31, 31—Synthesis, 9, 137
 Acid, leucinic, nitrile, 3, 176
 Acid, levulic, 75, 190—Acids formed from, 56, 22—Derivatives, 52, 177—Formed during action of sulphuric acid on sugar, 31, 109—Synthesis, 81, 23—Volatility, 74, 121
 Acid, levulinic, 44, 61
 Acid, maleic, and fumaric acid, relations between, 35, 164—And maleic acid, action of bromine on water, salts of, 28, 246, 260—From bibromopropionic acid, 41, 252—Transformation of succinic acid into, 28, 58, 277, 299
 Acid, malonic, 21, 239
 Acid, malic, action, 62, 38—Active, 33, 65—And citric and tartaric acids, distinction between, 57, 230—And succinic acid, separation, 66, 261
 Chemical constitution, 28, 75, 87, 101—Chromic acid as a reagent for, 36, 117—Compounds homologous with, 21, 274; 22, 107—Determination, 47, 60; 64, 225; 68, 286—Estimation, 18, 64—Ethereal salts of optically active, 73, 229—From bibromopropionic acid, 41, 252—In mountain ash berries, 46, 68—Inversion of direction of rotation of ordinary, 43, 45—Manganese oxidation, 81, 35—Neutralisation heat, 54, 273, 297—Optical properties, 53, 294, 304—Optical rotatory power, 44, 83—Splitting up of inactive, 42, 109—Titration with potassium permanganate, 44, 66—Transformation of cane-sugar into, 4, 291—Water salts of, action of bromine on, 28, 246, 260
 Acid, malonic, 30, 21; 39, 27; Action of fatty aldehydes on, 47, 294—Action of mustard oils on ethyl esters of, 97, 129—And acetone, α -lactonic acid from, 97, 94—Electrolysis, 41, 183; 42, 166—Methylamide of, 79, 263—Neutralisation heat, 54, 273—Neutralisation, 58, 72—Peculiar reaction, 58, 49—Preparation, 42, 13—Reactions of indones and quinones with derivatives of, 80, 48—Series, 72, 254
 Acid, l-mandelic, asymmetric synthesis of, 99, 206
 Acid, r-mandelic esterification by menthol and borneol, 89, 116—Resolution into its optically active isomerides, 96, 208
 Acid, manganic, 30, 145—Estimation in presence of manganous salts, 83, 4
 Acid, manganous, capacity of saturation of, 35, 65; 36, 154—Functions, 67, 265
 Acid, meconic, 47, 129—Action of phosphorus pentachloride on, 52, 308—Chemical reactions, 2, 158, 170—Double salts of, 42, 75—Group, compounds, 44, 122—Neutralisation heat, 54, 322; 55, 225—Nitrogenous derivatives, 47, 305
 Acid, melanurenic, 52, 214
 Acid, mellitic, 16, 266; 19, 73
 Acid, mellic, neutralisation heat, 55, 225
 Acid, mellithic, 27, 209
 Acid, mellitic, 15, 227; 20, 322; 35, 164—Condensation products of with resorcinol, 94, 227, 265—Neutralisation heat, 54, 322—Rhodamines of, 98, 253
 Acid, menaphthoxylic, and its derivatives, 18, 189
 Acid, menthane 1,8-dicarboxylic, 96, 107
 Acid, mercurio-monomethyl acetic, 22, 35
 Acid, mesaconic, and citraconic acid, relations between, 35, 164
 Acid, mesocamphoric, 59, 277—Basicity, 25, 46
 Acid, meso-hydromellitic, 21, 190
 Acid, mesoxalic, 26, 94, 180—Decomposition, 43, 82—Decomposition by hydrogen sulphide, 41, 48—Synthesis, 70, 73
 Acid, meta-amido-benzoic, more complicated amidic acids derived from, 53, 264
 Acid, meta-amido-cinnamic, 41, 36
 Acid, meta-amido-para-sulpho-toluolic, 30, 166
 Acid, meta-benz-bioxy-anthraflavic, from meta-oxy-benzoic acid, 38, 60
 Acid, metachlororothoxybenzoic, conversion of benzoic acid into, 27, 168
 Acid, meta-chlor-salicylic, products obtained by nitrising, 41, 219
 Acid, meta-ditolyl-tartaric, methylic and ethylic salts of, 74, 105
 Acid, meta-isocymol-sulph-, action of bromine and water on, 54, 226
 Acid, metamidobenzoic, action of chloroform and potash on, 74, 254
 Acid, metanitrobenzoic, formation, 27, 83—Separation of thorium from cerium, lanthanum, and didymium by, 90, 196, 201
 Acid, metanitrocinnamic syntheses, 39, 84
 Acid, meta-nitro-cumenyl-acrylic, 54, 109
 Acid, meta-oxy-benzoic, meta-benz-bioxy-anthraflavic acid from, 38, 60
 Acid, metaphosphoric, 59, 229—Examination, 87, 46—Hydration, 75, 263—Speed of transformation, 57, 51
 Acid, meta-tannic, 25, 128, 170
 Acid, metatitanic, 64, 302
 Acid, metatolyllic, 26, 300; 28, 205
 Acid, metatungstic, 59, 312
 Acid, metavanadic, 27, 92
 Acid, metaxylidine-sulphonic, 83, 46
 Acid, α -metaxylolsulphonic, bromated, 38, 141
 Acid, methacrylic, 46, 124
 Acid, methane disulphonic, formation during reaction of fuming sulphuric acid on acetylene, 79, 263
 Acid, methane trisulphonic, 78, 264
 Acid, methazonic, derivatives, 35, 84—Reactions and constitutions, 82, 251
 Acid, methintrisulphonic, 19, 275
 Acid, methoxybenzoic, 16, 84; 24, 34
 Acid, methoxyhydratropic, obtained by oxidation of anethol, 82, 58
 Acid, methoxy-propionic, rotatory powers of optically active, 79, 153
 Acid, methoxy-succinic, optically active, 72, 253—Resolution of, 67, 35
 Acid, methyladipic, rotatory power of ethers of, 71, 173
 Acid, methyl-alcohol-trisulphonic, 25, 202
 Acid, methylarsinic, action on antimony trichloride, 100, 72
 Acid, methyl-benzoylpropionic, synthesis, 82, 291
 Acid, methylbenzylacetic, optically active, 85, 104—Resolution into its optical isomerides, 85, 104
 Acid, methyl-crotonic, 36, 254; 40, 33
 Acid, 1-methylcyclohexan-2-ol-carboxylic, cis- and trans-modifications of, and their conversion into 1-methyl- Δ -cyclohexene-4-carboxylic acid, 98, 230
 Acid, 1-methylcyclohexylidene-4-acetic, 93, 207; 100, 253—Synthesis of, 97, 307; 98, 268
 Acid, methylene-3,4-dioxyhydratropic, 85, 203
 Acid, methylethylhydracrylic, aa, 91, 33
 Acid, methyl-ethyl-succinic, asymmetric, 78, 84
 Acid, methyl hydantoinic, 29, 155, 264
 Acid, β methylglutaconic, formation, 92, 257
 Acid, δ -a-methylglyceric, conversion of δ -a methylisoserine into, 99, 176
 Acid, methylisoamylsuccinic, 80, 10; 82, 44
 Acid, methyl-isobutyl-acetic, 71, 146
 Acid, methyl-isobutylglutamic, 82, 44
 Acid, methyl-isopropyladipic, combinations, preparation, 87, 130—Identical with dihydrocamphoric acid, preparation, 86, 24
 Acid, methyl-mercaptan-disulphonic, 25, 202
 Acid, methyl-mercaptan-trisulphonic, 25, 202
 Acid, methyl-mercaptan-thionio, formation, 23, 287
 Acid, methyl-oxybutyric, normal, and its derivatives, 37, 228
 Acid, methyl-oxy-succinic, 40, 238
 Acid, methyl-pyrogallic, 40, 253
 Acid, methyl-salicylic, 16, 84; 70, 258
 Acid, methyl-stannoxylic, 87, 253
 Acid, methyl-succinic, acid esters of, 89, 177
 Acid, methyl-sulphonic, derivatives of, 51, 73
 Acid, δ -methyluric, 78, 84
 Acid, molybdic, 3, 223; 19, 214; 21, 191; 58, 86; 85, 228; 88, 173—And arsenic acid, compounds, 30, 20—And phosphoric acid, combinations, 17, 183—And phosphoric acid, separation, 28, 315—And vanadic acid, determination in presence of one another, 97, 245—As a colour reagent, 65, 302—As a reagent for alcohol, 73, 149—Basicity, 23, 131—Behaviour in the zinc reductor, 97, 113—Blue solution of, 38, 22—Coloration of turmeric by, 2, 192—Colour reactions of, 89, 106—Complex acids formed by, 68, 306—Concentrated sulphuric acid a test for, 21, 166—Detection, 38, 22—Determination, 32, 259; 58, 61 72, 293—Determination as plumbic molybdate, 24, 175—Estimation by reduction by means of hydriodic acid, 87, 170—Formula, 17, 211—From residues of phosphoric acid estimation, 21, 166—Hydrate of, 46, 254; 57, 121; 91, 75—Reaction of, 70, 107—Reaction of oxygenated water, 65, 132—Test for alcohol, 50, 200—Test for morphia, 19, 180—Utilisation of liquids containing, from residues of phosphoric acid es-

- timation, 21, 166—With phosphoric acid, 17, 183—Yellow modification of, 96, 262
- Acid, molybdisulphuric, reduction by alcohol, 83, 166
- Acid, mono-alkyl-oxy-succinic, production of optically active from malic and tartaric acids, 79, 55
- Acid, monobasic, formation of anhydrides of, 50, 271
- Acid, monobromacetic, 20, 323 — Action on aniline, 12, 228
- Acid monobromacrylic, 27, 174 — Obtained from dibromo-propionic acid, 27, 305
- Acid, mono-bromo-benzoic, 19, 214
- Acid, monobromobenzosulpho, 20, 201
- Acid, monobromogallic, 67, 301
- Acid, mono-bromophthalic, 53, 55
- Acid, monobromopseudo-cumolic, 46, 281
- Acid, mono-chloracrylic, 36, 254
- Acid, mono-chloroacetic, origin and properties, 24, 264
- Acid, mono-chloridiparaconic, 75, 259
- Acid, mono-chloroacetic action of KNSC on derivatives of, 36, 53
- Action on sulphocyanates of aromatic monamines, 36, 224 — Action on sulphyroxyanic acid and its salts, 36, 224; 39, 206 — Behaviour with methyl guanidin, 24, 275 — Butylic, ethers of, 54, 205
- Acid, mono-chloroacetic, 24, 133 — From croton-chloral, 25, 311; 28, 156 — And its salts, 20, 23
- Acid, mono-chloroacetic, 22, 299 — From glyceric acid, 40, 24
- Acid, mono-chlorosulphonethanoic, 87, 35
- Acid, monochlorosulphuric, 27, 196
- Acid, mono-ethylphosphoric, 69, 301
- Acid, mono-nitronaphthoe, reduction, 27, 22
- Acid, mono-persulphuric, action of hydrochloric, hydrobromic, and hydrofluoric acids on, 87, 95
- Acid mono-sodic orthophosphate, 85, 191
- Acid, mono-sulpho-lactic, 29, 41
- Acid, monoxystearic, transformation of oleic acid into, 75, 149
- Acid, moringie, identity with oleic acid, 30, 207
- Acid, morrhua, 58, 256
- Acid, muic, 27, 107; 61, 189; 62, 258 — Derivatives, 10, 259; 26, 241, 288; 45, 88; 57, 161 — Emetics of, 48, 12; 49, 82 — Formation of adipic acid from, 20, 179 — Oxidation in presence of iron, 99, 307 — Products of fermentation, 1, 275
- Acid, muconic, 22, 130
- Acid, myristic, derivatives, 42, 84
- Acid, myronic, in oil-cake, 46, 184 — In seeds of Cruciferae, 47, 259 — Nitrogenous derivatives, 47, 305
- Acid, naphthalene-sulphonic, bromination, 56, 207 — Nitration, 59, 94 — Sulphonation, 59, 60
- Acid, naphthalic, 24, 277, 289; 27, 94, 167
- Acid, naphthalincarboxylic, preparation, 20, 82 — Synthesis, 20, 202; 22, 16
- Acid, naphthoic, 48, 238 — Preparation, 22, 14, 154 — Synthesis, 87, 121
- Acid, naphtholsulphonic, 72, 109
- Acid, naphtho-picric, 39, 42; 80, 11
- Acid, naphthylbenzoic, derivatives, 93, 20
- Acid, naphthylaminesulphonic, 73, 54 — 52, 260
- Acid, naphthylaminic-sulpho, 74, 293
- Acid, naphthyl-purpuric, 23, 142
- Acid, naphthyl-sulphurous, nitrated, 38, 10
- Acid, naphtholic sulpho, 74, 293
- Acid, nicotinic, transformation into amidopyridine, 80, 12
- Acid, nicotinic, 40, 34; 54, 285
- Acid, niobic, and titanio acid, separation, 17, 121 — Estimation, 17, 119
- Acid, niobium, and ilmenium acid, separation, 22, 166
- Acid, nitracetic, formation of glycochol by, 40, 56
- Acid, nitramido-benzoic, 36, 231
- Acid, nitranilic, 37, 174
- Acid, nitranissic, action of ammonia upon, 26, 94
- Acid, nitric, 4, 157; 21, 190; 24, 134, 146, 158; 38, 19; 65, 37; 98, 96 — Absorption spectra, 87, 200 — Action, 55, 188; 56, 140; 58, 263; 59, 92; 60, 13; 61, 216; 63, 210, 295; 65, 136, 165; 66, 288; 71, 293, 305 — Action of copper-zinc alloys on, 81, 239 — Action of diphenylamine on, 91, 190 — Action of light on, 29, 268 — Action of micro-organisms on, 57, 89 — Action of reducing agents on, 14, 298 — Action of sodium on, 20, 11 — Action of solar rays on, 52, 272 — Action of stannous chloride on, 52, 87 — Action on anthracene, 85, 167 — Action on asphalt and cellulose, 65, 136 — Action on azotoluide, 21, 299 — Action on bromophenolic compounds, 86, 264 — Action on charcoal, 25, 77 — Action on chromate of lead, 27, 319 — Action on copper, mercury, etc., in presence of metallic nitrates, 31, 276 — Action on dichlorophenol-sulphuric acid, 23, 249 — Action on diparatdyl-guanidin, 41, 290 — Action on ethers of aromatic hydroxyaldehydes, 99, 295 — Action on hydrocarbons, 3, 155 — Action on ligno-celluloses, 71, 226 — Action on metals, 43, 284; 44, 23, 59, 205 — Action on methyl-dimethyl-aceto-acetate, 84, 276 — Action on nitrates, 75, 143; 76, 23 — Action on normal butyl sulphide, 31, 163 — Action on oleic and elaidic acids, 80, 252 — Action on paraffin, 30, 156 — Action on phosphates and arsenates of baryta and lead, 33, 33 — Action on picramic acid, 5, 18; 17, 129 — Action on pyrophosphate of magnesia, 6, 206 — Action on saturated carbides, 81, 287 — Action on tin, 78, 320 — Action on toluidine, 22, 155 — Action on toluene-nitro-sulphamide-1.2.4, 85, 275 — Action on tribromated guaiacol, 82, 304 — Action on tribromo-phenol, 32, 298 — Action on trichlorated and tribromated veratrols, 85, 107 — Action on trichloroguaiacol, 82, 59 — Action on trichlorised guaiacol, 82, 182 — Action on triphenylmethane, 76, 192 — Action on urethane, 35, 185 — Action on vegetable fibres, 91, 105 — Action on zinc, 52, 7 — And acetic acid, combination, 87, 119 — And alcohol, electrolysis of mixture of, 2, 144 — And ammonia, series of bodies between, 12, 136 — And chlorate of potassium as an oxidising mixture, 20, 213; 21, 195 — And chlorinated phenols, behaviour of, 23, 179 — And copper, interaction in presence of metallic nitrates, 97, 306 — And copper, reactions between, 59, 303 — And ethers, compounds, 90, 265 — And ethylene, compound of, 20, 131 — And hydriodic acid, reaction between, 87, 150 — And hydrogen, action between, 78, 243 — And mercury cyanide, compounds of, 98, 12 — And sulphuric acid, anhydride of mixed, 96, 106 — And sulphuric acid, removal of nitrous acid from concentrated, 93, 78 — And metallic nitrites, reaction between, 66, 13 — And reducing agents, behaviour of products obtained by treating, 38, 35, 151 — And salicylic acid, 36, 231 — And tin, interaction, 67, 238 — Apparatus for converting nitrogen tetroxide into, 55, 276 — Behaviour of cadmium, iron, and tin in, 26, 95 — Burns, cure for, 49, 200 — Carbolie test for, 36, 179; 37, 3 — Cement to resist, 24, 47, 74 — Change in specific gravity, 68, 174 — Chemical history, 22, 48 — Combination of sulphuric acid with, 23, 311 — Compounds, transformation into sulfon acids, 28, 10 — Concentrated, electric conductivity of, 57, 131 — Conversion of hyponitric acid into, 24, 108 — Deaths from, 7, 132, 143, 156, 166, 178, 190, 204 — Decomposition, 78, 254 — Decomposition by heat, 24, 263 — Densities, 14, 95; 15, 159 — Detecting, 1, 131; 5, 3; 8, 235; 21, 250; 38, 58; 50, 33; 51, 39; 52, 321; 54, 37; 59, 278; 73, 251 — Detection and estimation, 83, 193 — Detection of iodic acid in, 72, 37 — Determination, 17, 92, 219; 37, 274; 39, 133; 50, 103; 51, 56, 76, 207; 61, 100; 64, 225; 65, 51; 71, 174; 81, 47; 92, 304 — Determination as ammonia, 39, 34; 45, 174 — Determination as nitric oxide, 39, 202 — Determination by indigo, 35, 45, 57; 39, 285 — Determination, gravimetric, 91, 234 — Dilute, action on coal, 65, 82 — Dilute, oxidising action on meta-iso-butyl-toluol, 48, 237 — Dissociation, 31, 112, 140 — Dissolves tin, 22, 298 — Electric conductivity, 57, 131; 76, 316 — Employment in pharmacy, 16, 191 — Estimation, 1, 132; 4, 75; 5, 104; 7, 158, 195; 8, 51; 17, 92, 219; 23, 261; 24, 193; 27, 129; 35, 263; 36, 145; 64, 188; 88, 59 — Estimation in gas analysis, 82, 231 — estimation, titrimetric, 87, 212 — Ferrous sulphate test for, 28, 248 — Formation, 30, 242; 81, 299 — Formation during combustion of hydrogen, 22, 30; 82, 35 — Formation in combustions, 81, 311 — Formation from ammonium sulphate, 93, 32 — Formation in soils, 40, 23 — Formation of nitro-prussides without, 51, 191 — Fumes, danger of, 51, 250 — Fuming, action, 61, 265 — Fuming, action on aceto-chlorhydric, 27, 106 — Fuming, action on acylacetates and acetylacetates of methyl and of ethyl, 87, 263 — Fuming, action on camphene, 82, 291 — Fuming, action on camphor mono-chloride, 47, 282 — Fuming, action on cyclic compounds obtained by synthesis, 80, 115 — Fuming, action on dibromo-camphor, 81, 56 — Fuming, action on dimethylacrylate of ethyl, 85, 180 — Fuming, action on monochloro camphor, 48, 171 — Fuming, action on paraffins and other hydrocarbons, 78, 262 — Fuming, action on substituted acrylic acids, 85, 167 — Fuming, preparation, 81, 110 — Gas evolved by action of metals on, 33, 255 — Hydrates of, isolation of two predicted, 66, 297 — In air, 52, 42 — In atmosphere, 4, 136 — In atmospheric precipitations, 38, 288 — In commercial lime-juice, 39, 206 — In glaciers of Alps, 46, 302 — In lemon juice, 38, 91 — In manures, 15, 173; 47, 76, 92 — In natural binoxide of manganese, 1, 299 — In natural waters, estimation, 81, 27; 83, 239 — In nature, origin of, 59, 144 — In the Nile, before and after its rise, 39, 277 — In potable water, detection by brucine, 8, 186 — In potable water, estimation, 17, 128; 22, 227; 25, 205; 27, 307 — In presence of nitrous acid, 40, 192 — In rain water, 24, 144, 209 — In rough saltpetre, 2, 192 — In the Seine, quantities of, 73, 186 — In soils, 45, 249; 47, 11 — In spring waters, 38, 275; 63, 134 — In urine, 46, 24 — In vegetable tissues, 50, 45 — In vitriol manufacture, 37, 155, 194, 216 — In water, 16, 218, 251; 32, 260; 51, 296 — In water, estimation, 10, 110; 21, 94 — In water, test for, 25, 89 — In waters of Seine, Yonne, and Marne, 74, 305 — In well water, 15, 149, 173, 57, 212 — In wine, detection, 58, 84; 58, 84 — In wine, determination, 58, 133 — Influence of free, on precipitation, 68, 264 — Injector, 43, 197 — Lecture experiments, 59, 208 — Loss in manufacture of sulphuric acid, 30, 83 — Magnetic rotation of, 60, 253; 66, 277 — Manufacture, 5, 69 — Monohydrated, action of metallic nitrates on, 40, 190, 214; 41, 23 — Nitrous gases obtained from, 38, 220 — Obtaining from nitrate of soda, 9, 47 — Of specific gravity 1.5, employment in pharmacy, 16, 191 — Origin, 70, 283 — Origin of various colours of, 66,

- 271, 304 — Oxidation of berberine with, 85, 7 — Oxidation of butyric, capronic, succinic, and oxalic acids by, 30, 83 — Paratoluidine as a reagent for, 50, 108 — Paratoluidine sulphate as a reagent for, 49, 14 — Peroxide of iron as a generator of, 32, 137 — Physical and chemical properties of, 88, 22 — Preparing tenth-normal, fifth-normal, etc., 88, 306 — Preparation, 52, 297 — Preparation of anhydrous, 20, 285 — Production of hydroxylamine from, 48, 223 — Products obtained in treating tellurium with, 50, 201 — Properties, 11, 250 — Quantities in the Seine, 73, 186 — Quantity in atmospheric precipitations of ammonia, 38, 288 — Quantity in Nile before and after its rise, 39, 277 — Reactions of soda and potash with, 3, 31 — Reactions of tin with, 53, 172 — Reagent for, 16, 50; 94, 271 — Reduction, 33, 255 — Reduction to ammonia, 61, 253 — Regeneration, 55, 297 — Removal from sulphuric acid by charcoal, 14, 217 — Risk of fire from, 53, 151 — Solubility of nitrates in, 20, 190 — Solubility of sulphate of lead in, 5, 52 — Solubility of tin in, 22, 322; 23, 36, 17 — Solution of molybdate of ammonia in, 37, 98 — Solutions, physical properties, 83, 145 — Specific gravity, 16, 115; 68, 174 — Stains, removal, 30, 286 — Stains, removal from hands, 2, 311 — Sulphate of aniline a test for, 19, 104 — Sulphates in, 61, 289, 301 — Synthesis, 81, 117 — Synthesis from its elements, 94, 36 — Synthetic production of, 44, 226 — Test, 8, 254; 36, 155 — Transformation of nitrous oxide into, 11, 185 — Trans formation of protoxide of nitrogen into, 11, 116 — Treatment of filter-paper with, 64, 85 — Vessel for holding, 17, 265, 290
- Acid, nitro, new, 26, 12**
- Acid, nitroamidostilbene-disulphonic, 88, 221**
- Acid, nitro-benzoic, 35, 142, 263 — Isomeric, 38, 113 — Nitro-benzaldehyde corresponding to the fourth, 36, 230**
- Acid, nitrobenzoyl-maleic, 51, 37**
- Acid, nitro-citric, 32, 292**
- Acid, nitro-cuminic, action of light on, 33, 75**
- Acid, nitrodisulphonic, blue, 76, 217 — Blue, and its salts, formation, 74, 49, 20 — Deep blue, 74, 34**
- Acid, nitrohydro, 64, 285, 300, 314; 65, 8, 21**
- Acid, nitro-hydrochloric, 19, 129 — Of British pharmacopoeia, 16, 191**
- Acid, nitrohydroxylamic, 84, 292**
- Acid, nitro-iodic, 4, 111**
- Acid, nitro-naphthalene sulphonic, 54, 266 — Action of sodium amalgam on, 36, 52**
- Acid, nitronaphthalic, esterification, 84, 263**
- Acid, nitro-naphthyl-sulphurous, corresponding to dichlorated naphthalin, 35, 95**
- Acid, nitro-naphthoic, 22, 213**
- Acid, nitrophenol-sulphonic, formation of substituted, 25, 284**
- Acid, nitrophthalic, 19, 214; 20, 60**
- Acid, nitropyromucic, and its ethylic ether, 86, 209 — Derivatives and oxidation products, 88, 233**
- Acid, nitro-salicylic, 35, 243**
- Acid, nitro-salicylic, 12, 94**
- Acid, nitrosodisulphonic, blue, 74, 34, 49, 76, 477**
- Acid, nitroso-isobutyric, 77, 117**
- Acid, nitroso-naphthol-sulphonic, 42, 175**
- Acid, nitroso-propionic, 43, 270**
- Acid, nitrosulphobenzoic, 64, 299**
- Acid, nitrosulphonic, blue, 74, 49**
- Acid, nitro-sulphuric, decomposition by aid of Glover's column, 25, 34 — Estimation of nitrous acid in, 24, 287; 25, 25**
- Acid, nitrotartaric, and its ethereal salts, 87, 20**
- Acid, nitrotoluenesulphonic, oxidation of, 79, 191**
- Acid, nitrous, 6, 154; 21, 45; 24, 157; 33, 10; 56, 30; 62, 284 — Action in acid solution on β -ketonic, substituted ethers, 86, 96 — Action of, 67, 36; 69, 181; 71, 279 — Action of nascent, 61, 86 — Action on acetanilide, 34, 163 — Action on allylamine, 97, 46 — Action on anethol, 46, 160 — Action on aniline and aniline colours, 12, 82 — Action on arylsulphonylmethylenes, 94, 217 — Action on benzol-sulphinic acid, 38, 10 — Action on cuprous oxide, 3, 253 — Action on dimethylamin, 30, 109 — Action on leucobase, $C_{18}H_{24}N_2$, 81, 22 — Action on mono- and diethylen-diphenyl-diamin, 41, 35 — Action on naphthylamine, 13, 91 — Action on monophenylurea, 90, 234 — Action on nitroso-naphthylamine, 83, 45 — Action on non-saturated hydrocarbons, 39, 34 — Action on phenols, 29, 264 — Action on quinone, 85, 167 — Action on substituted acid amides, 35, 241 — And cobalt compounds, 14, 33 — And nickel compounds, 14, 33 — And peroxide of hydrogen in nature, 31, 217 — And urea, reaction between in aqueous solution, 23, 179 — Appearance in evaporation of water, 47, 203 — Basicity, 23, 131 — Behaviour of vapours of, 21, 167 — Decomposition, 66, 175, 180, 200, 215, 225 — Decomposition of so-called sulpho-ureas by, 23, 179 — Detection, 51, 39; 52, 321; 69, 304 — Detection of nitric acid in presence of, 40, 192 — Detection, reaction for, 82, 261 — Determination, 24, 237, 249; 37, 274; 38, 10; 39, 133; 47, 178; 48, 274; 54, 25; 57, 89; 75, 282; 92, 304; 93, 31 — Determination as ammonia, 45, 174 — Estimation, 25, 95, 123; 35, 263; 36, 145; 49, 173; 65, 109 — Estimation, reaction for, 82, 261 — Formation, 30, 242; 68, 175, 189, 200, 215, 225 — Formation from ammonia, 12, 280 — In air, 61, 61 — In alkaline solution, action on substituted ketonic ethers, 86, 140 — In arable soils, 24, 85 — In atmosphere, 4, 136 — In blood, 47, 179 — In drinking water, etc., 41, 42 — In natural waters, estimation, 81, 27 — In nature, 31, 217 — In nitro-sulphuric acid, 24, 257; 25, 25 — In rain water, 24, 114, 200 — In spring waters, 63, 134 — In urine, determination, 46, 24 — Lead-chamber crystals as a source of, 25, 101 — Oxidation by hydrogen peroxide, 93, 269 — Ozone and nitrogen, 4, 193 — Preparation, 39, 42 — Products resulting from action upon normal butylamin, 35, 84 — Reaction for, 75, 58 — Reagent for, 45, 229 — Reduction by metals, 21, 286 — Removal from concentrated nitric and sulphuric acid, 93, 78 — Solidification, 60, 49 — Tests, 24, 225; 51, 84; 58, 40**
- Acid, nonylic, 28, 277 — From octyl alcohol of heracleum oil, 25, 57; 26, 229**
- Acid, normal, preparation, 28, 156**
- Acid, nucleic, of thymus gland, optical activity, 87, 203**
- Acid, nucifannic, 20, 83**
- Acid, odoriferous, 23, 167**
- Acid, oenanthic, 2, 83**
- Acid, oenanthyl, 27, 94, 320 — And normal heptylic alcohol, 27, 320; 29, 73 — And normal hexylalcohol, 35, 162; 36, 64**
- Acid, enegallie, in wines, titration, 145, 140**
- Acid, oleic, 59, 145, 168; 69, 145; 77, 259; 90, 278 — Action of nitric acid on, 80, 252 — Conversion into candle material, 97, 238 — Converting into solid fatty acids, 64, 297 — Derived from saponification of tallow, 38, 140 — Estimation in palm oils, 44, 209**
- Identity with moringic acid, 30, 207 — Oxidation, 52, 166 — Recovery of, 7, 274 — Stereoisomerism of, 66, 98 — Transformation into stearolactone and mono-oxy-stearic acid, 75, 149**
- Acid, opianic, 45, 35; 81, 131 — Action of, 25, 285 — Action of sulphuric acid on, 23, 180**
- Acid, organic, 72, 164 — Action on natural alkaloids, 31, 261 — Formation, 91, 19, 29, 40 — In agaricus integer, 40, 301 — New, 36, 120; 72, 164; 73, 194 — Synthesis, 8, 161**
- Acid, ortho-amido-benzoic, action of chloroform and potassium hydroxide on, 81, 11**
- Acid, ortho-amido-para-sulpho-toluolic, 30, 166**
- Acid, ortho-amido-sulphonic, derivatives, 35, 123**
- Acid, ortho-amino-benzoic, action of, 71, 185 — Methylation by means of methylsulphate, 91, 230**
- Acid, ortho-azo-benzoic, 38, 35**
- Acid, ortho-benzyl-benzoic, 78, 11**
- Acid, ortho-beta-oxynaphthoyl, 48, 204**
- Acid, ortho-chlorobenzoic, formation of, 20, 180**
- Acid, ortho-cyanbenzene-sulphonic, and derivatives, 93, 104**
- Acid, ortho-ditoluyl-tartaric, methylic and ethylic salts of, 74, 105**
- Acid, ortho-monochlorobenzoic, thermic data relative to, 84, 12**
- Acid, ortho-moniodobenzoic, thermic data relative to, 84, 12**
- Acid, orthonitrobenzoyl-acetic, 89, 70**
- Acid, ortho-nitro-cinnamic, 36, 269 — Derivatives of, 46, 67, 68**
- Acid, ortho-nitro-oxy-phenyl-acetic, behaviour with reducing agents, 45, 254**
- Acid, orthonitrophenoxyl-acetic, action of reducing agent on, 50, 104**
- Acid, ortho-paradinitro-sulpho-benzolic, 54, 189**
- Acid, ortho-phenoxybenzoic, transformation of diphenylcarbonic ether into, 91, 22**
- Acid, orthophosphoric, and aromatic ketones, double combinations of, 79, 204 — Preparing, 53, 109 — Transformation of pyrophosphoric acid into, 86, 316**
- Acid, orthotholuidine sulphonic, 66, 292**
- Acid, orthotolulic, oxidation by means of chromic acid, 29, 165**
- Acid, ortho-tribasic thioformic, ethers of, 35, 64**
- Acid, orthoxyphenoxyacetic, 79, 312**
- Acid, osmiamic, constitution, 86, 294**
- Acid, osmium, 1, 206**
- Acid, oxalacetic, 80, 300; 88, 317 — And its hydrazone, dissociation constants, 86, 11 — Formation by oxidation, 83, 227 — Relationships of, 82, 298 — Transformation of tartaric acid into, 87, 120**
- Acid, oxalic, 4, 156; 58, 12 — Action of light on, 69, 226 — Action of light on solution of, 36, 279 — Action of potassium permanganate on, 39, 18 — Action of sunlight on solutions of, 37, 9, 10 — Action on carbazol, 40, 264 — Action on chlorates, bromates, and iodates, 40, 168 — Action on cinchonine, 57, 51 — Action on sodium silicate, 36, 286 — And ferrie chloride, experiment with mixtures of, 72, 317 — And oxalates, titration of, 35, 248 — And polyatomic alcohols, reciprocal action of, 28, 264 — And potassium permanganate, speed of reaction between, 89, 96 — Anhydrous, 4, 75; 66, 297 — Application for separation of various metals, 55, 73 — As a characteriser for polyatomic alcohols, 35, 275 — Behaviour of chromic hydroxide towards, 90, 254 — Condensation, 79, 211 — Crystalline, 41, 219 — Decomposition, 6, 47; 22, 58, 168, 251; 67, 241 — Decomposition, influence of heat on, 45, 142 — Decomposition by sunlight, influence of altitude and warmth on, 77, 11 — Dehydrated, and polyatomic alcohol,**

- preparing highly concentrated formic acid by means of, 31, 280—Dehydrated, for preparing normal acidimetric liquids, 47, 260—Dehydrating, 24, 301, 313—Detection, 59, 206—Diallyl, 35, 113—Dissociation of hydrated, 59, 35; 57, 106—Dried, action on primary, secondary, and tertiary alcohols, 37, 227—Electrolysis, 21, 70—Elimination of lime from natural waters by, 20, 201—Experiments with, 68, 36—From chlorides of carbon, 1, 46—From paraffin oil, 44, 284—From sawdust, bran, and lignose, 29, 218—Hydrazine-halides derived from, 92, 268—In fungi, 36, 93—In madder, 21, 192—In manufacture of aniline, 59, 8, 84—In toxicology, 38, 154—In urine, 54, 86—In urine, estimation, 82, 72—In vegetation, 52, 106; 53, 251—Influence on colour of sulphocyanide and meconate of iron, 32, 15—Metamorphoses of, 8, 19—Monohydrated, 11, 166—Oxidation, 56, 277; 57, 168; 93, 31—Oxidation by nitric acid, 30, 83—Oxidation of acetic into, 19, 250—Poisoning with, 17, 204—Purification, 9, 57, 61, 154—Reduction of carbonic acid to, 17, 81, 132; 20, 45—Relative speeds of saponification of esters of higher homologues of, 79, 256—Spontaneous destruction, 47, 282—Synthesis, 15, 149; 91, 268—Titration by potassium permanganate, 80, 78, 91
- Acid, oxalohydroxamic, 15, 267
- Acid, oxalomolybdic, 59, 289
- Acid, oxalo-niobic, 88, 185
- Acid, oxaluric, homologues of, 28, 173—Synthesis, 24, 72
- Acid, oxamic, and oxamide, preparing, 60, 245—Production by oxidation of glycol, 30, 241—Salts of, 3, 253
- Acid, oxanilio, 18, 21
- Acid, oxethylcrotonic, 91, 176
- Acid, 4-oximinocyclohexane carboxylic, optically active, 99, 307
- Acid, oxisocaprolic, 22, 299
- Acid, oxuvitic, and cresol from it, 32, 83
- Acid, Oxyanthraquinone carbonic, 37, 162
- Acid, oxyacrylic, 42, 108
- Acid, oxybenzoic, 21, 191—Action of gases on, 62, 289—And phenols, conductivities, 61, 192—Condensation product obtained from, 29, 73—Derivatives, 20, 251—Phenol from, 20, 276—Protocatechutic acid from, 34, 72
- Acid, oxybenzylphosphinic, 87, 23
- Acid, α -oxybutyric, 71, 161—Synthesis, 35, 85
- Acid, β -oxybutyric, amides and anilides of, 42, 109
- Acid, γ -oxycrotonic, halogen derivatives of, 99, 168
- Acid, oxyethylendisulphonic, 16, 292
- Acid, oxygen, of sulphur, 57, 150
- Acid, oxyglycolic, 62, 74—Oxidation products, 79, 71
- Acid, oxyheptic, homologues of, 39, 104
- Acid, oxyisobutyric, 16, 208
- Acid, oxyisocaprolic, 22, 299
- Acid, oxyisohydroxamic, 20, 47
- Acid, oxymaleic, preparation and properties, 27, 294
- Acid, oxymethan-disulphonic, 28, 203
- Acid, oxymethan-sulphonic, 28, 203
- Acid, oxyphenic, bromo-derivatives, 16, 24
- Acid, oxyphenyl-acetic, and its derivatives, 40, 226
- Acid, oxyphenylendisulphonic, 16, 184
- Acid, oxyphosphinous, 61, 126
- Acid, oxyphthalic, 35, 263; 38, 9
- Acid, oxypicric, 23, 179, 287
- Acid, oxypivalic, action of dehydrating on, 91, 33
- Acid, oxypyrotartaric, normal, 34, 284
- Acid, oxysalicic, 21, 132, 252
- Acid, γ -oxytetrolic, 97, 143
- Acid, oxytolyllic, 38, 9
- Acid, ozonic, and tetroxide of hydrogen, 87, 112
- Acid, pallado-oxalic, 82, 94
- Acid, palmitic, in palm oils, 44, 299—Obtaining, 26, 88—Sample of, 59, 159
- Acid, paramidoorthosulphotolyllic, 30, 167
- Acid, paraazobenzoic, azophenylene from, 26, 59
- Acid, parabanic, 28, 21; 29, 92—Hydrate, 27, 209—Salts of, 30, 53—Synthesis, 26, 145; 31, 40; 80, 292—Synthetical preparation, 25, 130
- Acid, parabromtoluic, preparation from crystalline bromxylyl, 29, 176
- Acid, parachlorobenzoic, chlorinated, 22, 202
- Acid, paracinnamic, derivatives, 46, 67, 68
- Acid, paradichlorobenzoic, and dichlorobenzoic acid, identity, 19, 251
- Acid, paraditolyl-tartaric, methylic and ethylic salts of, 74, 105
- Acid, paradimethylamido-orthobenzoic, action of phenyl magnesium bromide on the second methyl ether of, 97, 276
- Acid, paraethoxybenzoic, synthesis of, 87, 118
- Acid, paragluconic, 43, 117
- Acid, paraiodobenzenesulphonio, 36, 7
- Acid, para-isobutylphenoxycetic, 75, 215
- Acid, paralactic, conversion of inosite into, 25, 107—Formation by fermentation, 31, 151
- Acid, paramethoxytartronic, 85, 203
- Acid, paramethoxyhydratropic, synthesis, 82, 94
- Acid, paramethyl-isatic, 51, 214
- Acid, paramidobenzoic, preparing, 35, 163
- Acid, paramonochlorobenzoic, synthesis, 19, 226; 20, 166
- Acid, paranitrobenzaldehydorthosulphonio, oxidation of paranitrotoluenesulphonic acid to, 77, 236
- Acid, paranitrobenzoic, nitric, 43, 11
- Acid, paranitrobenzoyl-acetic, derivatives, 53, 237
- Acid, paranitrophenylacetic, 41, 35
- Acid, paranitrotoluenesulphonic, oxidation to dinitrostilbenedisulphonic acid and to paranitrobenzaldehydorthosulphonic acid, 77, 236
- Acid, paraoxybenzoic, 14, 280; 23, 228; 36, 224—Anhydrides of, 46, 173—Phenolxybenzoic acids derived from, 36, 51—Products of dry distillation, 48, 226
- Acid, paraoxyhydratropic, 83, 239
- Acid, para-pseudopropyl-naphthene, 77, 189
- Acid, parapyruvic, 81, 107
- Acid, parasorbic, 22, 202; 25, 202
- Acid, parasulphamic, 35, 263
- Acid, parasulphanilic, acidimetric value, 84, 36
- Acid, parasulphobenzoic, 24, 23; 27, 213; 277; 28, 2; 32, 227
- Acid, para-tartaric, preparation, 2, 335
- Acid, parathionic, 25, 311—In mother liquor of coralline, 26, 300
- Acid, paratolylphenylacetic, 35, 263
- Acid, paratungstic, 72, 61
- Acid, paraxylic, 34, 270
- Acid, para-xylic, constitution, 23, 23
- Acid, petallarie, and its existence in *parmelia scruposa*, 19, 275
- Acid, pectic, transformation of cane-sugar into, 4, 291
- Acid, pelargonic, synthesis, 83, 239; 89, 226
- Acid, pentabromobenzoic, 19, 214
- Acid, pentachloroplatinic, 86, 48
- Acid, pentamethylenedicarboxylic, 70, 266
- Acid, pentamethylenetricarboxylic, synthesis, 81, 93
- Acid, pentathionic, 41, 209, 290; 43, 41; 44, 83; 47, 303—Non-existence of, 39, 263; 40, 241; 41, 209
- Acid, perboric, salts of, 81, 228
- Acid, perbromic, 9, 205; 33, 35; 55, 203
- Acid, perchloric, 86, 200—And its hydrates, 4, 155; 11, 77; 44, 168; 73, 8, 17—And its salts, electrolytic preparation, 81, 111—As a reagent for alkaloids, 40, 300—Non-hydrated, preparation and properties, 83, 167
- Acid, perchloroxynaphthalic, 3, 351
- Acid, perchromic, 4, 69; 5, 129; 33, 238; 91, 98, 114
- Acid, periodic, 86, 200—Basicity, 15, 240—Electrolytic preparation of free, 83, 305—Solutions, specific gravity and volume, 29, 155
- Acid, permanganic, 2, 119; 4, 103; 6, 57; 20, 203; 96, 28—Mechanism of action of peroxide of hydrogen on, 85, 219; 86, 50—Reduction by manganese peroxide, 78, 77, 90
- Acid, permolybdic, 66, 24—Formation heat of, 66, 121—Salts of, 78, 208; 79, 106
- Acid, permonosulphuric, 92, 301
- Acid, pernitric, 45, 198—Absorption spectrum, 45, 174
- Acid, peroxyaminesulphonic, 89, 18; 90, 42, 69
- Acid, perstannic, and perstannates, 91, 280
- Acid, persulphocyanic, 21, 239, 275, 287; 35, 273
- Acid, persulphuric, 37, 73, 102; 41, 133; 66, 185; 77, 39; 85, 193—Caro's, and hydrogen peroxide mixtures, effect of colloidal platinum on, 90, 262—Formation during electrolysis, 37, 82—Formation-heat of, 41, 159—Precipitation of manganese by, 88, 11
- Acid, perthiocyanic, 75, 212; 76, 68
- Acid, pertitanic, salts of, 81, 228
- Acid, pertungstic, salts of, 78, 208; 79, 106
- Acid, pervanadic, 77, 201
- Acid, phenacetic, 19, 191; 21, 239; 24, 300
- Acid, phenanthren-carbonic, 36, 231
- Acid, phenanthrothioxyacetic, 79, 312
- Acid, phenetosulphuric, salts of, 20, 203
- Acid, phenic, 23, 130—Action on vegetables, animals, ferments, poisons, virus, miasmas, and applications to hygiene, therapeutics, and anatomical and industrial sciences, 8, 65, 89—And its properties, 16, 297, 310, 320—Antiseptic properties, 32, 85—Assay of crude, 28, 181—Characteristic reaction, 85, 218—Colouring matters from oxidation of, 6, 85—Crystallised, preparation, 16, 188—Determination, 54, 334—For disinfecting purposes, 4, 60—For purposes of leather and skin manufacture, 21, 300—Hygienic use of, 22, 82—Manufacture and properties, 16, 35, 297, 310, 320—Pigments and dyes from, 23, 203—Poisonous properties, 21, 202; 39, 116—Preparations against smallpox, 23, 155—Prophylactic properties, 20, 219—Reaction by which it may be distinguished from creosote, 17, 70—Synthetic, 82, 98—Tempering steel with, 74, 317—To crystallise indigotine, 25, 58—Transformation of benzol into, 7, 79—Use in medicine, 11, 20
- Acid, phenetolsulphuric, salts of, 19, 209
- Acid, phenol, derived from camphor, 62, 296
- Acid, phenol-dicarboxic, derived from salicylic and paraoxy-benzoic acids, 36, 51
- Acid, phenol-disulphonic, 60, 185
- Acid, phenol-glycolic, preparing, 40, 45
- Acid, phenol-phosphorus, 20, 24
- Acid, phenol-sulpho, 26, 252
- Acid, phenol-sulphuric, salts of, 17, 10
- Acid, phenol-trisulphuric, 29, 73
- Acid, phenoxethylmalonic, derivatives of, 73, 101
- Acid, phenoxylic, 35, 142, 217
- Acid, phenyl-acetic, 21, 203—Acetones of, oxidation of, 26, 48—Action of sodium on ethereal salts of, 53, 211—Derivatives, 20, 46, 154; 39, 171; 40, 287—Nitro derivatives of, 22, 130
- Acid, phenyl-amidopropionic, 47, 306
- Acid, β -phenyl azoisovaleric, 90, 290

Acid, 1-phenylbenzole, and diphenylbenzene, 38, 110—Synthesis, 88, 127
 Acid, 1-phenyl-chloroacetic, displacement of chlorine by hydroxy and methyl groups, 97, 288
 Acid, phenyl-cinnamic, synthesis, 39, 111
 Acid, phenyl-citramic, 25, 35, 47
 Acid, phenyl-citric, 26, 47
 Acid, phenyl-citric, 31, 41
 Acid, phenyl-phosphoric, 78, 200
 Acid, phenyl-glyceric, attempt to prepare, 38, 226
 Acid, phenyl-glycolic, preparing, 41, 111
 Acid, phenyl-glycolic, properties, 88, 35
 — Splitting-up and properties, 81, 200
 Acid, phenyl-glyoxylic, reaction for, 40, 111
 Acid, β -phenyl-hydrazidobutyric, 90, 111
 Acid, phenyl- and derivatives, 17, 111
 Acid, phenyl-isobutyric, derivatives, 57, 111
 Acid, phenyl-methylbutanonic, synthesis, 82, 200
 Acid, phenyl-naphthoquinoleindicarboxylic, derivatives, 94, 111
 Acid, phenyl-oxymomcampholic, action of hydrobromic acid on, 81, 299—Synthesis, 95, 111
 Acid, phenyl-sulphacetic, 32, 8
 Acid, phenyl-phosphoric, 12, 283; 78, 200—Effects of neutralisation, 78, 200
 Acid, 1-phenylpyrrolidine-2:5-dicarboxylic, formation from adipic acid, 99, 111
 Acid, phenylsuccinic, anhydrides of, 94, 264
 Acid, phenylsulphocarbanilic, 38, 60
 Acid, phenylsulphopropionic, 21, 275
 Acid, phenylthiocarbamic, phenyl salt of, 61, 130
 Acid, phenyl-trisulphuric, 29, 73
 Acid, phloretic, 22, 262—And hydroparaldehyde, identity of, 82, 58
 Acid, phloroglucinic, 20, 283, 293
 Acid, phosphenylic, substituted, 36, 141
 Acid, phosphodekamolybdic, 60, 169, 170, 215
 Acid, phosphomolybdic, as a test for alkaloids in medicinal preparations, 7, 111
 Acid, phosphoric 17, 134; 18, 190; 32, 113; 52, 261; 53, 280; 59, 107, 240; 73, 48; 74, 292; 76, 268; 95, 149—Acidimetry by baryta, strontium oxide, and lime, 83, 312—Acidimetry by means of baryta water, 84, 269
 —Action of bismuth on, 15, 111
 —Action of soluble, reverted, and precipitated in light sandy soils, 44, 111
 —Action on erythrine, 87, 130
 —Action on morphine, 25, 284—Action on silver salts, 111
 —Action on sodium tungstates, 44, 60—Affinity for sesquioxides, 1, 143
 —Agricultural value of different combinations of, 46, 185—Analysis, 53, 111—And alumina, separation, 25, 277—And alumina, and iron sesquioxides, separation, 4, 75; 31, 214; 40, 292—And chlorides of alkaline earths, 84, 47—And ether in presence of water, reactions between, 74, 121—And ferric oxide, separation, 25, 277—And its compounds, estimating, 1, 181—And iron, 7, 111; 25, 277—And magnesia, determination, 47, 84
 —And magnesia, separation, 25, 277
 —And moisture, determination, 57, 17; 66, 107—And molybdic acid, separation, 28, 315—And molybdic acid, combinations, 17, 183—And phosphoric acid, 16, 218—And oxide of uranium, separation, 20, 111—And phosphoric, manufactory of Blanchard report on, 26, 71—And potash, estimation, 35, 259; 36, 17, 38, 47; 38, 54, 63, 99; 75, 209—And potash, in commercial products, 32, 111, 170, 181, 194, 200, 208, 223—And rocks, 49, 111—And silica, com-

pound, 47, 214—And superphosphates manufactory, 26, 47—And tartaric acid, separation, 49, 267—And titanate acid, combinations, 53, 252—And uranic oxide, separation, 28, 315—And urea, combination, 19, 261—And zirconia, combinations, 53, 252—Anhydrous, volatility of, 1, 286
 —Apparatus for extracting soluble, from superphosphates, 74, 258—Blowpipe reactions of, 35, 50—Blowpipe test for, 41, 187—Citrate-soluble, in natural guanos, 53, 138—Colorimetric determination of small quantities, 89, 73, 89, 101—Colorimetric, in water, 74, 45—Commercial, 10, 187—Conversion of monohydrated into common, 5, 61—Crystallised, 20, 111—Derivatives of pentabasic, 90, 148; 93, 44—Determination, 1, 73; 12, 180; 21, 170; 29, 287; 31, 161, 197; 40, 39; 42, 305; 45, 175, 248; 46, 4; 47, 83, 94, 106, 177, 231, 48, 202; 51, 123, 285; 52, 12, 58, 224; 54, 86, 188, 291; 55, 34; 56, 251; 57, 211, 222; 58, 61, 85, 184; 59, 107; 60, 12, 74, 310; 62, 155; 63, 249; 67, 241, 313; 69, 286; 70, 3, 157, 213, 224, 316; 71, 102; 73, 53, 212; 74, 45; 77, 32; 100, 1—Determination as ammonio-phospho-molybdate, 39, 42—Determination by magnesia, 8, 19—Determination by molybdenum process, 53, 53—Determination by molybdic method, 47, 66—Determination by molybdic solution, 74, 38—Determination by standard solutions, 44, 214—Determination, gravimetric method, 43, 7—Determination in acid solution with alkaline molybdate solution and glue, 100, 220—Determination of alumina and ferric oxide in presence of, 35, 268
 —Determination of assimilable, 42, 305—Determination, volumetric method, 92, 113—Dilute, 15, 306—Electrical conductivity of, 98, 270—Estimation, 1, 230; 3, 131, 211; 6, 99; 8, 207; 10, 116, 265; 13, 183; 17, 99, 134, 298; 20, 168; 23, 145; 24, 18, 31, 33, 167; 25, 229; 27, 94; 30, 200; 32, 222; 35, 250; 36, 17, 38, 47; 38, 54, 63, 99; 48, 61; 49, 230; 57, 165, 187; 69, 176; 71, 49; 72, 28; 76, 263; 78, 71, 166—Estimation as ammonio-magnesium phosphate, 21, 205; 22, 227; 31, 274; 32, 5, 12, 70—Estimation as magnesic pyrophosphate, 46, 213; 47, 9, 71; 48, 217, 230, 239—Estimation as uranic phosphate, 27, 199—Estimation by blowpipe, 32, 217—Estimation by molybdate, 83, 12—Estimation by molybdate of ammonia, 1, 264—Estimation by uranium, 24, 233—Estimation, ponderable or gasometric, 90, 161—Estimation, utilisation of molybdic acid from residues of, 21, 166—Etherification by glycerin, 81, 155; 89, 34—Etherification by glycerin, speed, and limit of, 81, 106—Etherification by methylic alcohol, 80, 59—Excretion in herbivora, 39, 240—Experiments with, 45, 234—Explosion in making, 4, 83—Extraction from glasses, 17, 41—Ferric oxide, alumina, lime, and magnesia, separation of, 25, 277—Formation of anhydrous acid of fatty and aromatic series by action of, upon their hydrates, 33, 117—From iron ores, separating and utilising, 22, 170; 24, 145; 26, 4—From slags, 50, 50—Glacial, analyses of commercial, 3, 230—Gladding's method for, 77, 242—Importance as regards fertility of arable soils of Auvergne, 32, 313—In agricultural soils, 44, 305; 49, 255—In arable soils, 19, 262; 36, 141; 46, 24; 47, 117; 49, 147, 178; 52, 83—In arable soils and rocks, 49, 147, 216, 224, 255, 266—In arable soils of north, 46, 24—In Baker guano, and similar raw materials, 23, 225—In basio slags, 58, 168; 66, 262, 293—In beryl, 66, 297

—In commercial products, 32, 159, 172, 185, 193, 200, 208, 223; 35, 208; 52, 85—In cows' milk, fluctuations, 54, 284—In fertilisers, 33, 255; 49, 247; 51, 19, 102; 65, 162, 170, 226—In fish guano, 40, 34—In foders, 75, 200—In foods, estimation, 93, 16—In magnesium phosphate, table for calculating, 74, 110—In manures, coprolites, bone-ash, and similar commercial substances, 1, 97, 122; 28, 9, 19—In natural phosphates, 28, 19; 80, 178—In phosphates, estimation, 81, 195; 85, 124—In phosphorites, 22, 227—In presence of alumina, 15, 207; 26, 60—In presence of iron, 26, 60—In presence of oxide of iron and earthy bases, 5, 281—In presence of silicic acid, 35, 127—In primitive rocks, 5, 210—In products important in agriculture and physiology, 27, 228, 309, 310—In products of agricultural interest, 25, 179; 26, 48—In shape of pyrophosphate of magnesia, 20, 167—In slags, 64, 275—In soil, 42, 35; 26, 288; 49, 178—In superphosphates, 23, 205; 40, 57, 216; 48, 106; 50, 67; 58, 63; 79, 87—In Thomas slag, solubility, 54, 5—In urine, 48, 160—In vegetation, 57, 140—In volcanic soils, 44, 36—In water, 74, 45—In wines, 38, 90; 42, 5, 85—Influence on colour of sulpho-cyanide and meconate of iron, 32, 15—Insoluble in water, manurial matter containing, 74, 318—Manufactory of Blanchard, 26, 47, 71—Manufacture, 42, 282—Manurial experiments with, 44, 238—Method of separating from bases, 1, 49—Neutralisation method for, 75, 101—Neutralisation, 83, 311—New, 73, 48—Of bone-meal, solubility of, 66, 118—Of mineral phosphorites, transformation, 36, 246—Of soil, 83, 276—Official, 23, 107—Precipitation as phospho-molybdate of ammonia, 12, 73—Precipitation by ammonia in presence of lime, 35, 238—Precipitation by molybdate of ammonia, 23, 143—Preparation, 2, 83; 53, 252—Proportion of nitrogen to in seeds, 51, 49—Pure, 4, 13; 63, 36; 68, 66—Quantitative expulsion from its salts in a current of chlorine saturated with carbon tetrachloride, 96, 221—Quantitative sublimation from its salts, 94, 242—Reaction on glycerin, 17, 237; 78, 60—Reactions of two bases placed simultaneously in presence of, 84, 35—Report, 65, 229—Resolution of asymmetrical derivatives of, 100, 287—Retrosession of soluble in superphosphates, 81, 196—Reversion of, 50, 1, 16, 27; 51, 64—Reverted, 42, 118; 51, 24; 65, 209, 221—Reverted, determination by ammonium nitrate, 44, 76—Reverted, determination with ammonium citrate, 43, 178—Reverted, in manurial phosphates, valuation, 41, 283—Reverted, value of different forms, 44, 305—Saturation with bases, 45, 109—Separation, 1, 72, 230; 71, 246—Separation and estimation from water, 88, 280—Soluble, retrosession in superphosphates, 81, 106—Soluble, determination, 57, 15—Soluble, Extraction from superphosphates, 35, 39; 74, 258—Spectra of, 29, 66—Strength of various solutions of, 12, 160—Technical extraction from mineral phosphates, 42, 85—Tendency of tungstic and silicic acids to combine with, 16, 187—Three basicities of, 65, 11—Titration, 56, 69—Valuation of manurial matter containing, 74, 118
 Acid, phosphoro-selenic, 51, 238
 Acid, phosphorous, 59, 289—Action of bromine and iodine on, 16, 74—Action on erythrine, 87, 273—Action on mannite, 88, 233—And persulphate of potassium, reaction between, 88, 173—Crystalline, preparing, 36, 81—

- Detection and estimation in cases of poisoning, 1, 207—Determination, 32, 61, 66; 96, 70—Determination in iron ores, 36, 234—Determination in organic substances, 36, 133—Estimation, 85, 36—Etherification by glycerin and glycol, 84, 304—Oxidation by iodine, 98, 231—Reducing action on sulphate of copper, 36, 34—Power of, 26, 285
- Acid, phosphorimetatungstic, 61, 205
- Acid, phosphotungstic, 29, 73; 44, 13
- Acid, photo-santonin, 10, 110; 35, 11
- Acid, phthalamic, acetyl and benzoyl derivatives of, 93, 198
- Acid, phthalic, 16, 148; 18, 214; 22, 108; 24, 168, 263—Absorption spectra, 95, 92—And phenols, compounds, 34, 206; 42, 61; 46, 78—And urea, and thio-urea, derivatives, 46, 185—Benzyl-iso, 34, 270—Derivatives, 24, 265—Dichlorised, derivatives, 87, 312—Formation, 31, 31—Manufacture, 12, 33—Preparation of aniline derivatives of, 96, 18—Synthesis, 37, 220—Synthesis of derivatives of anthraquinone by means of, 31, 269
- Acid, phthalonic, 78, 280
- Acid, phthalyl acetic, 35, 104
- Acid, phthaloyl acetic, 42, 317
- Acid, picolic, 54, 285
- Acid, picramic, 4, 193—Action of nitric acid on, 5, 18; 17, 129—Preparation, 5, 60
- Acid, picric, 3, 350; 5, 5; 16, 78, 104; 43, 233; 71, 43—Action of, 70, 197; 71, 112—Action of boiling caustic lyes on, 88, 218—Action of chloride of iodine on, 16, 7—Action on oil of turpentine, 52, 189—Action on turpentine, 53, 155—Additive compounds, estimation, 92, 300—And ammonia, and metallic bases, new combinations of, 3, 195, 208—And anhydrous acetic acid, compound of, 28, 81, 108—And dinitrophenol, haloid compounds which correspond to, 21, 251—And its solutions, colour of, 83, 100—Colouring properties of, 99, 252—Commercial, estimation of purity, 15, 140—Detection and determination, 50, 60—Diamido-nitro-phenylic acid from, 22, 35—Employed as reagent for albumen and sugar in urine, 48, 214—Explosion, 22, 60—Explosive decomposition of, 57, 23—For imparting a red colour to ivory, bone and horn, 21, 226—For quantitative estimation of cinchona alkaloids, 26, 215—Heat of neutralisation by different aromatic bases in benzene, 98, 83—In beer, 1, 24; 35, 75; 42, 259—Manufacture, 8, 139; 39, 150, 171—Morphotropic relationships between the derivatives of, 100, 33—Production, 45, 175—Solubility, 86, 45—Sources of error in employment of to detect presence of potash, 3, 180—Toxicological behaviour, 75, 50
- Acid, picryl-sulphonic, 52, 214
- Acid, pimicic, 30, 31
- Acid, pimelic, alkyl substitution products of, 82, 314—Derived from menthol, 58, 48—Synthesis, 90, 69
- Acid, pinonic, transformation into 1,3-dimethyl-4-phenylacetic acid, 99, 204
- Acid, pinophanic, 75, 162
- Acid, piperic, 4, 315; 21, 154
- Acid, piperinic, 20, 59
- Acid, piperonylic, conversion into protocatechuic acid, 22, 202—Synthesis, 24, 102
- Acid, pipitzaholic, 55, 105; 93, 243
- Acid, p'atinic, hydrates of, 22, 47
- Acid, platinichlorhydric, behaviour of some salts of, 77, 203
- Acid, plato-oxalonitrous, 87, 122
- Acid, platoso-oxalic, 53, 114
- Acid, plumbic, and the organo-acids, combination, 87, 178—Derivatives, 87, 238
- Acid, plumieric, 33, 261; 36, 102
- Acid, podocarpinic, 28, 205
- Acids, polyatomic, action of hydrobromic acid and hydriodic acid on, 9, 210
- Acid, polybasic, derived from phenol and carbonic acid, 36, 183
- Acid, polygalic, 3, 40
- Acid, polyporic, 39, 229
- Acid, polythionic, in Wackenroder's solution, 44, 304
- Acid, propargylic, 43, 188
- Acid, propenyl-tricarboxylic, action of bromine on, 57, 78
- Acid, propionic, 27, 59, 131; 54, 60—And acetic acid, separation, 81, 259—Bromo-propionic acid from, 27, 305—Constitution, 47, 52—Derivatives, 23, 204; 74, 253—Haloidal substitution derivatives of, 51, 61—Latent heat of fusion and specific heat of, 100, 196—Preparation from amyl alcohol, 13, 246—Preparation from propionitril, 35, 105—Presence among the products of destructive distillation of wood, 14, 257—Synthesis, 28, 204—Synthesis by means of oxide of carbon, 27, 106—Transformation of lactic acid into, 1, 264; 26, 50—Transformed into lactic, 4, 290; 70, 293
- Acid, propoxysuccinic, optically active, 72, 253
- Acid, propylic, aldehydes of, 14, 33
- Acid, propylmalonic, normal, 79, 71
- Acid, protocatechic, or dioxybenzoic acid, 82, 107
- Acid, protocatechuic, acidimetric estimation, 83, 131—Action of bromine on, 29, 95; 30, 246—Action of sulphuric acid upon, 46, 36—Derivatives, 87, 82—Reaction of, 74, 283
- Acid, protocatechusic, 20, 118, 251
- Acid, protocatechutic, conversion of piperonylic acid into, 22, 202—From oxybenzoic acid, 24, 72
- Acid, prussic, 5, 125—Acceleration of oxidation reactions by, 93, 116—Anhydrous, and aldehyde, compound formed by direct union of, 16, 224—Detection, 30, 54—Poisoning with, 2, 78
- Acid, pseudo-cumol-sulphonic, constitution and derivatives, 37, 161
- Acid, pseudo-lauronic, 79, 92
- Acid, pseudo-uric, 40, 56
- Acid, pulegenic, 86, 240
- Acid, purpuro-xanthic, 35, 185
- Acid, purpuroxanthin-carbonic, 35, 84
- Acid, pyridin-tricarboxic, 51, 238; 52, 71
- Acid, pyro-citric, water salts of, action of bromine on, 28, 246, 260
- Acid, pyrogallic, 21, 132; 36, 183; 43, 84—Action of oxygen on, 25, 299; 26, 181—Action on iodic acid, 28, 81—Antiseptic power, 40, 78—Bromo-derivatives, 16, 24—Detection, 57, 22—Determination, 29, 241—Ethyl ethers of, and cedric acid, 16, 52; 17, 96—Oxidation, 20, 213; 45, 208—Phthalic acids of, 38, 96—Preparing, 12, 156—Reaction, 51, 84—Reagent for, 60, 282
- Acid, pyrogallol-carbonic, thermic examination, 83, 11
- Acid, pyroligneous, 4, 156; 16, 114—Removal of empyreumatic oils from, 11, 168
- Acid, pyromellitic, action on naphthol, 23, 204—Condensation products of, with resorcinol, 94, 227, 265
- Acid, pyromucic, 27, 107; 84, 72; 86, 24—Group, 20, 226
- Acid, pyromucylhydroxamic, 83, 275
- Acid, pyropervanadic, salts of, 81, 226
- Acid, pyrophosphodiamic, 12, 283; 13, 220
- Acid, pyrophosphoric, 15, 327; 68, 137, 190; 74, 202—Acidity of, 86, 35—Transformation into orthophosphoric acid, 86, 316
- Acid, pyrophosphorons, 57, 220; 87, 226
- Acid, pyrophosphotriamic, 13, 42
- Acid, pyro-racemic, action of ammonia and amido-derivatives on, 35, 124—Action of aniline colours on, 35, 217
- Acid, pyro-sulphuric, 23, 119
- Acid, pyrosulphuric, action on metals, 52, 7
- Acid, pyro-tartaric, 33, 251; 34, 284—Action of bromine upon, 22, 21; 36, 61—Fermentation, 21, 226—Normal, derivatives, 34, 32—Ordinary, electrolysis, 35, 276—Preparation, 21, 226, 274—Transformation into hydrobromate of tribromated ethylene, 35, 146
- Acid, pyrotrebeic, 28, 204; 41, 209
- Acid, pyrotritic, 37, 270
- Acid, pyruvic, 19, 191; 28, 84; 36, 141; 39, 161—Action of chloride of phosphorus on, 22, 47—Action of perchloride of phosphorus on, 28, 98—Action of urea on, 84, 231; 87, 142—Action of urethane on, 84, 219—Colour reactions with α - β - and naphthol in sulphuric acid solution, 91, 209—Coloured reactions, 76, 219; 78, 60—Derivatives of normal, 36, 180—Ether of, 27, 23—Formation of dichloro-propionic acid from, 37, 238—Preparing, 92, 21—Reactions, 27, 84—Ureides of, 31, 19
- Acid, quercite-sulphuric, 26, 252
- Acid, quineic, rotatory power of derivatives of, 68, 74
- Acid, quinio, 14, 243; 35, 164; 38, 113; 41, 208—In leaves of *Vaccinium myrtillus*, 2, 204
- Acid, quinone-diortho-aminobenzoic, derivatives, 71, 233
- Acid, quinopieric, 20, 264
- Acid, quinovalic, and quinovine, 48, 305
- Acid, quinovalic, 49, 22
- Acid, racemic, 55, 113—And tartaric acid, reciprocal conversion of inactive, 27, 134—Artificial, 2, 95—Conversion of dextro-rotating tartaric acid into, 26, 93—Formation and constitution, 19, 22—Production in manufacture of tartaric acid, 36, 223
- Acid, regianic, 24, 119
- Acid, resin, new, 28, 205
- Acid, resorcylic, 72, 253—Derivatives, 87, 82
- Acid, rhamninitronic, cryoscopy of, 82, 59
- Acid, rhizopogonic, 43, 292
- Acid, rhodanic, homologue of, 53, 226
- Acid, rhodizonic, 5, 75
- Acid, ricinoleic, acid polymers of, 64, 85
- Acid, rosolic, 3, 350; 4, 90; 24, 110; 27, 244, 255; 33, 19; 35, 76; 36, 7; 37, 52; 38, 152—Detection in presence of magenta, 35, 5—Experiments with commercial, so-called aurine cake, 18, 17—Purification, 27, 21—Relation of rosaniline to, 14, 37—Use as indicator, 49, 32, 38, 119
- Acid, ruberythric, 69, 71
- Acid, rubic, 41, 37
- Acid, rufigallic, 21, 11; 22, 153; 35, 123; 43, 80—Derivative, 15, 241—Formation of alizarin by reduction of, 32, 260
- Acid, saccharic, derivatives, 57, 161—Emetics, 49, 82
- Acid, salicylic, 20, 203; 21, 132; 25, 227; 32, 46; 43, 270; 44, 107; 50, 173, 234; 54, 61; 55, 141; 58, 256; 60, 59—Action in typhoid fever, 36, 3—Action of phosphorus pentachloride on, 52, 84—Action of reducing agents upon nitranilides of, 31, 244—Action of woody fibre upon, 42, 120, 223—Action on ferments, 53, 28—Action on sodium succinate, 54, 271—And its homologues, preparation, 20, 225—And nitric acid, 36, 231—Anhydrides of, 27, 12—Anti-ptrescent action, 31, 208—Antiseptic action, 32, 179; 42, 97—Antiseptic properties of, 32, 85—As a disinfectant, 39, 11—As preservative of cider, 76, 220—Compounds, melting point, 60, 45—Curves of solubility, 39, 104—Derivatives, 27, 282; 57, 161; 95, 31—Detection, 36, 62; 55, 34, 48, 141; 57, 222; 66, 209—Detection of free, 68, 185—Detection of saccharin in presence of, 74, 49, 306—Determination, 46, 243; 55, 48; 59, 108; 57, 262; 65, 192—Examination of commercial, 36, 183—Impurities in, 63, 237—In alimentary substances, 44, 168; 45, 264—In beer, 39, 136; 55, 249—In beverages,

- 44, 226—In foods, 55, 34; 77, 136—In foods, detection by coloured reaction of ferric salts, 87, 65—In milk, 47, 258—In milk trade, 34, 142—In pansy, 49, 146; 50, 102—In textile manufactures, 43, 30—In titration, 32, 249—In urine, 36, 10; 44, 82—In wine and fruit juices, 42, 48—In wines, 36, 10; 48, 82—In wines, cause of error in search for, 83, 4—In wines, sensitiveness of methods for detecting, 85, 156—Organo-mercuric compounds of, 89, 120—Phenoldicarboxylic acids derived from, 36, 51—Properties of, 31, 229, 261—Reactions, 28, 13; 40, 181; 42, 49—Reaction with salts of iron, 40, 143—Reduction to salicylic aldehyde, 99, 72—Separation, 66, 42—Synthesis, 52, 94—Titration, 83, 51—Two ketones formed from, 49, 62—Use of, 45, 21—With salts of iron, 40, 143
- Acid, santalenoic**, 82, 298
- Acid, santonioic**, 29, 51—Action of chloride of acetyl upon, 32, 19—Derivatives, 35, 11
- Acid, sarcocollacetic**, 15, 267; 68, 107—Derivatives, 71, 207
- Acid, sebacic**, 29, 45—Anilised derivatives, 38, 273—Oxidation, 3, 191
- Acid, selenic**, 2, 59; 27, 168; 28, 205; 74, 85—Action on Alcohol, 6, 171—Alum of, 1, 215—Alums formed by, 6, 62—And other selenium compounds, 59, 219, 232, 258, 267—Determination, 74, 3, 284—Formation heat of, 75, 11—Preparation, 21, 46; 74, 85—Preparation, use of selenium of copper in, 78, 165—Reduction, 73, 273, 285
- Acid, selenious**, action, 56, 219; 61, 73, 265—Action of glucose on, 93, 44—Action of hydrazine upon, 34, 51, 72—Action of manganese dioxide on, 55, 308—Behaviour with sulphurous acid, 53, 37—Compounds, 68, 73—Determination, 72, 216; 74, 3, 284—Estimation, 80, 27—Preparation, 21, 46—Reaction with hydrogen sulphide, 51, 199—Reduction by glucose, 30, 176—Saturation, 54, 261
- Acid, silicic**, 27, 22; 89, 251, 263—Absorption by plants, 35, 220—Amount of water expelled by, from hydrate of potassa, soda, and baryta, 3, 366—And alkaline and alkaline-earth silicates, 89, 23—And carbonic acid in water, state of combination, 25, 171—And other colloidal substances, 10, 95, 109—And tungstic acid, separation, 84, 3—Behaviour with microcosmic salt, 38, 59—Crystalline, separation when mixed with silicates, 37, 162—Crystallised, preparation by dry way, 21, 179—Estimation of phosphoric acid in presence of, 35, 127—Formula, and amount of carbonic acid expelled by, 3, 205—Gelatinous and an inorganic membrane, 39, 105—In aqueous solutions, 22, 83—Isomeric states of, 15, 80, 215—Property of to combine with phosphoric acid, 16, 187—Solubility in ammonia, 17, 227—Solubility in potash, 3, 342
- Acid, silico-acetic**, and its ether, 28, 203
- Acid, silico-molybdic**, 45, 87
- Acid, silico-propionic**, 21, 106; 22, 22; 24, 146
- Acid, silico-tungstic**, 9, 238, 279—As reagent for alkaloids, 79, 179
- Acid, sodium formaldehyde sulphonylic**, crystalline form of, 92, 105
- Acid, sorbic**, 28, 215; 86, 308—Conversion into amino acids, 90, 46
- Acid, sorbetic**, 22, 202; 25, 202
- Acid, stannic**, and anhydrous acetic acid, combination, 26, 22—And tungstic acid, separation, 9, 23—Colours reactions, 54, 200—Combinations with anhydrous acetic acid, 26, 22
- Acid, stearic**, 59, 178—Decomposition by distillation under pressure, 32, 231—Derived from saponification of tallow, 38, 21—In paraffin, 16, 62, 28—Industry, 23, 16, 31, 54—Obtaining, 26, 88—Preparing, 35, 10
- Acid, stearolic**, action of fusing hydrate of potassa on, 20, 178
- Acid, styphnic**, 23, 179—Derivative of, 26, 71
- Acid, suberic**, 40, 241; 76, 183—Action of baryta on, 1, 59; 10, 6
- Acid, succinic**, 16, 186, 198, 209, 219; 19, 276—Action of ethylene-diamine on, 58, 241—Action of galvanic current on, 1, 264—Amides and anilides of, 25, 227—And alkyl derivatives, formation, 94, 218—And potassium dichromate, interaction, 94, 229—And potassium salts, 96, 242—As a standard in alkalimetry and acidimetry, 96, 44—Constitution, 16, 36; 28, 75, 87, 101—Conversion of in corresponding diatomic alcohol, 24, 73—Cyanamide compounds, 43, 188—Determination, 47, 60; 58, 298—Determination in presence of fixed acids in wines and fermented liquids, 98, 245—Esterification, 96, 194—Esterification, use of zinc chloride in, 97, 112—Estimation, 78, 18—Formation, 70, 50—Formation from chloride of ethylidene, 16, 236; 17, 34—In fermented liquids, estimation, 82, 20—In wines, 31, 186; 33, 128—Oxidation by nitric acid, 30, 83—Preparation from tartaric acid, 47, 10—Preparation of aniline derivatives of, 96, 18—Propylisopropyl, 81, 166—Separation of malic acid from, 66, 261—Series, 33, 176—Solubility in water, 29, 133—Sym-dipropyl, 81, 166—Sym-di-isopropyl, 81, 166—Synthesis, 29, 197—Transformation into maleic acid, 28, 58—Water salts of, action of bromine on, 28, 246, 260
- Acid, sulphalaziric**, 40, 77
- Acid, sulphallylic**, 52, 189
- Acid, sulphanic**, 33, 131; 40, 226; 65, 96—Thio-derivatives, 72, 47
- Acid, sulpharsenic**, separating from sulphydro-arsenic acid, 66, 209
- Acid, sulphindigotic**, 30, 215—Products of oxidation, 5, 252
- Acid, sulphinic**, action on diazo compounds, 36, 214
- Acid, sulpho**, formation, 23, 188; 27, 266
- Acid, sulphobenzoic**, 22, 213—Action of formate of soda on, 28, 279—Isomeric chlorides of, 79, 251
- Acid, sulpho-benzolic**, action of fuming sulphuric acid on, 35, 8
- Acid, sulphobenzyllic**, 19, 10
- Acid, sulphobutyric**, normal, and its salts, properties of, 31, 163
- Acid, sulphocamphenolencarboxylic**, 86, 11; 87, 270
- Acid, sulpho-camphoric**, 74, 288
- Acid, sulphocamphyllic**, 67, 236; 71, 98, 74, 286; 76, 287; 78, 250
- Acid, sulpho-carbaminic**, 27, 131, 322
- Acid, sulpho-carbol**, 51, 130
- Acid, sulpho-carbolic**, 21, 144; 23, 59
- Acid, sulpho-carbonic**, derivatives, 28, 21
- Acid, sulpho-chlorbenzoic**, derivatives, 16, 202
- Acid, sulpho-cyanic**, and its salts, action of mono-chlor-acetic acid on, 36, 224; 39, 206—Formation heat, 45, 149—Stains produced by, 34, 250
- Acid, sulpho-diazo-benzolic**, application for detection of glucose, 48, 149
- Acid, sulpho-fumaric**, 21, 108
- Acid, sulph-hydantoic**, 36, 243
- Acid, sulphomalalic**, 23, 110
- Acid, sulphomalainic**, 22, 226
- Acid, sulphonaphthalic**, 10, 250
- Acid, sulphonic-betanaphthalic**, 59, 59
- Acid, sulpho-nitrotribrombenzoic**, 27, 266
- Acid, sulpho nitrogen**, 21, 58
- Acid, sulpho-orthotoluidic**, 28, 196
- Acid, sulpho-orthotoluidinic**, 29, 52
- Acid, sulpho-parabrombenzoic**, 34, 271
- Acid, sulpho-paraoxybenzoic**, 26, 156
- Acid, sulphophenic**, 26, 269
- Acid, sulphophthalic**, 17, 83; 53, 283
- Acid, sulphosalicylic**, action on borax, 97, 179
- Acid, sulphovinic**, 31, 103—And its salts, preparation, 30, 221—New acid iso-
- merio** with, 9, 178—Production of nitrous ether by means of, 31, 75
- Acid, sulphydro-arsenic**, separating sulph-arsenic acid from, 66, 209
- Acid, sulphydrobenzoic**, 20, 118, 251—Action of fusing caustic potassa upon, 24, 193
- Acid, sulphydrophosphoric**, amides of, 18, 93
- Acid, sulphur**, new, 20, 130
- Acid, sulphuric**, 4, 12, 156; 5, 96; 20, 156, 168; 22, 23, 24, 192, 204; 37, 167, 192, 207; 53, 300; 74, 187, 246; 76, 232—Absorption of nitric oxide by, 55, 28—Action on higher chloro-benzene, 56, 269—Action of, 56, 250, 269; 61, 178; 64, 318; 65, 164, 226; 67, 12; 68, 73; 71, 13—Action of cholic acid with potassic bichromate upon, 39, 94—Action of hot, on platinum and iridium salts in presence of ammonium sulphate, 93, 178—Action of hydrochloric acid upon double salts of, 39, 84—Action of hydrogen on, 76, 325—Action of mercuric iodide on, 91, 256—Action of phenylhydroxylamine on, 79, 216—Action of zinc on, 62, 175—Action on acetylen, 35, 163; 36, 80—Action on aldehyde and paraldehyde, 99, 36—Action on aldol, 50, 187—Action on bromides, 64, 318—Action on camphene, 70, 50—Action on cellulose, 25, 286—Action on chloral, 27, 196—Action on cholic acid, 39, 94—Action on citric acid, 44, 274—Action on copper, 37, 36—Action on decidine, 29, 198—Action on diallyl, 22, 221—Action on elaidic acid, 77, 129—Action on essence of turpentine, 29, 198—Action on fenchone, 80, 254—Action on glucosides, 2, 167—Action on hydrobenzoin and iso-hydrobenzoin, 34, 270—Action on hydrocarbons of formula $C_{10}H_{16}$, 39, 284—Action on iodic acids, 74, 293—Action on laevoterebenthene, 76, 71—Action on lead, 7, 44; 30, 197—Action on laevo-turpentine, 76, 207—Action on mercury, 77, 136—Action on more volatile portion of coal naphtha, 13, 73—Action on morphia and its salts, 36, 228—Action on naphthalene, 33, 151, 156—Action on natural alkaloids, 23, 43—Action on nitrates, 76, 23—Action on opianic acid, 23, 180—Action on organic chlorides which contain nitrogen, 22, 213—Action on peroxide of hydrogen, 2, 107—Action on phenol, 96, 221—Action on phosphates, 41, 220—Action on platinum, 94, 14—Action on polychlorated hydrocarbons, 20, 46—Action on potassium iodide, 47, 277—Action on protocatechuic acid, 46, 36—Action on resorcin, 44, 274—Action on solubility of sulphates, 55, 128—Action on starch, 33, 179—Action on substituted anilines, 28, 20—Action on substituted nitro- and amido-benzols, 43, 198—Action on tin, 44, 237; 45, 69—Action on toluen, 35, 241—Action on wine, 26, 83—Action on wood-charcoal, 69, 78—Action on zinc, 44, 237; 45, 69; 52, 7—Addition to wine, 63, 189—Adulteration, 19, 227—Amount of moisture which it leaves in a gas, 54, 31—And acetic acid, compound of, 4, 333—And aluminium sulphate, compound, 88, 220—And arsenic, separation, 33, 74—And chloral, combinations, 28, 204—And chloronitrous acid, compound of, 11, 22—And elements, reactions between, 79, 261—And ethyl sulphocyanate, 19, 69—And ferric sulphate combination, 88, 33—And manganese dioxide, oxidation of benzoic carbides by, 84, 242—And mercury, reactions between, 77, 40—And morphine, coloured reaction produced by, 55, 47—And nitric acid, mixed anhydride of, 96, 106—And nitric acid, combination, 23, 311—And nitric acid, removal of nitrous acid from

concentrated, 93, 78—And organic acids, combinations, 81, 192—And oxide of iron, 2, 263—And oxides of nitrogen, combination, 21, 24—And potassium ferrocyanide, reaction between, 80, 300—And potassium permanganate, distillation of aqueous solutions of, 73, 122—And sucrose, formation of fructose from, 37, 133—And titanate acid, compounds, 79, 305—And water, contraction on mixing, 65, 14—And water, heat evolved from, 36, 246—And zinc, interaction, 56, 205, 221—Anhydrous, action of chloroethyl on, 27, 304—Anhydrous, action on chlorine and sulphur compounds, 21, 287—Anhydrous, action on perchloride of carbon, 20, 81—Anhydrous, action on sulphurets, 1, 11—Anhydrous, in gaseous products of combustion of iron pyrites, 31, 260—Anhydrous, reactions of, 21, 70—Aromatic, 19, 103—Arsenic in, 5, 95; 83, 107—Arseniferous purification, 61, 40—As manure, 48, 106; 55, 12—As a typhoid disinfectant, 84, 161—Assay of, 30, 228—Attack of platinum by, 93, 108—Behaviour of acids of nitrogen with, 40, 204—Behaviour of alkalis with, 29, 37—Behaviour of hyponitric acid with, 45, 276—Behaviour of permanganate of potash with, 22, 24—Bihydriated, 29, 250—Burns, treatment, 43, 233—Cement to resist, 24, 182, 194—Chamber crystals, behaviour towards water, 25, 263—Chambers, patent for supplying with nitre, 37, 203—Chambers, working of, 47, 266—Commercial, 36, 42, 54—Concentrated, a test for molybdic acid, 21, 166—Concentrated, action of nitroso-carbides on, 79, 216—Concentrated, action on bases in opium, 37, 158—Concentrated, action on cerulignion and hydro-cerulignion, 31, 269—Concentrated, action on lead, 41, 236; 42, 314—Concentrated, and olive oil, different amounts of heat produced by mixture of, 32, 217—Concentrated, and mercury, reactions between, 77, 40—Concentrated, disinfecting properties of cellulose substances carbonised with, 37, 32—Concentrated, electrolysis of, 90, 26—Concentrated, reaction on iodide of potassium, 2, 11—Concentrated, solubility of barium and strontium sulphates in, 45, 22—Concentration, 3, 4; 20, 107; 23, 167; 24, 82, 106; 25, 215; 26, 174; 27, 185; 33, 95; 36, 111; 65, 227—Concentration, apparatus for, 40, 228; 70, 318—Concentration, apparatus for according to systems of Delplace and Prentice, 41, 274—Concentration, in iron vessels, 80, 205—Concentration, solution of platinum in during process of, 32, 281—Constitution, 99, 176—Contact process, 94, 256—Conversion of amylen into amylic alcohol by means of, 26, 265—Crystalline hydrates of, 29, 206—Crystals obtained in manufacture of, 6, 120—Decomposition, 77, 191—Decomposition by hydrogen, 26, 117—Decomposition by hydrogen in pores of carbon, 27, 152—Decomposition by zinc, 27, 116—Density of solution of, 65, 13, 50, 85—Derivatives, 23, 226—Detection, anomalies in, 10, 219—Detection of selenium in, 83, 245—Detection of arsenic in, 22, 214—Detection of free, 47, 247; 51, 201; 56, 105—Determination, 19, 287; 50, 175; 54, 48, 261; 55, 249; 58, 72; 60, 19; 61, 61, 76; 66, 168, 296; 73, 285, 299; 74, 187, 246—Determination by standard solutions, 34, 9—Determination in presence of iron, 81, 185—Determination of equivalent of, 75, 25—Determination of free, 47, 49, 61, 98, 122—Determining strength of, 69, 236—Displacement in alkaline bisulphates by water, 87, 118—Dissociation, 44, 262—Dissociation of fluid,

21, 107—Dissociation of liquid, 20, 258—Dissolution of platinum by, 93, 108—Distilling, apparatus for, 33, 55—Ebullition, 31, 208—Electrolysis, 59, 133—Electrolysis of aqueous solutions, 53, 306—Electrolysis of dilute, 49, 61—Electrolytic properties of dilute solutions of, 98, 98, 118, 127, 158—Electrolytic solution of platinum in, 91, 162—Estimation, 8, 207; 39, 156; 46, 221; 48, 41; 57, 165, 187; 59, 58; 77, 46; 78, 285; 82, 206—Estimation of glycerin by, 76, 64—Estimation of sulphur in presence of, 14, 48—Etherification, 42, 83; 88, 35—Formation, 14, 58; 54, 212; 82, 83—Free, and combined, estimation in alums, 86, 106—Free, detection in acetic acid, 14, 152—Free from arsenic, 35, 76; 40, 45—Fuming, 21, 276; 34, 154; 72, 75—Fuming, action of, 55, 11—Fuming, action on carbides of hydrogen, 33, 64—Fuming, action on ethanal, propanal, and propanone, 86, 60—Fuming, action on ethylic and propylic aldehydes and acetones, 84, 304—Fuming, action on sulphobenzoic acid, 35, 8—Fuming, action on triphenylsilicil, 99, 139—Fuming, analysis, 47, 60—Fuming, viscosity, 98, 315—Gas (see Gas)—Glacial, 26, 60, 72—Heat of neutralisation, 59, 237—Heated to 320°, behaviour with oils, 43, 95—Hydrated, containing arsenic, purification, 99, 252—Hydrates, molecular heat of, 22, 214—Impure, 44, 47—In air, 59, 229—In coal-gas, estimation, 83, 217—In combustion of coal-gas, 74, 24—In concentrated solution, molecular condition, 90, 253—In Eastern Texas, 26, 147—In gaseous mixture, 47, 155—In lead chamber, 49, 13—In living mollusca, 16, 32, 182—In mineral waters, estimation, 86, 245—In presence of aluminium sulphate, 49, 14—In presence of iron, determination, 81, 185—In products of combustion of coal-gas, 74, 24—In pure wines, 47, 60—In red wines, 46, 209—In salts of alkalies, 9, 131—In sherries, 48, 237—In sulphates, 41, 24—In vinegar, 14, 152; 25, 227; 53, 97—In waters, 32, 259—Estimation, 36, 227; 77, 135—In wine, 40, 169; 53, 189—In wines, percentage a sign of sophistication, 35, 206—Industrial preparation in South of France, 33, 129—Influence of neutral salts on, 54, 298—Isolation of tetrahydrate of, 60, 253—Levulinic acid formed during action on sugar, 31, 109—Loss in salt-cake manufacture, 16, 17—Magnetic rotation, 66, 277—Manufacture, 2, 34; 3, 63; 6, 68; 7, 47, 142; 15, 280, 291, 321; 16, 52; 17, 238; 20, 33; 21, 106, 132, 141, 164, 189, 200, 212, 223, 224; 25, 208; 27, 124, 135, 152, 163, 206, 218; 29, 114; 31, 177; 39, 148, 170, 226, 241, 249; 41, 16, 43, 47, 52, 67, 78, 263; 42, 85; 49, 256; 55, 89; 60, 282—Manufacture, action of "Glover's tower" in, 31, 85—Manufacture, and application of a product of such manufacture to bleaching of textile animal and vegetable substances, 4, 123—Manufacture and condensation of nitrous vapours in, 22, 225—Manufacture, apparatus for, 9, 46; 11, 166—Manufacture, apparatus for representation of, 34, 270—Manufacture, crystals obtained in, 6, 120—Manufacture, loss of nitre in, 37, 147—Manufacture, loss of nitric acid in, 30, 83—Manufacture, loss of nitrous compounds in, 43, 78—Manufacture, pyrites-smalls in, 40, 189, 203—Manufacture, sources of sulphur used in, 17, 225—Manufacture, substitution of pyrites for sulphur in, 53, 214—Manufacture, utilisation of nitrogen compounds lost in, 47, 280—Manufacturers, Association of, 40, 302—Manufacturing with, 50, 248—Metal-

lic copper a test for, 5, 126—Monochlorinated, 5, 224—Monohydrate of, 4, 26—Monohydrated, 3, 19—Monohydrated, action on alcohols, 33, 74—Monohydrated, volume weight of, 46, 291—Normal, seminormal, decinormal, &c., preparing of exact strength, 83, 172—Obtainable from pyrites, 14, 22, 48—Obtaining from refuse pickle used in tin plate works and from sulphate of iron or green copperas, 11, 166—Plant, 82, 171—Polarisation of platinum electrodes in, 68, 30—Precipitation of chlorides and bromides of cadmium, mercury, and tin by means of, 86, 138—Precipitation of cupric chloride and bromide with, 86, 95—Precipitation of cupric chloride and bromide by, 87, 203—Preparation, calcining furnaces for desulphurising ores for, 26, 301—Price of, 17, 85—Production, 32, 150; 55, 89—Production from gypsum, 22, 23—Pure, 3, 390; 4, 40—Purification, 9, 73, 98, 286; 52, 297; 53, 109—Purification from arsenic, 2, 24—Purification of arsenical, 9, 73, 225—Reaction on iodide of potassium, 17, 203—Reaction with mercury, 76, 325—Reactions of tin with, 53, 172—Reciprocal hygroscopicity of, 11, 240—Reduction, 93, 119—Reduction by hydrogen, 28, 13—Reduction by nascent hydrogen, 5, 337—Reduction by zinc-amalgam, 23, 245—Reduction to sulphuretted hydrogen, 6, 311—Removal of arsenic from, 1, 240—Removal of last traces after refining petroleum, 42, 186—Removal of nitric acid from by charcoal, 14, 217—Secondary products formed during action on wood charcoal, 83, 312—Seleniferous, 81, 291—Selenium in, 25, 275, 285—Selenium in, detection, 83, 245—Sodium salts of bibasic acids analogous to, 85, 256—Solubility of selenium and tellurium in, 29, 253—Solubility of sulphate of baryta in, 11, 125—Solubility of sulphur dioxide in, 43, 121; 45, 270—Solution of platinum in, 37, 237; 42, 61—Solutions, densities of, 64, 311; 65, 13, 50, 85—Solutions, objections to the work on, 64, 1—Solutions, vapour pressures, 88, 275; 90, 253—Source of error in evaporating over, 68, 211—Substances formed from hydro- and isohydrobenzoin by action of, 37, 162—Table for restoration of weak, to acid of, 98 per cent. H_2SO_4 , 49, 220—Test for anthracene, 44, 279, 230—Testing for, 46, 223—Transformation of amylen into amylic alcohol by means of, 27, 219, Use to oxidise sulphides, 51, 193, 213—Voltmeter of, 68, 12—Volumetric process for, 19, 116

Acid, sulphurous, 19, 103, 129; 27, 46—Action, 65, 227—Action of iodides and hydriodic acid on, 82, 28; 83, 83—Action of sunlight on, 21, 299—Action on compounds of silver, 18, 86—Action on diazo compounds, 36, 214—Action on flowers of sulphur, 65, 48—Action on metals, 23, 293—Action on metals and oxides at high temperatures, 3, 282—Action on phosphates, 23, 136—Action on platinum chloride, 20, 189, 322; 24, 109—Action on pyridine, 82, 35—Action on recently precipitated insoluble sulphurets, 26, 264—Action on sulphur, 10, 193—Action on triphenylmethane dyes, 82, 281—Action when employed for saccharification and alcoholisation of grain, 26, 283—And hydric sulphide, 16, 109—And iodometry, 58, 49—And molybdates, combinations, 68, 25—And ozone, 21, 297—And phosphate of lime, combinations, 20, 267—And soluble sulphates, determination by means of standard solutions, 34, 9—And sulphuretted hydrogen, reaction between, 15, 318—And uranic acid, compounds, 83, 180—Anhydrous,

- action on alcohols, 37, 204.—As a disinfectant, 34, 245, 247.—Behaviour of certain organic compounds of, with resorcinol, 48, 32.—Behaviour of solutions acid with, 53, 37.—Behaviour to alkali, 4, 83.—Bleaching with, 16, 8.—Bleaching silk and wool by liquid, 44, 275.—Constitution, 99, 176.—Density, 65, 107.—Density, 56, 12.—Detection, 22, 71; 47, 248.—Detection of salts of, 95, 166.—Determination, 54, 48, 261; 58, 72.—Determination in alkaline solution, 91, 222.—Dilute solutions formed from hydro- and isohydro-benzoin from action of, 37, 162.—Direct fixation on benzol, 38, 20.—Dissociation, 11, 90.—Econonisation, in copper smelting, 16, 159.—Electrolysis, 36, 90.—Estimation, 81, 40.—Estimation by means of a titrated solution of iodine, 86, 296.—Extraction from oxysulphure of calcium, 9, 11.—Fixation on benzol, 38, 20.—For dissolving bones, 19, 249.—For preserving potatoes, 33, 299.—Freezing machines with, 34, 52.—Fumes, absorbing, 25, 167.—Fuming, 34, 154.—In air, 47, 71.—In air of Manchester, 19, 139.—In atmosphere of towns, 52, 24.—In diazo compounds, 36, 214.—In gaseous mixture, 47, 152.—In products of combustion of coal gas, 74, 24.—In wine, 48, 106.—Injury done to forests by, 37, 204.—Liquid, chemical action on iron, 81, 212.—Manufacture, 16, 129.—Manufacture, and application of a product of such manufacture to bleaching of textile, animal, and vegetable substances, 4, 123.—Mechanism of reduction of potassium bichromate by, 87, 138.—Nitrated naphthyl, 38, 10.—Oxidation, 43, 193.—Oxidation, formation of dithionio acid in, 75, 139.—Oxidation, influence of hydriodic acid on, 89, 238.—Oxidation to dithionio acid by metallic oxides, 84, 287.—Reactions of iodine and potassium iodide with, 39, 19.—Specific heat of liquid, 70, 121.—Sugar refined with, 23, 287.—Test for, 4, 83.—Use in manufacture of sugar, 7, 258.
- Acid, sulphydantoic, 36, 243
- Acid, sulphydric, estimation, 81, 40.—Estimation in coal-gas, 83, 217
- Acid, tannic, 23, 226; 29, 73.—And gallic acid, relation between, 24, 216.—And derivatives, 25, 34.—Artificial, 40, 102.—Behaviour of starch and dextrine towards, 24, 265.—Determination, 45, 58.—Estimation, 8, 54; 9, 22; 29, 101; 32, 11, 101, 90, 111; 98, 316.—Estimation by carbonate of lead, 50, 179.—In catechu, ratanhia, kino, etc., estimation, 22, 216.—In cultivated soils, 31, 21.—In galls, estimation, 5, 177.—Used as a reagent, 51, 114.—Nature and constitution, 28, 180; 31, 107.—Of divi-divi, 32, 260.—Of sumach leaves, 41, 63.—Of the hop, 33, 139.—Preparation, 22, 251.—Reaction, 51, 84.—Sulphuretted, from phloroglucine, 27, 71.—Sulphuretted, synthesis of, 26, 94.—Tests, 59, 52.—
- Acid, tannic, constitution, 12, 20.—In crystals, obtaining, 4, 102
- Acid, tar, in vinegar, 61, 264
- Acid, tartaric, constitution, 81, 312.—Transformation, 73, 257
- Acid, tartaric, 1, 46; 4, 176; 22, 107; 31, 274; 53, 86; 55, 113.—Action of chloracetyl on, 5, 195.—Action of heat on, 19, 143.—Action of pentachloride of phosphorus on, 1, 8.—Action of permanganate of potassa on, 25, 286.—Action on metallic sulphides, 3, 65.—Action on neutral sulphate of potash, 12, 70.—Analysis of materials containing, 58, 37; 60, 109.—And acetic acid, compound, 4, 333.—And citric acid, separation, 5, 106.—And citric and malic acids, distinction between, 57, 230.—And its alkaline salts, behaviour with certain agents, 74, 281.—And phosphoric acid, separation, 49, 267.—And racemic acid, reciprocal conversion of inactive, 27, 134.—And tartar, determination, 47, 278.—Aqueous solution of, 63, 248.—Aqueous solutions of, prevention of mouldiness in, 22, 13.—Artificial production, 1, 244.—Basicity, 15, 4.—Chemical constitution, 28, 75, 87, 101.—Chemistry of, 46, 239.—Chloromaleic from, 7, 211.—Compounds homologous with, 21, 274; 22, 107.—Compounds produced in solutions of, 55, 164.—Curves of solubility in water of, 46, 57.—Detection, 59, 170; 67, 85.—Detection, by means of resorcin, 74, 276.—Determination, 17, 123; 47, 24, 178; 57, 250.—Determination, volumetric method, 97, 299.—Dextro rotating, conversion into racemic acid, 26, 93.—Electrolysis, 17, 32.—Estimating, 18, 63; 19, 179; 22, 228, 240.—Estimation of industrial, 93, 107.—Examination of, 50, 176; 68, 279.—Experiments on solutions of, 56, 259.—Formation from sugar of milk and gum, 1, 194.—Formula of ordinary, 67, 168.—Free, in wine, 38, 154, 274; 42, 95; 49, 94.—In cider, detection, 97, 47.—In citric acid, 50, 236; 80, 6.—In crude tartar, 39, 263; 47, 254.—In grape-juice, 9, 214.—In lees and argol, 39, 182.—In must, 42, 84.—In raw tartars, 80, 36.—In wine, determination, 50, 58.—In wine, estimation, 8, 108, 173.—In wines, 39, 207, 263; 42, 84, 95.—Influence, which temperature exerts on rotatory power of, 26, 157.—Manufacture, 79, 296.—Manufacture, production of racemic acid in, 36, 223.—Optical properties, 53, 294, 304.—Oxidation, 67, 238; 70, 45.—Preparation, 25, 119, 275.—Preparation of chemically pure, 39, 263.—Preparation of inactive, 27, 134.—Preparation of succinic acid from, 47, 10.—Product of, 82, 219.—Pyrogenous derivatives, 37, 147, 250.—Pyro-product of, 82, 231.—Reaction of, 33, 190; 43, 110; 63, 142; 72, 306.—Substituted amides of, 100, 251.—Synthesis, 65, 148, 239.—Testing citric acid for, 25, 23.—Titration with potassium permanganate, 44, 66.—To prevent fungi, 24, 246.—Transformation into oxalacetic acid, 87, 120.—Transformation of benzol into, 19, 191
- Acid, tartronic, 36, 241; 65, 132.—Affinity constants, 77, 235.—Neutralisation heat of, 54, 273
- Acid, tauro-carbaminic, 28, 280; 29, 52
- Acid, telluric, action on para-tungstates, 50, 187.—And iodates, compounds, 83, 62.—Estimation, 70, 275.—Reduction by glucose, 30, 176
- Acid, tellurous, action of hydracids on, 34, 92, 133.—Action on para-tungstates, 50, 187.—Combinations with acids, 50, 127.—Reaction, 28, 227
- Acid, tetracrylic, 35, 164
- Acid, terebic, 28, 204; 79, 223.—Synthesis, 77, 83, 286
- Acid, terephthalic, absorption spectra, 95, 92.—Synthesis, 21, 47
- Acid, terphenylic, 79, 223
- Acid, tetrachloraldehydylbenzoic, 80, 72
- Acid, tetrachlorobenzoylbenzoic, action of pentachloride of phosphorus on, 86, 186
- Acid, tetrahydrofurfuran-aa-dicarboxylic, synthesis, 80, 263
- Acid, tetrahydroisnaphthalic, conversion of tetrahydrotrimesic acid into, 83, 139
- Acid, tetrahydrophthalic, 21, 190
- Acid, tetrahydrotrimesic, conversion into tetrahydroisnaphthalic acid, 83, 139
- Acid, tetramethylene dicarboxylic, 69, 52
- Acid, 888'-8' tetramethylsuberic, bromo- and hydroxy-derivatives, 93, 198
- Acid, tetramethylsuccinic, 29, 265
- Acid, tetramethyluric, 78, 71
- Acid, tetrasulphonic indigotine, 66, 258
- Acid, tetrethylsuccinic, 92, 9
- Acid, tetric, and its homologues, 39, 73; 48, 236
- Acid, thallic, 16, 84
- Acid, theobalactic, 21, 203
- Acid, thiodydrobenzoic, 20, 190; 22, 23
- Acid, thioacetic, 71, 172; 95, 227.—From acetic acid phenol, 15, 292.—Preparation, 72, 64.—Use in analysis in place of hydrogen sulphide, 74, 73
- Acid, thioallophanic, salts of isomeric mercaptoid form of, 87, 200
- Acid, thioamylic, in mother-liquor of coralline, 26, 300
- Acid, thiocarbonic, and some of its salts, 94, 251
- Acid, thiocyanic, anhydrous, 95, 300.—Free, 56, 250
- Acid, thiodilactic, 50, 117
- Acid, thioformic, 90, 304
- Acid, thioglycollic, 36, 64
- Acid, thioglycolic, reaction with iron peculiar to, 40, 253
- Acid, thiolactic, 50, 117
- Acid, thiophenic, 54, 7, 274
- Acid, thiophosphoric, 51, 214.—Methyl and ethyl ester of, 99, 23
- Acid, thiorufinic, 35, 141
- Acid, thiosulphuric, compounds with aldehydes, 94, 171
- Acid, thioviolic, group, coloured salts and derivatives, 99, 234
- Acid, thymotic, 14, 140
- Acid, tiglic, preparation, 88, 221
- Acid, titanic, 23, 214; 75, 134.—And chromic acid, combinations of, 78, 35.—And iron, separation, 21, 120.—And niobic acid, separation, 17, 121.—And phosphoric acid, combination, 53, 252.—And sulphuric acid, compound of, 79, 305.—And zirconia, separation, 10, 91, 218; 14, 33.—And zirconium, separation, 21, 120.—Coloured reactions, 54, 300.—Detection, 4, 84.—Determination, 56, 209.—Estimation, 17, 119; 19, 3.—In clay, 5, 320.—In ores, 73, 123.—In silicates, 1, 143.—In titaniferous iron ores, 28, 93.—Isotomorphism of, 22, 215.—Precipitation, 48, 113.—Preparation, 21, 120.—Reaction for, 52, 104
- Acid, titani-dihydroxymaleic, and detection of titanium, 97, 273
- Acid, toluidenulphonic, 35, 264
- Acid, toluoldisulphic, 26, 156
- Acid, toluolsulphurous, 15, 323; 16, 65; 17, 155
- Acid, tolylpropionic, synthetic formation, 58, 25
- Acid, trans-carbonic, synthesis, 77, 209
- Acid, trans-methylisopropyl-succinic, 73, 152
- Acid, trans-phenylbutane aarar-tricarboxylic, 80, 240, 253
- Acid, triacetic, 66, 33.—Esters of, 94, 58.—Lactone of, 64, 10
- Acid, triazooacetic, and triazooacetone, 96, 290
- Acid, a-triazopropionic, resolution of, 93, 267
- Acid, tribasic [ortho] thioformic, ethers of, 35, 64
- Acid, tribromacetic, 28, 239
- Acid, tribromobenzoic, 19, 214
- Acid, tribromolactic, 37, 174
- Acid, tricamphorylarisnic, 100, 231
- Acid, trichloracetic, 22, 214; 24, 85.—Manufacture from hydrate of chloral, 25, 214.—Preparation of ethers of, 47, 128.—Solutions of, 74, 85.—Reactions, 84, 268
- Acid, trichlorangelactinic, 25, 179
- Acid, trichloracrylic, 16, 84
- Acid, trichlorobenzoic, 20, 190
- Acid, trichlorolactic, 25, 131, 170
- Acid, trichlorobenzoic, 20, 322; 82, 276
- Acid, trichlorocrotonic, 22, 214
- Acid, trichloromethylsulphurous, products of decomposition, 20, 276
- Acid, trichlorophenyllic, forming, 12, 82
- Acid, triglycolamidic, constitution, 23, 204
- Acid, trimellitic, 36, 213
- Acid, trimesic, reduction, 83, 139
- Acid, trimeta-phosphoric, salts of, 32, 8
- Acid, trimethylacetic, 26, 265; 27, 219; 29, 73

- Acid, α - β -trimethyladipic, and β - β -dimethyladipic acid, synthesis, **91**, 134
- Acid, γ , γ -trimethylbutyric, **89**, 226
- Acid, trimethylenedicarboxylic, conversion of glutaric acid into, **91**, 160
- Acid, trimethylglutaronic, cis- and trans-modifications, **89**, 80
- Acid, trimethylglutaric, synthesis, **79**, 9; **83**, 217
- Acid, trimethylglutaric, α - γ , synthesis, **87**, 295
- Acid, trimethylsuccinic, **71**, 208; **79**, 55
- Acid, trimethyluric, **80**, 231
- Acid, α β -trimethyl- β -oxyadipic, **81**, 226
- Acid, trimethylsuccinic, bromination, **84**, 300
- Acid, trioxybenzoic, thermic examination, **83**, 11
- Acid, trioxymaleic, **45**, 130
- Acid, triphenylacetic, **53**, 73
- Acid, triphenylamine, **96**, 23
- Acid, trisulphonic indigotine, **66**, 258
- Acid, trisulphoxybenzoic, **38**, 48
- Acid, trithiocyanuric, **53**, 143
- Acid, trithionic, **13**, 139, 189; **23**, 275
- Acid, tropic, artificial formation, **42**, 110
- Acid, tungstic, **7**, 143—Absorption by charcoal, **17**, 157—And manganese, separation, **75**, 26—And silica, separation, **84**, 75; **98**, 294—And silicic acid, separation, **84**, 3—And stannic acid, separation, **9**, 25—And stannic oxide, separation, **59**, 73—And vanadic acid, separation of, **61**, 220—Colloidal, **45**, 100—Constitution of complex mineral acids derived from, **45**, 100—Determination, **84**, 75—Determination and separation from other substances, **97**, 299—Determination in wolframite ores and concentrates, **95**, 19—Ether of, **14**, 153—Mineral colours with, **47**, 281—Preparation, **38**, 47—Property of to combine with phosphoric acid, **16**, 187
- Acid, tungstoboric, and its salts, **42**, 209; **44**, 214
- Acid, ulmic, **17**, 70
- Acid, umbellulonic, reduction, **95**, 91
- Acid, undecylenic, **38**, 273; **53**, 105—Hydrobromides of, **84**, 263
- Acid, uramidobenzoic, and derivatives, **20**, 202; **25**, 109, 121, 179
- Acid, uramidodacrylic, derivatives, **26**, 252
- Acid, uramidonitrophenylic, **25**, 118
- Acid, uranic, and sulphurous acid, compounds, **83**, 180—Complex compounds of, **87**, 98
- Acid, urethanbenzoic, **38**, 34
- Acid, uric, **21**, 203, 216; **22**, 178; **32**, 209; **38**, 259; **59**, 240; **74**, 25—Absorption spectra in relation to colour and chemical structure, **91**, 266—Action of bromine on, **30**, 196—Action of iodic acid on, **83**, 181—Action of iodine on, **29**, 92—Action of peroxide of manganese on, **16**, 225—Action of water on, **32**, 29—And derivatives, action of nitrites of alkalis on, **20**, 131—And glucose, decomposition by alkalis, **45**, 87—And its products, **12**, 197—Behaviour with glycerin, **49**, 236—Calculus, **20**, 171—Certain substances derived from, **36**, 101—Decomposition by bromine, **9**, 260; **10**, 121—Derivatives, **1**, 131; **28**, 196—Derivatives, acid constants of, **94**, 251—Determination, **20**, 171; **44**, 215; **53**, 24, 36; **57**, 243; **61**, 132; **63**, 37; **66**, 173; **72**, 40; **74**, 25—Estimation, **12**, 25, 47; **25**, 263, 287; **66**, 106; **82**, 182; **83**, 181—Extraction of, **51**, 121, 241—Fermentation, **73**, 257; **74**, 84—Formation heats, **62**, 12—Formula of, **30**, 42—Group, **25**, 94; **26**, 276; **31**, 196; **32**, 156; **38**, 259; **39**, 28, 41—Group, determination of alkalis in salts of acids of, **30**, 53—Hydrates of, **70**, 37—In animal body, place of origin of, **53**, 290—In guano, **74**, 229—In soil, composition of, **13**, 274—In urine, **5**, 51—In urine, conditions of solution of, **74**, 318—In urine, solvent treatment of uric acid calculus, and quantitative determination of, **20**, 171—
- Preparation, **17**, 141—Preparation from Peruvian guano, **18**, 77; **19**, 215—Substances derived from, **36**, 101—Synthesis, **29**, 37; **59**, 279—Synthetic experiments on, **25**, 34—Tests for, **13**, 91—Transformation into glycolic, **17**, 179
- Acid, uric, **20**, 106
- Acid, uroerythric, blue and red colouring matters of, **14**, 177
- Acid, uroxoanic, **22**, 178
- Acid, usnic, **33**, 231—And carbon-usnic acid, identity of, **38**, 91
- Acid, uric, **21**, 58; **39**, 74
- Acid, valerianic, **21**, 263; **24**, 73, 109; **26**, 227; **27**, 131, 269—In valerianates, **21**, 166—Isomers of, **20**, 60; **26**, 265; **28**, 57—Preparation of pure, **56**, 80—Reduction of angelic acid to, **21**, 70
- Acid, valeric, **5**, 122—Isomeric forms of, **17**, 45—Purification, **35**, 155
- Acid, valerolactic, **13**, 202
- Acid, vanadic, **5**, 103—Action, **56**, 279; **57**, 70—Action of hydrogen acids on, **53**, 311—Action of reducing agents on, **53**, 35—Action on alkaline haloid salts, **54**, 47—Action on ammoniacal salts, **53**, 252, 274—And antimonious acid, estimation in presence of one another, **100**, 225—And arsenic acid, estimation in presence of one another, **100**, 225—And chromic acid, separation, **69**, 54—And metals, separating, **47**, 101—And oxygen acids, combinations, **53**, 191—And tungstic acid, separation, **61**, 220—And ethenol, colour reactions of, **89**, 82—And molybdic acid, determination in presence of one another, **97**, 245—Compounds, **2**, 59—Determination, **55**, 203; **66**, 27; **68**, 77, 89, 101, 132; **70**, 157, 168, 178, 190—Estimation, use of zinc reductor in, **87**, 265—Reduction, **70**, 205—Reduction by action of hydrochloric acid, **87**, 133—Reduction by hydriodic and hydrobromic acids, **74**, 202—Reduction by zinc and magnesium, **98**, 2
- Acid, vanillic, derivatives, **35**, 104
- Acid, veratric, **4**, 70; **33**, 242
- Acid, vinylacetic, addition products of, **87**, 311
- Acid, vinylidimethylacetic, **90**, 117
- Acid, violuric, **49**, 116—Colour of aqueous solutions of, **99**, 247
- Acid, viridinic, **17**, 59
- Acid, vulpic, **48**, 83
- Acid, vulpinic, **1**, 311
- Acid, xanthic, **6**, 108
- Acid, xanthoacetic, diethyl ether of, **32**, 84
- Acid, xanthogenic, **43**, 259
- Acid, xylic, **73**, 208
- Acid, xylinic, **73**, 208
- Acid, xylosulphurous, **18**, 188
- Acid, xylylic, **23**, 41, 80
- Acid, xylylsulphamic, preparing, **79**, 191
- Acid, xylylsulphuric, and derivatives of benzol, **18**, 168
- Acid acetates (see Acetates)—Alcohols (see Alcohols)—Aldehydes (see Aldehydes)—Amide, isethionic (see Amide)—Amide, Naphthalin-carboxyl- (see Naphthalin-carboxyl-acid-amide)—Amides (see Amides)—Amidins (see Amidins)—Ammonium oxalate (see Ammonium)—Ammonium sodium tungstates (see Ammonium)—Anhydrides, sulphonic (see Anhydrides)—Aniline ortho-sulphates (see Aniline)—Calcium phosphate (see Calcium)—Cerium sulphate (see Cerium)—Chloride (see Chloride)—Chlorides (see Chlorides)—Cyanides (see Cyanides)—Diuramide, diglycolamido (see Diuramide)—Dyes (see Dyes)—Esters (see Esters)—Ether (see Ether)—Ethers (see Ethers)—Ethyl-ether (see Ethyl-ether)—Fermentation (see Fermentation)—Fertilisers (see Fertilisers)—Fruits (see Fruits)—Fumes (see Fumes)—Fuschine (see Fuchine)—Gases (see Gases)—Hydrazides (see Hydrazides)—Imid-chlorides (see Imid-chlorides)—Imides (see Imides)—Ions (see Ions)—Leathers (see
- Leathers)—Magenta (see Magenta)—Magentas (see Magentas)—Malate (see Malate)—Methyl-ether (see Methyl-ether)—Mineral substance (see Mineral)—Oxalates (see Oxalates)—Periodides (see Periodides)—Phenolic salts of dibasic acids, **79**, 236—Phosphites (see Phosphites)—Phosphoglycerates (see Phosphoglycerates)—Polymers (see Polymers)—Potassium platonitrite (see Potassium)—Potassium tartrate (see Potassium)—Proof, exsiccator (see Exsiccator)—Radicals (see Radical)—Radicles (see Radicles)—Salts (see Salts)—Slags (see Slags)—Sodium sulphates (see Sodium)—Soils (see Soils)—Sulphate of neodymium (see Neodymium)—Sulphate of praseodymium (see Praseodymium)—Sulphates (see Sulphates)—Tartrate (see Tartrate)—Tar (see Tar)—Thiocyanates (see Thiocyanates)—Vapours (see Vapours)—Water (see Water)—Waters (see Waters)—Wine (see Wine)
- Acids, **1**, 220; **69**, 289; **94**, 101—Acrylic series of, transformation of lactic into, **11**, 295—Action of arsenious hydride on, **35**, 235—Action of dehydrating agents on, **42**, 109—Action of light on in presence of uranium salts, **74**, 55, 67, 79—Action of metals on, **53**, 211—Action of water on, **64**, 284—Action on alcohol, **8**, 9—Action on alkaline haloid salts, **75**, 35—Action on amine salts, **84**, 36—Action on bases, **85**, 251—Action on blood, **66**, 62—Action on carbonates of alkaline earths, **83**, 178—Action on cellulose, **87**, 20—Action on diiodo- α -methylsartein, **99**, 36—Action on litmus, **61**, 2—Action on metals and alloys, **14**, 3—Action on metals employed in arts, **53**, 240—Action on salts without intervention of a solvent, **39**, 252—Affinities of, comparing, **82**, 105—Affinity of casein for **11**, 44, 208—Aldehydes and anhydrides of, **99**, 108—Aldehydes as, **93**, 128—Amides of, action of phosphorus pentachloride upon, **46**, 255—And alcohols, simultaneous reaction of several, **8**, 20—And aldehydes and alcohols, thermic relations among, **71**, 281—And anhydrides, action on terphenols, **57**, 181—And bases, action on solutions of tartar emetic, **54**, 23—And bases, distribution of dissolved, **47**, 141—And bases, heat developed in combination, **23**, 1—And bases, heats of neutralisation, **75**, 271—And bases, relation between strengths of, and the quantitative distribution of affinity in the molecule, **99**, 90; **100**, 23—And metals, action between, **99**, 187—And metals, interaction, **59**, 202—And salts, and alkalis, combination of solid hydrates of dioxides with, **44**, 72—And salts, molecular refraction of dissolved, **71**, 313—And salts, superoxygenated, in solution, **90**, 11—And sugar, compounds, **3**, 15—Anhydrides of, action on organo-metallic compounds of magnesium, **83**, 179—Anhydrides of, of fatty series, action on polymerised methanol, **87**, 119—Anhydrides of, preparation of, **99**, 108—Anhydrides of, reaction of certain, **94**, 71—Antiseptic action of, **40**, 57—Application of powerful optically active, to resolution of externally compensated basic substances, **80**, 264—Application of powerful optically active, to resolution of feebly basic substances, **80**, 264—As accelerators in acetylation, **99**, 297—As accelerators in acetylation of amino-groups, **97**, 273—Auxiliary, in etherification, **37**, 273; **38**, 8—Basicity of, **22**, 59; **59**, 85—Behaviour with water at high temperatures, **15**, 323—Belonging to acetic, lactic, and acrylic series, constitution, **12**, 148—Belonging to uric acid groups, determination of the alkalis in the salts of, **30**, 53—Borax as an

ultimate standard for, with methyl orange as indicator, 74, 107—Causes of reciprocal displacement of two, 77, 188—Chemical neutralisation of, 64, 112—Chlorides of, action on organo-metallic compounds of magnesium, 83, 129—Chlorides of, action on soda-derivatives of substituted acetylacetic ethers, 87, 215—Chlorides of, formation, 20, 130—Chlorides of, of fatty series, action on polymerised methanal, 87, 110—Combined with albumin, determination, 91, 200—Combined with mercuric oxide, reciprocal displacement of, 46, 21—Comparative affinity values of, 83, 21—Compounds of, effect of phenylacetic, nitroso-derivatives and the carbamides with, 95, 240—Compounds of two, 4, 333—Containing the ethylenic function, action of hypiodous acid in the nascent state on, 94, 125—Containing two adjacent ethenoid groups, 100, 237—Decomposition of sugars under influence of, 74, 233—Derivation of etherised alcohols on, 27, 268—Derived from dibromocamphor, 81, 140—Determination, 58, 293—Determining ratio of distribution of a base between two, 85, 102—Diacyanides of di-molecular constitution, 68, 98—Distribution of a base between two, 54, 60—Effect on interior of iron wire, 29, 118—Effect on vegetable and animal fibre, 93, 152—Electric conductivity, 50, 164—Electrolysis of dilute solutions of at low potentials, 94, 36—Ethereal derivatives, 21, 70—Fluorides of, 73, 107—Formation from aldehydes, 53, 128—Formation in vegetables, 84, 208—Formed from levulinic acid, 56, 36—Formed when hydrogen of amides of toluol-sulpho acids is replaced by radicals of acids, 23, 46—From butyl-alcohol, 23, 22—From palm-oil, 16, 26—Fuming of, 19, 23—Having a pyranic radical, 94, 77—Heavy metal salts of very feeble, 94, 100—Hydrolysis of amygdalin by, 100, 33—In crab oil, 21, 169—In mother-liquors of coralline, 27, 21—In oils, 28, 157—In plants, identification, 73, 295—In salts, volumetric determination, 91, 66—In seeds of yellow lupines, 23, 35—In solution, estimation of mixtures of, 1, 108, 141, 153, 179—In wines, determining the fixed and volatile, 98, 16—Inactive, biological method for resolving into their optically active components, 87, 114—Incomplete, electrolytic reduction, 88, 11—Influence of sodium salts on solubility of sparingly soluble, 92, 6—Influence on iron and steel, 27, 176—Influence on velocity of formation of acetoxyne, 97, 111—Influence of cane sugar by, 32, 271—Methodic degradation, 89, 191—Molecular refraction, 76, 66—Neutralisation and basicity of, 21, 203—Nitrating, relationship of cellulose to, 84, 61—Obtained from *a-di* bromocamphor, constitution, 83, 295—Of acetic series, decomposition, 19, 175—Of acetic acid series; solubilities of calcium salts of, 85, 103—Of acetylene series, 80, 240—Of acetylene series, combination of thiophenol and guaiacol with, 82, 173—Of aromatic series, synthesis of, 27, 106—Of bigonia catalpa, 87, 71—Of carbon, synthesis, 42, 96—Of cocoa butter, 3, 25—Of complex function, reduction of ether salts of, 88, 137—Of complex function, titration, 84, 11—Of ethylene series, action of iodine and yellow oxide of mercury on, 90, 328—Of fatty series, chlorides and bromides of, action on polymerised methanal, 87, 110—Of fatty series, distillation of first, 73, 245—Of fatty series, melting and solidification points of, 73, 65—Of fatty series, pyrogenous decomposition, 52, 329; 53, 96—Of formic acid series,

catalysis of, 100, 183—Of formula $R-CH-CH-CH-CO H$, action of nascent hypiodous acid upon, 97, 119, 179—Of lactic series, oxidation, 15, 223—Of nitrogen, behaviour with sulphuric acid, 40, 204—Of oxalic series, solubility in water, 79, 226—Of phenol, reactions of sulpho-conjugated, 24, 207—Of phosphorus, 1, 118; 4, 253—Of selenium, reduction, 72, 156—Of sulphur, separation of dithionio acid from, 83, 5—Of thionio series, 8, 100—Of wood vinegar, 38, 254—On cast iron and steel, carbides of hydrogen produced by the action of, 30, 41—Optically active salts of, containing adjacent unsaturated groups, 98, 229—Of alkalies, mixtures, in solution, 1, 108—Oxidation, 77, 234—Part played by in dyeing with alizarin and its congeners, 23, 42—Pigments formed on heating urine with, 50, 47—Polyatomicity of, 15, 80, 215—Possessing formula $C_5H_6O_4$, 35, 39—Pouring out, 61, 205—Pseudo (*see* Pseudo acids)—Rate of dissolution of metals in, 59, 202—Ratio of solution of zinc in, 74, 303—Reactive value of components of, 45, 253—Reciprocal displacement, 31, 185—Recognition in presence of acetic acid, 74, 276—Relation of taste to degree of dissociation, 77, 91—Relative strengths of, 93, 284—Replacing, 37, 84—Report on methods of conveying, 40, 23—Richer in carbon, transformation of aromatic monamines into, 18, 77—Salts of, belonging to uric acid group determination of alkalis in, 30, 53—Separation and determination of, 58, 220—Solubility of strychnine in, 47, 270—Speed of reactions of Iceland spar with, 57, 263—Standardising, 26, 261; 68, 246—Strong, gun-cotton as filter for, 2, 35—Synthesis of, 21, 143—Two new series, 1, 239—Succro-lactic action as contrasted with that of enzymes, 91, 167

Acids, acetic and benzoic, heat of neutralisation by aniline in a benzene medium, 98, 47—Acetic, esterification constants of substituted, 79, 54

Acids, acetoximic, 48, 106

Acids, acetylen-dicarboxylic, 41, 122

Acids, acetylenic, 83, 239; 87, 154; 89, 226—Addition of iodine to, 95, 248—Condensation of amides with esters of, 99, 167—Decomposition by the alkalis, 89, 226—Formation of 4 pyrone compounds from, 97, 128; 98, 34—Hydration, 87, 192; 89, 226

Acids, acetic, action on salts of hydroxy acids, 79, 224

Acids, acrylic, action of fuming nitric acid on substituted, 85, 167—Esterification constants of substituted, 91, 158; 95, 273; 99, 105, 246

Acids, alicyclic non-saturated, stereoisomerism in the group of, 93, 280

Acids, adipic and pimelic, converting substituted into cyclic compounds, 96, 35

Acids, alcohol, action, 71, 13

Acids, alcoylcyanacetic, 83, 130

Acids, aldehyde, 65, 75

Acids, aliphatic, azoamides of the monobasic, 99, 91—Hydrogenation of anhydrides of, 96, 70

Acids, alkylpropionic, optically active, 78, 251

Acids, alkyl-sulphinic, preparation, 90, 45

Acids, allynitrous, synthesis, 47, 270

Acids, amide, derived from albumines, synthetic union, 93, 56—Transformation into phenyl-hydantoins, 82, 255

Acids, amidic, 36, 247; 46, 291; 70, 73—Alkylene substituted, 44, 306—Behaviour with magnesia, 50, 31—More complicated, derived from meta-amido benzoic acid, 53, 264

Acids, amido, 25, 46—Action of potassium cyanate on, 19, 10—And alkaloïds, relations between, 20, 33—Aromatic, 42, 110—Aromatic, con-

taining alcohol radicals, 27, 23, 320—Aromatic, derivatives, 21, 251—From chlorhydracrylic and chlorallylic acids, 17, 65—Reactions, 35, 163—Solubility of copper oxide in alkaline solutions of, 35, 163—With alcohol radicals, 41, 172

Acids, amidobenzoic, 67, 158—Isomeric, 38, 113—Isomerism of, 67, 145, 204—Reactions, 65, 295; 71, 104

Acids, amidocumenic, isomeric, 33, 75

Acids, amidomonochlorosulphobenzidic, 27, 106

Acids, amidotoluylenisulpho, 22, 214

Acids, aminic, aldehyde disulphites of, 44, 306

Acids, amino, conversion of sorbic acid into, 90, 46

Acids, aminocarboxylic and aminosulphonic, affinity constants of, 95, 20

Acids, aminosulphonic, affinity constants of, 96, 8—And aminocarboxylic, affinity constants of, 95, 20

Acids, ampelechoic, 67, 25

Acids, angelico, of different origins, 39, 34

Acids, anhydrous, action of dehydrating agents on, 39, 54—Action of stable, on stable anhydrous bases, 37, 21—Action upon anhydrous bases, 30, 221—And water, 37, 21

Acids, antimonie, 76, 241; 81, 67; 83, 160

Acids, aromatic, action of melting soda upon, 40, 216—And phenols, 43, 84—In phenol solution, 90, 291—Neutralisation, 52, 224; 53, 96—Synthesis, 18, 151; 19, 299; 27, 283

Acids, arsenic, action of alkalis on mono and dimethyl, and their iodine substitution products, 98, 47—And methyl arsenic, 96, 35—Ethers of, 22, 107

Acids, arsinic, aromatic, 97, 307

Acids, arsonic, aromatic, 97, 307; 98, 268

Acids, aspartic, 58, 12, 244

Acids, atrolactic and *p*-methoxyatrolactic, comparative study of, 97, 263—

Acids, azaurolic, 46, 255

Acids, azo-ortho-carboxylic, preparation, 99, 22

Acids, benzarsenic, and derivatives, 44, 250

Acids, benzene-sulphonic, diazo derivatives, 36, 214

Acids, benzoic, acidimetric value of mono-substituted, 83, 102—And acetic, heat of neutralisation by aniline in a benzene medium, 98, 47—Brominated, 36, 231—Diortho-substituted, 71, 239; 75, 138; 79, 54; 89, 19—Substituted, 49, 288

Acids, benzobisulphuric, 33, 242

Acids, benzolsulpho, 20, 100; 21, 242, 255; 24, 97—Bromised, 28, 83

Acids, benzoquinoncarbonic, 55, 104

Acids, benzoylised, derivatives, 84, 32

Acids, benzylaminocarbonic, reduction of, 79, 144

Acids, benzylanilinesulphonic, 82, 46

Acids, bibasic, 15, 148—Action of isocyanate of phenyl and isothiocyanate of phenyl on, 81, 202—Anilides of, action of acetic anhydride on, 78, 270—Chlorides of, 58, 25; 62, 202—Chlorides of, action of, 66, 302—Ethers of, action on organo-metallic compounds, 83, 202—Formation, 45, 123—Imides of, 46, 280—Monochlorides of, 24, 45—Organic, 65, 36, 311—Sodium salts of analogous to sulphuric acid, 85, 256

Acids, bidecylsuccinic, symmetric, 78, 84

Acids, bile, modification of Pettenkofer's reaction for, 46, 110—Reactions and detection in urine, 39, 135

Acids, biliary, behaviour with glue and glue-peptone, 53, 24—Detection, 61, 130—Modification of Pettenkofer's reaction for, 44, 227

Acids, borotungstic, 99, 22

Acids, bromacetic, ethers of, action of hexamethylenetetramine on, 83, 23

Acids, bromo- (*see* Bromo-acids)

- Acid, bromoacetic, *a*-bromopropionic, and *a*-bromobutyric, and their sodium salts, interaction with water and alkali, 100, 254
- Acids, *d*-bromo- and *d*-chloro-camphorsulphonic, isomeric forms of, 91, 198
- Acids, bromocinnamic, 88, 252
- Acids, bromonitrophenylacetic, isomeric, 35, 164
- Acids, bromophenolsulpho, 22, 288
- Acids, bromosulphobenzolic, 33, 261
- Acids, bromosuccinic, 77, 116
- Acids, butyric, 25, 263
- Acids, $C_8H_{14}O_4$, formed from butyric acid, 43, 12
- Acids, camphenesulphonic, derivatives, 74, 107, 279
- Acids, camphoacetic and β -camphopropionic, 92, 57
- Acids, campholenic amides and, 71, 245
- Acids, campholic and isocampholic, direct transformation of borneol into, 98, 84
- Acids, β -camphopropionic and camphoacetic, 92, 57
- Acids, camphoric, 61, 216—Chemistry of, 60, 307—Configuration, 81, 141—Constitution, 36, 120
- Acids, carbon, of synthetic pyridic bases, 50, 285—Synthesis, 42, 96
- Acids, carboxylic, electrolysis of, 100, 316—Synthesis of aromatic, from hydrocarbons, 98, 222
- Acids, cetic, 75, 237—Action of phenyl isocyanate and aniline on, 81, 264
- Acids, chloroacetic, ethers of, action of hexamethylenetetramine on, 83, 23
- Acids, chloralic, 99, 180
- Acids, chloric-acetic, ethylic ethers of, 74, 37
- Acids, chlorobenzeneazosalicylic, 74, 106
- Acids, chlorobenzene, rotation of the methyl esters of the isomeric, 88, 253
- Acids, chlorobromobenzoic, rotation of the methyl esters of the isomeric, 90, 251
- Acids, *d*-chloro-camphorsulphonic and *d*-bromo-camphorsulphonic, isomeric forms of, 91, 198
- Acids, chlorochromic, preparation, 52, 36
- Acids, *a*-chlorocinnamic, 91, 158
- Acids, chloronitrobenzoic, rotation of methyl esters of isomeric, 93, 125
- Acids, chlorophenol sulpho, 23, 155
- Acids, chloropyridine carboxylic, 77, 283
- Acids, chromo-organic, 55, 43; 57, 108; 90, 254
- Acids, chromosulphochromic, 77, 45
- Acids, cinnamic, 100, 250—Addition of bromine to α - and β -chloro- and bromo- and their methyl esters, 95, 273—Isomeric, 95, 179— β phenylpropionic, menthyl and bornyl esters of, 96, 316
- Acids, *cis*- and *trans*-methyl isopropyl glutaric, 81, 261
- Acids, coal-tar, 99, 60
- Acids, coloured, acidimetry of, 40, 289; 41, 110—Determination, 44, 47
- Acids, complex, 61, 267—And inorganic, 48, 155—Containing boric acid, 42, 282—Organic, transformation of olefiant gas into, 2, 119, 121
- Acids, crotonic, 22, 84—Substituted, 89, 262— α - and β -isomerism of, 90, 166, 264
- Acids, cyanuric, isomeric, 40, 22
- Acids, cyclic and acyclic, preparation of anhydrides of, 99, 204
- Acids, di-, of oxalic series, 76, 183
- Acids, dialcylamido-benzoyl-benzoic, action of phenyl-magnesium bromide on ethers of, 94, 96
- Acids, dialcylamidobenzylbenzoic, 84, 32
- Acids, dialcylamido-ortho-benzoylbenzoic, and derivatives, 84, 12
- Acids, dialcylhydrazyl, 80, 148
- Acids, dibasic, acid phenolic salts of, 79, 236—Action of acetyl chloride on, 35, 105; 36, 243—Action of acetic anhydride on, 36, 243—Normal series of fatty, 100, 231—Organic, dissociation, 77, 274—Organic, electrolytic synthesis, 66, 91
- Acids, dibromobenzoic, rotation of methyl esters of isomeric, 93, 20
- Acids, dibromophenol-sulphonic, nitration products of, 25, 284
- Acids, dicarboxylic, acid esters of an symmetrical, 83, 138—Action of organic magnesium compounds on, 100, 304
- Acids, dichlorophenolsulphonic, nitration products of, 24, 310
- Acids, dihydrobrazilinic and dihydrohaematoxylinic, synthesis of lactone of, 96, 317
- Acids, dihydroxyadipic, 96, 29
- Acids, dihydroxybenzoic, 46, 219
- Acids, dihydroxyphenyl-acetic, -glycolic, and -glyoxylic, derivatives, 89, 166
- Acids, diisopropylsuccinic, symmetrical, 79, 283
- Acids, dilute, absorption, by silk, 74, 105—Action on albumin, 82, 12—Circumstances which affect the rate of solution of zinc in, 74, 303
- Acids, dimethylglutaric, 73, 152; 77, 94; 88, 216
- Acids, dimethyl glutolactonic, 82, 35
- Acids, dimethyl pimelic, isomeric, 71, 73
- Acids, dimethylsuccinic, 73, 152
- Acids, dinitrobenzoic, rotation of methyl esters of three isomeric, 94, 218
- Acids, dinitrodiphenylamine *o*-sulphonic, 97, 308
- Acids, dinitrotoluen-sulphonic, 35, 64
- Acids, dioximidosuccinic, isomeric, 95, 251
- Acids, dioxyposphinic, 60, 49
- Acids, disulphonic, of toluene, 72, 58—Of toluene, of ortho- and para-toluidine, and of ortho- and para-chlorotoluene, 78, 250
- Acids, *a*-dithiodibutyric, *a*-dithiodiisobutyric, and *a*-dithiodiisovaleric, diethyl esters of, 99, 297
- Acids, dithiodiglycolic and dithiodilactylic, esters of, 98, 242
- Acids, ethyl barbituric, electrolytic reduction, 97, 23
- Acids, ethylbenzolsulphonic, 31, 41
- Acids, ethylnaphtholsulpho, 22, 84
- Acids, ethylphenol, 31, 41
- Acids, fatty, 63, 11—Action of metals on hot, 87, 179—Action of phenyl substituted, 71, 15—Action of sodium on ethers of, 18, 281—Action of zinc powder on, 88, 221—Action of zinc powder on unsaturated, 83, 167—Amides of, formation, 24, 35—And resin, separation, 64, 204—And resin acids, shellac acids in separation of, 75, 70—And soaps, action in animal body, 60, 197—And suggested application of photography, 33, 126—And their alkaline salts, 31, 269—And their derivatives in phenol solution, 88, 275—Anilides of normal, melting-points of, 97, 261—Benzoylation in presence of ammonia, 84, 274—Biochemical synthesis of, 96, 268—Chlorides of, action on soda derivatives of acetylacetic ethers, 87, 203—Chloro-derivatives, 15, 241—Combustion heats, 53, 297—Constituent of palm-nut oil, 26, 182, 194—Constitution, 78, 313; 80, 300—Containing halogens, derivatives of, 69, 224—Converting into their alcohols, 20, 190; 23, 143—Converting oleic acid into solid, 64, 297—Cooling curves of, 78, 164—Derivatives, 15, 6—Determination of volatile, in butters, 95, 229—Determining fixed organic, in wine, 47, 84—Electrolysis of, 74, 85—Esterification constants of normal, 97, 81—Ethers of monobasic, action on mixed organo-magnesium compounds, 83, 118—For candles and soap, 9, 291—Formation of amides of, 24, 35—From wool and soapsuds, 21, 131—Halogen derivatives of, 35, 185—Hydrates of, 97, 310—Hydrocarbon formed on distillation of crude, in presence of superheated steam, 32, 50—Identifying, 89, 311—In alizarin oil, 61, 52, 76, 84—In contaminated waters, 85, 143—In fusel oil, 23, 213—In oils, 42, 211—In oils, free, 48, 258; 60, 34—In soap, 50, 68; 55, 165; 56, 58; 58, 60—Isocitramine, etherification of, 77, 117—Manufacture, 24, 193—Melting-points of the anilides, *p*-toluidides, and *a*-naphthalides of normal, 97, 261—Monobasic hydrates of, 27, 34—Neutral fats in mixtures of, 47, 72—New source of first terms of, 20, 124—Of butter, 42, 72; 66, 188, 235, 294—Of cotton-seed oil, action of nitrate of silver on, 80, 134—Of series $C_nH_{2n-4}O_2$ di-iodo addition products of higher, 100, 183—Oxidation, 54, 62—Phenyl substituted, antiseptic action, 71, 15—Phenylated, synthesis of, 38, 141—Preparing bromised, 55, 165—Reaction for, 87, 146—Salts, stability in presence of water, 31, 185—Separation, Wechsler's method of, 75, 138—Solubility of, 58, 133—Solubility of salts of lower, 89, 193—Tetrachlorhydroquinone, for identification and separation, 80, 59—Thiocarbimides derived from complex, 74, 290—Transformation of ethereal salts of *a*-brominated, into ethereal salts of *a*-iodated, 95, 311—Undecomposed fats in mixtures of, determination, 47, 72—Unsaturated, 71, 75—Use of lime-water, to fix, in water used to feed steam-boilers, 36, 204, Volatile, production from washing waters of wools, 76, 326—Volatile, separation, 72, 37—Volatile, synthesis, 11, 225
- Acids, fixed and volatile in wine, determination, 98, 162
- Acids, free, determination, 66, 225—Mineral, in various commercial products, 37, 211, 237—Mineral, in vine gar, 41, 110—Of bees-wax, extraction, 71, 22
- Acids, gallic and tannic, action of reducing agents on, 98, 316
- Acids, glaucenic, 79, 107—Of different origin, 48, 281
- Acids, glycerylphosphoric, relation between natural and synthetical, 91, 126; 94, 251
- Acids, glycolamidic, 15, 140; 20, 287
- Acids, glyoxylic, of aromatic series, action of hydrazines on, 74, 17
- Acids, halogen, analysis of mixtures of, 100, 75
- Acids, haloid, action, 68, 6—Action on hydrocyanic acid, 45, 161
- Acids, hemipinic, 4-methoxyphthalic, and 4-hydroxyphthalic, fluoresceins and eosins from, 96, 242
- Acids, homoterpenylic, terbic and terpenylic, synthesis of, 94, 302
- Acids, hydrazinacetic, 77, 166
- Acids, hydroferrocyanic and sulphuric, compounds of, 92, 57
- Acids, hydrogen, action on vanadico acid, 53, 311
- Acids, hydroxy- and alkyloxy, affinity constants of 99, 246—Dehydration of, molecular transpositions and migration of carboxyl group in, 92, 266—Esters of, Grignard reaction applied to, 90, 302—Salts of, action of acidic oxides on, 74, 253; 79, 224
- Acids, hydroxybenzoic, electrolytic oxidation, 92, 0; 97, 308—Oxidation products of, 92, 290; 93, 91
- Acids, hydroxybutyric, optically active, 84, 287
- Acids, hydroxycarboxylic, action of heat on, 89, 81, 294
- Acids, *a*-hydroxycarboxylic, action of heat on, 92, 292; 96, 29; 97, 165
- Acids, 3-hydroxyphthalic and 3-methoxyphthalic, 95, 33
- Acids, 4-hydroxyphthalic and 4-methoxyphthalic, 95, 33—4-methoxyphthalic, and hemipinic, fluoresceins and eosins from, 96, 242
- Acids, hypochlorous, 32, 19
- Acids, indol carbonic, and indoles, recognition of, 74, 109

Acids, inorganic, complex, 45, 22, 34, 60; 48, 155; 54, 197; 55, 51; 66, 198

Acids, iodobenzenemonosulphonic, 99, 186

Acids, iodobenzoic, iodotoluylic, and iodoanisic, substitution and formation, 1, 23, 24—Isomerism, 23, 24—Reaction of the methyl esters of the isomeric, 90, 252

Acids, iodo fatty, action of ethereal salts of on phenylamine magnesium iodide and orthotoluidine magnesium iodine, 96, 48

Acids, isomeric, 46, 210

Acids, isomorphous and campholic, direct transformation of borneol into, 98, 84

Acids, isomeric, $C_7H_6O_3$, products of iodisation, 25, 287—Combustion heats, 57, 287—From camphor, 43, 287

Acids, isopropylidene, 81, 264

Acid, ketone, 35, 185—And sulphone carbon, analogies between, 62, 236 —Cyclisation of, 100, 24—Ferrie chloride on ethereal salts of, 77, 149—Ketones and ketonic condensation of halogen derivatives of fatty and ethereal salts with, 74, 119

Acids, ketonic, 21, 58; 74, 252; 75, 153, 161—Ethers of, action of mixed organo-magnesium compounds on, 86, 245—Formation of ethereal salts of, 78, 250—Preparation, 99, 180—Synthesis, 81, 23— β , and β -aldehydic, optically active esters of, 87, 27; 89, 21

Acids, kynurenine, 26, 156

Acids, lactic, active, 71, 278—And malic, ethereal salts of optically active, 73, 229—Isomeric, 27, 95—Series of, 13, 14

Acids, lactic, 63, 188

Acids, malonic and cyanoacetic, action of mustard oils on ethyl esters of, 99, 24—Substituted, acidimetric value compared with corresponding normal di-acids, 81, 105—Substituted, solubility in water, 79, 225

Acids, mandelic, chemistry of, 80, 240 —Interconversion of optically active, 99, 140—Measurements of the velocities of saponification of the *l*-menthyl and *l*-benzyl esters of the stereoisomeric, 95, 234

Acids, manganous and tungstic, complex double salt of, 89, 288

Acids, mellitic and pyromellitic, constitution of phthalates of, 98, 254

Acids, metaxylene-sulphonic, 58, 21; 65, 100

Acids, methenic and methinic, constitution of sodium salts of, 91, 47

Acids, methoxy-naphthalene-sulphonic, 59, 226

Acids, 3-methoxyphthalic and 3-hydroxyphthalic, 95, 23

Acids, 4-methoxyphthalic and 4-hydroxyphthalic, 95, 33—4-hydroxyphthalic, and hemipinic, fluoresceins and eosins from, 96, 242

Acids, β -methyladipic, α -substituted, 89, 107

Acids, methylarsenic and arsenic, 96, 35

Acids, β -methylcinnamic, isomeric, 89, 251

Acids, methylethylsuccinic, symmetric, 78, 84

Acids, methyl-iso-propyl-succinic, *cis*, and *trans*, 73, 152

Acids, methyl-procatechuic, derivatives of isomeric, 36, 52

Acids, mineral, acetic acid in presence of, 31, 12—Action, 62, 31; 64, 19 —Action of dilute on bleaching powder, 31, 268—Action on chloride of lime, 32, 62—And aurin, combination of, 39, 25—Complex, 62, 37 —Detection in presence of acetic acid, 74, 276—Detection in presence of organic acids, 47, 72; 74, 49—Detection and estimation of free, in various commercial products, 37, 211, 237—Detection in vinegar, 41, 110; 56, 91—In vinegar, 50, 98; 74, 49—

Intensity of inversion of sugar by, 31, 118—Salts of *p*-hydroxy compounds with, 97, 47—Variation in the catalytic activity of, with changes in their concentration, 99, 83

Acids, monhydroxy, electrolysis of salts of, 74, 120

Acids, monoacylphosphoric, silver and lead salts of, 89, 203

Acids, monobasic, acid salts of, 88, 302 —Anhydrides of, 7, 256 —Fatty, ethers of, action on mixed organo magnesium compounds, 83, 118 —Glycerides of, in C_{20} , 81, 140 —Hydrates of, 27, 283, 322—In very dilute liquids, 64, 273—Mode of division of one base between several when together in aqueous solution, 26, 93—Of fatty series, action of sodium on ethers of, 92, 21—Organic, and amidines of thiamides, 37, 262 —Organic, thiamides of, 35, 75—Thiamides of, 36, 41

Acids, monobromonaphthalic, 53, 55

Acids, monochlorocrotic, 41, 173

Acids, monochlorinated, action on zinc hydrocarbons, 35, 8, 29

Acids, monohalogen, of fatty series, action on pyridine and quinoline, 83, 131

Acids, naphthalene-sulphonic, action of bromine on, 54, 256

Acids, naphthalin-sulpho, derivatives, 21, 24

Acids, naphthoic, 64, 62—Optically active reduced, 92, 268; 94, 58, 219; 99, 248

Acids, naphthyl-sulphurous, amides of, 36, 23

Acids, nitric and sulphuric, mixed anhydride of, 96, 106

Acids, nitrobenzalmalonic, 51, 47; 53, 166

Acids, nitrobenzoic, 36, 8; 69, 289; 70, 31—Action of chloroform and alkaline hydroxides on, 77, 58—Isomeric, 38, 113; 69, 265—Isomerism of, 69, 129, 145—Reduction, 89, 119—Rotation of menthyl esters of isomeric, 92, 234

Acids, nitrobenzoyltartaric, methyl and ethyl esters of, *di-o*, *m*-, and *p*-, 90, 277

Acids, nitrocinnamic, electrolytic reduction, 91, 268

Acids, nitrogen, 41, 80—Amongst the products of combustion of coal-gas and hydrogen flames, 38, 240 —Behaviour with sulphuric acid, 40, 204 —Heat of formation, 26, 23

Acids, nitrogenous, from acetones, 38, 21; 45, 90

Acids, nitronaphthyl-sulphurous, and derivatives, 33, 10

Acids, nitrophenol-sulphonic, formation of substituted, 25, 284—haloid derivatives, 29, 283

Acids, nitrophenol-sulphuric, 27, 70

Acids, nitrous, formation, 30, 242 —In potable waters, 40, 38, 61—Nitrification of glycerin with, 78, 258

Acids, non-saturated, 39, 105; 44, 60, 250—Of aromatic series, 61, 265; 63, 189—Oxidation by a mixture of sulphuric acid and persulphate of ammonium, 86, 24

Acids, octonaphthene, isomeric, 69, 168

Acids, olefinedicarboxylic, and olefine- β -ketocarboxylic, action of ammonia and organic bases on ethyl esters of, 87, 115, 246

Acids, organic, 87, 274—Organic, action of, 58, 25; 65, 263—Action of ammonia on ethereal salts of, 79, 55—Action of light on in presence of uranium salts, 74, 55, 67, 70 —Action of sulphur monochloride on salts of, 99, 308—Action on metallic antimony, 88, 172—Action on minerals, 35, 113, 109—Action on tungstates of soda and potassa, 33, 251—Action on utensils of nickel, 62, 50—Alkaline salts of, electrolysis of, 86, 198

And ketones, synthesis by carbonyl chlorides, 35, 40—And mustard oils, action of ethyl carbamate on esters of, 99, 116—And nitrogen, 77, 164—

And plumbic acid, combination, 87, 178—And sulphuric acid, combinations, 81, 192—And their anhydrides, action on natural alkaloids, 30, 224; 31, 37, 256, 261; 33, 127—Anhydrides, preparing mixed, 98, 162 —As standards in alkalimetry and acidimetry, 100, 3—Basic salts of, 9, 184 —Basicity of, 63, 119, 120 —Bibasic, 65, 36, 311—Chromatic reactions produced by, 75, 61—Conversion into esters, 90, 256—Decomposition, 87, 227—Detection of mineral acids in presence of, 47, 72; 74, 49 —Di- and tri-basic, decomposition, 87, 47—Dibasic, dissociation, 77, 274 —Dibasic, electrolytic synthesis, 66, 91—Dissociation constants of, 66, 34 —Electrolysis by alternating current, 91, 118—Electrolytic chlorination of salts of, 98, 33—From cyano-succinate of ethyl, 80, 59—Formation, 13, 179—Formation of tertiary organic bases during synthesis of, 38, 35—In examination of minerals, 38, 249, 261; 37, 14, 24, 65, 86, 98, 148; 43, 31, 39; 47, 251—In juice of sugar-cane, 35, 104—In phenol, 47, 84—In wine, 47, 84—Intensity of inversion of sugar by, 31, 218 —New series of, 15, 267—Oxidation in presence of ferrous salts, 80, 299 —Reduction of chlorides of, 70, 287 —Salts of, preparation of anhydrides by action of thionyl chloride on, 100, 314—Salts of, action of sulphur monochloride on, 99, 308—Salts of, electrolytic chlorination, 98, 33—Simultaneous action of intra-pilair current and nascent hydrogen on, 21, 22—Solubility in alcohol and ether, 37, 249—Solubility of phosphate manures in, 84, 199—Synthesis, 21, 82; 22, 168—Their anhydrides and their ether salts, heat of combustion, 88, 269—Transformation of olefant gas into complex, 2, 119, 121 —Tribasic, 63, 120

Acids, ortho- and pyro-arsenic, 96, 137

Acids, orthophenoxybenzoic, 91, 23

Acids, orthoxylenic sulphonic, 67, 34

Acids, oxalcoyl-ethylenic, 89, 119

Acids, oxamyl-sulphonic, 22, 312

Acids, α -oximino-fatty, conductivities of, 98, 231

Acids, oxy- (see Oxy-acids)

Acids, oxybenzoic, 47, 281—Acid functions of, 78, 36—And bismuth compounds, 90, 57—And their derivatives, combinations of antipyrine with, 74, 11—Isomeric, 35, 198; 36, 277

Acids, oxygen, combination of vanadic acid with, 53, 101—Of chlorine, 48, 106—Of iodine, 61, 97—Of sulphur, 40, 143

Acids, oxygenated, compounds of hypovanadic acid with, 66, 12

Acids, oxyphenoxy-acetic, 82, 43

Acids, oxyphosphinic, synthesising, 87, 59

Acids, oxypivalic, 90, 148

Acids, oxystearic, of different origin, 58, 250

Acids, oxysulphuric, 79, 276

Acids, paramethoxytoluic, and atrolactic, comparative study of, 97, 253

Acids, pentamethylene-dicarboxylic stereoisomeric, 79, 287

Acids, per- (see Per-acids)

Acids, perchromic, 92, 248

Acids, persulphuric, 81, 296

Acids, phenetol sulphonic, 67, 34

Acids, phenic, in inhumations, 30, 99—Of commerce, 50, 237, 297

Acids, phenol-dicarboxylic derived from salicylic and para-oxy-benzoic acids, 36, 51

Acids, phenol-glyoxylic, 77, 46

Acids, phenol-sulphuric, 58, 161; 60, 97

Acids, phenylalkyloxyacetic, 79, 284—Possible intramolecular change in the inactive, 100, 33

Acids, phenyl-lactic, 42, 109

Acids, phenyloxycetic, 82, 43

- Acids, phenylpropionic, β -phenylpropionic, and cinnamic, menthyl and bornyl esters of, 96, 316
- Acids, phosphenic, substituted, 36, 142
- Acids, phosphoric, isomeric derivatives of, 100, 34—Meta- and ortho-, relation between composition and conductivity in solutions of, 99, 161, 188—Molecular weights of, determined by cryoscopy, 98, 60—Titration of, 53, 130
- Acids, phosphorus, 1, 118; 4, 253—Action of chloride of acetyl on, 10, 91—Derived from benzophenone and methylpropylketone, 87, 142—Derived from methylethylketone, 87, 94
- Acids, phosphotungstic, 60, 161
- Acids, picric and styphnic, molecular compounds of, 98, 280
- Acids, pimelic and adipic, converting substituted, into cyclic compounds, 96, 35—substituted, 70, 266
- Acids, pinic, and pinonic, active, 98, 245
- Acids, polyatomic, and alcohols, ethereal derivations, 20, 72—Chromates of, 90, 95—Ether derivatives, 22, 59, 154; 23, 142—Study of, 32, 114
- Acids, polybasic, indicators of various energies of, 53, 95—Organic, acidimetry of, 81, 95—Relative affinities of, 87, 248
- Acids, polycarballic, formation of ethereal salts of, 78, 263
- Acids, polythionic, history, 28, 204
- Acids, polythiosulphonic, of diamines, 88, 253
- Acids, propionic, tetra-substituted, 47, 49
- Acids, propylbenzenesulphonic, 79, 81
- Acids, pyrazol dicarbonic, 62, 296
- Acids, pyridin carbonic, 41, 220; 54, 97
- Acids, pyro-, and ortho-arsenic, 96, 137
- Acids, pyro-citric, isomery of, 34, 284
- Acids, pyrogallol-sulphonic, 82, 158; 83, 131; 84, 96—Alkaline-earth salts of, action of alkaline earth bases on, 87, 238, 291
- Acids, pyromellitic and mellitic, constitution of phthaleins of, 98, 254
- Acids, pyruvic, substituted, 49, 116
- Acids, pyruvic, condensations of, 44, 250
- Acids, resin and fatty acids, shellac acids in separation of, 75, 70—Of conifers, 89, 250
- Acids, resinous, distillation with zinc dust, 36, 233
- Acids, rosolic, 27, 255
- Acids, salicylic, iodated, 21, 132, 252
- Acids, shellac, in separation of fatty acids and resin acids, 75, 70
- Acids, silico tungstic, 9, 238, 279
- Acids, silicic, and their derivatives, 98, 281
- Acids, stannic, 76, 253
- Acids, stereo-isomeric chlorobromosuccinic, 78, 12
- Acids, strong, and boric acid, simultaneous volumetric estimation, 89, 60
- Acids, styphnic and picric, molecular compounds of, 98, 280
- Acids, succinic, 72, 253—Alkyl substituted, 80, 238; 82, 265—Isomeric, 21, 180—Substituted, 78, 83—Sym-dipropyl, sym-di-isopropyl, and *aa*-propylisopropyl, 81, 166
- Acids, Sulph- (see Sulph-acids)
- Acids, sulph-anthraquinonic, reductions, 40, 32
- Acids, sulph-etheric, of phenols, 39, 163
- Acids, sulphuric, 98, 280—Formation in fatty series from chloranhydrides of sulphonic acids, 35, 241—Isolation of aromatic, 99, 116
- Acids, sulpho, and sulpho-hydrates derived from crystallised bromotoluol, 22, 144—Naphtholic and naphthylaminic, 74, 293—Of aniline blue (see aniline)—Of benzol (see Benzol)—Of benzo (see Benzyl)—Of Guanidin (see Guanidin)—Of hydrocarbons (see Hydrocarbons)—Of Hydroquinones (see Hydroquinones)—Of mesitylen (see Mesitylen)—Of orthobromotoluol (see Orthobromotoluol)—Of Phenol (see Phenol)—Preparation, 28, 205
- Acids, sulpho-conjugated, 33, 176; 60, 62
- Acids, sulpho-dicarbonic, 35, 197
- Acids, sulpho, action of phosphoric per chloride upon, 26, 252—Transformation of nitric compounds into, 28, 10
- Acids, sulphone-carbon, and keton acids, analogies between, 62, 236
- Acids, sulphonic, 49, 121; 54, 256; 55, 91; 65, 247—Anhydrides of, 65, 139—Decomposition, 50, 105—Derivatives, 74, 107, 279—From sulphones, 40, 32—Influence of melting alkalies upon aromatic, 40, 226—Isomeric, 58, 263—Isomeric, from para-nitrotoluene, 35, 263—Of meta-xytol, oxidation products of, 35, 263—Of retene, 36, 232—Six dichlorotoluene and their, 72, 58
- Acids, sulpho-nitrogen, 20, 323; 21, 59, 23, 180, 310
- Acids, sulpho-salicylic, isomeric, 33, 19
- Acids, sulphur, conjugate, 23, 71—Estimation, 17, 206—Formation, 27, 22
- Acids, sulphuric and hydroferrocyanic, compounds of, 92, 57—and nitric, mixed anhydrides of, 96, 106
- Acids, tannic, 15, 134; 16, 36—And gallic, action of reducing agents on, 98, 316—Synthesis of sulphuretted, 33, 139
- Acid, tartaric, 29, 206; 96, 29—Asymmetric synthesis of optically active, 96, 21
- Acids, terebic, terpenylic and homoterpenylic, synthesis of, 94, 302
- Acids, terpenylic, terebic and homoterpenylic, synthesis of, 94, 302
- Acids, tetrahydronaphtholic, resolution of, 94, 58
- Acids, *aa*xy-tetramethyl-, and *aa*xy-trimethyl-tricarballic, 95, 92
- Acids, tetramethylglutaric, 81, 261
- Acids, thio-, RCOSSH, 87, 153
- Acids, toluene-sulphonic, 58, 21
- Acids, toluidine-sulphonic, separating the two isomeric, 55, 290
- Acids, toluol-sulpho, 22, 70—Isomeric, 21, 286
- Acids, toluic, isomeric, 59, 179
- Acids, triacetic, 100, 172
- Acids, triazooacetic and -triazopropionic, dissociation constants of, 87, 259
- Acids, tricarballic, synthesis of allyl substituted, 84, 287
- Acids, *aa*xy-trimethyl-, and *aa*xy-tetramethyl-tricarballic, 95, 92
- Acids, trimethylenecarboxylic, dissociation constants of, 88, 291
- Acids, tungstic and manganous, complex double salt of, 89, 288
- Acids, ulmic, materials produced by action upon sugar, 42, 271
- Acids, unsaturated, additive compounds of organic bases and ethereal salts of, 78, 250—Condensation of phenols with esters of, 85, 130; 88, 251—Isomerism of, 57, 78—Of benzene series, 98, 254
- Acids, valerianic, 23, 22, 71; 25, 107
- Acids, vegetable, 50, 284—Action on tin, 47, 290, 300—Combination of metal: for production of white alloy resisting action of, 5, 251
- Acids, volatile, estimation, 65, 280—In croton oil, 22, 323; 35, 217—In wines, 29, 274; 31, 208; 71, 306
- Acids, weak, dissociation constants of, 80, 277—Reciprocal displacements between, 38, 264
- Acids, xyloidisulphonic, 67, 13
- Acidic acids (see Acids)—Oxides (see Oxides)—Thiocarbides (see Thiocarbides)—Thiocarbimides (see Thiocarbimides)—Ureas (see Ureas)
- Acidimetric indicator (see Indicator)—Method, generalisation of, 5, 145—Process, 4, 195
- Acidimetry, 81, 35; 82, 11—Acid potassium tartrate as original standard substance in, 65, 107—Indicator, 58, 49; 79, 102; 81, 251—Indicator which shows neutral concluding points in, 48, 110—Of acetones (see Acetones)—Of aldehydes (see Aldehydes)—Organic acids and acid anhydrides as standards in, 100, 3—Potassium tetraoxalate as a standard in, 71, 307—Standardising in, 68, 161—Use of succinic acid as a standard in, 96, 44
- Acidity in stem, leaf, and flower of a plant, distribution, 84, 208—Of fruits (see Fruits)—Of urine (see Urine)—Of wine (see Wine)—Theory of, 82, 58—Urinary (see Urinary)
- Acidosulphite of ammonium (see Ammonium)
- Acidulous radicals (see Radicals)
- Acidylthiocarbimides, 72, 277
- Ackermann, E., Determination of tar tar in sweet wines, 66, 197
- Aekman, C. M., R. P. Wright, and W. Fleischmann, "The Book of the Diary" (review), 74, 173
- Ackroyd, W., Action of metals and their salts on ordinary and Röntgen rays, 74, 257—Action of radium rays on the halides of the alkali metals, 89, 243—Atomic colour-cross, 65, 205—Bearing of the colour phenomena presented by radium compounds, 90, 157—Circulation of salt and its bearing on chemico-geological problems, and of geological age of earth, 83, 205; 84, 56—Cohesion and cohesion figures, 54, 58—Cohesion and submersion figures, 55, 68—Colour of the ions as a function of atomic weight, 73, 221—Colours of iodides, 88, 217—Determination of equivalent of sulphuric acid, 75, 25—Distribution of chlorine in Yorkshire, 82, 162; 84, 185—"Elementary Chemical Analysis" (review), 67, 11, Experiments and observations with radium compounds, 88, 203—Fixing nitrogen from the atmosphere, 86, 203—Human eye as automatic photometer, 41, 179—Inverse relation of chlorine to rainfall, 84, 176—Laboratory stills, 65, 167—Licence for laboratory stills, 91, 105—Limiting standard of acidity for moorland waters, 82, 162—Luminiferous ether as an element, 91, 16—Metachromatism, or colour change, 33, 60; 34, 75—Origin of colour, 67, 27, 64, 111, 147—Principal cause of the saltiness of the Dead Sea, 89, 13—Production of rainbows, 46, 251—Researches on moorland waters, 79, 54; 83, 214—Reversal of sodium lines, 36, 164—Selective absorption, 33, 227—Selective absorption in relation to aggregation, 35, 184—Synthesis of complex equations, 82, 154—Telluric distribution of the elements in relation to their atomic weights, 86, 187—Transverse absorption of light, 36, 159

- Aconella and narcotine, identity, 9, 216
- Aconic acid (see Acid)
- Aconine dibenz- (see Dibenzaconine)
- Aconitate, methyl dicarboxy- (see Methyl dicarboxyaconitate)
- Aconite alkaloids, 9, 217; 22, 216; 34, 222; 37, 67, 245; 39, 224; 63, 174; 65, 140, 152; 67, 106; 68, 95; 69, 58, 70; 80, 276; 92, 245, 246—Comparative value of different species, 1, 100—Detection, 12, 22—Poisoning, 45, 110—Root, relative activity of American and European, 8, 87

- Aconites, alkaloids in, 32, 232
 Aconitic acid (*see* Acid)
 Aconitine, 8, 200; 63, 174; 66, 329; 67, 112—Action of heat on, 69, 70 — Action of iodine on, 86, 210—Action of methyl alcohol on, 71, 120 — Acetyl derivatives of, 71, 99 — And nepaline, distinction between, 50, 188, 61, 241 — Aurichlorides, 71, 99 — Bikh- (*see* Bikhacointine) — Crystals, 24, 85; 26, 12 — Foreign, 7, 118—Glycerole of, 4, 60 — Group of alkaloids, 92, 246—Jap. (*see* Japacointine)—Medicinal, 4, 60—Pseudo- (*see* Pseudacointine) — Pyr. (*see* Pyracointine)—Reagent for, 91, 179
 Aconitum heterophyllum, atisine, alkaloid of, 74, 120
 Aconitum napellus, alkaloids of, 57, 251
 Accrus, a carbohydrate in, 56, 40 — Analysis of, 18, 262—Nutritive value, 42, 95; 43, 36
 Acoustic attraction and repulsion, 21, 287; 27, 170—Pyrometer (*see* Pyrometer)—Transparency of air, 29, 133
 Acoustical attraction and repulsion, 22, 71, 101—Experiments, 70, 292; 71, 158—Transparency and opacity of atmosphere, 29, 275
 Acoustic-optic phenomena, 30, 107
 Acoustics, 4, 105; 22, 96, 227—Musical, 3, 279
 Acree, S. F., and R. F. Brunel, New method for the preparation of standard solutions, 94, 221
 Acridine, naphtho- (*see* Naphthoacridine)—5-Phenyl- (*see* 5-Phenylacridine)—series, 89, 70—Studies in, 92, 233; 93, 125; 94, 218—Tribo-luminescence in, 92, 219
 Acridines, 22, 192; 24, 34; 50, 117; 85, 66; 88, 272, 285, 290—And phenonaphthacridines, synthesis of, 96, 277 — Dimethylnaphtho- (*see* Dimethylnaphthacridines) — Diquin (*see* Diquinacridines)—Halides of, 90, 251 — Interaction with magnesium alkyl halides, 92, 243—Naphtho- (*see* Naphthacridines) — Naphthaquin- (*see* Naphthaquinacridines) — Phenonaphtho- (*see* Phenonaphthacridines) — Synthesis, 100, 242—Synthesis of complex, 98, 243—Tetramethyl (*see* Tetramethylnaphthacridines)
 Acridol, phenylmethyl- (*see* Phenylmethylacridol)
 Acridone, method of making, 99, 191
 Acrylic acids (*see* Acids)
 Acrolygen, 51, 37
 Acrolein, 17, 166—Acetals of, 79, 250—Behaviour towards hydrochloric acid and zinc, 11, 237—Chemical constitution of, 21, 286—Monobrom- (*see* Monobromacrolein)—Preparation, 81, 252—Products of action of phosphorus pentachloride upon, 44, 193 — Reaction of, 82, 48
 Acroleins, furfur- (*see* Furfuracroleins)
 Acrolein-urea, 50, 182
 Acrolein-ureide, with remarks on H. Schiff's communications on condensed ureides, 48, 204
 Acrose, α - and β -, formation from glycollic aldehyde, 81, 9
 Acrylate, ethyl dimethyl- (*see* Ethyl)
 Acrylic acid (*see* Acid)—Acid ether (*see* Ether)—Acids (*see* Acids, acrylic)—Isomers of borneol (*see* Borneol)—Series of acids (*see* Acids)
 Actea racemosa and its preparations, 3, 132—Tincture of, 3, 221
 Actinic phenomenon, 43, 84, 283; 44, 12, 51, 73, 167
 Actinism of sun's rays, measurement, 41, 211
 Actinium, 44, 138, 180, 191; 45, 61; 81, 169; 87, 25; 90, 232—And emanium, 92, 92—And emanium emanations, action on sensitive screen, 91, 241—And emanium emanations, decay constant of, 92, 49 — And thorium emanations, diffusion of, 98, 304 — Decay products, 96, 73 — Distribution in electric fields of active deposits of, 97, 156 — Gases evolved from, 92, 143—New product of, 93, 259
 Actino-chemistry, 27, 71; 42, 44
 Actino-electric phenomena, probable cause, 42, 321
 Actinograph, 65, 276
 Actinometer, absolute total, 49, 158 — Differential, 34, 40—Selenium, 51, 117
 Actinometric studies, 54, 297
 Actinometry, 18, 126—Slow, simple process, 42, 178
 "Actio in distans," explanation of, 35, 10
 Action at a distance, 42, 268—Chemical (*see* Chemical action)—Slow, effects of produced during a number of years, 25, 58
 Actions, chemical (*see* Chemical)
 Activity, optical (*see* Optical activity)
 Actonian prize, 11, 180, 204—Essay, 10, 300
 Acyclic acid (*see* Acid)—Acids (*see* Acids) — Isomers of borneol (*see* Borneol)
 $\alpha\beta$ -Acyclic ketones, unsaturated (*see* Ketones)
 $\alpha\beta$ -Acyclic non-saturated acids (*see* Acids)
 Acyl derivatives of aldehydecyanohydrins, preparation, 100, 230—Derivatives of salicylamide, labile isomerism among, 94, 217
 Acylacetic acid (*see* Acid)—Ethers (*see* Ethers)
 Acylacetones, synthesis of, starting from C-acylacetic ethers, 87, 214
 Acylacetylacetates, C-, reactions and compositions, 87, 215—Of Ethyl (*see* Ethyl)—Of Menthyl (*see* Menthyl)—Of Methyl (*see* Methyl)
 Acylacetylacetic ethers (*see* Ethers)
 Acylamino-compounds, mechanism of bromination of, 95, 274
 Acylaminoketones, isomeric change of diacylanilides into, 89, 117, 176; 90, 291
 Acylanilides and chlorine, primary interaction, 100, 32—Chlorination and bromination, 100, 253—Di- (*see* Diacylanilides)
 Acylarylamines, alkylation of, 83, 189
 Acylating agents, action on camphor derivatives, 93, 111
 Acylation in presence of pyridine, 91, 164—Of Amines (*see* Amines)
 Acylcampholic ethers (*see* Ethers)
 Acylyanacetic ethers (*see* Ethers)
 Acylyanocamphors, 87, 226
 Acyl-hydroxyamines and acyl-salicylamides, labile isomerism among, 97, 177
 Acylogens, 96, 318
 Acyl-salicylamides, and acyl-hydroxyamines, labile isomerism among, 97, 177; 99, 178
 Acyl thiocyanates, constitution and properties, 93, 152—Tautomeric character of, 89, 92

- under pressure, 49, 255—Burning in hydrogen or coal gas, 19, 154—Carbon dioxide in, 70, 111—Carbon dioxide in, estimation of, 99, 217—Carbon dioxide in, causes of variations of, 97, 288—Carbonic acid in, 42, 13, 24, 35; 44, 13, 48; 48, 12; 49, 168; 54, 201; 59, 259, 269; 74, 64, 71; 76, 209; 77, 105, 188—Carbonic anhydride in, 29, 284; 74, 287—Carbonic oxide in, 45, 288; 74, 188—Carbonic acid in, chloride of palladium for detection of, 77, 212—Carbonic oxide in, estimation of, 93, 50, 61—Carburetted, use for lighting and other purposes, 83, 10—Chloroform in, estimation, 93, 80—Chloroform vapour in, 88, 22—Collecting at great heights, 75, 167—Combustible gases of, 82, 58—Combustible gases of, 82, 58—Combustion in coal-dust, 47, 55—Combustion in coal-gas, apparatus for showing, 58, 55—Composition, 21, 166; 74, 292; 77, 95—Compressed, influence on fermentations, 32, 51—Compressed, surgical use of, 40, 265—Compression, 26, 240—Contamination by cesspools, 38, 233—Continuous current of, obtaining under pressure, 21, 173—Core transformer, behaviour of, 68, 218—Decrease of temperature of, 21, 167—Determining mercury vapour in, 97, 263—Determining ratio of specific heats at constant pressure and at constant volume for, 86, 266—Dielectric strength of, 92, 258—Difference of potential required to give sparks in, 49, 114—Diffusion between moist and dry, through a partition of porous earth, 29, 240—Dissolved in sea-water, 36, 6—Does a red-hot stove burn, 1, 312—Dusty, dark plane formed over heated wire in, 47, 1—Early chemistry of, 10, 195—Electrisation of, 48, 280—Estimation of lighter constituents of, 95, 16—Examination for sanitary purposes, 47, 7—Exhausting apparatus, 27, 131—Experiments on combustion in, 69, 276—Expired, poisonous character, 59, 241—Expired, toxicity of, 83, 304—Explosion and detection of acetylene in, 74, 96—Explosion, rapid, in boiling flasks, 51, 83—Extraction of oxygen from, 19, 25—Feeble electric sparks in, 20, 106—Filtration and influence which it exerts on fermentation, 5, 173—Forest, composition of, 54, 185—Formic aldehyde in, estimation, 89, 23—Free from dust, behaviour of albumen and fibrin in, 18, 11—From galleries of mines, analysis, 86, 260—From sea, 82, 70—Gases, the sulpho-carbonates, &c., detection and determination of small quantities of carbon-disulphide in, 50, 67—Given off by ignited charcoal, composition, 21, 251—Ground, 60, 258—Ground, carbonic acid in, 36, 100; 37, 204; 44, 48—Heated, as substitute for steam as a motive power, 10, 273—Heated, substitution for oxygen for thermal and illuminating effects, 22, 103—Highly rarefied, heat conduction in, 42, 300—Hydrogen in, 88, 47—Impurities, 6, 283—In and near trees, temperature, 13, 286—In breweries (see Breweries)—In closed spaces, sanitary examination, 47, 50—In flues, etc., measuring current of, 38, 180—In London law courts, composition, 13, 116—In mines, measuring, 34, 25, 36—In pipes, 29, 229—In public schools, sanitary condition, 39, 180—In sea-water, 27, 265—In soil, circulation of, 73, 72—In tubes, movement of, 30, 20, 52—In water, 24, 133—In which a candle flame has burnt, respirability, 72, 177—In wine tuns, 13, 143—In woods, 82, 58—Inferior organism in, 43, 118—In-

fluence in reduction of ores of zinc, 41, 220 — Influence of contact of, on fermentation, 44, 216 — Influence of woods on heat of, 55, 176 — Ionisation by ultra-violet light, 97, 275 — Irrespirable, of wine-must fermenting tubs, 20, 188 — Is sulphuric hydrate volatile in ordinary temperature of? 63, 151 — "Linde," generator gases produced by, 84, 155 — Liquefaction, 76, 272 — Liquefaction, and research at low temperatures, 73, 40 — Liquefied, absorption spectra, 72, 65 — Liquid, amorphous elements and, 93, 270 — Liquid, charcoal and, 97, 4, 16 — Liquid, as analytic agent, 80, 187, 199, 212 — Liquid, by the gallon, 77, 113 — Liquid, condensation of radioactive emanations of radium and thorium by, 87, 308 — Liquid, distillation, 81, 117 — Liquid, scientific uses of, 71, 102, 199; 93, 303 — Liquid, temperature and critical pressure, 50, 93 — Means of cooling, 27, 196 — Microbia in, 52, 117 — Micro-organisms in, 56, 145; 58, 97 — Mixtures of, compressibility, 62, 309; 63, 131 — Moist, absorption of watery vapour from, by solids, 58, 197 — Moisture in, 29, 284; 59, 250, 269 — Moisture in relation to health and comfort, 44, 100 — Necessary to health, 23, 108 — Nitrates in, 74, 230, 240 — Nitrogen, of, oxidation by electric arc, 92, 144 — Of hospitals, purification, 22, 72 — Of Manchester, solid particles from, 17, 201 — Of Manchester, sulphurous acid in, 19, 139 — Of mines, pressure and temperature of, 12, 288 — Of Mont Blanc, 1, 116 — Of Paris, combustible gases in, 82, 195 — Of schoolrooms, carbonic acid in, 22, 83 — Of towns, 82, 35 — Of towns, analysis of, 77, 200 — On Atlantic, composition, 13, 116 — On high mountains, 82, 88 — Organic matter in, 21, 64, 65, 78, 45, 288 — Oscillations in pipes of different shape, 22, 35 — Oxidations due to, 94, 36 — Oxygen in, 20, 35; 40, 184, 109; 50, 67 — Oxygen in, determining amount, 45, 259 — Oxygen in, increase of proportion, 50, 67 — Oxygen in, insensibility from want of, 47, 158, 176 — Oxygen in, of forests, 55, 58 — Oxygen in, proportion of, 53, 85 — Oxygen in, variation in proportion of, 40, 184, 199 — Oxygen of, extraction by solution at low temperature, 82, 158 — Oxygen of, oxidation, 85, 167 — Oxygen of, oxides of iron considered as a means of conveying to combustible matters, 1, 13 — Oxygen of, utilising, 62, 297 — Ozone in, 20, 35; 32, 42; 37, 262 — Ozone in, apparatus for determining, 45, 141 — Ozone in country air, 25, 178 — Ozone in, of Libyan Desert, proportion of, 38, 153 — Ozonised action on animals, 7, 118 — Permeability of soil for, 44, 48 — Peroxide of nitrogen in, 21, 156 — Phosphorised, constituent of which causes electric conductivity, 93, 257 — Pollution by chemical works, 22, 27, 37 — Potential of, 51, 166 — Preparation of argon from, 95, 211 — Production of magnesium nitride by smothered combustion of magnesium in, 33, 39 — Production of manure from, 2, 220 — Products of ozonation of, by moist phosphorus, 43, 97, 127 — Pump mercury, application to coke analysis, 25, 98 — Pump, Sprengel's, 17, 73, 85 — Pump, Sprengel's mercurial amount of exhaustion obtainable by, 29, 125 — Pump, water jet, 36, 95 — Pump with a free piston, 12, 70 — Pump with free plunger, 20, 215 — Pumps, 21, 119; 26, 144; 27, 94; 58, 84; 74, 25 — Purification, 6, 283; 8, 291; 53, 296, 311; 54, 22 — Purification by soil, 83, 83 — Purifier, 23, 238 — Putrefaction by exclusion of, 30, 121 — Quantity indispensable for respiration during

sleep, 7, 221, 246 — Quantity of pure hydrogen in, 87, 11 — Rarefied, electrical resistance of, 49, 26 — Refraction and dispersion, 100, 297 — Refractivity of, 77, 1 — Rendering substances less pervious to, 7, 239 — Resistance, 23, 57 — Sea, microscopic organisms in, 53, 144 — Sea, salt in, 20, 298 — Solid, 67, 126 — Solution in sea-water, 67, 99 — Specific heat, 20, 46; 23, 108 — Specific heat when kept at a constant volume, 20, 214 — Specific heat when under pressure, 22, 227 — Subjected to X-rays, how it loses its discharging property, and how it discharges electricity, 83, 106 — Sulphate of soda in, 11, 289 — Sulphurous acid in, 47, 71 — Supposed nature, prior to discovery of oxygen, 8, 113, 186, 246; 9, 14, 26, 50, 242; 10, 74, 195, 208; 11, 87, 74, 101, 201; 12, 62, 74, 203, 14, 51; 15, 312; 16, 29, 43 — Tester, York, 99, 21 — Thermal conductivity, 100, 19 — Thermometer, 42, 258 — Velocity of sound in, 48, 234 — Vibrations of a layer of, 21, 60 — Vitiated, estimation of carbon monoxide and carbon dioxide in, 86, 270 — Weight of, 19, 119, 123, 180, 209 — Air-tight corks (see Corks) — Taps, 56, 224 — Vine, the river, 62, 167 — Vithreos springs at Bridge of Allan analysis, 31, 88 — Aitchison, Adam, and William Knapton, Improvements in manufacture of gas, 1, 176 — Vitkon, J. Dew, 55, 81 — Vix-la-Chapelle, laboratory at, 22, 58 — Royal Bismish-Westphalian Polytechnic School at, 22, 23; 28, 130 — Vix, radio-activity of thermal springs at, 94, 202 — Akazga order of West Africa, 16, 203 — Akerman, R., "Present State of the Iron Manufacture in Sweden" (review), 34, 259 — Aketorides, T., Products from fuming nitric acid on illuminating gas, 35, 197 — Akroyd, W., Law of colour in relation to chemical constitution, 65, 203 — $Al_2Cl_3 \cdot 2NH_3$, dissociation and thermal examination, 83, 179 — Alabandine, reproduction, 55, 277 — Alabaster, calcareous, from Mexico, 33, 230 — Glass (see Glass) — Aladern, R. D' (see D'Aladern, R.) — Alangilan essence, 28, 19 — Alanin, preparation by means of cyanide of potassium, 28, 204 — Alano, M., treatment of burns caused by sulphuric acid, 43, 233 — Alant camphor (see Camphor) — Alarm signals, continuous, 29, 240 — Thermometer, 11, 35 — Alaska, Tooth of Elephas primigenius found in, 24, 264 — Albahary, J. M., Complete analysis of vegetable matter, 97, 152 — Albatross, avic acid in, 23, 299 — Albers, M., Assaying purity of arrow root from the Maranta, 14, 96 — Albert, Kurt, and Otto Ruff (see Ruff O.) — Albert, H., and L. Siegfried, Determination of superphosphates, 40, 34, 228 — A'bert, H., Dr. Vollbrecht, and H. Joulie, Reversion of phosphates and behaviour of phosphoric acid in the soil, 42, 35 — Albert Medal of the Royal Society of Arts, 13, 300; 97, 312; 99, 312 — Albert Medal, presentation to Sir Andrew Noble, 100, 36 — Albert Veterinary College, 12, 142 — Albertier, Dr., Toepfer's electrical machine, 24, 265 — Albertite, 6, 122 — Albertoni, P., Detection of alcohol, 58, 184 — Albinism, vegetable, 38, 261; 40, 260; 54, 257 — Albite, reproduction in moist way, 48, 81

Albitzky, A. A., Oxidation of non saturated acids by a mixture of sulphuric acid and persulphate of ammonium, 86, 24 — Albo-carbon burners, 46, 257 — Light, 45, 106 — Albolith, 21, 167 — Albrecht, M., Methyl-mercaptan-trisulphonic acid, methylmercaptan-disulphonic acid, and methyl-alcohol-trisulphonic acid, 25, 202 — Albumen, 22, 62, 190; 31, 239, 250; 43, 130; 90, 194 — Action of chloral on, 29, 186 — Action of cyanogen on, 36, 221; 39, 200 — Action of potash on, 47, 87 — Aldehydic nature of, 47, 277, 48, 179 — And casein, transformation, 9, 45 — And its oxidation, 51, 274 — Blood, 32, 8; 21, 60; 26, 240; 36, 24 — Coagulated, photography of colours by dyeing layers of, 44, 70 — Coagulation of, 31, 51; 79, 36 — Coagulation of, action of gases in, 28, 238 — Coagulation, action of nitrated substances on, 86, 48 — Commercial, 76, 21 — Compounds, 22, 84 — Consumption for industrial purposes, 21, 142 — Crystalline, in pumpkin seeds, 44, 24 — Crystals, 23, 131 — Decomposition by pancreas in absence of air, 36, 184 — Decomposition by permanganate of potassa, 25, 46 — Decomposition in presence of alkalis, first products of, 86, 47 — Derivatives, 23, 215, 254; 25, 164; 26, 50 — Detection, 53, 298; 62, 285 — Detection, cause of error in, 60, 130 — Determination of, 54, 85; 59, 206; 61, 289 — Determination by tannin, 31, 141 — Determination of equivalent of, 20, 179 — Digestion by papaine, 81, 227 — Distribution through muscular tissue, 10, 283 — Egg, 21, 60; 26, 240; 36, 24 — Egg, solution of, 33, 130 — Examination, 40, 78, 277 — Falsifications, 28, 22 — For use in diet, 35, 210 — From chemical point of view, 17, 222 — From milk, 28, 59 — In air free from dust, behaviour, 18, 11 — In animal fluids, 32, 180 — In milk, 37, 22 — In neutral fats, 26, 88 — In pepsin, solution of damaged, 34, 184 — In plants, 42, 96 — In serum, 37, 22 — In urea, 48, 104 — In urine, 41, 122; 42, 210; 43, 131; 47, 239; 49, 58; 50, 153; 53, 155; 54, 43; 58, 245; 63, 37; 64, 262; 68, 281 — In urine, icteric, 51, 303 — In urine, picric acid as reagent for, 48, 214 — In urine, reagent for, 49, 216; 67, 109 — In urine, test for detecting, 47, 239 — Met- (see Metalbumen) — Of serum and of egg, and their combinations, 38, 175 — Of eggs, properties, 22, 108 — Par- (see Paralbumen) — Plates, preparation, 23, 109 — Preparation from blood, 20, 274 — Production by yeast, 59, 215 — Putrefaction products of, 40, 77; 41, 252 — Reactions, 49, 287; 50, 105; 52, 118 — Reagents for, sensitiveness of, 55, 69 — Relation to casein, 11, 118 — Restoration of, 33, 140 — Synthesis, 78, 97 — Test for, 8, 14; 20, 215 — Tinctorial properties, 1, 287 — Albumens, 12, 58 — Of milk, 53, 49 — Reactions of, 56, 67 — Albumenised paper (see Paper) — Albumenoid and amyloid matters, relations between, 2, 59 — Bodies, 30, 8; 32, 158; 33, 118 — Compounds, reactions of, 80, 47 — Estimation by means of acetone, 94, 24 — Materials, reaction for, 83, 155 — Matter, active influence of, on oxidation by means of manganese, 89, 83 — Matter in maize seed, 88, 108 — Matter, proportion in hay, 43, 36 — Matters, 31, 98 — Matters, action of formic aldehyde on, 81, 46 — Matters, conversion into urea, 24, 288 — Matters, experiments, 62, 309 — Matters, ferments of, 42, 270 — Matters in Burton ales and Dublin porter, 38, 215 — Matters of crystalline lens, 42, 12 — Nitrogen (see Nitrogen) — Substances, 14, 96 — Substances, absorption of ultra-violet rays by, 48, 169 — Substances, in

- fluence in electrical phenomena, 29, 186—Yielded by stagnant waters, estimation, 33, 185
- Albumenoids, 28, 325; 69, 229—And neurin, behaviour, 31, 131—Bacterial fermentation of, 48, 71—Can they be digested without digestive ferments, 69, 276 — Chemistry of, 55, 30 — Constitution of, 33, 10; 52, 59; 63, 83; 68, 306—Crystalline from various oil seeds, 44, 122—Decomposition, 83, 287—Derivative of, 35, 55—Determination, 44, 296; 46, 160, 185—Estimation, 88, 287—Experiments on, 70, 37 — In animal organisation, 38, 90—In cow's milk, 52, 285—In hemp-seeds, 46, 303 — In human milk, 50, 177—In milk, 49, 168—In milk, estimation, 87, 171 — In oil-seeds, 43, 36—In wheat grains, 57, 71 — Influence of alcohol upon transformation of, 44, 73 — Malt, varying quantities extracted by waters of different types, 46, 220 — Milk, 49, 168; 53, 24—Milk, nomenclature of, 67, 135—Precipitation by salts, 58, 184—Precipitation from urine, 61, 289—Reaction for, 50, 105 —Reversible liquefaction of, 80, 208 —Ultra-violet absorption spectra of, in relation to that of tyrosin, 80, 31
- Albumin, action of heat, dilute acids, and alcohol on, 82, 12—Desiccation effect on its coagulability, 81, 207—Ex. (see Exalbumin)—Isatinic derivative, formation, 84, 208
- Albumins, amide acids derived from synthetic union of, 93, 56—Decomposition of acid amido-derivatives of, 94, 83
- Albuminate of iron (see Iron)
- Albuminates, changes suffered when submitted to action of water, 20, 167 —Determining of nitrogen in, 33, 261—Oxidation to urea, 23, 23
- Albuminose, 24, 181
- Albuminose compounds, products of splitting up of, 23, 71—Liquids (see Liquids)
- Albumose, hemi- (see Hemialbumose)
- Albumoses, determination, 67, 254 — Estimation, 81, 24
- Albytre, M. D' (see D'Albytre, M.)
- Alcamines, 44, 169
- Alcaptone, coloured reaction of, 80, 231
- Alchemical literature, Chinese, 70, 53—Tricks in Afghanistan, 48, 169
- Alchemists, elements of, 94, 4 — Greek, collection of ancient, 58, 280—Survival of the old, 71, 26
- Alchemy, 2, 120; 4, 136; 90, 161; 94, 4 —Edict of Diocletian against, 94, 2 —In 19th century, 4, 291—Literature of, 83, 261, 269, 280—Modern, 76, 117—Object of, 94, 15—Origins of, 51, 165—Progress in America, 76, 61 —Revival in France, 77, 69, 73
- Alcock, Mary, and G. T. Morgan (see G. T. Morgan)
- Alcock, N. H., Determining the temperature limits of nerve activity in warm-blooded and cold-blooded animals, 88, 22
- Alcock, Dr. T., Tongues of mollusca, 5, 177, 192
- Alcohol, 22, 71 — Absolute, 25, 22; 30, 235; 51, 7, 21, 33, 68, 76; 77, 52—Absolute, action of chlorine on, 23, 22—Absolute action of ozone on, 27, 256—Absolute, and sodium disulphide, crystalline compound of, 64, 61—Absolute, influence on chemical reactions, 26, 181—Absolute, preparation from strong spirit, 58, 233—Acetopropyl and acetobutyl, 59, 247 —Acids (see Acids)—Action of acid on, 8, 9—Action of chlorine on, 21, 94 —Action of chlorosulphide of phosphorus on, 21, 88—Action of iodide of methyl on, 32, 52—Action of phosphorus trihydrosulphate on, 85, 9 —Action of selenic acid on, 6, 171—Action on albumin, 82, 12—Action on brain, 34, 158—Action on mercuric nitrate, 43, 140—Action on mercurous iodide, 73, 12—Action on mercury perchlorates, 91, 267—Action on plato-nitrites, 35, 241—Aldehyd- (see Aldehyd-alcohol)—Allylic, 24, 109; 22, 71; 23, 227 —Allylic, and benzylic alcohol, 87, 262 —Conversion into acrylic acid, 24, 103—Allylic monochloride, 46, 254 —Allylic, phosphoric ethers of, 72, 61; 75, 59—Amylic, 22, 100; 38, 140—Amylic, action of chief derivatives on polarised light, 27, 319 —Amylic, action of chloride of zinc on, 8, 20, 108—Amylic, and water, and phenol and water, reciprocal solubility, 36, 20—Amylic and water, boiling point of mixture of, 23, 139—Amylic, commercial, 91, 163 —Amylic, colour reagent for, 50, 175—Amylic, commercial organic bases in, 46, 268—Amylic, commercial, pyridine in, 49, 230—Amylic, dextro-rotatory, 39, 140 —Amylic, formation, 76, 182—Amylic, in spirits of wine, 31, 107 —Amylic, formed during fermentation, 85, 57—Amylic, isomer of, 7, 72; 18, 19—Amylic, of fermentation, action on its soda derivative, 80, 84—Amylic, of fermentation, inactive, 34, 144—Amylic, of slow fermentation, action of hydrate of soda on, 35, 11—Amylic, oxidation, 17, 166—Amylic, preparation, 28, 304 —Amylic, preparation process for, 30, 176 —Amylic, production of acetic and propionic acids from, 13, 246 —Amylic stability of normal, 21, 118 —Amylic, testing alcohol for, 21, 143 —And chloride of arsenic, compound of, 2, 11 —And chlorides of manganese and cobalt, compounds, 85, 155 —And ether, washing wool with, 39, 163—And extract in wines, optical determination of, 74, 25 —And methyl cyanide, properties of mixtures of, 41, 218—And nitric acid, electrolysis of mixture of, 2, 144 —And starch, 22, 192 —And water combinations, 20, 214, 264 —And water, density and freezing point of mixtures, 21, 250; 22, 96 —And water, limit of separation, by distillation, 39, 251—And water, mixtures of ether with, 1, 143 —And water, specific gravity of mixtures 1, 207; 21, 208—Anisic, 25, 300 —Aqueous, dissociation of substances dissolved in, 77, 189—Arseniuretted, for preservation of objects of natural history, 4, 274—As test for croton oil, 11, 53—Assay, 59, 48, 8, —At 95°, action on metals with which it comes in contact, 83, 115 —Beet-root, reagent for detect ing, 7, 51 —Benzene-azo-orthobenzylic, and its transformation into phenyl-indazol and azodiphenyl methane, 87, 286—Benzoic, amines of, 11, 286; 12, 10, 37—Benzoic, transformation of benzamide into, 31, 21 —Benzil and ethyl, condensation compounds, 50, 282—Benzylic, action of chloride of cyanogen on, 22, 59—Benzylic, sulphones of, 68, 221 —Benzylic, action of sulphate of methylene on, 81, 215—Benzylic, and allylic alcohol, 87, 262—Bi-naphthylene, 83, 170—Boiling-point of water in, 70, 53—Butyl, normal, conversion of primary into secondary, 22, 70—Butyl, acids from, 23, 22—Butyl, normal, conversion into butylenhydrate or ethyl-methyl-carbinol, 25, 227—Butyl, preparation of optically active, 95, 170—Butylic, 20, 23, 70; 23, 22—Butylic, in brandy from Cognac, 55, 224—Butylic, compounds derived from, 19, 163—Normal, 23, 28 —Butylic, normal, stability, 21, 118—Butylic, normal synthesis of, 84, 97; 87, 71—Butylic, oxidation, 10, 110—Butylic and propylic, distinction between, 61, 192 —Butylic, preparing trichlorated, 85, 12—Campholenic isomer of, 90, 243—Campholenic, and campholenic derivatives, 89, 119 —Caproic, formation in caproic fermentation of common alcohol, 18, 201—Caprylic, 12, 224 —Caprylic, action on its sodium derivative, 83, 179—Caprylic, alcohol isomeric with, 18, 20—Cetyl, 22, 84—Cinnamic, reduction of, 43, 193—Cinnamic, transformation into phenyl propylene and phenyl propylic alcohol by ammonium metals, 94, 290—Combination with bases, 24, 180—Compounds derived from, 19, 176, 198 —Compounds of phenylcarbazine with phenylhydrazine, 83, 118 —Concentration in bladders, 3, 143—Condensation of acetylenic ethers with, 83, 108 —Crotonylic, formation and etherification, 74, 85 —Cumic, action of chloride of cyanogen on, 33, 75—Cumic, cymen of, 41, 36—Cumic, cymol from, 37, 263—Dangers of industrial use, 38, 264 —Denaturated, detection, 43, 234 —Denaturation, 45, 99; 74, 37 —Derived, of limonene, 83, 131—Detection, 58, 184; 66, 161—Determination, 38, 251; 58, 184; 60, 109; 78, 67, 82—Determinations of, distillatory apparatus for, 48, 119 —Dialdanic, 44, 59—Diatomic, derived from naphthal, 45, 77—Dibutyllic, constitution, 85, 143—Dibutyllic, synthesis, 85, 59—Dicaprylic, synthesis, 83, 179—aa-Dichlorisopropyl, ethyl ether oxide of, 95, 94—Di-iodo propylic, 43, 11—Dienanthylic, constitution, 85, 143—Dipropylic, synthesis, 85, 50—Effect on human body, 21, 253—Effect on saliva, 39, 226 —Electric resistance of, 52, 82 —Elements of, 63, 244 —Elimination of, 25, 61—Ethylic, action on barium ethylate, 84, 97; 87, 71—Ethylic, action on its sodium derivative, 79, 226 —Ethylic, admixture with water, 61, 208—Ethylic, and water, distillation of mixtures of, 75, 277 —Ethylic, caproic and caprylic fermentation of, 18, 201—Ethylic, condensation with enanthylic alcohol, 87, 203—Ethylic, decomposition, catalytic, 87, 191 —Ethylic, detection of acetone in, 79, 252—Ethylic, detection of methyl alcohol in, 49, 58—Ethylic, estimation, 79, 119—Ethylic, estimation of methyl alcohol in, 78, 267—Examination of, 59, 121 —Extraction by means of juice of lemon, 48, 169 —Fermentation of common, formation of caproic alcohol in, 18, 201—Flame, action of palladium in an, 34, 269; 35, 55—For industrial purposes, 91, 212—For industrial purposes, duty-free, 41, 273; 90, 145—For scientific research, duty-free, 88, 190 —Formation in fermenting saccharine liquids, 88, 23—Found in essential oils, 88, 71 —From apples, 11, 34 —From birdlime, 50, 67 —From coal-gas, 6, 100; 7, 1, 17, 169 —From ether, 19, 10—From Indian corn, 20, 312 —From mosses and lichens, 28, 60 —From sawdust, 26, 181—From wood, 17, 254—Furfuric, 15, 149; 79, 230—Fusel in, 45, 288—Fusel oil in, 47, 72, 106, 170, 248; 53, 302—Garanine, odoriferous, principle of, 17, 307—Glyceric, and its heterologues, chemical constitution, 24, 279, 296 —Hexatomic, conversion of glucoses into, 24, 240—Hexyl- (see Hexyl-alcohol)—Hexylic, normal, and normal enanthylic acid, 35, 162; 36, 64 —Hexylic, primary, 48, 270—Hexylic, secondary, 33, 43—Illicic, identity with a-anirine, 98, 305 —Impure, injurious effects on aniline colours, 21, 35 —Impurities in, 62, 74; 63, 237 —In alcoholic mixtures, 1, 36, 108, 192, 240—In animal tissues, 40, 188, 202; 42, 186—In atmosphere, 43, 166—In brain in cases of drunkenness, 48, 118—In bread, 27, 271—In Burton ales and Dublin porter, 38, 215—In chloroform, 2, 138; 20, 101; 27, 95—In ethereal oils, 38, 71; 42, 318; 60, 103 —In

commercial ethyl ether, 63, 161—In essential oils, 45, 288—In glutinous liquids, 49, 201—In milk, 27, 184—In organism, 26, 183—In soil, 43, 166—In transparent soaps, 43, 231—In very dilute solutions, estimation, 86, 237—In water, 43, 166, 197; 57, 232, 242—In which part of carbon is replaced by silicon, 12, 238—In wines, 1, 36, 108, 192, 240; 4, 208, 239, 252, 268; 24, 229; 29, 250; 38, 174—In wines, detection, 74, 25—Isoamylic, action on its sodium derivative, 79, 226—Isoamylic, synthetic, 91, 163—Isomeric with caprylic alcohol, 18, 20—Isotoluylen, 25, 22—Manufacture, 23, 95, 108—Manufacture use of fluorides in, 66, 203, 219—Methylic, action on its soda derivative, 87, 65—Methylic, and iodide of methyl, molecular combination formed by, 84, 231—Methylic, decomposition of copper sulphate by, 94, 12—Methylic, electric osmosis in, 89, 237, 286—Methylic, hydrates of, 89, 244—Methylalysylic, 25, 300—Mixed with wood-spirits, ordinary, 31, 238—Molybdic acid as a reagent for, 73, 149—Molybdic acid test for, 50, 200—Monotamie, conversion of glucoses into, 24, 240—New, 50, 177—Mono-iodallylic, 43, 11—Non-inflammable, 95, 179—Nonylic, synthesis of normal, 87, 203—Octyl (*see* Octyl alcohol)—Octylic, 20, 132, 156— α -Cenanthylic, 12, 224— α -Cenanthylic, action on its sodium derivative, 83, 95— α -Cenanthylic, condensation of ethylic alcohol with, 87, 203— α -Cenanthylic, condensation with propylic alcohol, 87, 203—Of acetone (*see* Acetone)—Of Allyl (*see* Allyl)—Of amyl (*see* Amyl)—Of benzyl (*see* Benzyl)—Of ethyl (*see* Ethyl)—Of heptyl (*see* Heptyl)—Of isoamyl (*see* Isoamyl)—Of isobutyl (*see* Isobutyl)—Of isopropyl (*see* Isopropyl alcohol)—Of methyl (*see* Methyl)—Of propyl (*see* Propyl)—Of sodium (*see* Sodium alcohol)—Orthonitrobenzyllic, decomposition under influence of aqueous soda and alcoholic soda, 91, 163—Orthonitrobenzyllic, reduction, 87, 118; 90, 23—Oxidation of, 15, 66; 17, 299; 26, 59—Oxidation by ammoniacal binoxide of copper, 41, 47—Oxygenous base derived from, 43, 46—Para-amidophenylethyllic, 69, 313—Phenic, crystallised hydrate of, 11, 114—Phenylethyllic, primary, 89, 298—Phthal- (*see* Phthal-alcohol)—Phthalic, oxidation, 54, 109—Production by fruit, 26, 240—Production of pure, 59, 181—Propargylic (*see* Propargyl-alcohol)—Propylic, 24, 110—Propylic and butylic, distinction between, 61, 192—Propylic and water, mixture of, 58, 263—Propylic, ethereal derivatives from, 20, 117—Propylic solutions, behaviour towards semi-permeable membranes, 91, 267—Propylic, condensation of α -enanthylic alcohol with, 87, 203—Propylic, ethers of, 19, 176—Propylic, normal, conversion of allyl-alcohol into, 22, 226—Propylic derivatives from, 22, 323; 28, 84, 204—Propylic, normal, existence of, 19, 203—Propylic, normal, stability of, 21, 118—Propylic, of fermentation, 20, 130—Propylic, of fermentation, propylic compounds derived from, 19, 198—Propylic, synthesis by means of ethylic alcohol, 21, 57—Photo-catchuyl (*see* Photocatchuyl alcohol)—Pseudoctylic, oxidation, 20, 203—Pure, specific gravity, 27, 93—Purification, 51, 275, 287; 59, 25; 61, 53—Radicles, action of chlorides of, on primary monamines, 32, 146—Radicles, action of chlorides of, on secondary monamines, 31, 140; 32, 146—Radicles, amido-acids with, 41, 172—Radicles, chlorides of (*see* Chlorides)—Radicles, halogen compounds of, action of water on, 35, 194; 36,

223—Radicles, haloid compounds of, action of water on, 35, 232; 40, 43—Radicles, iodides of, 26, 83—Radicles, nomenclature, 26, 108—Radicles, recognition of, 47, 59—Radicles, substitution of for the hydrogen of sulphuretted hydrogen, 23, 180—Reaction for, 50, 175, 200—Reagent for, 24, 144; 37, 62—Recognising source of, 17, 301—Rectifying by means of gelatine, 18, 131—Reduction of molybdo-sulphuric acid by, 83, 166—Research, proposed Society of, 94, 12—Sale of, 13, 84—Sodic, measure of heat of etherification, 74, 37—Solidification, 48, 193—Solubility of glucose in, 3, 80—Solubility of organic acids in, 37, 249—Solubility of proteoses and peptones in, 81, 24—Solubility of sulphur in, 53, 181—Solvent power of clearing and mounting media, 82, 88—Specific gravity of, 22, 71, 191—Stilben, 25, 22—Styrolen, 35, 263; 36, 213; 38, 273—Synthesis of, 80, 217—Tables, 41, 57, 70, 71, 100—Terpenic, and derivatives, 81, 202—Tertiary, 78, 35—Tertiary, method of preparing, 27, 70—Tertiary pseudobutyl, conversion of isobutyl-alcohol into, 21, 34—Test for, 34, 137, 191—Test for pure castor oil, 62, 215, 235—Testing for adulteration of essential oils, 26, 205—Testing for amyl alcohol, 21, 143—Thio-isopropyl, 26, 94—Titrating with chromic acid, 61, 121—To aid in detecting adulteration of wax with tallow, 25, 167—Toxic properties, 32, 84—Transformation of aldehyde into, 10, 202—Treating wood and other substances to produce, 11, 10—Triazoethyl, 98, 267—Tricaprylic, synthesis, 83, 179—Trichloric, 57, 171—Trivalent of allyl-dipropylcarbinol, 77, 129—Trichloroisopropylic, 89, 106—Vinic, electrolysis of, 10, 22—Vinic, in mixtures, 33, 180—Vinic, methylic alcohol in, 43, 117—Vinyllic, of the type $\text{ArR}=\text{C}=\text{CHOH}$, 96, 234—Water in, 41, 36—Wood, action of watery vapour on ignited, 38, 113—Xylil- (*see* Xylil-alcohol)—Yeast (*see* Yeast)

Alcohol hydrates, ethylic, 89, 22—Methylic, 89, 244

Alcohols, 15, 200; 57, 171; 88, 233—Acetylenic, synthesis of primary, 83, 287—Acid, lactonisation of, 100, 160—Acid, nitric ethers of, 89, 35, 59, 227; 88, 244—Acidity of, 82, 47—Action of, 57, 90; 65, 58—Action of aluminium amalgams on, 83, 48—Action of ammonia metals on, 81, 280—Action of anhydrous sulphurous acid on, 37, 264—Action of chloride of lime on, 44, 274—Action of metallic alkylates on, 55, 245—Action of metallic calcium on, 97, 10—Action of nitrogen trioxide and tetroxide on, 76, 249—Action on acetals of monovalent alcohols, 83, 239—Action on chloroacetate of methylene, 87, 312—Action on gold-phosphorus chlorides, 54, 297—Action on metallic calcium, 99, 82—Action on sodium benzoate, 97, 143—Action on sodium derivatives of other alcohols, 86, 95—Allylic, glycerins from, 71, 234—Allylic, secondary, 70, 12—Aluminium, 42, 267; 44, 257; 52, 267—Amino- (*see* Amino-alcohols)—And aromatic hydrocarbons, combinations, 27, 196—And aldehydes substituted, 16, 314—And baryta and lime, combination, 41, 295—And benzil, and benzoin, compounds from, 53, 259—And carbide of calcium, 83, 287—And phosphorus halides, interaction, 92, 245—Aqueous, 33, 53, 64—Aromatic, derived from fenone, 100, 72—Aromatic, reactions of, 97, 47—Aromatic, synthesis from formic alde-

hyde, 87, 24—Behaviour with zinc powder, 43, 66—Belonging to the series $\text{C}_n\text{H}_{2n}\text{O}$, formation and properties, 35, 113—Boiling-points, 89, 265— α - and β -campolytic, 93, 106—Catalytic decomposition, by finely-divided metals, 87, 239, 262—Catalytic dehydration by amorphous phosphorus and phosphates, 95, 286—Colour, compared with that of water, 74, 181—Commercial, denaturising agent for, 88, 311—Commercial, furfural in, 62, 85—Composition, 64, 61—Condensation of acetylenic carbides with, 91, 153—Condensation of acetylenic ethers with, 89, 107—Constitution, 27, 99; 34, 120, 129—Conversion into nitric ethers, 29, 274—Converting fatty acids into, 23, 143—Cyclic, synthesis of alcoyl derivatives of saturated, 91, 143—Decomposition under catalytic action of live coals, 98, 59—Derived from a dextroteterebentene eucalyptene, 72, 49—Derived from xylenes, 51, 49—Detection of impurities in, 57, 202—Diagnosis of, 8, 75—Dicaprylic and tricaprylic, synthesis, 83, 179—Diatomic, oxidation of, 14, 81—Ethereal derivatives of, 21, 70—Etherised derivation on acids, 27, 268—Ethyl, in the vegetable kingdom, 32, 62—Ethylic, activity of commercial, 91, 304—Ethylic and methylic, determination and separation, 74, 110—Fatty, formation from their initial constituent molecules, 25, 46, 202—Fatty, molecular weight and atomicity of higher, 52, 331—Fatty, recognition of, 40, 77—Fermentation, groups of isomeric substances derived from, 26, 299—Formation of corresponding, in preparation of aldehydes on Piria's method, 37, 205—Formenic, primary, 87, 239—Formulae of, 33, 174—From flint and quartz, 27, 237—Hexatonic, and mononitrobenz-aldehydes, combination, 89, 23—Higher, detection, 65, 283; 67, 215; 68, 281—Higher, origin, 63, 188—Higher, production, 63, 58—Higher, Rose-Herzfeld and sulphuric acid methods for determination of, 93, 199—Hydroaromatic, preparation, 89, 59—In chemistry, 25, 83—In cyclohexane series, synthesis, 90, 118—In sour waters of starch works, 29, 273—In spirits, determination of higher, 95, 34—In unfermented fruit juices, 41, 25—Increase in viscosity when mixed with water, 95, 254—Industrial, impurities in, 57, 170—Isomerism in, 10, 260—Ketone, 97, 179—Ketone β -aa-di- α -coolated, 97, 259—Lower, properties of mixtures of with benzene and with benzene and water, 85, 233—Lower, properties of mixtures of with water, 85, 233—Meta- and para-nitrobenzyllic, decomposition under influence of aqueous soda and alcoholic soda, 92, 212—Methylic and ethylic determination and separation, 74, 110—Methylic, detecting acetone in, 79, 252—Mono- and poly-atonic, synthesis, 92, 57—Monatomic sodic, action on camphor, 31, 229—Monovalent, acetals of, 82, 243—Monovalent, action of alcohols on acetals of, 83, 239—Monovalent, reagent for, 72, 257—New series, 23, 131—Nitriles of, and cyanic ethers, 71, 294—Non-saturated, oxidation by action of contact, 84, 202—Normal, products of oxidation, 20, 81; 24, 168—Of amyl series, polariscopic rotatory power of, 24, 216—Of bad flavour, disinfection by means of electrolysis, 48, 182, 203—Of hydroaromatic and terpene series, 96, 291—Of series $\text{C}_n\text{H}_{2n-5}\text{OH}$, synthesis, 99, 59—Oxidation of, 8, 293; 70, 269—Oxidation, catalytic, 87, 288—Phenol, synthesis of, 70, 198—Plurivalent, acetals of, 82, 267—Plurivalent, action of bacteria of sorbose on,

78, 95—Polyatomic, 28, 107; 46, 160 — Polyatomic, action of ammonium metals on, 91, 205—Polyatomic, of sugar series, acetals of, 89, 228 — Polyatomic, and their derivatives, action of permanganate on, 74, 317 — Polyatomic, and benzene alkylid, combination, 53, 232—Polyatomic, etheral derivatives, 20, 153; 22, 59, 154; 23, 142—Polyatomic, oxalines or ethers of, 28, 70—Polyatomic, preparation, 52, 13—Polyatomic, reaction, 37, 133, 196; 50, 800—Polyatomic, synthesis, 92, 57 — Polyhydric, oxidation, 78, 324 — Polyhydric, magnetic rotation of, 85, 8 — Polyvalent, action of inorganic compounds on optically active, 92, 58 — Primary, action of dried oxalic acid on, 37, 227—Primary, action of metallic oxides on, 98, 59, 83, 96 — Primary, secondary, and tertiary, of fatty series, differentiation, 89, 287—Primary, containing an acetylenic function, synthesis of, 86, 317—Primary, of fatty series, reduction of non-saturated, by ammonium metals, 94, 83 — Primary, oxidation by action of contact, 83, 287—Primary, preparation by means of corresponding acids, 88, 59, 70—Primary, preparation by means of the corresponding amides, 89, 94 — Primary, syntheses of, 85, 71; 64, 165—Prognosis of, 13, 92—Propylic, action of hypochlorite of lime on, 40, 276—Propylic and normal butylic, action on their respective sodium derivatives, 85, 59—Purification and identification, 89, 251 — Racemic, resolution of, 99, 297—Reactions of, 21, 64—Recognition of, 47, 59 — Reduction of aldehyds to, 32, 57 — Regenerated, detection of benzine in, 82, 71—Saturated, of fatty series, latent heats of evaporation of, 70, 209, 221—Secondary, 10, 259; 87, 262—Secondary, action of dried oxalic acid on, 37, 227 — Secondary and tertiary, action of contact on, 84, 60—Secondary, boiling-points, 94, 159 — Secondary, characteristic reaction, 51, 165 — Secondary, containing an acetylenic function, synthesis, 85, 119—Secondary, of dichotomic octane, 94, 83 — Soluble in water, 24, 167 — Sulphuryl-chloride and its conduct towards, 35, 197 — Synthesis, 15, 226; 16, 208; 17, 181, 213; 83, 95 — Synthetic, formation of mixed, 72, 98—Taxation of, 44, 83—Terpenic, and their ethers, use of salicylate of sodium for estimation of mixtures of, 75, 199—Terpenic, extraction of, 73, 232 — Tertiary, 13, 83; 87, 262 — Tertiary, action of dried oxalic acid on, 37, 227—Tertiary, application of Grignard's reaction to the halogen ethers of, 89, 275—Tertiary, boiling-points, 94, 159—Tertiary, component C(OH) of, 93, 80—Tertiary, direct dehydration of, 99, 35—Tertiary, from cyclohexanol, synthesis, 90, 10—Tertiary, of fatty series, synthesis of, 83, 142 — Tertiary, oxidation of, 25, 107; 65, 120—Tertiary, prepared from paramethylcyclohexane, syntheses of, 93, 141—Tertiary, reaction of, 78, 11—Tertiary, recognition, 47, 178—Tertiary, saturated from the ketones, synthesis of, 52, 13—Tertiary, synthesis, 88, 220; 89, 95 — Testing purity of, 7, 279—Thallic, 10, 249, 268—Toxic action of different, 73, 293 — Transformation into amines, 45, 237 — Transformation of aldehydes and acetones into, 6, 148 — Transformation of aldehydes and ketones into, 88, 137 — Transformation of primary saturated, into corresponding monobasic acids, 95, 105—Triacrylic and diacrylic, synthesis, 83, 179—Univalent, action of isocyanate of phenyl on, 90, 58, 70—Unsaturated, subti-

tution of magnesium for zinc in the synthesis of, 99, 133—Zinc in, 82, 317.

Alcoholacetophenones, tri- (see Tri-alcoholacetophenones)

Alcoholate, acetylchloral- (see Acetylchloralalcoholate) — Of baryta (see Baryta) — Of chloral (see Chloral) — Of potassium (see Potassium) — Of sodium (see Sodium)

Alcoholates, formation heat of, 48, 203 — Of alkaline (see Alkaline) — Of aluminium (see Aluminium) — Of sodium (see Sodium) — Preparation, 91, 280

Alcoholic acid (see Acid) — Amines (see Amines) — Ammonia (see Ammonia) — Bromides (see Bromides) — Chlorides (see Chlorides) — Drinks (see Drinks) — Ferment (see Ferment) — Ferments (see Ferments) — Fermentation (see Fermentation) — Intoxication (see Intoxication) — Iodides (see Iodides) — Liquids (see Liquids) — Liquors (see Liquors) — Metamorphoses (see Metamorphoses) — Oxides (see Oxides) — Potash (see Potash) — Potassium hydroxide (see Potassium hydroxide) — Radicles (see Radicles) — Solution of soap (see Soap) — Solutions (see Solutions) — Spirits (see Spirits) — Yeast (see Yeast)

Alcoholism, 54, 334

Alcoholometers of precision, 66, 210 — Testing and verification, 26, 47, 71

Alcoholometric method by distillation of alkalinised spirituous liquids, 34, 51

Alcoholysis of cocoa butter, 94, 259 — Of fatty bodies, 94, 266

Alcoloids, acidimetric estimation, 80, 72

Alcoyl and acyleyanocamphors, 87, 226

And alcolidic derivatives of cyclic ketones, preparation, 39, 286

Alcoylacetylacetones, action on diazoic and tetrazoic chlorides, 86, 257

Alcoylallylketones, 89, 119

Alcoylamidoanthraquinones, di- (see Dialcoylamidoanthraquinones)

Alcoylamidodichloranthraquinones, di- (see Dialcoylamido-dichloranthraquinones)

Alcoylcamphors, 87, 226—Of aromatic series, crystallographic properties of, 74, 85

Alcoylevanacetic acids (see Acid) — Ethers (see Ethers)

Alcoyleyanmalonic ethers (see Ethers)

Alcoyleyclohexanones, β -methyl- α - (see β -methyl- α -alcoyleyclohexanones)

Alcoylamide, tetra- (see Tetraalcoyl-diamide)

Alcoyldiamidodiphenylanthrones, tetra- (see Tetraalcoyldiamidodiphenylanthrones)

Alcoylketones, propenyl- (see Propenyl-alcoylketones)

Alcoylketonic ethers (see Ethers)

Alcoylmalonic ethers (see Ethers)

Alcoylmenthones, preparation, 89, 286

Alcoyloxy-cyanocrotonic ethers (see Ethers)

Alcoylthuyones, 92, 35

Alde acids (see Acids)

Aldehyde of ammonia (see Ammonia) — Of ammonium (see Ammonium)

Aldehyde, acet- (see Acetaldehyde) — Acetal- (see Acetaldehyde) — Action of chlorine on, 21, 286—Action of heat on, 8, 87; 31, 240—Action of sulphuric acid on, 99, 36—Action on primary ureas, 24, 87—Adipic, 79, 287—Ammon- (see Ammonaldehyde) — Amylic, 21, 119—And ammonium combinations, 24, 195 — And anhydrous prussic acid, compound formed by direct union, 16, 224—And camphor, molecular compounds, 45, 100 — And oxide of ethylene, 4, 334—And phenols and aromatic hydrocarbons, combinations, 27, 47—And sulphaldehyde, 23, 227—Anis- (see Anisaldehyde) — Anisic, preparation, 81, 215—Anisic, reactions of, 17, 155 — Benz (see Benzaldehyde) — Benzene-azobenzonic, 86, 11—Benzoic, action on

sodium menthol, 84, 47 — Benzoic, action on ammoniacal salts, 79, 226 — Benzoic, decomposing action, 53, 303—Benzoic, and polyatomic acohols, combination, 53, 233—Benzol- (see Benzolaldehyde) — Benzyllic, phenylhydrazine of, action of chloride of tetrazodiphenyl on, 79, 144—Bichloric propionic, 61, 278—Bichlorinated, 18, 185—Bichloruretted, 19, 203—Bromomethylfurfur- (see Bromomethylfurfuraldehyde) — Butylic, 21, 119—Chloracetic, hydrate of, 23, 47—Cinnamic in the digestion of fibrin, 42, 109—Coloured reaction of ordinary, 77, 29—Compounds, 29, 197 — Condensation products, 25, 95, 215, 227—Conversion into acetone, 20, 60 — Conversion of chloral into by inverse substitution, 22, 58 — Croton- (see Crotonaldehyde) — Crotonic, base from, 48, 22—Crotonic, hydrat on, 49, 10—Crotonic, preparation, 43, 82; 65, 74; 99, 36—Crotonic, reduction, 74, 73—Crotonic, synthesis, 20, 130—Cumic, derivatives, 35, 64—Cyan- (see Cyanaldehyde) — Derivatives, 36, 230—Derivatives of amines and ureas, 38, 48—Derivatives of naphthylamine, 29, 252 — Detection, 56, 229; 58, 208—Di- (see Di-aldehyde) — Dibromacetic, ethyl ether-oxide of, 95, 94 — Dichlor- (see Dichloraldehyde) — Dimethylaminobenz- (see Dimethylaminobenzaldehyde) — Ethylic, action of fuming sulphuric acid on, 84, 304—Ethyl (see Ethyl) — Form- (see Formaldehyde) — Formal, reactions of, 74, 281 — Formation, regular, 87, 191 — Formic, 66, 122 — Formic, action of halogens on, 73, 48—Formic, action of oxygen on dissolved, 77, 45 — Formic, action of water on, 74, 73—Formic, action on albumenoid matters, 81, 46—Formic, action on ammoniacal salts, 71, 161; 79, 226—Formic, action on menthol and borneol, 79, 156—Formic, action on phenylhydrazine and hydrazones, 74, 120—Formic, alkaline solutions of, use in quantitative analysis, 81, 47 — Formic, and chloral, combinations, 79, 287—Formic, menthol, and borneol compounds, 80, 229 — Formic, and its polymers, estimation, 91, 135 — Formic, condensation, 70, 98 — Formic, condensation of acetylenic carbides with, 86, 317—Formic, detection and estimation, 81, 242 — Formic, disinfection with, 75, 251, 278—Formic, estimation, 76, 206; 80, 7—Formic, formation heat of, 75, 215—Formic, formation in combustion of tobacco, 90, 281 — Formic, importance as product of partial combustion of organic compounds, 84, 13—Formic, in the air, estimation, 89, 23—Formic, in atmospheric air, 89, 120—Formic, in caramelised substances, 93, 141—Formic, in milk, detection, 71, 247; 80, 244 — Formic, in products of combustion and smoke, 90, 45 — Formic, preparation, 36, 7 — Formic, products of condensation with quinaldine, 80, 231—Products of reaction on gallic acid, 77, 267—Formic, synthesis, 29, 96 — Formic, synthesis of aromatic aldehydes from, 87, 24—From pinene, 99, 251—Fumic, gaseous, for disinfection, 70, 209 — Furfur- (see Furfuraldehyde) — Glyceric, 55, 272 — Glyceric, acetals of, 79, 250—Glyceric, fermentable, 57, 23—Glycollic, condensation, 80, 177 — Glycollic, crystalline, 79, 236—Glycollic, degradation of, 82, 23—Glycollic, formation, 72, 47—Glycollic, formation of α - and β -acrose from, 81, 9—Glyoxal monopyrocatechin (see Glyoxal) — Hexahydrobenzoic, 90, 11—In ether, estimating, 76, 7—Iod (see Iodisaldehyde) — Iodosobenz- (see Iodosobenzaldehyde) — Iodoxybenz- (see Iodoxybenzaldehyde) — Isobutyl, action of chlorine on, 27, 282 — Isobutyl,

- action of potassium carbonate on, 40, 32 — Isobutyl, action of potassium carbonate on, 41, 34; 43, 12 — Isobutyl, commercial and pure, 28, 98 — Isobutyl, derivatives, 43, 98 — Isobutyl, polymeric modifications, 27, 23; 28, 204 — Isobutyl, trichloroacetone formed from, 29, 264 — Isobutyric, condensation products, 74, 12 — Isomer of, 2, 72 — Isovalerianic, condensation, 69, 66 — Isovaleric, condensation products of, 72, 98 — Levulic, splitting-up of sylvane into, 78, 83 — Manufacture for preparation of aniline green, 11, 294 — Met- (see Metalddehyde) — Metacet. (see Metacetaldehyde) — Methyl, (see Methalddehyde) — Methyl, 22, 83, 287; 31, 186 — Methyl, contribution to history of, 16, 285, 299 — Methyl, contributions to our knowledge of, 20, 106 — Methyl, conversion into ethylic alcohol, 18, 7 — Methyl, formation, 39, 54 — Methyl, probable identity with dioxymethylene, 18, 21 — Methyl, synthesis of, 31, 61 — Methyl, transformation of, wood spirit into, 16, 182 — Methylene-3,4-dioxyhydratropic, 85, 203 — Methylic, 16, 299 — Modifications, 4, 226 — Monobrom- (see Monobromalddehyde) — Monochloro- (see Monochloroaldehyde) — Nitro-benz- (see Nitro-benzaldehyde) — Nitro-succinic, nitration of a derivative of, 85, 215 — Oenanthe, 20, 286 — Of acetone (see Acetone) — Of ammonia (see Ammonia aldehyde) — Of bichloride (see Bichloride aldehyde) — Of chlorine (see Chlorine aldehyde) — Of ethyl series, products of action of chlorine and bromine on, 33, 18 — Of salicyl (see Salicyl aldehyde) — Orthonitrobenzoic, product of combination with phenol in presence of hydrochloric acid, 91, 154 — Orthotoluic, 88, 281 — Oxalic, product of condensation, 29, 207 — β -Oxy- α -naphthoic, derivatives and products of condensation, 89, 287 — Oxy-naphthoic, and camphor, union, 84, 47 — Ozoniferous, for detection of iodine, 74, 7 — Par- (see Paraldehyde) — Parabenzoic, azobenzoic, and its derivatives, 87, 21 — Paraform (see Paraformaldehyde) — Para-homosalicyl (see Para-homosalicylaldehyde) — Paramethoxybenzoinic, in essence of tarragon and derivatives of tarragon, 96, 304 — Paroxy-benz- (see Paroxybenzaldehyde) — Paroxybenzoic, 80, 195 — Paroxybenzoic, nitro derivative of, 36, 109 — Phthalic, 13, 281; 36, 52 — Polymeric, modifications, 22, 47 — Prognosis of, 13, 92 — Propylic, 21, 119 — Propylic, action of fuming sulphuric acid on, 84, 304 — Protocatechu (see Protocatechu-aldehyde) — Reaction for, 63, 25, 204 — Researches on, 33, 54 — Salicylic, reduction of salicylic acid to, 99, 72 — Semi- (see Semi-aldehyde) — Sulph- (see Sulphalddehyde) — Synthesis with an odour of violets, 96, 48 — Terephthal, 53, 96 — Tetrollic, ethylic acetal of, 100, 107 — Titration, 62, 84 — Transformation into alcohol, 10, 202 — Transformation of benzamide into, 31, 21 — Triazo-acetyl- (see Triazoacetylaldehyde) — Tribromopropionic, 79, 202 — Valerian, 20, 286 — Valerianic, preparation, 69, 313 — Valeric (see Valeric aldehyde) — Valeric, 72, 49 — Valeric, action of chlorine on, 2, 35 — Valeric, products of, 21, 107 — With an odour of violets, synthesis of, 96, 48
- Aldehyd acetone, formation, 45, 87
- Aldehyde alcohol, 25, 299
- Aldehyde ammonia, action of hydrocyanic acid on, 95, 36 — And chloral ammonia, 55, 84 — Action of triocyanates on, 57, 116 — Cyan derivatives of, 28, 204 — Electrolytic reduction in sulphuric acid solution, 100, 328
- Aldehyde collidine, 22, 202; 40, 300
- Aldehyde resin, 42, 186; 43, 84
- Aldehydes, 23, 119; 31, 31; 77, 164; 88, 233 — Acetylenic, 90, 10 — Acetylenic, decomposition by the alkalis, 86, 317 — Acetylenic, synthesis, 84, 60 — Acid, 92, 57 — Acidimetry of, 82, 315 — Action, 59, 12; 60, 302 — Action of acid chlorides on in presence of zinc chloride, 84, 36 — Action of baryta and of sodium on, 87, 203 — Action of magnesium amalgam on, 95, 286 — Action of nascent hydrogen on, 7, 244 — Action on amines, 11, 21 — Action on benzil, 50, 232; 53, 259 — Action on binaphthyl acetals, 81, 23 — Action on bisulphite of naphthalin, 28, 180 — Action on chloral ammonia, 40, 156 — Action on ketons, 47, 294 — Action on phenanthraquinon, 45, 104 — Action on rosaniline, 12, 159 — Aliphatic, 71, 221 — Aliphatic, electrolytic oxidation, 91, 54 — Amino (see Aminoaldehydes) — And acid chlorides, interaction, 86, 289 — And alcohols and aromatic hydrocarbons, combinations, 27, 196 — And alcohols substituted, 16, 314 — And ammonia, condensations of compounds which contain the dicarbonyl group with, 48, 204 — And camphor, compounds, 79, 300 — And cyanides, condensation, 70, 73 — And ethylic alcohol, separation, 74, 110 — And glycol combinations, 57, 141 — And ketones, compounds with mercury oxide, 92, 201 — And ketones, condensation compounds, 48, 217 — And ketones, solubility of bisulphite compounds of, 96, 225 — And phenols, combinations, 25, 58, 191 — And saturated acetones, condensation of, 71, 317 — And thiosulphuric acid, compounds, 94, 171 — Amines and amides derived from, 79, 11 — Aromatic, 94, 216 — Aromatic, action of isobutyric anhydride on, 39, 39 — Aromatic, action of oxalacetic ether on, 90, 117 — Aromatic, action on derivatives of naphthylamine, 82, 240 — Aromatic, and thuyone, compounds, 92, 35 — Aromatic, condensation of nitromethane with, 86, 70 — Aromatic, formation of coumarin from, 35, 61 — Aromatic, preparation of, 74, 49 — Aromatic, preparation of acetals of ortho-substituted, 78, 304 — Aromatic, reduction products, 53, 276 — Aromatic synthesis, 41, 172 — 79, 191; 89, 83 — Aromatic, under influence of dehydrating agents, 16, 37 — As acids, 93, 128 — Benz- (see Benzaldehydes) — Boiling-points, 89, 265 — Bromised, 65, 191 — Butylic, 10, 117 — Chlorinated, action of semicarbazide on, 99, 191 — Chlorised action on benzol, 50, 11 — Condensations, 55, 177; 69, 37 — Condensation of the true acetylenic carbides with, 85, 119 — Condensation with methylacetoacetate, 89, 21 — Condensation with mixtures of α -naphthol and α -naphthylamine, 96, 21 — Condensation with sodium derivatives of ethyl cyanoacetate, 99, 142; 100, 266 — Condensed with elimination of water or aldehydes, 26, 59 — Constitution, 21, 203 — Cyclic, preparation, 9, 143 — Detection, 57, 13 — Determination in whiskey, 95, 183, 190 — Fatty, action of cyanide of potassium on, 83, 152 — Fatty, action on malonic acid, 47, 294 — Fatty, and mercuric sulphate, combinations, 79, 131 — Fatty, synthesis, 89, 226 — Formation of acids from, 53, 128 — Formation of amides from, 83, 138 — Formation of corresponding alcohols in preparation on Piria's method, 37, 205 — Formic, action on ammoniacal salts, 79, 226 — From hydroquinon, 44, 13 — General reaction of, 100, 220 — Glucose, reactions for, 74, 281 — Glycidic condensation with α -chloropropionic ether, 93, 93 — Hydroxy (see Hydroxy-aldehydes) — In wood spirit, 34, 271 — Isomeric, thermic formation, 34, 133 — β -keto- (see β -ketoaldehydes) — Monamine derived from, 17, 34 — Mononitrobenz- (see Mononitrobenzaldehydes) — Of acids, preparation, 99, 108 — Of fatty series, synthesis of, 85, 300 — Of hexahydroaromatic series, preparation, 93, 186 — Oxidation by silver oxide, 100, 172 — Ozoniferous, for detection of iodine in presence of chlorine and bromine, 74, 7 — Phenylhydrazones of, 93, 263 — Preparation, 89, 191 — Preparing by means of glycidic acids, 99, 168 — Producing, 9, 265 — Prognosis of, 13, 92 — Propylic, 10, 117 — Quantitative determination of carbonyl group in, 93, 83 — Reaction for, 89, 131, 251 — Reaction of, 48, 238; 68, 186; 70, 161; 77, 236; 91, 130; 100, 220 — Reagent for, 64, 190 — Reduction to alcohols, 32, 57 — Synthesis of, 35, 64; 85, 287; 89, 83, 191 — Synthesis by Grignard's reaction, 93, 74 — Synthesis by means of substituted glycidic acids, 91, 47 — Thi- (see Thialdehydes) — Transformation of α -oxyacids into, 97, 119 — Transformation of the primary α -glycols into the corresponding, 89, 59
- Aldehyde decanohydrin, *d*-benz- (see *d*-Benzaldehydephenylhydrazine) — Cinnam- (see Cinnamaldehyde decanohydrin)
- Aldehyde decanohydrins, preparation of acyl derivatives of, 100, 230
- Aldehyde phenylhydrazones, benz- (see Benzaldehydephenylhydrazones)
- Aldehydic acid (see Acid) — Chlorides (see Chlorides)

 Alix, Just, and Isidore Bay (*see* Bay, I.)
 Alizarin, 3, 125; 15, 253; 19, 136, 258, 263; 21, 252; 22, 130, 168, 180; 30, 180, 203, 213, 222, 235—Absorption spectra, 39, 287—Action of ammonia on, 35, 198—Action of bromine on, 27, 317—Amide *see* Amidealizerin—And dibasic compounds, 33, 122—Artificial, 20, 131, 192, 286, 299; 21, 35, 43, 57, 71, 138, 184, 249; 23, 142, 276; 24, 205, 217; 28, 280; 39, 229—Artificial, and extract of madder, distinctive reaction between reds of, 34, 184—Artificial, and madder, 29, 166; 30, 31—Artificial and natural, distinction between, 21, 99—Artificial, anthraflavon and an accessory product of manufacture of, 34, 21—Artificial, dyeing with, 33, 211; 34, 184; 43, 214—Artificial, isopurpurine from, 26, 106—Artificial, manufacture, 5, 181; 30, 53—Artificial, preparation, 49, 158, 202; 30, 113—Artificial, production, 3, 329—Artificial, Turkey red dyeing with, 30, 140—As an indicator in titration, 28, 280—Blue, 37, 204; 39, 42; 40, 191, 238; 42, 24—Blue, bisulphite compounds of, 63, 157—Blue oxy derivatives of, 64, 201—Brown, 38, 37—Carmine, 38, 154—Chemical formula, 19, 193—Clearing Turkey reds obtained with, 29, 187—Colouring matter accompanying, 23, 157—Colouring-matters and green alizarin dyes, 38, 254—Constitution, 33, 25, 37—Dyeing with, part played by acids in, 33, 42—Ethyl, 27, 171—Formation by reduction of rugulic acid, 32, 260—Formation from anthracene-sulpho acid, 32, 241, 254—Green commercial, extraction of yellow from, 10, 105, 220—In purpurin, 35, 34—Industry, 48, 182—Isomerides, 33, 233—Isopurpurin, and flavo purpurin, recognition in mixtures, 41, 256—Manufacture, 31, 142—Maximum tension and density of vapour of, 40, 156—Methyl, 27, 171—Monalkyl ethers of, 69, 71—Naphthalic, 3, 329, 336—Nitr- (*see* Nitralizarine)—Nitro, 31, 256; 34, 10, 40; 38, 24—Nitro-derivatives, 38, 27—Nitro, preparing, 46, 47—Oil (*see* Oil)—Preparation, 12, 296—Preparation from madder, 21, 81—Preparation, secondary colouring matter in, 25, 284—Red dyeing, 48, 292—Reds, constitution of oils for, 65, 25—Synthesis, 19, 202
 Alkali, 24, 23—Act, 8, 266; 9, 120; 31, 7—Act, Inspectors under, 9, 72, 120—Act of 1863, first prosecution under, 15, 121—Act, working of, 11, 252; 14, 34—Acts, history and working of, 38, 158, 172—Acts, report on, 40, 304—And alkali earth-metals, electrolytic preparation of amalgams of, 100, 235—And soap, 55, 94—Apparatus, 21, 227—California, 55, 58, 79—Caustic, and carbonated, estimation, 54, 28, 67—Caustic, determination in presence of alkali line sulphides and carbonates, 37, 83—Caustic, neutral soap free from, 26, 287—Caustic, of soap, 59, 280—Caustic, vanadium in, 63, 24—Company, Ltd., Cheshire, 56, 48—Crude, purification, 58, 185—Determination of small quantities, 64, 228, 240, 254, 266, 277, 288—Electrolytic, and bleach industry, position and prospects, 95, 118—Free, and carbonated, in soaps, estimation, 55, 182—From seaweed, 34, 201—Glasses melted with, 39, 137—Group, fifth element of, 3, 357—In beet-root juice, 27, 84—In soap, 50, 68; 59, 40; 64, 205; 71, 285, 305—Industry, notes on, 59, 240—Makers, German, report of Association of, 45, 253—Making, cyanogen compounds in, 38, 130, 137, 162, 177—Manufacture, 2, 120; 4, 172; 28, 228; 37, 16; 49, 288; 61, 169—Manufacture, commercial analyses of products and materials, 16, 151, 170, 178—Manufacture, loss of soda in, 15, 259; 44, 71—Manufacture, rare products of, 55, 176—Manufacture, regeneration of sulphur in, 36, 273—Manufacture, sodium carbonates in, 49, 168—Manufacture, waste of materials in, 15, 210, 232—Organic, in Boldo, 26, 168—Products of, 44, 71—Proof vessels, 50, 3—Report, the late Dr. Angus Smith's, 50, 200—Testing, 32, 313—Trade, 16, 172—Trade, German, in 1880, 43, 60—Trade of Lancashire, 22, 161—Trade statistics, 6, 288—Waste, 6, 203, 310—Waste, action at a high temperature on manganese chloride, 36, 113 173—Waste as a manure, 42, 295—Waste, hyposulphite of soda from, 21, 72—Waste in Great Britain, manufacture of sulphur from, 18, 157—Waste, sulphur from, 9, 107; 16, 27, 41, 220; 24, 289; 39, 172; 47, 202—Works, 9, 12; 19, 236, 241, 259—Works, act for condensation of muriatic acid gas in, 8, 35—Works, inspector of, 9, 72—Works inspector ship, 71, 318—Works, products of, 19, 119—Works Regulation and Poisoned Grain Bills, 8, 23, 25, 47, 49, 62—Works Regulation Bill, 7, 215, 306
 Alkali carbonates, estimation in presence of bicarbonate, 82, 68, 80
 Alkali-chlorine cell (*see* Cell)
 Alkali earth metals, electrolytic preparation of amalgams of alkali and, 100, 235—Periodides of, 89, 273
 Alkali heptamolybdates, determining, iodometric method, 91, 106
 Alkali metal, new, 2, 281—Oxidation, 69, 239
 Alkali metals, action of radium rays on the halides of, 89, 246—And mercury, double nitrites of, 95, 308—Anhydrous protoxides of, 95, 23—Boiling-points of, 92, 281—Discovery by Davy, 97, 11, 103, 210—Heat of solution of, 97, 118—Molecular volumes of, 97, 176—Nitrites of, and decomposition by heat, 90, 301—Production, 54, 218—Relation of ammonium to, 91, 276—Relation of thallium to, 100, 298—Solutions of in liquid ammonia, 98, 24—Trithionates and tetrathionates of, 98, 243—Vapours of, action on molten cast iron, 22, 48
 Alkali nitrates, colour of, 81, 102—Crystallisation of solutions of, 98, 242
 Alkali nitrite, reduction by an alkali metal, 78, 314
 Alkali nitrites, preparation of pure, 78, 314
 Alkali salt vapours, velocities of ions of, at high temperatures, 93, 139
 Alkali selenates and sulphates, topic axes and topic parameters of, 92, 234
 Alkali series, isodimorphism in, 93, 288—Position of ammonium in, 88, 8
 Alkali solution, indicator suitable for use with hundredth normal, 93, 23
 Alkali sulphates and selenates, topic axes and topic parameters of, 92, 234
 Alkali sulphides, action of ethane mercuride on, 92, 282
 Alkali vanadates, absorption of oxygen by, 91, 224
 Alkalies, absorption of carbonic oxide by, 5, 144—Action of, 59, 265; 61, 97, 313; 63, 242—Action of acetylene on ammonium compounds of, 79, 47—Action of iodine on, 80, 23; 81, 152—Action of phosphorated hydrogen on salts of, 3, 327—Action on amides, 77, 57—Action on aqueous solutions of acetol, 91, 269—Action on ethyl sodium thiosulphate, 98, 12—Action on ferro- and ferri-cyanides of iron, 14, 280—Action on glass and on paraffin, 86, 241—Action on glucose, 70, 209—Action on mica, 61, 313—Action on mono-dimethyl arsenic acids and their iodine substitution products, 98, 47—Action on glycerin, 87, 274—Action on nitro-compounds of paraffin series, 82, 251—Action on ouabaine, 88, 11—Action on sodium alkyl thiosulphates, 98, 34—Action on sugars, 81, 80—Action on tetrathionates, 96, 212—Analysis of vanadium sulphates and their double salts with, 36, 213—And alkali line earths, neutral carbonates of, 97, 256—And alkaline earths, separation of uranium from, 57, 221—And bismuth, double hyposulphites of, 90, 71—And carbohydrates, combinations, 45, 78—And cellulose, 61, 8—And iron, determining volu-

metrically, 28, 71 — And magnesia, separation, 1, 155—And magnesium, separation by alcoholic ammonium carbonate, 97, 280 — And magnesium, separation by arsenate process, 96, 166—And manganese peroxide, separation, 87, 23 — Anhydrous, decomposition of ethers by, 3, 63—Anhydrous hydrosulphates of, synthesis, 86, 256 — Behaviour of hydrogen peroxide with, 38, 174 — Cadaveric, 43, 130 — Carbonates of, and alkaline earths, neutral, 97, 228 —Caustic, acetone-additions under influence of, 48, 204—Caustic, action on cinnamic acid dibromide and its esters, 87, 201—Caustic, action on derivatives of para-nitrotoluene, 98, 243 — Caustic, action on diphenyl-carbonic ether, 90, 83 — Caustic, action on para-nitrotoluene and its derivatives, 96, 316 — Caustic, and metallic sulphates, interaction, 96, 290—Caustic, determination, 47, 188 —Caustic, determination, indicators for, 51, 226—Caustic, estimation, 70, 166, 187, 209, 232, 245, 257—Caustic, examination of flesh for, 59, 206 —Caustic, preparation of pure, 14, 152 —Caustic, solution of metallic oxides in fused, 11, 297 — Compounds of mercury cyanide with, 98, 12 — Decomposition of acetylenic aldehydes by, 86, 317 — Decomposition of glucose and uric acid by, 45, 87 — Decomposition of lead salts by, 45, 208 —Determination, 28, 71; 57, 212; 67, 185; 68, 137—Does ozone combine with free nitrogen in presence of, to form nitrous compounds and nitrates? 35, 44 — Electrolysis of dilute solutions of, at low potentials, 94, 36 — Fixed, volumetric determination of the metals precipitable by, 74, 109 — Humoid matters extracted from soil of, 44, 192 — In aethusa cynapium, 41, 277—In animal economy, 36, 275—In ashes of plants, chemical equivalence of, 32, 51—In ashes of plants, relative proportions of, 20, 83 — In beet-root, equivalence of, 31, 229 — In mineral leucite, 22, 13—In minerals, 23, 222, 234—In salts of acids belonging to the uric acid group, determination, 30, 53—In silicates, 5, 121; 22, 84, 96; 50, 279; 54, 242—In urine, 51, 95—In waters, 61, 38—Influence on velocity of formation of acetoxime, 97, 11—Iodates of, and ammonium radicle, 97, 10—Iodides of, preparation, 6, 107—Lakmoid and carminic acid as reagents for, 51, 206—Manganates of, preparation and use, 24, 86—Melting, influence on aromatic sulphonic acids, 40, 226 — Mixtures in solution, estimation, 1, 108, 144, 155, 179—Mono- and bicarbonates of, estimation, 74, 116, 197 — Nitrites of, action on uric acid and derivatives, 20, 131—Of complex function, titration, 84, 11—Organic, 42, 95; 62, 61—Organic, electrolysis of, 21, 59 —Organic, reactions of, 62, 321—Organic, salts of, analysis, 43, 39 — Permanganates of, preparation and use, 24, 86 — Preparation, 84, 108—Reaction for, 17, 22—Salts of, estimation of sulphuric acid in, 9, 133 —Salts of fixed, manufacture, 3, 221 —Separation from bases with which they are generally associated, 1, 193, 217—Silicates of, solution of, 78, 31, 21—Soil of, humid matters extracted from, 44, 102—Solubility in ether, 36, 48—Solubility of oxides in, 25, 311 —Sulphates of, conversion into carbonates, tartrates, etc., 27, 316 — Sulphates of, role played by carbon in reducing, 37, 271 — Volatile, 62, 110, 322

Alkali sulphides (*see Sulphides*)
Alkaliferous minerals (*see Minerals*)
Alkalimeter, new, 25, 68

Alkalimetric arrhenal (*see Arrhenal*) — Indicator (*see Indicator*)—Sulphates (*see Sulphates*)
Alkalimetric assays (*see Assays*)—Degree (*see Degrees*)
Alkalimetry, acid potassium tartrate as original standard substance for, 65, 107—Borax as a basis, 68, 317—Indicator in, 37, 275; 67, 60; 79, 192—Indicator which shows neutral concluding points in, 48, 119 —Indicator in, methyl-orange as, 44, 288—Of amines (*see Amines*)—Organic acids and acid anhydrides as standards in, 100, 3—Sources of error in, 74, 172, 197—Standardising in, 68, 161—Use of succinic acid as a standard in, 96, 44

Alkaline amalgams and nascent state, 39, 276—Amalgams, chemical constitution 40, 66, 156—And alkaline earthy sulphates, titration of a mixture of, 35, 152—And earthy alkaline metals, toxicity of, 66, 121—Bases, earthy, decomposition in presence of water, 49, 46—Compounds, insoluble, contained in living vegetables, 93, 105—Decomposition by solution in water, 18, 294—Deposits from Western America, 18, 108 — Development, theory of, 93, 104—Lakes in California, 21, 84—Matters, natural and industrial, rubidium in, 5, 295 —Preparation, 4, 213 — Reaction of glass, 51, 25—Reaction of natural silicates, 78, 311 — Reaction of well-waters, 54, 24—Reduction of metanitriline, 73, 9—Reduction of ortho-nitrodiphenylmethane, 99, 96 — Reduction of para- and meta-nitrobenzophenone, 95, 47

Alkaline acetates, separations with, 75, 251; 76, 19, 105, 175, 210, 222

Alkaline alcoholates, action, 67, 73, 169 —Action of carbonic oxide on, 13, 83

Alkaline aluminates, decomposition, 67, 85, 121—Preparation, 61, 73

Alkaline arseniates, action on metallic sesquioxides, 62, 49

Alkaline bicarbonates, decomposition under influence of heat, and of a vacuum, 34, 83 — Electrolysis, 30, 63

Alkaline bismuth solution as a reagent for starch sugar in urine, 50, 176

Alkaline bisulphates, displacement of sulphuric acid in, by water, 87, 118

Alkaline bisulphates, action on diazo-compounds, 25, 106

Alkaline borates, action on plants, 34, 205

Alkaline bromides, preparation, 9, 195

Alkaline carbides, formation, 77, 85

Alkaline carbonate and calcium carbonate, decomposition of a mixture, 90, 34

Alkaline carbonates, 5, 236, 311; 71, 93 —Action on earthy oxalates, 35, 272 —And analogous industrial products analysis, 38, 24 — Behaviour of phenolphthalein in the presence of, 89, 27 — Determination of caustic alkali in presence of, 37, 83 — Dissociation, 89, 59—Electrolysis, 30, 63 —In bicarbonates, 76, 305 — Manufacture, 20, 214 — Platinum attacked by melting, 41, 25—Precipitation of copper and nickel by, 17, 172 — Precipitation of lime by, 36, 277; 39, 264

Alkaline chlorates, electrolysis with an anode of copper, 89, 293 — Preparation, electrolytic method, 81, 182

Alkaline chlorides and aluminium chloride, compounds, 84, 304—And thorium chloride, anhydrous compounds of, 99, 299 — And thorium chloride, hydrated compounds of, 100, 48 —Decomposition, 19, 178 —Decomposition of calcium sulphate by, 36, 202 —Decomposition of cerium sulphate by, 36, 302 —Determination, 47, 166 — Electrolysis, 79, 208—Electrolysis, resistance of iridioplatinum anodes used in, 89, 138—Found on

Vesuvius, 36, 57—Found in water and rocks of coal formation of Luijk, 20, 168—Poisonous power of, 46, 23—Use in absorption of phosphide of hydrogen, 82, 95

Alkaline chloroiridates, 98, 31

Alkaline chloroiridides, 98, 31, 60

Alkaline chromates, absorption spectra of, 54, 44—Added to milk as a preservative, detection, 81, 44—Separations with, 78, 14

Alkaline citrates, solubility of metallic oxides in solutions of, 8, 260

Alkaline cobalt, polysulphide as reagents for, 39, 140

Alkaline cobaltioxalates, 85, 300

Alkaline cupric solutions, decomposition of hydroxylamin by, 35, 208

Alkaline cyanides, 4, 213 — Preparation, 35, 39

Alkaline dicarbonates, examination, 41, 160

Alkaline earth bases, action on alkaline earth salts of pyrogallol sulphonic acids, 87, 238, 209—Boro-stannates, 94, 135 — Mangani-manganates, 89, 155 — Metals, fluochlorides, fluobromides, and fluoiodides of, 89, 106 — Metals, halogen salts of, and phenylhydrazine, combinations, 79, 23 — Metals, periodides of, 89, 273 — Metals, solutions of salts of, 84, 21 —Sulphates, chemical reduction of, 95, 277 — Sulphides, electrolysis, 87, 299

Alkaline earths, acetates of (*see Acetates*) — Anhydrous hydro-sulphates of, synthesis, 86, 256—Bicarbonates of (*see Bicarbonates*) — Carbonates of, action of acids on, 83, 176 — Carbonates of, carbon and nitrogen, products from, 95, 105 — Carbonates of, and of alkalis, neutral, 97, 228 —Chlorides of, and phosphoric acid, 84, 47—Metals of (*see Metals*) — Orthoplumbates of, 81, 264—Pyromucates of, decomposition by heat, 76, 59

Alkaline earthy carbonates, decomposition, 90, 4—Carbonates in waters, determination, 46, 302 — Chlorates, electrolysis with an anode of copper, 89, 293 — Fluorides, 67, 241—Manganates, 52, 70 — Manganites (*see Manganites*) — Metals, electrolytic separation, 91, 305—Metals, properties of, 66, 173—Oxalinitrites, 83, 147 —Zincates, 66, 305—Zirconates, 64, 61

Alkaline electrolytes, electromotive behaviour of cuprous oxide and cuprio hydroxide in, 100, 287

Alkaline ferridoyanide of potassium, action on colours derived from madder and its derivatives, 35, 115

Alkaline ferrocyanides, 51, 61—Titration with copper sulphate, 49, 214

Alkaline fluorides, 22, 288 — Action of magnesia on, 7, 245 — Electrolysis of, 78, 268

Alkaline halogen salts of bromine and iodine, separation, 89, 12

Alkaline haloid salts, action exerted on, by bases which they contain, 75, 47 —Action of acids on, 75, 35

Alkaline hydrates, 50, 213; 53, 61 — Estimating, 5, 311; 71, 93

Alkaline hydrides, decomposition by acetylene, 88, 108

Alkaline hydrosulphides, behaviour with compound ethers, 53, 131

Alkaline hydroxides and ammonia hydroxides, relative strengths, as measured by their action on cotarnine, 89, 17

Alkaline hypobromite, action on ammonia salts, urea, and oxamide, 37, 270—Action on oxamide, urea, and potassium ferrocyanide, 38, 305

Alkaline hypobromites and hypochlorites, determination of urea by means of, 41, 161

Alkaline hypochlorites, decomposition, 81, 11

Alkaline hyposulphites, acetic solution of, 52, 59—Action on ammonia and

- chromates of potash, **11**, 16—Determination of carbonic acid in presence of, **50**, 34
- Alkaline iodides, action of oxidising agents on, **82**, 35—And alkaline chlorides and bromides, separation of iodine in form of cuprous iodide from a mixture of, **88**, 293 — And lead iodide, compounds, **44**, 36 — Application as reducing agents, **19**, 238 — Preparation, **6**, 102 — Solution of silver in presence of, **44**, 101
- Alkaline iodomercurate bases, dense liquids containing, **92**, 143
- Alkaline meta-dinitrobenzene, colour reaction of reducing sugars given by, **94**, 315
- Alkaline mercuric cyanide, action, **65**, 169
- Alkaline metal, caesium, **3**, 3, 132, 357
- Alkaline metals, **61**, 89—Acid phosphites of, **57**, 211—Action of earthy, **59**, 289 —Action of silicon on, **74**, 73—Action on boric acid, **65**, 119—Alloys of, preparation, **81**, 130—And hydrogen compounds, **29**, 217—And uranium, fluorised compounds, **42**, 95—And uranyl, double chlorides of, **83**, 125 — Attempt to explain the occurrence of copper, silver and gold in the same group with, **90**, 271—Double glycerolates of, **79**, 215 — Flame spectra of, **89**, 130—In silicates and substances not attacked by acids, determination by means of hydrate of baryta, **33**, 74—Production, **55**, 225 —Sodium, potassium, lithium, dissociation-spectra of melted salts, **74**, 12—Spectra of, **6**, 304—Spectrum of, in Geissler's tubes, **33**, 64, 74 — Vapour densities, **42**, 110
- Alkaline methyl tartrates, **68**, 257
- Alkaline nitrates, action of sodium amalgam on, **10**, 112 — Preparation, **35**, 86 — Transformation into chlorides, **12**, 58
- Alkaline nitrites, action, **66**, 173; **71**, 13—Action of sodium amalgam on, **10**, 112—Action on uric acid and derivatives, **20**, 212 — Manufacture, **66**, 84 — Preparation, **36**, 81; **60**, 2; **64**, 38—Preparation of pure, **81**, 19
- Alkaline nitroprussiates, estimation, **89**, 114
- Alkaline oxy-salts, action of copper-zinc couple on, **37**, 68—Action of copper-zinc element on, **38**, 34
- Alkaline perchlorates, detection, **70**, 180 —Detection in presence of chlorides, chlorates, and nitrates, **74**, 38
- Alkaline periodates, oxidising power, **79**, 263
- Alkaline permanganate free from ammonia, **47**, 70 — Limited oxidation with, **15**, 223
- Alkaline permanganates and their medicinal uses, **13**, 166—Composition, **55**, 47
- Alkaline peroxides, action of boric acid on, **90**, 264
- Alkaline persulphates, oxidising value of, **83**, 48
- Alkaline phosphates, action, **57**, 250 — Action of sulphur on, **48**, 46—Estimation in chlorides, **32**, 6 — In aqueous solution, state of, **40**, 301—Obtaining, **7**, 94
- Alkaline phosphides, **72**, 98
- Alkaline polycarbonates, contamination, **64**, 212
- Alkaline polysulphides, action of dimethylsulphate on, **97**, 211—As reagents for cobalt, **39**, 149—Thermic study of, **42**, 48
- Alkaline potassium permanganate solution used for water analysis, **46**, 284
- Alkaline protoxides, properties of, **95**, 214
- Alkaline pyrogallol solution, determination of oxygen by absorption with, **43**, 178; **74**, 199
- Alkaline resins, abnormal solubility of certain bodies in, **38**, 140
- Alkaline salts, **63**, 272 — Electrolysis in solution, **69**, 68—In Indian Usar Land, analysis, **87**, 139—Of organic acids, electrolysis of, **86**, 198—Part exercised by, on vegetation of beet-root, and potato, **31**, 229—Poisonous action, **53**, 60—Reduction of congelation point of solutions of, **49**, 167
- Alkaline selenium-antimonites, **81**, 251
- Alkaline silicates, action on animal economy, **17**, 57—Action on mica, **61**, 313—Analysis, **14**, 243 — And alkaline earthy silicates and silicic acid, **59**, 23—Reaction of natural, **78**, 311 —Use of gauze for preparation of, **24**, 21
- Alkaline soaps, abnormal solubility of certain bodies in, **38**, 140
- Alkaline solution, constitution of polynitrophenols in, **100**, 253—Of copper (see Copper)—Of copper oxide (see Copper oxide)
- Alkaline solutions, chemically pure, **71**, 245 — Constitution, **27**, 256—Desulphurising, **44**, 261—Electrolysis, **55**, 119 — Congelation point, **48**, 248 — Of amido acids (see Acids, amido)—Of copper (see Copper)—Of formic aldehyde (see Aldehyde)—Of mercury (see Mercury) — Of phenolphthalein (see Phenolphthalein)—Of zinc salts (see Zinc)—Quantitative separation of metals in, **69**, 184—Zinc oxide in, **42**, 30
- Alkaline stibnides, preparation, **81**, 130
- Alkaline substances, reagent for, **53**, 73
- Alkaline sulphantimonites, **77**, 274
- Alkaline sulphates, action of sulphate of lime on, **35**, 44—Conversion into chlorides, **26**, 147 — Reduction, **61**, 301—Titrating, **34**, 272
- Alkaline sulphides, action of sulphur on, **44**, 250—Action on double cyanides, **79**, 179 — Action on stannous sulphide, **45**, 263 — Application, **61**, 13 — Behaviour towards water, **35**, 198 — Decomposition by solution in a large bulk of water, **18**, 204 — Determination of carbonic acid in presence of, **50**, 34—Determination of caustic alkali in presence of, **37**, 83 — Electrolysis, **87**, 286 — In dressing hides, **34**, 52—Mineralising action of, **57**, 101—Thermo-chemical study, **40**, 56, 99
- Alkaline sulphites, **47**, 105; **49**, 36 — Action of heat on double, **100**, 328—Action of hydrochloric acid on, **75**, 35—Action on chromic salts, **78**, 46 —Behaviour of diazo-compounds with, **24**, 217 — Determination of carbonic acid in presence of, **50**, 34
- Alkaline sulphocarbonates, **34**, 94 — Manufacture, **35**, 188, 208 — Use against phylloxera, **31**, 239
- Alkaline sulphocyanides, action on hydrochlorates of alkalis of fatty series, **35**, 106
- Alkaline sulpho-molybdates, solubility of copper sulphide in, **47**, 304
- Alkaline sulphurets, use of bleaching fibres and tissues of vegetable origin, **20**, 299
- Alkaline trisulphocarbonates, decomposition in the animal system, **41**, 122
- Alkaline vanadates, **55**, 188, 224
- Alkaline waste and gas-lime refuse, obtaining products from, **6**, 120
- Alkaline zirconates, **64**, 26
- Alkaline radicles (see Radicles)
- Alkalinity, employment of nitroprussiate of potash as test for, **18**, 6 — Of carbonates and silicates of magnesia, free, mixed or combined, **38**, 287—Of various substances, influence upon rotatory power of sugar, **36**, 193
- Alkalino-cupric carbonates (see Carbonates)
- Alkalino-glyceric solution of copper (see Copper)
- Alkaloid, **59**, 120; **60**, 73, 114; **76**, 220 —And colouring matter in agarious rubber, **46**, 199 — And other constituents of coca leaves, **4**, 47 — Cinchona, **3**, 15—Cinchona, Indian factory, **26**, 250—Formed during alcoholic fermentation, **20**, 44 — From bark of pseudo-cinchona, Africana, **100**, 131—From barley, **100**, 301 — From calabar bean, **11**, 286; **12**, 100 — From cinchona bark, **23**, 43; **44**, 301 — From Jaborandi, its platinum compounds and their formulae, **33**, 256—From piturite, **43**, 124, 138—In aniline, and isomeric with toluidine, **18**, 52—In damaged Indian corn and mouldy maize bread, **34**, 144—In fermented liquors, **19**, 71—In veratrum viride, **6**, 139—Of acetonium heterophyllum, **74**, 110—Of coca (see Coca) —Of yew, **85**, 296—Of spoiled maize, **35**, 11—Salts (see Salts)—Vegetable, synthesis, **23**, 71
- Alkaloids, **22**, 192; **40**, 126; **41**, 63, 255; **44**, 286; **51**, 203; **52**, 273; **63**, 61; **54**, 23, 48; **54**, 225; **55**, 128, 284; **56**, 269; **58**, 24; **59**, 193; **64**, 12; **71**, 317—Absorption spectra, **50**, 287; **51**, 135—Accessory, in commercial quinine sulphate, **44**, 61—Aconite (see Aconite alkaloids)—Aconitine group of (see Aconitine) — Action, **59**, 278—Action of acids on rotatory power of, **48**, 238—Action of sulphuric acid on, **23**, 43—Affinity for hydrochloric acid, **98**, 277—Affinity values of, **99**, 232—And amido acids, relations between, **20**, 33 — And extracts, separation, **2**, 84 — And metals, double sulphocyanides of, **17**, 150, 184—And tinctures, separation, **2**, 84 — Application of dialysis to investigation of, **10**, 25—Artificial, **41**, 159, 220—Assay of, **7**, 150—Behaviour with sugar and sulphuric acid, **26**, 193; **29**, 37—Cacao, quantitative determination and separation, **69**, 277—Cadaveric, and importance in toxicology, **37**, 264 — Chemistry of, **40**, 94; **55**, 36—Cinchona, **48**, 4—Cinchona, determination, **45**, 234; **47**, 240, 248; **53**, 23 Cinchona, estimating, **26**, 215 — Cinchona, estimating, by means of their double thiocyanates, **92**, 257—Cinchona, optical properties, **28**, 253 —Cinchona, separation, **52**, 313 —Cinchonic, behaviour of phenol with, **34**, 153 — Collection of, the late Dr. C. R. A. Wright's, **70**, 186 — Colour reactions, **46**, 268; **53**, 61 — Conversion of phenol into, **25**, 81—Crystallised, identification, **43**, 244 — Decomposition products of quinine and allied, **39**, 92 —Derived from animal proteo materials, **45**, 207—Derived from physiological destruction of animal tissues, **53**, 192—Derived from toluen, **20**, 33 —Detection, **9**, 289; **45**, 194—Determination, **50**, 189; **57**, 231; **64**, 177; **66**, 223, 259, 260—Determination as pterates, **47**, 107—Diagnosis, **3**, 301; **4**, 2, 113—Electrolysis, **21**, 82—Estimation as higher periodides, **79**, 17, 29, 45, 51—Estimation by potassium mercuric iodide, **45**, 114, 123—Examination, **27**, 266 — Examination by micro-chemical methods, **83**, 226 — Examination of bark of *Coprosma grandifolia* for, **23**, 18 — Examination of corpses for, **61**, 174, 184, 196, 210, 221, 234, 243—From tobacco, **83**, 239 — Gallic acid on, **75**, 202 —Hydrocyanates of, **26**, 241 — In aconites, **32**, 232—In cinchona bark, **10**, 77; **23**, 107; **27**, 208; **45**, 175—In citrate of iron and quinine, **10**, 163—In conium, **26**, 95—In diseases, **51**, 227—In extract of belladonna, **53**, 97—In ipecacuanha, **26**, 95—In medicinal extracts, assay, **10**, 175—In nicotiana, **26**, 95—In nux vomica, **48**, 160—In oils, dissolving, **7**, 80 — In plants of Boraginaceae, **22**, 262 — In their salts, recognising, **46**, 243 —Influence on certain properties of hæmoglobin, **31**, 109—Instability of

- solutions of, **19**, 260—Iodine for volumetric determination, **74**, 24, 247—Isolated from a species of Jaborandi, **76**, 48—Isolation, **74**, 246—Isomerism, **1**, 15—Micro-chemical researches on, **83**, 252—Natural, action of organic acids and their alkaloids on, **33**, 127—Nature and properties, **53**, 109—Nitroprusside of sodium as test for, **5**, 355—Of aconite (*see* Aconite alkaloids)—Of aconitum napellus, **57**, 251—Of Australian plants, **81**, 242—Of belladonna, datura, jusquiama, and dohisia, natural and mydriatic, **41**, 241; **43**, 252—Of cinchona group, **99**, 44—Of cinchona trees, **25**, 22—Of cinchonas, **62**, 272—Of cod-liver oil, **53**, 48; **67**, 133—Of Corydalis cava, **82**, 299—Of ergot, **94**, 80; **95**, 90—Of hyoscyamus muticus and datura stramonium grown in Egypt, **82**, 299—Of isopyrum thalicroides, **26**, 118—Of Jaborandi leaves, **43**, 131; **55**, 284; **81**, 127—Of nuxvomica, **43**, 289; **51**, 47—Of opium (*see* Opium alkaloids)—Of papaveraceae, **27**, 35—Of quinine (*see* Quinine alkaloids)—Of quinquinas (*see* Quinquinas)—Of senecio latifolius, **99**, 139—Of veratrum family, **39**, 224—Perchloric acid as reagent for, **40**, 300—Periodides of, **23**, 83, 215; **24**, 71—Phosphomolybdic acid as test for, **7**, 135—Plant (*see* Plant)—Poisonous, characteristic reactions of, **5**, 220—Poisonous, extraction and investigation of, **5**, 229—Polysulphohydrates of, **36**, 7—Precipitation by nitrate of uranium, **89**, 26—Produced by action of ammonia on glucose, **52**, 272—Reactions, **55**, 240; **59**, 122—Reagent for, **1**, 83; **19**, 33—Recognition, **14**, 48—Removal of nitrogen from, **27**, 303—Soluble, estimation, **83**, 84—Salts of, **62**, 98—Separation by dialysis, **9**, 209—Solanaeous, gold salts of, **75**, 308—Solubility in chloroform and olive oil, **1**, 268—Strychnine and other, colour-test for, **55**, 155—Sublimation of, **15**, 305—Tannin and gallic acid on, **75**, 202—Temperature at which some of them sublime, **37**, 167—Toxic, in urine, **51**, 121—Use of bromine in testing for, **47**, 215—Vegetable, acidimetric estimation, **73**, 287, 208—Vegetable, action of chromic acid on, **6**, 176, 192—Vegetable, action on indicators, **84**, 60—Vegetable, forensic chemistry of, **47**, 179—Vegetable, reactions for, **49**, 65—Vegeto- (*see* Vegeto-alkaloids)—Volatile, diagnosis, **57**, 2, 23—Volatile, given off during putrefaction, **2**, 88—Volatile, in pepper, **58**, 235—Zinc chloride as a reagent for, **42**, 318
- Alkaloidal assays (*see* Assays)—Periodides (*see* Periodides)—Stearates (*see* Stearates)
- Alkyl iodides, chemical dynamics of, **89**, 140
- Alkamine triacetone (*see* Triacetone alkaline)
- Alkanin, **20**, 58
- Alkarsin, **58**, 268; **59**, 264, 312
- Alkyl and mercurous nitrate, interaction, **74**, 289—And nitrogen combined, **72**, 37; **74**, 49—Compounds, metallic, **71**, 158—Compounds of gold (*see* Gold)—Compounds of platinum (*see* Platinum)—Derivatives of sulphur (*see* Sulphur)—Derivatives of tellurium (*see* Tellurium)—Groups, removal from secondary amines, **90**, 118—Magnesium (*see* Magnesium)
- Alkyl acetophenone, di- (*see* Dialkylacetophenone)—Mon- (*see* Monalkylacetophenone)—Tri (*see* Trialkyl)
- Alkylamines, sulphonchloro- (*see* Sulphonchloro alkylamines)
- Alkylammonium cyanates, transformation, **73**, 82
- Alkylammonium hydrosulphides, **75**, 157
- Iodides, tetra- (*see* Tetraalkylammonium iodides)
- Alkyl anilines, determination, **70**, 280
- Alkyl bismuth iodides and bismuth iodides of vegetable bases, **77**, 138
- Alkyl bromides, determining the relative stability of, **55**, 280, 290
- Alkylidulphides, di- (*see* Dialkylidulphides)
- Alkyl esters, amino- (*see* Aminoalkyl esters)
- Alkyl halides, addition to alkylated sugars and glucosides, **94**, 59—And magnesium, interaction, **98**, 232—Magnesium (*see* Magnesium alkyl halides)
- Alkyl halogen compounds, action of halogen derivatives of tri- and pentavalent metalloids upon, **90**, 269
- Alkyl haloids, action of amorphous arsenic on, **96**, 293—Action on aldoximes and ketoximes, **75**, 177; **83**, 213—Magnesium (*see* Magnesium alkyl haloids)
- Alkyl iminothiocarbamates, synthesis, **87**, 200
- Alkyl iodides, action on mercuric iodide sulphides of fatty series, **81**, 10—Action on silver lactate, **77**, 163—Action on silver malate, **74**, 290; **77**, 163—Effects of heat on, **97**, 10—Of cyclic bases, colour and constitution of, **99**, 237—Preparation, **66**, 35—Reaction with hydroxylamine, **79**, 124
- Alkylidohydrines derived from styrene, **96**, 202
- Alkyl nitrates, reduction to nitrites, **98**, 48
- Alkyl nitrites, reduction products of nitroparaffins, **56**, 132
- Alkyloxy-groups, influence on velocity of saponification, **99**, 248
- Alkylpropionic acids (*see* Acids)
- Alkyl radicals, replacement by methyl in substituted ammonium compounds, **96**, 317
- Alkylsilicon chlorides, preparation, **89**, 81
- Alkyl stilbene, tri- (*see* Trialkyl stilbene)
- Alkyl sulphates, interaction with nitrites of the alkali metals and metals of the alkaline earths, **94**, 230
- Alkyl sulphides, action of α -halogen ketones on, **91**, 160
- Alkylsulphinic acids (*see* Acids)
- Alkyl tartrate, di- (*see* Dialkyltartrate)—Potassium (*see* Potassium alkyl tartrate)
- Alkyl thiocyanates, tautomeric character of, **89**, 02
- Alkyl thiosulphates, sodium (*see* Sodium)
- Alkyl ureas, decomposition, **89**, 273
- Alkyls, displacement from phenols by nitration, **84**, 23—Halogen, preparing, **92**, 104—Of mercury (*see* Mercury alkyls)
- Alkylated arylamines (*see* Arylamines)—Glucosides (*see* Glucosides)—Oxamines (*see* Oxamines)—Sugars (*see* Sugars)
- α -N-alkylated naphthylamine (*see* Naphthylamine)
- Alkylates, metallic, action on ethereal salts and alcohols, **55**, 245—Sparteine iod. (*see* Sparteine)
- Alkylations of acylarylamines (*see* Acylarylamines)—Of L-arabinose (*see* L-Arabinose)—Of D-fructose (*see* D-Fructose)—Of galactose (*see* Galactose)—Of mannose (*see* Mannose)—Of rhamnose (*see* Rhamnose)—Of sugars (*see* Sugars)

- Alloy, aluminium (see Aluminium) — For silver coinage, 19, 110 — For soldering steel and iron to brass, 23, 107 — Found at Pompeii, analysis of, 19, 286 — Gold-like, 24, 181 — Known as "Tiers Argent," 22, 228 — Metallic, manufacture of, 7, 35 — New, 19, 283 — Of chrome iron, 32, 136 — Of cobalt and manganese, 22, 34 — Of copper, 3, 269 — Of copper adhering to glass, 32, 116 — Of iron and zinc, 19, 214 — Of nickel and iron, 54, 310 — Of nickel and silver, 34, 150 — Of silver and aluminium, "Tiers-argent," 16, 289 — Of thorium and aluminium, 93, 106 — Of tin antimony-arsenic, 93, 231, 303 — Potassium-sodium, photoelectric properties of, 98, 268 — Resisting acids, 55, 297 — White, resisting action of vegetable acids, combination of metals for, 5, 251
- Alloys, 15, 78; 20, 81; 23, 141, 275; 52, 13; 68, 318 — Action of acids on, 14, 3 — Alteration products of, 56, 12 — Aluminium, (see Aluminium) — Analysis of, 22, 48, 60; 31, 76; 54, 11; 66, 121 — And metal work, composition, 45,
- 84 — And metals, expansion, 3, 315, 357, 371 — And metals, solution and diffusion, in mercury, 74, 289 — And rocks, application of law of phases to, 81, 59 — And their uses, 17, 176 — Antiferrion, bismuth in, 74, 169 — Application of Raoult's depression of melting point to, 59, 175 — Auriferous, by wet processes, 30, 151 — Bearing-metal, analysis of, 77, 41, 52 — Behaviour in a voltaic circuit, 69, 210 — Binary, analysis, 80, 113 — Binary, relations between diagram of, and their malleability, 96, 12 — Bismuth-aluminium (see Bismuth-aluminium) — Bismuth-silver (see Bismuth-silver) — Bronze-nickel (see Bronze-nickel) — Cadmium (see Cadmium) — Cathodic polarisation and formation, 87, 24 — Chinese, composition, 2, 215 — Containing zinc, freezing point curves of, 75, 160 — Copper (see Copper) — Copper-zinc, 100, 47 — Density of, 83, 300 — Dental, 75, 132, 144 — Dilatation of specific heat, and their relations with the law of Dulong and Petit, 32, 180 — Electrical resistance of, 94, 288 — Electro-deposited, conditions which determine composition of, 100, 47 — Electro-deposition of, 35, 154; 55, 300 — Electrolysis of, 64, 157 — Electrometallurgical, new applications of, 98, 15 — Electromotive force of, 70, 264 — Eutectic, 49, 242 — Estimation of arsenic in, 81, 242 — Estimation of chromium in, 96, 1 — Ferro-, (see Ferro-alloys) — Freezing-points of, 68, 304; 69, 36 — Fusible, 20, 96 — Fusion point of, 13, 122 — Gold and silver in, 42, 331 — Gold, tin, and cadmium in, 65, 133 — Heat of formation, 81, 239 — In fusion, action of voltaic pile on, 5, 326 — Japanese, 31, 32 — Lead aluminium (see Lead aluminium) — Lead-antimony (see Lead-antimony) — Magnesium (see Magnesium) — Magnetic, production from non-magnetic metals, 90, 179 — Melting-points of, 30, 53 — Metallic, 4, 68; 11, 47; 21, 84; 32, 63; 74, 84 — Metallic, combinations of, 71, 221 — Metallic, constitution, 75, 287 — Metallic, direct combustion, 81, 95 — Metallic, fusibility of, 74, 73 — Metallic, galvanic conductivity, 41, 184 — Metallic, preparing, 64, 302; 56, 153 — Method of preparing, 63, 17; 74, 11 — Micrographic analysis, 66, 111 — Nature of, 86, 176 — Nickel (see Nickel Alloys) — Of alkaline metals, preparation, 81, 130 — Of aluminium and magnesium (see Magnesium-aluminium) — Of aluminium with lead and bismuth, determination of fusion-points, 94, 170 — Of cobalt and copper, 52, 116 — Of cobalt and tin, 96, 47, 161, 186 — Of copper, analysis, 93, 84, 98 — Of copper and antimony, 56, 275 — Of copper and calcium, 93, 304 — Of copper and magnesium, 88, 11 — Of copper and nickel, assay, 76, 241 — Of copper and tin, 56, 275 — Of copper and zinc, 2, 303; 3, 22, 37, 51, 70, 149, 164; 4, 91; 73, 168 — Of copper and zinc, analysis, 61, 136; 71, 92 — Of copper and zinc, thermo-chemistry of, 83, 49 — Of gold (see Gold) — Of iron and aluminium, magnetic properties of, 80, 218; 81, 283 — Of iron and nickel, 2, 309; 69, 144 — Of iron and nickel, allotropic transformation, 81, 286 — Of iron and silicon, 60, 273 — Of iron and titanium, 4, 2 — Of lead and calcium, 94, 96 — Of lead and tin, 4, 316; 5, 121 — Of lead and tin, antimony, and arsenic, analysis, 73, 25 — Of manganese (see Manganese alloys) — Of nickel and tin, 95, 166, 190, 214; 96, 27, 100, 161 — Of platinum and iron 31, 172 — Of platinum and palladium with cadmium, zinc, and magnesium, 80, 185 — Of platinum and thallium, 97, 264 — Of silicon and manganese, use in casting steel, 35, 226 — Of silicon and

- silver, 98, 305—Of silver and copper group, 75, 300—Of silver and copper, silver and tin, silver and lead, distillation, 95, 46—Of sodium and lead, 62, 314; 63, 8, 10, 83—Of sodium and potassium, formation of liquid, 99, 59—Of sodium and potassium liquid, 69, 20—Of strontium with zinc and cadmium, 85, 12—Of tungsten (*see* Tungsten)—Planimetric analysis, 97, 271—Quantitative estimation of lead in, 98, 1—Separation of tantalum and niobium from silica in, 100, 154—Solid, measurement of rate of change in, 96, 37—Solidification point of, 13, 122—Spectrographic analysis, 94, 162—Steel-making, determination of molybdenum in, 90, 204, 218—Steel-making, estimation of molybdenum in, 81, 269—Thermoelectric properties of, 93, 129—Tin in, estimation, 65, 133 — Tin-aluminium (*see* Aluminium-tin alloys)—Use, 24, 156 — Used for coinage, 28, 10; 49, 131—188; 50, 158, 169—Useful, 6, 131—Vanadium, preparation, 90, 269 — Vanadium in, 88, 46—White-metal, analysis, 84, 167
- Allrich, Dr., Use of sodium phosphate in dyeing, 42, 330
- Alluvial deposits, filtering value of, 82, 275
- Allyl, acetone, (*see* Acetone)—And propenyl compounds in etheral oils, separation, 99, 312—Compounds and glycerin, 24, 145—Compounds, constitution, 24, 21; 27, 285—Compounds, direct hydrogenation, 95, 251—Compounds, position formulae of, 29, 146 Cyan- (*see* Cyanallyl)—Di- (*see* Diallyl)—Group, 21, 299; 24, 73, 97—Mercur- (*see* Mercuriallyl)—Methyl- (*see* Methylallyl)—Phenyl- (*see* Phenylallyl)—Series nitro-compounds of, 29, 264—Silico- (*see* Silico-allyl)
- Allyl alcohol, 19, 251—Conversion into normal propylic alcohol, 22, 226 — Cyanide, 26, 60—Specific volumes of, 24, 72
- Allylamine, action of nitrous acid on, 97, 46
- Allylamin, ethyl- (*see* Ethylallylamin)
- Allyl ammonium (*see* Ammonium) — Phenylidimethyl- (*see* Phenylidimethylallyl-ammonium) — Bromide, tetra- (*see* Tetra allylammonium bromide)
- Allylazoimide, 97, 306
- Allylbenzene, 2,3-Dimethoxy 4,5-methylene dioxy-1- (*see* 2,3-Dimethoxy 4,5-methylene-dioxy-1-allylbenzene)
- Allyl benzol (*see* Benzol)
- Allyl bromide (*see* Bromide)
- Allyl carbinol, ethyl- (*see* Ethyl-allyl carbinol)—Methyl ethers of, 95, 298 — Passage to furfurane series, 99, 252 — Phenyl- (*see* Phenylallylcarbinol)
- Allyl chloride and hypochlorous acid, 22, 36
- Allyl cyanide, 22, 144—Constitution, 88, 108; 92, 10
- Allyl-dipropyl carbinol, trivalent alcohol of, 77, 129
- Allyl ether of formic acid, 23, 22
- Allyl ethers, phenol (*see* Phenol allyl ethers)
- Allyl-ethyl phenyl carbinol, 77, 129
- Allyl fluoride, 62, 321
- Allyl iodide, action of cyanide of potassium on, 26, 60—Action of hydriodic acid on, 58, 220—Action on phenol, 47, 304—Preparation, 35, 113; 56, 270
- Allyl-iso-sulphocyanate, formation, 35, 85
- Allyl-ketones, 89, 179, 275—Alcoyl- (*see* Alcoyl-allyl-ketones)
- Allylmethylammonium, benzylphenyl- (*see* Benzylphenyl allylmethyl-ammonium)
- Allyl-methyl-carbinol, di (*see* D'allyl-methyl-carbinol)
- Allylmethyltertiarybutyl carbinol, 77, 189
- Allyl-nitrous acids (*see* Acids)
- Allyl-para-dinitrodiazo-amidobenzene, relation between melting point and constitution, 73, 130
- Allyl-succinic acid (*see* Acid)
- Allylsulphide, tol- (*see* Tolallylsulphide)
- Allyl-sulphonic acid (*see* Acid)
- Allylene, 12, 251—Action of bromine and iodine on, 9, 299—Bromhydrates, 25, 142—Chlorhydrates, 25, 142—Di- (*see* Diallylen)—Formation at expense of bromo-citro-pyrotartaric anhydride, 36, 204—Hydration, 70, 13—Liquefaction, 91, 222—Preparation, 10, 91; 71, 118; 74, 78
- Allylene dihydriodate, 12, 202
- Allylic alcohol (*see* Alcohol) — Alcohols (*see* Alcohols)—Compounds, and chloride of iodine and hypochlorous acid, combination, 21, 202—Essences and estragol, synthesis of, 78, 303 — Ethers (*see* Ethers)—Ethers of borneol (*see* Borneol ethers)—Series, isomerism in, 13, 247
- Allyline, mono (*see* Mono-allyline)
- Almaden, mercury mines, of, 20, 132; 24, 74
- Almeida, G. O. De (*see* D'Almeida, G. O.)
- Almeida, J. C. De (*see* D'Almeida, J. C.)
- Almond oil (*see* Oil)
- Almond water, preparation of bitter, 8, 234
- Almonds, bitter purification, 11, 35—Emulsion of, 23, 83—Essential oil of, detection of nitrobenzol in, 25, 117—Oil of bitter (*see* Oil)—Sweet, asparagin in, 34, 238
- Aloes, acids from, 25, 179; 27, 265 — Action of chlorine on, 12, 230—Barbadoes and scotrine, comparative value, 2, 271—Crystalline principle of, 25, 66—In elixirs, detection, 42, 306 — Products from, 25, 229 — Reagent for, 67, 253—Used to adulterate resin of Jalap, 14, 113
- Aloesol, 98, 294
- Aloines, 76, 95, 195; 80, 11; 81, 24; 82, 59—And their halogen products, derivatives of anthraquinone obtained during action of sodium dioxide on, 85, 275—Constitution, 86, 47; 99, 142, 248 — Oxidation products, 35, 273
- Aloy, J., Action of oxide of bismuth on various metallic solutions, 86, 186 — Atomic weight of uranium, 83, 154 — Coloured reaction of the salts of uranium and peroxide of hydrogen, 87, 102 — Conditions of production and stability of hyposulphurous acid, 88, 70—Double chlorides and bromides of uranium, 79, 297 — Double chlorides of uranyl and the alkaline metals, and hydrochlorate of chloride of uranyl, 83, 125 — New class of the peruranates, 87, 281 — New preparations of oxides of uranium, 81, 278—Precipitation of some alkaloids by nitrate of uranium, 89, 26—Preparation of uranium, 83, 230 — Thermic researches on uranium compounds, 74, 49
- Alpe, E. N., "Handy Book of Medicine Stamp Duty" (review), 58, 254

- Alum, 4, 156; 21, 107—Action of zinc on a solution of, 2, 156—Ammonia iron, dissociation, 40, 238—Ammoniacal, harmony of molecule of, 14, 210 — Baking-powders, experiments on, 58, 276, 284—Cake, analysis, 55, 165, 189; 56, 194—Chrome, 11, 126; 98, 305 — Chrome, dissociation, 66, 245 — Chrome, effect of heat on aqueous solutions of, 74, 278—Chrome, solutions, 31, 19—Chrome, solutions, Molecular equilibrium, 31, 40—Chrome, utilisation, 19, 101—Clarification of waters by, 12, 191—Complex, from thermo-mineral water of the Solfatara, chemical investigation, 25, 70 — Crystallisations over fresh flowers, 15, 268—Cubic, 42, 110—Hemihedral forms, 39, 123—History of, 12, 221, 234, 242, 265 — In baking-powder, 67, 212—In bread, 3, 207, 253; 4, 326; 6, 146, 193, 204, 205, 216, 240, 251; 7, 286; 28, 267, 275, 287, 303; 29, 95, 101, 111, 233; 31, 66; 39, 103; 60, 133—In bread, tests, 24, 98, 131, 134, 154; 25, 207, 230—In flour, 4, 326; 7, 286; 29, 101; 39, 103—In iron safes, 14, 24—In wines, 72, 209—Lozenges, 1, 108—Manufacture, 24, 98, 110—Mordanting with, 26, 48; 29, 93—Of magnesia (*see* Magnesia alum)—Of neodymium (*see* Neodymium)—Of praseodymium (*see* Praseodymium) — Of silver (*see* Silver alum)—Of selenic acid, 1, 215—Potash (*see* Potash) — Purification of water by, 51, 241; 54, 45—Shale, utilisation, 28, 222 — Silver-ammonium (*see* Silver-ammonium alum) — Soda, 61, 302 — Sodium, notes on, 91, 228—Sodium of Japan, 44, 218—Solution of, action of zinc on, 2, 156—Spring, the Orchard, 46, 226—Stone and sulphur in New South Wales, 57, 64—Test for, 60, 134—Thallium iron, 9, 205 — Type, 31, 268—Well, ancient, at Harrogate, 42, 268
- Alums, 26, 192—Acid reaction of, 87, 214—And water, compounds, 54, 12 — Anhydrous, isomorphism of, 68, 98—Containing aniline and rosanilin, 38, 1—Crystalline water of, 58, 220 — Crystallisation of, 43, 292—Crystallised soda, 3, 253—Estimation of alumina and free combined sulphuric acid in, 86, 106—Formation by electrolysis, 78, 236; 79, 248 — Formed by selenic acid, 56, 62—Formulae of, 30, 272 — Lanthanum- (*see* Lanthanum-alums) — Precipitation by sodic carbonate, 45, 230 — Rhodium (*see* Rhodium alums) — Soda (*see* Soda) — Specific refraction and dispersion, 52, 22—Water of combina-

- tion of, 54, 322—Water, of crystallisation, 56, 24
- Alumed wine (*see* Wine)
- Alumina, 21, 144, 156—Action in the composition of glass, 73, 175—Action of fluorides on, 56, 12—Action on calcium chloride, 56, 269 — Alkaline solutions of, behaviour with sulphuretted hydrogen, 40, 11—Analysis of substances containing, 69, 128 — Amorphous, fused, 93, 318 — And aluminium powder, 90, 6—And carbonic acid compound, 39, 277—And ferric and chromic oxides, determination and separation, 44, 85 — And ferric oxide, mutual action at incipient white heat, 84, 305; 85, 24, 47—And ferric oxide, separation, 25, 277; 44, 266; 51, 165 — And glucina, separation, 58, 49 — And iron, estimation, 70, 297—And iron, separation, 2, 208; 21, 54; 28, 324; 67, 204; 89, 63—And iron-oxide, separation, 57, 221—And iron sesquioxide, separation, 18, 154; 31, 214 — And its compounds, preparation and applications of, 12, 10 — And lime, separation, 2, 291; 25, 277—And magnesia, circumstances which favour the simultaneous precipitation of, by ammonia, 22, 4 — And magnesia, separation, 2, 291; 25, 277—And manganese, separation, 40, 33 — And phosphoric acid, separation, 4, 75; 25, 277; 31, 214—And protoxide of magnesia, separation, 2, 266—And silica, catalytic power of, 97, 119—And silicon and silica, action of chlorine on mixture of, 80, 123 — Anhydrous, solubility in ammonia, 16, 214—As a discharge on indigo-blue, fixation of, 45, 113 — Coloph. (*see* Colophalumina) — Compounds, obtaining and treating, 8, 252 — Crystallisation, 61, 277—Detection, 45, 46 — Determination, 12, 180; 47, 248; 52, 277, 311; 53, 40; 60, 98; 61, 108; 62, 73, 84, 249; 63, 146, 251; 65, 51—Determination by titration, 54, 24—Determination in presence of ferric oxide, 46, 12—Determination in presence of iron, manganese, calcium, and magnesium, 81, 158—Determination in presence of phosphoric acid, 35, 268 — Estimation, 14, 34; 55, 289; 58, 24; 70, 297 — Estimation by carminic acid, 11, 205 — Estimation of phosphoric acid in presence of, 15, 207; 26, 60 — For colours, preparation, 13, 108 — From island of Eubœa, 21, 12 — In alums, estimation, 86, 106 — In ash of plants, 74, 316—In cements, 50, 235—In commercial phosphates, 40, 203 — In cryptogamous plants, 31, 218—In grapes, 55, 176—In iron, 62, 11, 25—In iron, determination, 97, 21—In limes, 50, 235—In mineral phosphates, 76, 212—In mineral waters, 83, 312—In phosphate rock, 74, 112, 146 — In phosphates, 28, 208; 53, 81, 82, 87; 74, 300 — In plants, 71, 113 — In production of glass, 74, 12 — In steel, 62, 11, 25—In wheat, 6, 264—In wines, 55, 176—Lime, and magnesia, analysis of substances containing, 59, 128 — Manufacture, at works of Larnè Harbour, 74, 225—Mordants, fixation on calicoes, 30, 53—Part taken by in absorptive action of soils, 16, 253—Phosphorescence of, 55, 23, 99; 60, 65—Phosphorescent, crimson line, 55, 25 — Phosphorescent, sharp line spectrum 56, 59, 70—Precipitation, 48, 119 — Precipitation by ammonia, 35, 238 — Precipitation by phenylhydrazine, 89, 44 — Preparation, 61, 73; 67, 145 — Production from clay, 70, 269 — Red, fluorescence, 54, 322; 55, 116, 128, 146, 176—Reduction, 56, 169; 70, 102; 71, 238—Saffron containing, 50, 153—Salts, 3, 230—Salts for industrial purposes, 5, 340 — Salts, preparation of pure, 35, 231—Salts, reactions of, 3, 257 — Solubility in aluminium sulphide, 97, 35 — Volumetric determination for technical purposes, 84, 306
- Alumina acetate for rendering woven fabrics waterproof, 24, 35
- Alumina carbonate, 1, 110; 7, 112, 122
- Alumina chlorate, preparation of chlorates by aid of, 27, 70
- Alumina chloride, action, 63, 224
- Alumina hydrate, 83, 103—Precipitated from alkaline solution, 14, 34—Purification of saccharine juices with, 39, 249
- Alumina hypochlorite, 2, 215 — Application to bleaching, dyeing, etc., 2, 58
- Alumina phosphate, hydrated, 10, 296—Prepared, 81, 210
- Alumina phosphates, 33, 43—And quicklime, experiments on summer barley with, 38, 89—Ferric, 57, 51 — In manures, 28, 232 — In superphosphates or manures, 19, 229, 266 — Native, analysis, 29, 111
- Alumina sesquioxide and sulphuric acid, separation, 40, 292
- Alumina silicate, 95, 276
- Alumina sulphate, 5, 307; 16, 118 — Addition of in treatment of sewage, 34, 197 — Clarifying action on turbid water, 16, 86 — Manufacture, 20, 227—Testing for sulphuric acid, 27, 306
- Alumina tannate, 16, 104
- Aluminate, monocalcic, crystallised, 82, 195—Of barium (*see* Barium)—Of baryta (*see* Baryta)—Of magnesium (*see* Magnesium)—Of manganese (*see* Manganese)—Of potassium (*see* Potassium)—Of soda (*see* Soda)—Of sodium (*see* Sodium)
- Aluminates and basic haloid salts of barium, 47, 129—Containing a large quantity of lime, fusibility of, 16, 57—Of Alkaline (*see* Alkaline)—Of barium (*see* Barium)
- Alumina iodide (*see* Iodide)—Oxides (*see* Oxides)
- Aluminides, silico- (*see* Silico-aluminides)
- Aluminised bread food (*see* Food)
- Aluminium, 1, 10, 46; 5, 338; 7, 182; 8, 189; 59, 283; 64, 150, 224; 66, 50; 69, 254; 70, 70; 84, 249—Action, 70, 13—Action of liquids on, 65, 110—Action of mercury salts on, 74, 30—Action of silicon on, 74, 73; 93, 11—Action on aluminium chloride 51, 262—Action on carbonate of soda at an elevated temperature, 35, 232—Action on copper chloride, 45, 206; 46, 62—Action on ether and compound ethers, 33, 256 — Adhesion to glass, 70, 258; 71, 174—Alloys, 83, 263, 312—Alloys, crystallised, 86, 245 — Alloys, preparation by a chemical reaction, 74, 37—Alloys, manufacture, 60, 211, 225, 241 — Alloys, thermo-electricity of, 91, 57—Alloys with lead and bismuth, determination of fusion-points, 94, 170 — Amalgam, 74, 197—Amalgams, 33, 48 — Analysis, 65, 223, 235; 75, 55, 66, 79 — And antimony alloys, 90, 45—And atmospheric nitrogen, combination, 73, 35 — And beryllium, separation of, 76, 111; 94, 255—And bismuth alloys, 90, 35 — And calcium and magnesium, heats of combustion, 99, 21 — And cast-iron, detection of small quantities, 63, 10 — And cerium, separation, 10, 195 — And chromium, separation, 11, 101—And chromium sesquioxide, compounds, 85, 228 — And cobalt, separation, 57, 125; 75, 193; 76, 65 — And gallium, alloys, 37, 274—And glucinum, separation by hydrochloric acid, 85, 156—And glucinum silico-fluorides, 54, 261—And iron, estimation, 65, 68, 78, 89, 98—And iron in bone-black, 67, 311 — And iron, separation, 48, 148; 57, 125; 62, 19; 74, 296; 76, 65; 87, 312; 89, 44, 95—And iron and manganese alloys, 66, 140, 160—And iron, alloys of, magnetic properties of, 80, 218; 81, 283—And iron groups, analysis, 99, 6, 16, 32, 41, 55, 71, 81, 92, 107, 160, 171, 181, 194, 208, 219, 228, 239, 251, 264, 273, 291, 300, 311—And its alloys, 55, 297; 56, 115—And its alloys, analysis of, 73, 49—And its alloys, impurities in, 77, 45 — And its alloys, relative value of, to arts, 58, 227—And magnesium, combinations, 14, 190—And magnesium, gases retained by occlusion in, 41, 273; 42, 318—And manganese, separation, 57, 125; 76, 65 — And magnesium alloys, 85, 12; 90, 35, 45—And molybdenum alloys, 84, 96—And molybdenum, compounds, 83, 312 — And nickel, separation, 57, 125; 76, 65; 87, 312 — And other steels, electric and magnetic properties, 80, 218 — And potassium or sodium, double silicates of, 53, 273 — And thorium alloy, 93, 106—And titanium, compound, 1, 311—And titanium, separation, 52, 55, 68—And tungsten, combinations, 83, 263—And vanadium, separation, 37, 113—And zinc, separation, 57, 125; 76, 65—And zirconium, separation, 59, 100 — Anode, theory of, 86, 265—As an electrical conductor, 84, 215 — As a reducing agent, 77, 213; 79, 172—Atomic weight, 41, 212, 285; 45, 256, 268, 281; 46, 15, 27, 41; 90, 280; 91, 228; 93, 55, 195; 99, 69; 100, 278—Atomicity of, 11, 110; 20, 264 — Bells, 19, 215—Chlor- (*see* Chloraluminium) — Coating metals with, 5, 153 — Commercial, analysis of, 67, 212 — Compounds, 11, 61; 59, 75, 99; 71, 221 — Compounds, crystallized, 2, 323 — Compounds, decomposition, 5, 153 — Compounds, molecular weights of, 58, 293; 83, 194, 208 — Compounds, preparation, 81, 286 — Corrosion, 71, 134; 77, 207—Detection, 52, 109 — Determination, 61, 313; 64, 194; 69, 13—Determination in presence of iron, 54, 252—Determination of acids combined with, 91, 236 — Determination of equivalent of, 17, 165—Dishes, platinised, 88, 269—Effect of blowson, 93, 200 — Electrical conductivity, 75, 217 — Electro-chemical deposits of, 34, 227 — Electrodeposition, 24, 194—Electrolytic manufacture of, 52, 177—Electro-metallurgy of, 61, 86, 266; 63, 89; 88, 62 — Electro-thermic properties of, 22, 70 — Employment of acetate of sodium for separation from other bases, 11, 102 — Estimation, 65, 68, 78, 89, 98; 81, 83 — Estimation by standard solutions, 3, 385—Estimation of tartaric and malic acids by, 18, 63—Estimation with sodium thiosulphate, 58, 109 — Ferro- (*see* Ferro-aluminium) — Flattened, 1, 310 — For batteries, 23, 215, 239 — For condensers, 75, 221—For laboratory use, 69, 121 — From aqueous solutions, deposition of, 73, 122—Gold (*see* Gold aluminium) — Group, metals of, and organic halogen derivatives, interaction, 98, 231 — Impurities of, 70, 49; 79, 276—In aluminium chloride and aluminium sulphate, iodometric determination, 94, 247 — In batteries, 22, 228 — In bone-black, 67, 311—In cast-iron, 63, 172; 64, 49—In cryptogams, 30, 137 — In iron, 57, 249, 261; 64, 73—In metallurgy of steel, 67, 26—In pig-iron, 29, 57, 110—In qualitative analysis, 77, 105—In silicates, determination, 95, 252—In steel, 63, 172; 64, 73—In vegetable earths, amount of, 83, 287 — Magnesium (*see* Magnesium-aluminium) — Manufacture, 62, 250 — Manufacture, Castner's process, 58, 64 — Manufacture from cryo-

- lite, 60, 199—Mercury couple, 77, 58; 80, 239—Metallic, determination, 62, 241; 100, 207—Metallic, oxidation, 21, 130—Metallic, properties of pure, 46, 178—Metalurgical importance of, 6, 138—Metalurgical use of, 64, 285—Natural, formation, 68, 36—New source, 90, 232—Novel application, 1, 60—Oxidation, 37, 218—Oxidation, product of incomplete, 68, 109—Pasty condition near its point of fusion, 86, 284—Peculiar absorption of a compound of iodine by, 49, 1—Plate as support in blowpipe work, 36, 208, 217; 40, 312—Plating, 26, 157—Powder, 90, 5—Powder, action on silica and borio anhydride, 96, 244—Powder, analysis, 99, 35—Powder, alumina in, 90, 6—Powder, and carbon, interaction, 97, 219, 233, 238—Powder, oxidation, 90, 7; 92, 105—Powder, thermal phenomena accompanying action of water on, 99, 168—Preparation, 45, 152; 54, 322—Preparation of binary compounds of metals by means of, 92, 57, 80—Preparation of compound SiMn_2 by, 92, 271—Prepared by electrolysis, sodium in, 73, 64—Production, 28, 307; 62, 51—Properties of, 79, 47, 105, 190; 81, 299—Pure, 26, 96—Reduction, 60, 299—Reducing from its ores, 19, 162—Reducing properties of, 80, 122; 83, 202—Report on recent work of Richards, 73, 306—Separation, 77, 170, 265—Separations by hydrochloric acid, 78, 53—Silicium in, 19, 274—Soldering, 15, 318; 50, 45; 67, 96—Specific heat, 65, 97—Spectra, 79, 35—Supposed discovery two thousand years ago, 86, 171, 203—Test, 54, 280—The chief inorganic element in a protaceous tree, 88, 135—Thermo-chemistry of, 98, 197—To gold, 1, 24—Trivalency, 59, 205—Tubes, 75, 239—Utensils, 72, 161; 76, 23—Valency of, 41, 212—Voltaic element in, 43, 131—Weights, 22, 187—Welding, 89, 117—Wires for telegraph, 41, 134—Working in, 4, 79
- Aluminium alcoholates, 74, 58; 76, 55; 83, 146
- Aluminium alcohols (*see* Alcohols)
- Aluminium ammonio salts, 14, 266
- Aluminium-bismuth alloys (*see* Bismuth-aluminium)
- Aluminium borate crystalline, from Siberia, 47, 164
- Aluminium bromide, action, 54, 274—Action on acyclic chlorised hydrocarbons, 84, 12—Action on bromide of ethylene, 78, 47—And bromine, compound of, 86, 197—Compound with organic substances, 83, 179—And sulphide of carbon, compound of, 86, 197
- Aluminium bronze, 4, 58; 7, 220; 15, 318; 17, 253—Chalices and patens of, 16, 280—Constituents obtained during tempering, 91, 148—Resistance of, 61, 266
- Aluminium carbide, 96, 269, 304—Crystalline, 71, 50—Preparation, 96, 246—Reduction of metallic oxides by, 92, 244
- Aluminium chloride, action, 63, 224; 68, 266; 69, 201—Action of aluminium on, 51, 262—Action of chlorinised aldehyds on benzol in presence of, 49, 190—Action of ethyloxyal on naphthalene in presence of, 74, 62—Action on anhydrides in chloroformic solution, 85, 107—Action on anhydrous chloral, 78, 71—Action on anhydrous chloride, 78, 60—Action on benzene containing thiophene, 74, 97—Action on aromatic compounds, 93, 289—Action on bromo-, chloro-, and iodo-naphthalenes, 53, 275—Action on camphoric anhydride, 74, 281; 77, 210; 80, 316; 81, 94—Action on naphthalene, 95, 177—Action on naphthalene, absorption spectra of hydrocarbons isolated from products of, 97, 308—Action on penta-chlorethane, 78, 47—Action on tetra-chloride of acetylene, 79, 118—Action on toluene, 91, 9, 58; 92, 81—And alkaline chloride, compounds, 84, 304—And ammonia gas, compounds, 83, 82—And bromide, reactions taking place in presence of, 41, 251—And carbon oxychloride, compounds, 92, 45—And hydrochloric acid, products of action on benzene, 97, 239—And tetrabromide of acetylene, action on toluene, 92, 81—Anhydrous, action on acetylene, 81, 286—Anhydrous, action on acetone, 46, 184—Anhydrous, and sulphuretted hydrogen, compounds, 86, 24—Anhydrous, double compounds, 71, 245—Catalytic action on silicio ethers, 67, 9, 16, 28—Compounds as ferments, 87, 273—Compounds with organic substances containing oxygen, 89, 294—Decomposing action, 51, 165—Hydrated, as an antiseptic, 22, 165—Of platinum, 29, 265—Reaction, 54, 261; 57, 142—Synthesis of, 67, 261—Vapour density and molecular weights of, 58, 24
- Aluminium chlorides, ammoniacal, thermal examination of, 83, 154
- Aluminium chlorosulphate, 86, 269
- Aluminium-copper alloys (*see* Copper-aluminium)
- Aluminium copper-tin (*see* Copper-tin aluminium)
- Aluminium ethyl, 22, 70
- Aluminium ferrocyanide and cerium and magnesium ferrocyanides, double and triple salts with potassium and ammonium, 100, 31
- Aluminium fluoride, 4, 256; 87, 23—Electrolysis, 62, 29, 261—Electrolysis by igneous fusion, 61, 132
- Aluminium hydroxide and dextrose, compound, 87, 175—Isomeric modification, 42, 119—Preparation, 64, 180
- Aluminium hydroxides, 82, 75
- Aluminium iodide, reaction of, 42, 2
- Aluminium iodomercurate, 97, 208
- Aluminium-iron alloys, 85, 108—Magnetic properties, 80, 218; 81, 283
- Aluminium-lead alloys (*see* Lead aluminium)
- Aluminium magnesium alloys (*see* Magnesium-aluminium)
- Aluminium-manganese alloys, 85, 108
- Aluminium-mercury couple, 83, 223
- Aluminium methyl, 61, 12—Vapour density, 57, 121
- Aluminium nitride, 33, 238; 35, 232—Formation, 99, 4
- Aluminium orthophosphate, neutral crystalline, production, 50, 67
- Aluminium oxide and fluoride, electrolysis by igneous fusion, 61, 132—And iron oxide, separation, 80, 39—Determination in presence of ferric oxide, 29, 190, 216, 229
- Aluminium oxychlorides, 51, 263
- Aluminium phosphate, 44, 82—Precipitation with calcium sulphate, 47, 203—Preservation of wine by addition of, 38, 21
- Aluminium phosphates, agricultural value, 71, 125—Deposits, 72, 73
- Aluminium phosphide, 20, 264
- Aluminium sesquioxide, sulphates of, action of hydrochloric acid on, 86, 95; 87, 74
- Aluminium sesquisulphide, double compounds with monosulphides of chromium, nickel, cobalt and magnesium, 95, 286
- Aluminium silicide, 16, 78
- Aluminium silicofluoride, 4, 255
- Aluminium silver, 29, 200
- Aluminium steels, constitution and properties, 92, 57
- Aluminium succinate, 88, 135
- Aluminium sulphate, 42, 23; 51, 201—And silver sulphate, double, 31, 209—And sulphuric acid, compound, 88, 220—As a disinfecting agent, 40, 23—Efflorescence of double ferrous, 72, 289—Free from iron, 42, 191, 202—From bauxite, 45, 256—Manufacture, 45, 78—Neutral, hydrate of, 47, 190; 50, 272—Of commerce, 70, 276—Sulphuric acid in presence of, 49, 14—Typical hydrate of, 62, 84
- Aluminium sulphates, 45, 121, 153, 146
- Aluminium sulphide, 20, 264; 65, 135—And its combinations with magnesium sulphide and iron sulphide, 95, 226
- Aluminium-tin alloys, 84, 163, 316; 89, 286; 92, 10
- Aluminium-zinc alloys, 89, 274
- Aluminous mineral (*see* Minerals)
- Minerals (*see* Minerals)—Rocks (*see* Rocks)
- Alunite, calcination in powder, 46, 291—Ground, as supplied to alum works, analysis, 47, 10—Of Montedore, 21, 214—Raw, industrial richness of, 46, 200—Roman, commercial treatment of, 53, 27
- Alvarez, E., New microbe, 56, 114
- Alvarez, E. P., Adoption of a system of nomenclature for designation of the condensed organic compounds, 94, 297—Colour reactions of certain organic compounds, 94, 297—Colour reactions of pyruvic acid with α - and β -naphthol in sulphuric acid solution, 91, 209—Contribution to the study of the per-salts, 94, 269—New general colour reagent of the polyphenols, their isomers, and higher organic compounds, 91, 125—New iodised compound of osmium, 91, 172—New osmium compound and an osmium reaction, 91, 269—New reagent for acetonine, 91, 179—New reagent for potassium, 91, 146—Observations on diphenylamine as reagent for nitrites, nitrates, chlorates and its use when mixed with resorcin and β -naphthol, 91, 155—Reaction of the compounds of rhodium of use in chemical analysis, 91, 216—Reaction of salts of cobalt of service in analytical chemistry, 94, 306
- Alvergniat, M., Luminosity of Geissler tubes by friction, 19, 176—Phosphorescence produced by frictional electricity, 24, 288
- Alvergniat Freres, MM., Drop apparatus for fluids, 21, 10—Radiometers composed of laminae of different materials, 34, 83, 92

- Amélio, R. M. De (*see* D'Amélio, R. M.)
- America, adulteration in, 1, 240, 288; 9, 103 — Application of ozone in, 26, 118 — Chemical publications in, in relation to chemical industry, 98, 75 — Coal oil, manufacture in, 1, 180 — Influence of petroleum in, 10, 204 — Man of tertiary period in, 21, 142 — Monster gun in, 10, 144 — National Chemical Society of, 63, 52 — North, evolution of wheat culture in, 100, 151 — Oil springs in, 4, 152 — Pharmaceutical matters in, 6, 280 — Progress of alchemy in, 76, 61 — Scientific notes from, 22, 204 — South, gold nugget from, 39, 161 — South, saltpetre in, 26, 107 — Western, alkaline deposits of, 18, 108
- American agricultural chemists, official methods of, 98, 174, 198 — And Indian podophyllum, 77, 113; 78, 26 — Asphaltum, 26, 46 — Association for Advancement of Science, 28, 158; 36, 235; 37, 265; 38, 142; 39, 289; 40, 166; 45, 222; 46, 115, 167; 66, 314, 326; 77, 214 — Blenders, in dium in, 28, 28 — Cheeses (*see* Cheeses) — Chemical Societies, early, 76, 216, 235, 237 — Chemical Society, 34, 22; 42, 21, 44, 58, 207, 246, 291, 304; 43, 57, 268; 44, 56, 167, 271; 45, 127; 92, 21 — Chemical Society, chemical abstracts of, 94, 243 — Chemical Society, Detroit meeting, 100, 70 — Chemical studies, 44, 56, 167 — Chrome-iron ore, 5, 56 — Coal, 2, 24 — Copyright, 63, 95, 106 — Devotion to science, 36, 175 — Eclipse (*see* Eclipse) — Electro-chemical Society, 87, 72; 89, 156 — Institute, 19, 47 — Institute of Electrical Engineers, report of committee on cadmium cell, 90, 225 — Journal of Science, 4, 334 — Lead (*see* Lead) — Manufacture of soda from cryolite, 13, 11 — Mineral (*see* Mineral) — Minerals, examination, 36, 152 — Oil of turpentine, 70, 311 — Oil springs, 4, 152 — Oil wells, 6, 149, 161, 175, 228, 252, 300 — Opium, assay of, 21, 144 — Pennayrol, constituents of essential oil of, 95, 234 — Petroleum, chemistry of, and products of destructive distillation, 7, 197 — Petroleum composition, 8, 44; 78, 261 — Petroleum, incomplete carbides obtained from, 40, 167 — Petroleum, products obtained from, 19, 143 — Petroleum, separation of normal and isoheptane from, 78, 262 — Petroleum trade, 6, 180 — Philosophical Society, 66, 294; 86, 298; 99, 24 — Platinum, 50, 36 — Pork, insalubrity of, 42, 318 — Rock oil, chemical constitution, 7, 157 — Salt, 2, 96 — Science (*see* Science) — Silver, tellurium in ingots of, 85, 290 — Society of Civil Engineers, 29, 119 — South, production of iodine, 39, 172 — Spelling of chemical words, 83, 141 — Tantalates, analysis of, 41, 244 — Versus English spelling, 83, 153, 202; 84, 10 — View of patent laws, 24, 107
- Ames, J. S., Probable spectrum of sulphur, 67, 40
- Ames, J. S., and W. J. Humphreys, Effect of pressure upon the series in the spectrum of an element, 76, 21
- Amethylcamphonitroketone, tinctorial properties, 66, 41
- Amethylcamphophenol sulphone, 61, 254
- Amherst, mineral water from, 45, 158
- Amide, acet. (*see* Acetamide) — Acids (*see* Acids) — And thiosamide compounds, oxidation of, 77, 201 — Barium (*see* Bariumamide) — Benz- (*see* Benzamide) — Benzoylnaphthyl- (*see* Benzoylnaphthylamide) — Chloracet- (*see* Chloracetamide) — Chloro-cyan- (*see* Chlorocyanamide) — Chlorphos- (*see* Chlorphosamide) — Chromyl- (*see* Chromylamide) — Cyan- (*see* Cyanamide) — Derivatives, acetylation of, 79, 106 — Diacet- (*see* Diacetamide) — Dibenz- (*see* Dibenzamide) — Diethyl malon- (*see* Diethylmalonamide) — Disalicyl- (*see* Disalicylamide) — Ethyl carbyl- (*see* Ethyl carbylamide) — Form- (*see* Formamide) — Formation, 59, 85 — Formi- (*see* Formamide) — Furfur- (*see* Furfuramide) — Furfuryl- (*see* Furfurylamide) — Glyoxylic, 27, 174 — Hydro benz- (*see* Hydrobenzamide) — Hydrocinn- (*see* Hydrocinnamide) — Isonyl- (*see* Isonylamide) — Isothionio acid, 29, 288 — Mal- (*see* Malamide) —
- Maldi- (*see* Maldiamide) — Maldibenzyl- (*see* Maldibenzylamide) — Maldin-propyl- (*see* Maldin-propylamide) — N-Methylsalicyl- (*see* N-Methylsalicylamide) — Mono-chlor-ethyl-acet- (*see* Mono-chlor-ethyl-acetamide) — Naphthalin-carboxylic acid (*see* Naphthalin-carboxylic acidamide) — Naphthyl-chlor-acet- (*see* Naphthyl-chloracetamide) — Nitracet- (*see* Nitracetamide) — Nitro-benzyl- (*see* Nitrobenzylamide) — Nitroso-propylacet- (*see* Nitroso-propylacetamide) — Of caesium (*see* Caesium amide) — Of calcium (*see* Calcium amide) — Of dimethoxypropionic acid derived from *d*-glyceric acid, 91, 292 — Of glyceric acid, 83, 59 — Of lithium (*see* Lithium amide) — Of potassium (*see* Potassium amide) — Of silicon (*see* Silicon amide) — Of sodium (*see* Sodium amide) — Osmi- (*see* Osmiamide) — Oxalur- (*see* Oxaluramide) — Paratoluylic, 33, 75 — Phenyl par- (*see* Phenyl paramide) — Phenylxanthogen- (*see* Phenylxanthogenamide) — Phthal- (*see* Phthalamide) — Potassium (*see* Potassium amide) — Rubid- (*see* Rubidamide) — Salicyl- (*see* Salicylamide) — Salicylhydr- (*see* Salicylhydramide) — Sebac- (*see* Sebacadamide) — Silicophenyl- (*see* Silicophenylamide) — Silver cyan- (*see* Silver cyanamide) — Sod- (*see* Sodamide) — Sulph- (*see* Sulphamide) — Sulphacet- (*see* Sulphacetamide) — Tetraacetyl- (*see* Tetraacetylhydramide) — Tetramethyl- (*see* Tetramethylhydramide) — Tetramethyldiamido-diphenyldianthranil-tetramethyldiamide) — Thio-benz- (*see* Thiobenzamide) — Thioform- (*see* Thioformamide) — 1,2,4- Tolucene ortho-nitro-para-sulph- (*see* Toluene ortho-nitro-para-sulphamide 1,2,4-) — Toly- (*see* Tolyamide)
- Amides, 23, 119; 26, 94 — Acetylation of, 90, 263 — Acetylenic, 93, 93 — Acetylenic, action of hydroxylamine upon, 96, 12 — Acetylenic, condensation with phenols, 93, 223 — Aci- (*see* Aci-amides) — Acid, action of nitrous acid on substituted, 25, 241 — Acid, condensation of salicylic aldehyde with, 79, 251 — Acid, constitution of, 70, 100 — Acid, formation from salts of ammonia, 50, 117 — Acid, formation of bases from substituted, 43, 12 — Acid, hydrolysis of, 75, 200 — Action of alkalis on, 77, 57 — Action of hypobromites on, 87, 90 — Action of organo-magnesium compounds on, 88, 244 — Action of phosphogen on, 22, 144; 25, 119 — Action of sulphocarbonyl-chloride on, 28, 294 — Action on amido-azo bodies, 35, 217 — Action on phenol, 28, 181 — Action on xanthone hydrol, 96, 293 — Acyl-salicyl- (*see* Acyl-salicylamides) — Aliphatic, velocity of hydrolysis of, 95, 128, 248 — Amin- (*see* Aminamides) — And ethers, action of sodium ethylate on mixtures of, 57, 78 — And iodine cyanide, 36, 231 — Aromatic, conversion into their azo-compounds, 44, 210 — Aromatic, of camphoric acid, 96, 278 — Campholenic, 71, 245 — Complex, *see* researches on, 10, 178 — Condensation with esters of acetylenic acids, 99, 167 — Conversion into amines, 54, 61 — Cyan- (*see* Cyanamides) — Decomposition, 64, 309 — Derived from aldehydes, 79, 11 — Determination, quantitative, 91, 10 — Diazo- (*see* Diazoamides) — Formation, 33, 107; 49, 266; 84, 274 — Formation from aldehydes, 83, 138 — Formation heats of, 62, 74, 309 — Hydrochlorates of, synthesis, 73, 48 — Influence of, formation of salts on saponification of by means of alkalis, 80, 183 — β -Ketonic, synthesis of non-substituted, 95, 226 — Metallic derivatives of, 47, 246 — Molecular complexity of

- in various solvents, 97, 247—Molecular weights of, 95, 308—Mon- (see Monamides) —Nitrophenyleyan- (see Nitrophenyleyanamides) —Or acids (see Acids) —Of benzyl (see Benzyl amides) —Of fatty acids, formation of, 24, 35—Of molybdenum (see Molybdenum amides) —Of naphthylsulphurous acids, 36, 22—Of sodium (see Sodium amides) —Of tartaric acid, substituted, 100, 251—Organic, action of hydrochloric acid on, 43, 188 — β -Oxyphenol ethylenic, synthesis, 93, 223 — Preparation, 68, 210 — Producing, 27, 3 — Propyl- (see Propylamides) — Pyrophosphoric, 16, 275 — Salicyl- (see Salicyl-amides) — Saponification by means of alkalis, influence of formation of salts on, 80, 183 — Secondary, 88, 137 — Secondary, preparation, 88, 83 — Substituted, preparation from corresponding sodium, 83, 105 — Sulphon- (see Sulphonamides) — Sulphonphenylchloro- (see Sulphonphenylchloro-amides) — Sulphontolylchloro- (see Sulphontolylchloro-amides) — Tartaric, *ar* and *ac*-tetrahydronaphthyl, 83, 277 — Tetraphosphoric, 17, 198, 305—Thio- (see Thiamides) — Thio- (see Thio-amides) — Transformation of nitriles into, 37, 161—Xylol-sulph- (see Xylol-sulphamides)
- Amido acids (see Acids)
- Amido derivatives, fixation of group CH_2 in, 68, 98
- Amide of barium (see Barium)—Of sodium (see Sodium)
- Amide, benz- (see Benzamidine)
- Amidines, 38, 35—Amidised, 75, 300; 76, 60—Amido- (see Amidoamides)
- Amino- (see Aminoamides) — And monobasic organic acids of thiamides, 37, 262—Chemistry of, 93, 20; 97, 274 — Of the naphthalene series, isomerism, 90, 288 — Phosphoric, 88, 251
- Amidiphenol, oxalic diethyl ethers on, 78, 107
- Amidised amidines (see Amidines)
- Amido acids (see Acids)
- Amido, diazo- (see Diazoamido)
- Amido-acetate of phenol (see Phenol amido-acetate)
- Amido-alizarin, formation of, 65, 69
- Amidoamides, 79, 118—Of naphthalene series, 80, 241
- Amido-anthraquinone, diortho- (see Diortho-amido-anthraquinone) — Hydroxyl- (see Hydroxylamidoanthraquinone)
- Amido-anthraquinones, dialcyl- (see Dialcylamidoanthraquinones)
- Amido-azo bodies, action of amides on, 35, 217—Compounds in toluene series, 35, 185—Compounds of toluyl series, 36, 8
- Amido-azobenzene, relation of diazobenzene-anilide to, 52, 247
- Amido-bases, bases of phenols with, 48, 224 — Isomeric, from a hydrocarbon, 22, 82—Phenates of, 47, 116
- Amido benzamid, meta- (see Meta-amido benzamid)
- Amido-benzene, diazo- (see Diazoamido-benzene)—Ethylidimethyl (see Ethyl diamethylamido-benzene)
- Amido-benzenes, dinitrodiazo- (see Dinitrodiazo-amido-benzenes)
- Amido-benzhydrol, tetramethyl-di- (see Tetramethyldiamidobenzhydrol)
- Amidobenzoic acid (see Acid)—Acids (see Acids)
- Amido-benzol, 28, 84—Brom- (see Brom-amido-benzol) — Diazo- (see Diazo-amido-benzol) — Meta-di- (see Meta-di-amido-benzol) — Tri- (see Tri-amido-benzol)
- Amido-benzols, di- (see Diamido-benzols) — Nitr- (see Nitr-amido-benzols)
- Amido-benzophenone, tetramethyl-di- (see Tetramethyl-diamido-benzophenone)
- Amido-benzo-sulpho acid (see Acid)
- Amido-butyric acid (see Acid)
- Amido-camphoric acid (see Acid)
- Amido-caprylic acid (see Acid)
- Amidochloroiodides, 80, 290
- Amido-chromates, 71, 13; 73, 48
- Amido-compounds, action of d. isocyanates on, 77, 162; 78, 13—Action of diphenyl di-isocyanate on, 73, 81—Action on animal nutrition, 48, 226—Action on chloral, 25, 190—Constitution, 42, 237.
- Amido crotonate, ethylic, action of heat on, 62, 306—Ethylic, pyridine derivatives from, 75, 150
- Amidocumenic acids (see Acids)
- Amido-derivatives, action on pyroracemic acid, 35, 124 — Application of pyridine to preparation of, 88, 280 — Aromatic, 24, 275—Of orcin, 23, 292; 27, 49
- Amido-dichlor-anthraquinones, dialcyl- (see Dialcylamido-dichlor-anthraquinones)
- Amido-dicyanac acid (see Acid)
- Amido-diethylamido-ortho-benzoyl dimethyl- (see Dimethylamido-diethylamido-ortho-benzoyl)
- Amido-dimethyl-hydroquinone and ortho-anisidin, 44, 83
- Amido-dimidophenol, 15, 279
- Amido-dinaphthylid, 13, 202
- Amido-diphenylanthrones, tetra-alcyl-di- (see Tetra-alcylamido-diphenylanthrones)
- Amido-diphenyldianthranol-tetramethyl-diamide, tetra-methyl-di- (see Tetramethyldiamidodiphenylanthranol-tetramethyl-diamide)
- Amido-diphenylethane, di- (see Diamido-diphenylethane)—Tetramethyl-di- (see Tetramethyldiamido-diphenylethane)
- Amido-diphenylimid, 13, 202
- Amido-ethane-oxy-methane-phenylimine-phenylamine, phenyl- (see Phenyl-amido-ethane-oxy-methane-phenylimine-phenylamine)
- Amido-group attached to the nitrogen atom of heterocyclic compounds, 97, 48
- Amido-meta-xylol-sulphonic acid (see Acid)
- α -Amido- β -methylhydrindene, 84, 22
- Amido-methylnaphthimidazole, Gallinek's, 82, 265
- Amidomonochloro-sulphobenzidic acids (see Acids)
- Amidon, acid properties of, 93, 214 — Animal, a starch-like substance, 24, 45 — Retrogradation and coagulation, 89, 71 — Retrograde, formation and saccharification, 89, 101—Starch (see Starch)
- Amido-naphthalene, ethyl-tri- (see Ethyl-tri-amidonaphthalene)
- Amido-naphthol, diazo- (see Diazoamido-naphthol)
- Amido-orthobenzoyl, dimethylamido-diethyl- (see Dimethylamido-diethyl-amido-orthobenzoyl)
- Amido-oxylutidines, production, 77, 124, 125
- Amido-oxypicolines, production, 76, 66
- Amido-oxy-sulphobenzid, di- (see Diamido-oxy-sulphobenzid)
- Amido-para-benzoyl- β -naphthol, benzoyl (see Benzoylamido-para-benzoyl- β -naphthol)
- Amido-phenol, ortho- (see Ortho-amido-phenol) — Ortho-para- (see Ortho-para-amido-phenol) — Propyl- (see Propylamido-phenol) — Tri- (see Triamido-phenol)
- Amido-phenols, 48, 214 — Brom- (see Brom-amido-phenols)
- Amido-phenyloxanthranol, tetramethyl-di- (see Tetramethyldiamido-phenyloxanthranol)
- Amidophosphoric acid (see Acid)
- Amido-phthalic acid (see Acid)
- Amido-pyridine, di- (see Diamidopyridine)—Transformation of nicotic acid into, 80, 12
- Amido-selenites, 79, 211
- Amido-substituted benzophenones (see Benzophenones)
- Amido-sulphates, hydroxy- (see Hydroxy-amido-sulphates)
- Amido-sulphite of ammonium (see Ammonium-amido-sulphite)
- Amido-sulphobenzide, di- (see Diamido-sulphobenzide)
- Amido-sulphobenzidic acid (see Acid)
- Amido-sulphonates, oxy- (see Oxyamido-sulphonates)
- Amido-sulphonic acid (see Acid)
- Amido-sulphophenol, 22, 215
- Amido-tariric acid (see Acid)
- Amido-toluen, para-di- (see Para-di-amido-toluene)
- Amido-toluquinon, para-di- (see Para-di-amido-toluquinon)
- Amidotoluyensulpho acids (see Acids)
- Amido-triphenylmethane, 43, 48 — Hexamethyltri- (see Hexamethyltri-amidotriphenylmethane)—Tri- (see Triamido-triphenylmethane)
- Amido-triphenylmethanes, parantrodidi- (see Parantrodidi-amidotriphenylmethanes)
- Amido-valeric acid (see Acid)
- Amidoximes, action of chlorofumario ethers on, 79, 288
- Amigues, M., Flattening of planet Mars, 30, 41
- Amin, chlornaphthyl- (see Chlornaphthylamin)—Cycl- (see Cyclamin)
- Aminamides of fatty acid series, 20, 119
- Amine, allyl- (see Allylamine)—Amyl- (see Amylamine)—Anthracen- (see Anthracenamine)—Bases compounds with hydro-ferro-cyanic acid, 37, 63 — Bases, tertiary, formation during synthesis of organic acids, 38, 35—Benzoyl-1:4: Naphthylenedi- (see Benzoyl-1:4-naphthylenediamine)—Benzyl (see Benzylamine)—Benzyl-hydrind- (see Benzylhydrindamine)—Bornyl- (see Bornylamine)—4-Bromo-2-nitro-1-(α -naphthyl- (see 4-Bromo-2-nitro-1-(α -naphthylamine)—Butyl (see Butylamine)—Carbo-triphenyl-tri- (see Carbo-triphenyltri- (see Carthamine)—Chin- (see Chinamine)—Chloronaphthyl- (see Chloronaphthylamine)—Cinchon- (see Cinchonamine)—Cobalt- (see Cobaltamine)—Compounds, action of organo-magnesium compounds on, 87, 192 — Conchin- (see Conchinamine)—Conquin- (see Conquinamine)—Cumonitril- (see Cumonitrilamine)—Cyclohexyl- (see Cyclohexylamine)—Decahydro- α -naphthyl- (see Decahydro- α -naphthylamine)— β -Decahydronaphthyl- (see Decahydronaphthylamine, β) — Derivatives of amyl series, 36, 51 — Derivatives of bi-naphthylene glycol, 84, 242 — Dextro- α -tetrahydronaphthyl- (see Dextro- α -tetrahydronaphthylamine) — Dextro-camphorsulphonate, dextro- α -phenethyl- (see Dextro- α -phenethylamine dextro-camphorsulphonate) — Dextro-tetrahydronaphthyl- (see Dextro-tetrahydronaphthylamine) — Di- (see Diamine) — Diacetone-hydroxyl- (see Diametone-hydroxylamine) — Diethyl- (see Diethylamine)—Diethylene, di- (see Diethylenediamine) — Diethyl-naphthyl- (see Diethylnaphthylamine) — Dihydropinyl- (see Dihydropinylamine) — Dihydroxyl- (see Dihydroxylamine) — Dimethyl-naphthyl- (see Dimethylnaphthylamine)—Dinitronaphthyl- (see Dinitronaphthylamine) — Diphenyl- (see Diphenylamine) — Diphenyl-nitrosamine) — Di- (see Diphenyl-nitrosamine)—Ethyl-propyl- (see Dipropylamine)—Ethyl- (see Ethylamine) — Ethyl-allyl- (see Ethyl-allylamine) — Ethyl-carbyl- (see Ethylcarbylamine) — Ethyldichlor- (see Ethyldichloramine) — Ethyl-naphthyl- (see Ethylnaphthylamine) — Ethyl-paraphenyldi- (see Ethyl-paraphenyldiamine)—Furfur- (see Furfuramine) — Gluco- (see Glucamine) — Glucos- (see Glucosamine) — Glut- (see Glutamine) — Glykos-

(see Glykosamine) — Hexamethyl- (see Hexamethylamine) — Hexamethylene- (see Hexamethyleneamine) — Hydroxyl- (see Hydroxyamine) — Hydroxyl- (see Hydroxylamine) — Hyoscy- (see Hyoscyamine) — Isoamyl- (see Isoamylamine) — Isobutyl- (see Isobutylamine) — Isoglucos- (see Isoglucosamine) — Isonitr- (see Isonitramine) — Leuco-aur- (see Leucoauramine) — Mann- (see Mannamine) — Menaphthyl- (see Menaphthylamine) — Meta-di- (see Metadiamine) — Metallic, derivatives, relative stability of, 95, 107—Metaphenylenedi- (see Metaphenylenediamine) — Methyl- (see Methylamine) — Methylacetone- (see Methylacetone) — Methyl-diphenyl- (see Methyl-diphenylamine) — Methyl-ethyl-β-naphthyl- (see Methyl-ethyl-β-naphthylamine) — dl-Methylhydri- (see dl-Methylhydriamine) — Monodiphenyl-di- (see Monodiphenyldiamine) — Monoisobutyl- (see Monoisobutylamine) — Monomethyl- (see Monomethylamine) — Naphthyl- (see Naphthylamine) — Neobornyl- (see Neobornylamine) — Ninaphthal- (see Ninaphthalamine) — Nitr- (see Nitramine) — Nitrosophenyl- (see Nitrosophenylamine) — Oenanthal-naphthyl- (see Oenanthal-naphthylamine) — Oxallyl-diethyl- (see Oxallyl-diethylamine) — Para-hydroxydi-phenyl- (see Para-hydroxydiphenylamine) — Para-hydroxyphenylethyl- (see Para-hydroxyphenylethylamine) — Phenylacetylchlor- (see Phenylacetylchloramine) — Phenyl-amido-ethane-oxy-methane-phenylimine-phenyl- (see Phenyl-amido-ethane-oxy-methane-phenylimine-phenylamine) — Phenylethyl- (see Phenylethylamine) — 1-Phenylethyl- (see Phenylethylamine) — Phenylhydroxyl- (see Phenylhydroxylamine) — Phenyltolyl- (see Phenyltolylamine) — Pinene nitrol- (see Pinene) — Pinocamparyl- (see Pinocamparylamine) — Propyl- (see Propylamine) — Propylpropylidene- (see Propylpropylideneamine) — Quin- (see Quinamine) — Salts, action of bases and acids on, 84, 36—ar-Tetrahydro-naphthyl- (see ar-Tetrahydro-naphthylamine) — ar-Tetrahydro-naphthyl- (see ar-Tetrahydro-naphthylamine) — Thiosin- (see Thiosinamine) — Tolluylendi- (see Tolluylendi-amine) — Tri- (see Triamine) — Triacetone-alk- (see Triacetone-alkamine) — Tribenzyl- (see Tribenzylamine) — Triethyl- (see Triethylamine) — Trimethyl- (see Trimethylamine) — Trimethyl-glycer- (see Trimethylglyceramine)

Amine bromocamporsulphonates, hydrind- (see Hydrindamine bromocamporsulphonates)

Amine camphorsulphonates, hydrind- (see Hydrindamine camphorsulphonates)

Amino hydrochlorate, trimethyl- (see Trimethylamine hydrochlorate)

Amine magnesium iodide, phenyl- (see Phenylmagnesium magnesium iodide)

Amine mandalates, hydrind- (see Hydrindamine mandalates)

Aminesulphonates, peroxy- (see Peroxyaminesulphonates)

Aminetrisulphonates, hydroxyl (see Hydroxyaminetrisulphonates)

Amines, 94, 97—Action of acetylchloro- and acetylchloro-amino-benzenes on, 83, 116—Action of bromine in alkaline solution on, 48, 237—Action of dibrom-naphthol on, 47, 27; 49, 146—Action of hydro-, ferro-, and ferricyan acids on, 41, 123—Action of trihydro-acetyl-chloride on, 29, 44—Action of zinc-ethyl on, 47, 142, 294—Action on chloral, 35, 216—Action on diazobenzene picrate, 83, 65—Action on quinones, 40, 301—Acyla-

tion of, 100, 162 — Acylaryl- (see Acylarylamines) — Acyl-bornyl- (see Acylbornylamines) — Acyl hydroxy- (see Acyl-hydroxyamines) — Alc- (see Alcamines) — Alcoholic, preparing, 99, 263—Aldehyde derivatives of, 38, 48—Aldehyde-disulphites of, 44, 306—Aliphatic, action of diazo compounds on primary, 92, 105—Aliphatic, action of hydrogen peroxide on secondary and tertiary, 79, 237 — Aliphatic, action of oxygen on, in presence of copper, 93, 117—Alkali-metry of, 80, 316 — And ammonia, separation by means of boiling absolute alcohol, 98, 23 — And camphoroxalic acid, condensation compounds, 93, 72, 89, 102, 111, 123, 134 — And 2:3:5-trinitro-4-acetylaminophenol, interaction, 99, 297 — Anhydroxycobalt- (see Anhydroxycobaltamines) — Aromatic, 27, 106; 36, 143; 37, 204; 38, 22; 48, 105; 56, 173—Aromatic, action, 62, 248—Aromatic, action of bibasic acid ethers on halogen-magnesium derivatives of primary, 93, 127—Aromatic, action of chloride of iodine on, 37, 162 — Aromatic, action of chloroacetic acid on, 89, 298 — Aromatic, action of dichloroacetic acid on substituted, 48, 305—Aromatic, action of halogen derivatives of acetones on, 96, 83—Aromatic, action of oxidising agents on, 79, 71—Aromatic, action of sulphochloride of phosphorus on, 84, 48—Aromatic, condensation of mesoxalic ethers with tertiary, 99, 118 — Aromatic and fatty, separation, 56, 91—Aromatic, and paradiamides, interactions, 96, 232 — Aromatic, and piperidine, mixed ureas of, 88, 281—Aromatic, coloured reactions, 63, 204—Aromatic, compounds of tetrazoditolylsulphite of sodium with, and transformation into azoic colouring-matters, 85, 264 — Aromatic, condensation with aniline benzyldene, 90, 45 — Aromatic, di-alcoholic, union of di-naphthopyrrol salts with, 89, 163 — Aromatic, formyl derivatives, 72, 57 — Aromatic, hyposulphites of, 85, 36 — Aromatic, primary, direct nitration of, 83, 288—Aromatic, primary, products of condensation of tetramethyldiamidobenzhydrol with, with the paraposition occupied, 85, 155 — Aromatic, reaction in sulphuric medium, 83, 216—Aromatic, substitution of, 25, 34—Aromatic, synthesis of, 62, 12—Aromatic, transformation, 65, 119 — Aromatic, tertiary, 81, 119 — Aryl- (see Arylamines) — Arylsulphonylmetadi- (see Arylsulphonylmetadiamines) — Avidity of, determination, 85, 60 — Behaviour with sulphochlorides, 40, 205—Benzenoid, 67, 117—Benzenoid, isomeric change and metasubstitution in, 83, 57 — Benzenoid, primary, 68, 269 — Benzenoid, and primary, and urethanes, interaction, 82, 299 — Benzenoid, relations between physical constants and constitution in, 83, 297; 84, 221 — Benzenoid, tertiary, 74, 303—Benzenesulphonylaminobenzyl- (see Benzenesulphonylaminobenzylamines) — Benzenesulphonylaminobenzyl- (see Benzenesulphonylaminobenzylamines) — Benzenesulphonylnaphthylenedi- (see Benzenesulphonylnaphthylenediamines) — Benzenesulphonylphenyl- (see Benzenesulphonylphenylenediamines) — Butyl- (see Butylamines) — Carbyl- (see Carbylamines) — Chlor- (see Chloramines) — Cobalt- (see Cobaltamines) — Combustion heat, 53, 61 — Condensation of acetylenic nitriles with, 94, 212—Condensation products of acetylenic ethers with, 94, 211 — Constitution determination, 90, 269 — Conversion of amides into, 54, 61—Cyclic, 89, 261—Cyclic, acid phosphites of primary, 93, 304—Cyclic, action of pentachloride of phosphorus on the ter-

tiary, 91, 95—Cyclic, primary, at boiling point, action of PCl₃ on, 89, 298 — Cyclic, retrogradation of secondary, 91, 9—Derived from aldehydes, 79, 11 — Determination of equilibrium in aqueous solutions of, 95, 284—Di- (see Diamines) — Dial-phenyl-ethylenedi- (see Dialphenylethylenediamines) — Diarylmethylene- (see Diarylmethyleneamines) — Diarylmethylenedi- (see Diarylmethylenediamines) — Diazo- (see Diazoamines) — Dicarbanilomethylenedi- (see Dicarbanilomethylenediamines) — Dinitros- (see Dinitrosamines) — Dioxethylen- (see Dioxethylenamines) — Diphenyl- (see Diphenylamines) — Diphenyldi- (see Diphenyldiamines) — Diphenylethylenedi- (see Diphenylethylenediamines) — Enclosing camphor molecule, 81, 35 Ethyl- (see Ethylamines) — Ethylisoamyl- (see Ethylisoamylamines) — Fatty, 56, 179 — Fatty, action of gaseous ammonia on chlorohydrates of, 84, 84—Fatty action of oxidising agents on, 79, 71—Fatty action of peroxide of hydrogen on, 82, 184; 86, 318—Fatty, action on dibenzoate, 86, 317—Fatty and aromatic, separation, 56, 91—Freezing-point curves for, 87, 268 — Hydroxyl- (see Hydroxylamines) — In commercial methylamine, extraction, 50, 260—In suit waters, 55, 266—Isoamyl- (see Isoamylamines) — Isobutyl-, (see Isobutylamines) — Isopropyl- (see Isopropylamines) — Methyl- (see Methylamines) — Meta-di- (see Metadiamines) — Metall- (see Metallamines) — Methyl- (see Methylamines) — d- and l-Methylhydri- (see d- and l-Methylhydriamines) — Molecular compounds of, 67, 142—Mon- (see Monamines) — Monophenyl- (see Monophenylamines) — Naphthyl- (see Naphthylamines) — Naphthylidene- (see Naphthylideneamines) — Nitr- (see Nitramines) — Nitro- (see Nitroamines) — Nitros- (see Nitrosamines) — Of fatty series and complex cyanide, combinations, 86, 305—Of fatty series, neutral salts of, 63, 177 — Of fatty series, preparation, 72, 209 — Of naphthalene series, action of formaldehyde on, 77, 258; 81, 307—Of xylalcohol, 20, 165—Orthotoloxopropanol- (see Orthotoloxopropanolamines) — Oxidation by catalytic action, 87, 60—Oxyo-balt- (see Oxyo-baltamines) — Oxethyl- (see Oxethylamines) — Paradi- (see Paradiamines) — Phenyl- (see Phenylamines) — Phenylchloroacetylhydri- (see Phenylchloroacetylhydriamines) — Phenylethyl- (see Phenylethylamines) — Phosphines, and arsines, production of mixed, 2, 351—Poly- (see Polyamines) — Polycarbonyl- (see Polycarbonylamines) — Primary, action of benzo-trichloride on, 42, 7 — Primary, action on diphenyl-nitrosamine, 36, 52 — Primary, formation, 81, 45, 91, 269 — Primary, preparing, 75, 131 — Primary, thiosulpho-carbamic ether derivatives of, 85, 300—Primary, secondary, and tertiary determination of components of mixture of, 74, 97—Primary, secondary and tertiary, estimation, 99, 142—Primary, secondary and tertiary, differentiation, 90, 31 — Primary, secondary and tertiary, synthesis, 91, 123—Primary and tertiary, iodides of mercur-ammonium of, 89, 34—Propyl- (see Propylamines) — Rhod- (see Rhodamines) — Salicylidene- (see Salicylideneamines) — Secondary, action of nitrosobenzene on, 99, 118—Secondary, sulphocarbonyl compounds of, action of halogenated ethers on, 85, 184 — Sewage process, 60, 157, 184, 106, 207, 221, 233, 245, 257 — Sulphochloroalkyl- (see Sulphochloro-

Alykamines — Synthesis of cyclohexylamine and two other, 89, 155—Synthesis of new, 92, 70—Tertiary, and magnesium alkylhalides, stability of compounds derived from, 99, 233 — Tertiary, separation from secondary and primary, 99, 234—Tertiary, synthesis of, 95, 132 — Tetrahydronaphthyl- (*see* Tetrahydronaphthalenes) — Thiosin- (*see* Thioisaminines) — Toluylen-di- (*see* Tolulylen diamines) — Tolyphenyl- (*see* Tolyphenylamines) — Transformation of phenols and alcohols into, 45, 237—Triethylox- (*see* Triethylloxamines) — Vanadates of, 50, 233

Amino acids (*see* Acids)

Amino acids (*see* Acids) — Diazohydroxyl- (*see* Diazohydroxylamino)—Nitroso-acetyl- (*see* Nitrosoacetylamino)—Ortho-di- (*see* Ortho-diamino)—Trixylyl- (*see* Trixylylamino)

Aminoacetophenone derivatives, 87, 125

Amino-alcohols of tertiary alcoholic function, 89, 203—Polyvalent, action of carbon disulphide on, 86, 47—With primary alcoholic function, preparing, 96, 83

Aminooaldehydes, 80, 24

Amino-alkyl esters, relation between chemical constitution and physiological action in, 98, 254

Amino-amidines, of naphthalene series, 82, 239; 88, 252

Amino-antraquinone, solid azo-dyes from, 88, 270

Aminoazobenzene, dibromo- (*see* Dibromo-amino-aminoazobenzene)

Aminoazo-compounds and diazoamines, influence of substitution on formation, 91, 276, 277; 94, 9; 95, 90—Direct production, 91, 5—Formation, influence of substitution on, 84, 297; 86, 253 — Transformation of diazo-amido-compounds into, 86, 46

Aminobenzenaldehyde, dimethyl- (*see* Dimethyl-aminobenzenaldehyde)

Aminobenzene, acetylchlor- (*see* Acetylchloraminobenzene) — Diphenylbisdiazo- (*see* Diphenylbisdiazaminobenzene) — Diphenyldiazo- (*see* Diphenyldiazaminobenzene) — Phenyldiazo- (*see* Phenyldiazaminobenzene)

Aminobenzenes, Acetylbro- (*see* Acetylbro-aminobenzenes) — Acetylchloro- (*see* Acetylchloraminobenzenes) — Chloronitro- (*see* Chloronitroaminobenzenes) — Nitro- (*see* Nitroaminobenzenes)

Amino benzhydryl, tetramethyl-di- (*see* Tetramethyldiaminobenzhydryl)

Aminobenzhydryl methylene, tetramethyl-di- (*see* Tetramethyldiaminobenzhydryl methylene)

Aminobenzophenone, derivatives, 87, 201

Aminobenzylamines, benzenesulphonyl- (*see* benzenesulphonylamino-benzylamines)

Aminobromobenzenes, nitro- (*see* Nitroaminobromobenzenes)

Aminobutenediamide, 68, 74

Aminocaffeine, 87, 152

Aminocampheane, 83, 213

Aminocampheolones, 80, 72

Aminocamporphoxine, derivatives, 85, 163

Aminocarboxylic acids (*see* Acids)

Aminochloropyridines, constitution, 81, 260

Amino-compounds, condensation of oxymethylene camphor with, 89, 82

6-Aminocumarin, 90, 251

Aminodicarboxylic acid (*see* Acid)

Aminodihydroumbelluloneoxime, hydroxyl- (*see* Hydroxylamino-dihydroumbelluloneoxime)

Amino-diphenylenephenylmethane, tetramethyl-di- (*see* Tetramethyldiaminodiphenylenephenylmethane)

Aminofuchsin, diazo- (*see* diazoaminofuchsin)

Amino-groups, acetylation of, 97, 273—Acids as accelerators in, 97, 273—Action of chormethylsulphate on, 98, 11

Aminoheptamethylene, pheno-a- (*see* Pheno-a-aminoheptamethylene)

Aminoketones, acyl- (*see* Acylaminoketones)—Aromatic, intramolecular rearrangement in derivatives of, 89, 117

Amino-magnesian arseniates, 89, 35 — Phosphate (anilino or ureo)-, attempts to make aniline and urea take the form of, 89, 35 — Phosphates, 89, 34

Aminomethylbenzophenones, benzoyl- (*see* Benzoylamino-methylbenzophenones)

Amino-naphthalene-1:3-Di- (*see* 1:3-Diaminonaphthalene)

Aminonaphthalene, β-NH-Ethenyldi- (*see* β-NH-Ethenyldiaminonaphthalene)

Aminonitriles, 89, 59 — Formation of imino-derivatives of pyrrole and isopyrrole from, 100, 240

Amino-phenol, diacylortho- (*see* Diacylorthaminophenol) — 2,3,5-trinitro-4- (*see* 2,3,5-Trinitro-4-aminophenol) — Trinitro-acet- (*see* Trinitroacetaminophenol) — Trinitro-acetyl- (*see* Trinitroacetylaminophenol)

Aminophenylarsenic acid (*see* Acid)

Aminophenyloxanthrol, tetramethyl-di- (*see* Tetramethyldiaminophenyloxanthrol)

Aminopinedicarboxylic acid (*see* Acid)

Aminopropiophenone, propionylpara- (*see* Propionylpara-aminopropiophenone)

Aminopyrruonic acid (*see* Acid)

Amino-rosaniline, diazo- (*see* Diazoaminorosaniline)

Aminosulphonic acids (*see* Acids)

Amino-triphenylarsine oxide, tri- (*see* Triaminotriphenylarsine oxide)

Amino-triphenylcarbinol, di- (*see* Diaminotriphenylcarbinol)

Ammann, H., Action of hydrogen on essential of bitter almonds, 23, 228

Ammeter, Duddell twisted strip, 92, 264—Hot-wire, for measuring very small alternating currents, 89, 178

Amni Vsnaga, active principle of, 40, 156

Ammies, metallic, 50, 250

Ammon, G., Permeability of soil for air, 44, 48

Ammonaldehyde, compounds derived from, 34, 144

Ammonia, 63, 120; 93, 66—Absorption, apparatus for, 32, 40 — Absorption by acid solution, 58, 6—Absorption by saline solutions, 28, 313—Absorption spectra, 81, 81—Acetyl derivatives of, 22, 312—Acids or hot-water washing bottle for, 65, 179—Action, 62, 258; 63, 310; 85, 300—Action of air on, 13, 51 — Action of carbon monoxide on, 91, 196 — Action of chloride on ethyl on, 1, 170—Action of mercury on solution of sodium in, 41, 133—Action of monobromated diphenylmethan on, 42, 283 — Action of nitrogen peroxide on, 93, 178—Action of phosgene on, 40, 238 — Action of sulphur on, 55, 80—Action on acet-acetic ether, 38, 210 — Action on acetone, 29, 230; 31, 109 — Action on alizarin, 35, 198—Action on anthrapurpurin, 37, 110—Action on benzil, 50, 232; 53, 259—Action on benzyl chloride, 84, 242—Action on boron bromide and phosphorus chloride, 90, 118—Action on brom-acetylurea, 28, 196—Action on carbon at red heat, 11, 255—Action on chlor-acetyl benzol, 34, 270 — Action on chlorides, 4, 135 — Action on chlorides of thionyl and selenium, 22, 226—Action on chloroform, 53, 155—Action on chlorophosphamide, 97, 310—Action on chloropropionic, and iodopropionic acid, 22, 287—Action on chromyl dichloride, 53, 165 — Action on copper, 5, 41, 113—Action on copper oxide, 46, 103—Action on diazobenzene picrate, 93, 65—Action

on dihydroxyhydrin, 28, 83—Action on dithioacetic acid, 78, 35—Action on ethereal salts of organic acids, 79, 55 — Action on ethylesters of olefine dicarboxylic and olefine-β-ketocarboxylic acids, 87, 115, 247—Action on ethylene oxide of cyclohexanediol, 88, 107—Action on fats at a high temperature, 45, 172—Action on ferrous chloride and bromide, 82, 245—Action on glyceride aryl ethers, 100, 254—Action on gun-cotton, 9, 286—Action on isatin, 35, 142; 36, 223; 37, 93; 38, 244, 44, 144—Action on isobutylene chloride, 44, 13—Action on lecithine, 21, 298—Action on metallic magnesium, 58, 297—Action on metals, 92, 35 — Action on metals at high temperatures, 84, 264—Action on nitranissic acid and Griess's phenyldiamine, 28, 94 — Action on phenyl and cresyl-chlor-acetamide, 29, 212—Action on phosphorus, 19, 191; 24, 241; 98, 11 — Action on potassium or sodium paratungstates, 74, 84 — Action on pyruvic acid, 35, 124—Action on quinones, 40, 169, 301 — Action on rosaniline, 33, 60—Action on solid hydrides, 100, 208—Action on solution of potassium salts, 52, 48—Action on tellurium bichloride, 75, 47—Action on tungsten compounds, 58, 289—Alcoholic, action of calcium on, 89, 263 — Alcoholic, action on bromised derivatives of methyl-*p*-chlorophenylketone and methyl-*p*-bromophenylketone, 85, 240 — Alcoholic, action on oxalate of methyl, 35, 116 — Aldehyde (*see* Aldehyde ammonia)—Aldol (*see* Aldol ammonia)—Alkaloids produced by action on glucose, 52, 47—Analysis of drinking water for, 50, 182—And alkaline hydroxides, relative strengths of, as measured by their action on cotinine, 89, 17—And amines, separation by means of boiling absolute alcohol, 98, 23 — And ammonium nitrate, equilibrium between, 77, 189 —And boracic acid, behaviour, 20, 166—And carbon monoxide, dissociation temperature, 98, 197—And chlorine, reactions between, 85, 14—And chromate of oxide of zinc, 20, 166—And coal-tar, 56, 37—And cyanide of silver, combinations, 20, 60 — And extracts of plants, applicability of Schlosing's method of determining, 50, 57—And hydracids, compounds, 40, 156 — And hydrochloric-acid, combinations, 39, 162 — And its derivatives, action on ketones in presence of dehydrating bodies, 28, 20—And its salts, influence on precipitation of metals, 4, 150—And Lblanco soda, 41, 102—And magnesium salts, reactions between, 54, 273 — And metallic permanganates, combinations, 54, 108; 62, 49 — And monomethylamine, separation, 95, 155 — And Nessler's reagent, behaviour of carbonic acid with, 42, 259 — And nickel, double chromate of protoxide of, 22, 287—And nitrate

49, 82—And strontia, manufacture of soda by use of, 21, 36—And sulphate of zinc, compounds, 20, 166 — And sulphocyanide of silver, combinations, 20, 60 — And sulphury chloride, reaction between, 100, 304 — And tar, 50, 93 — And trimethylamine, separation, 74, 116 — Anhydrous, 47, 107, 179 — Anhydrous liquid, solvent power of, 22, 217 — Artificial colouration of a cinchona by, 47, 117 — As a reagent for double ketones, 53, 119 — Assimilation by yeast, 25, 275 — Atmospheric, 61, 168 — Atmospheric, absorption of, 61, 157 — Atmospheric, and vegetable soils, reactions between, 61, 181, 191—Avidity, determination, 85, 60 — Bases, estimation of typical hydrogen in, 24, 145—Bases, hydro-sulphates of, 40, 10 — Benzaldehyde (see Benzaldehyde ammonia) — Chloral (see Chloral ammonia) — Coal-gas as a possible source of contaminating substances to be tested for, 17, 161 — Collecting from waste gases arising from combustion of coal, 5, 124—Collector for distillation of, from water, 78, 89—Combustion of oxygen in, 38, 227; 58, 27 — Commercial, pyridins in, 48, 226 — Composition, apparatus for determination, 77, 203 — Compounds with chloride, bromide, and iodide of gold, 94, 107 — Concentrated, action on mercurdiammonium iodide, 81, 105 — Condensation, apparatus for, 30, 170 — Cuprous, 40, 33 — Cyan-derivatives of acetaldehyd and aldehyd, 28, 204 — Decomposition, 11, 90 — Decomposition and synthesis, 90, 182—Decomposition by electrolysis, 54, 16 — Decomposition by heat, 48, 302; 90, 13—Derivatives, number of, 8, 245 — Derivatives of acetone, 30, 275 — Derivatives of benzoin (see Benzoin) — Derivatives of benzol (see Benzol) — Detection, 21, 280, 56, 58; 67, 188; 68, 37; 91, 118 — Detection of Nessler's solution, 69, 220—Determination, 15, 160; 17, 102, 165; 54, 83, 96; 57, 81; 62, 125, 126, 166; 69, 26; 74, 38—Determination by distillation, 47, 109; 52, 49 — Determination of nitric acid as, 39, 34; 45, 174—Determination of nitrous acid as, 45, 174—Determination, quantitative, 91, 10 — Dilute, insolubility of ammonio-magnesium phosphate in, 47, 9, 71—Disengagement of, observed on certain bars of steel, 35, 21—Displacement of, 54, 72 — Distillation in presence of sulphocyanides, 31, 15 — Distribution, 38, 44—Dried, action on carbon dioxide gas, 69, 138—Drying of, 77, 198—Electro-conductivity of, 61, 289 — Electrolysis of coke in, 54, 250 — Emission from vegetable mould, 55, 272—Engine (see Engine) — Estimation, 27, 262; 61, 231; 81, 27, 144—Estimation, apparatus for, 79, 85 — Estimation in its salts, 83, 299; 84, 10, 35, 59—Estimation of nitrous nitrogen in state of, 45, 159, 186 — Eudiometric analysis, 15, 187 — Examination, 67, 216 — Exchanges between natural waters and atmosphere, 33, 33 — Extrication and condensation from gas liquor, 20, 182, 194 — Fixation, 4, 15—Fixed, determination, 50, 192 — Formation, 62, 99—Formation, artificial, 2, 19 — Formation by means of water and atmospheric air, 6, 241—Free, 84, 268 — Free distilled water, preparation, 30, 18 — Free, presence in cast steel, 35, 95—Free water (see Water) — Free, yielded by stagnant waters, estimation, 33, 185—From atmospheric nitrogen, 41, 208, 218, 229, 240, 259 — From hydrogen of water, 41, 155, 195, 272—From mushrooms, 20, 166 — From nitrogen of air, 2, 36; 26, 143—From nitrogen of atmosphere

and hydrogen of water, 41, 155, 195, 272—From polluted sea-water, absorption by *Ulva latissima*, 84, 176 — Gaseous, 61, 97; 63, 97—Gaseous, action on chlorohydrates of fatty amines, 84, 84—Gaseous, experiments with, 65, 185 — Gaseous reactions of, 62, 12—Gaseous, sensitive reagent for, 47, 94—Heat of formation, 40, 288; 43, 12—Heat of formation of metallic chlorides united with, 37, 217—Humate of, 23, 71 — In air, 21, 138; 29, 11; 32, 226; 42, 83—In animal liquids, 51, 95 — In arable soils, 56, 57; 57, 242 — In atmosphere, 27, 104; 31, 84; 45, 288; 64, 309 — In Atmosphere, absorption by plants, 30, 64—In atmospheric precipitations, 38, 288 — In atmospheric waters, 64, 321—In Bolivian nitre, 52, 285 — In contact with oxides, action of oxygen on, 5, 89—In farm-yard manure, losses, 67, 25 — In farm-yard manure, preservation, 52, 12—In filtered water, 37, 9, 19, 30, 38, 79, 93, 111—In fungi, 27, 20 — In gas, 27, 107—In gas-liquor, 50, 68—In gaseous atmosphere, 77, 267 — In glaciers of Alps, 46, 302—In hail, 11, 220—In healthy persons, destiny of, 42, 186—In human organism, 43, 235 — In illuminating gas, 27, 34—In natural waters, estimation, 81, 27—In plants, 41, 241; 44, 37—In potable waters, 46, 247; 50, 279—In rain-water, 47, 105—In raw-acetylene, 80, 115 — In sea-waters, 32, 226—In snow water, 26, 204—In soils, 53, 251, 274, 311; 54, 11, 23—In spa water, usual amount, 27, 6—In tobacco, 74, 185—In vegetable juices and extracts, 48, 118 — In water analysis, 43, 137 — In water, estimation by Nessler's reaction, 94, 107—In waters, 42, 83—In waters, disappearance, 34, 152 — In waters, estimating, 95, 142 — In waters from gas purifiers, titrating, 80, 37—In waters, oxidation, 54, 226, 237—In waters, variation of amount, 71, 225, 237, 249—In zinc powder, 72, 37 — Liquefaction, 45, 161 — Liquefied, action on chromic chloride, 87, 269—Liquid, electric osmosis in, 89, 59 — Liquid, electrode potentials in, 95, 164—Liquid, properties of, 79, 308—Machine, 21, 288; 22, 47 — Manufacture, 8, 95; 9, 31 — Manufacture, disinfection in, 44, 295 — Margarate of, 68, 210—Metal (see Metal-ammonia) — Method, application to analysis of sewage and sewage effluents, 81, 268 — Method, examination of waters by, 31, 233—Nitrification, 60, 184, 317—Nitrogen as, action on crops, 37, 204 — Of commerce, detection of tarry matter in, 31, 250—Or Chili saltpebre, 54, 177 — Order of addition of to organic α -oxides of asymmetric structure, 87, 142 — Oxidation by catalytic action, 87, 60 — Oxidation in waters and soils, 54, 226, 237—Oxidation to compounds of nitrogen and oxygen, 93, 257—Oxy- (see Oxy-ammonia) — Platin- (see Platin-ammonia) — Polyatomic derivatives, 3, 18, 33—Power of certain salts to arrest, 45, 142 — Precipitation of alumina and magnesia by, 22, 4 — Precipitation of manganese hydrate by, 42, 259 — Precipitation of phosphoric acid by, in presence of lime, baryta, magnesia, alumina, and ferrous oxide, 35, 238—Process, 24, 10, 19, 32, 180—Process for milk analysis, 26, 28—Process of water analysis, 24, 203, 26, 171; 47, 19; 49, 65 — Production, 11, 83; 29, 91—Production from air and water under sole influence of porosity of arable soil, 11, 26 — Production from atmospheric nitrogen by peat, 98, 163 — Production from nitrogen of minerals, 47, 221—Products of action of

sulphur dioxide on, 81, 236—Quantity of nitric acid in atmospheric precipitations of, 38, 288—Rate of escape from aqueous solution, 77, 79 — Reaction between mercuric cyanide and silver nitrate in presence of, 48, 161—Reaction of phenol on, 21, 250—Reaction on brass, 40, 236, 266 — Reduction of nitric acid to, 61, 253—Salts, keeping, 41, 185—Salts, manufacture, 8, 95; 37, 154—Salts of cobalt (see Cobalt)—Salts, reaction of, 71, 80—Solid, and liquid, heat of solution at about 758, 85, 179 — Solid, latent heat of fusion, 85, 179 — Solubility in water, 76, 305—Solubility of amorphous silica in, 17, 165 — Solubility of silicic acid in, 17, 227 — Solubility of silver iodide in, 98, 46—Solution, aqueous, vapour pressure of, 83, 139; 88, 252—Solution, oxidising action, 71, 73—Solution, preparation in water, 6, 250—Solution, aqueous, 88, 318—Solutions, aqueous, influence of salts and other substances on vapour pressure of, 85, 21—Specific gravity, 4, 150 — Spectrum by reversion of induction spark, 52, 276—Spectrum, on reversing induced current, 52, 58 — Synthesis, 43, 288; 97, 119—Synthesis by means of peat, 99, 48—Synthesis direct, 91, 283—Synthesis from its elements by catalysis, 96, 304—Synthetic formation, 86, 222—Synthetic production, 43, 42—Tarry matters in, 39, 173—Tarry matters in, detection, 31, 250 — Tension of dissociation of carbamate, 24, 217—Test, 13, 216 — Test for drinking waters, 28, 93—Test, Nessler's, 17, 246—Test of cocaineum hydrochloricum, 77, 183—Thermic equivalent of dissociation of vapourisation, and heat of solidification, 85, 191 — Thermo-conductive power of, 35, 194 — Thiosulphocarbamic ethers from, 87, 312 — Transformation of protoxide of nitrogen into, 11, 116 — Trisulphocarbonate and sulphocarbamate of, action on aldehydes and acetone, 28, 205 — True ionisation and hydration constants of, 95, 284 — Use in looking-glass amalgam-covering works, 27, 153 — Use in reactivation of bone-black in sugar refineries, 25, 34—Use of gypsum for recovery of as a by-product in coke making, 93, 259—Volcanic, source of, 12, 171—Volumetric composition, 98, 318—Water-liquid, study of the system, 100, 12 — Ammonia acetate, preparation, 33, 65; 36, 102 — Ammonia aldehyd and chloral, 35, 84 — Ammonia aldehydate, 77, 71 — Ammonia aldol, bases from, 29, 251, 288 — Ammonia benzoate, 3, 259 — Ammonia bicarbonate, 5, 325; 7, 79 — Action on salts of magnesia, 5, 235 — In illuminating gas, 21, 192 — Solubility and dissociation, 32, 9 — Ammonia bichromate, 18, 250 — Ammonia carbonate, 49, 203, 214—Conversion into urea, 17, 152; 75, 275 — Manufacture, 12, 303 — Ammonia chloral and ammonia aldehyd, 35, 84 — Ammonia chloride, action on bromo-, chloro-, and iodo-naphthalenes, 53, 275 — Alcoholic derivatives, 63, 200 — Ammonia chlorothallate as a reagent, 12, 100 — Ammonia chromium bases, 21, 235 — Ammonia crenate and urea in spring waters, 37, 233 — Ammonia fluosilicate, preparation, 36, 90 — Ammonia gas, action, 66, 223; 68, 229 — Action of boron chloride on, 87, 23 — Action on arsenic trichloride, tribromide, and tri-iodide, 90, 70 — Action on anhydrous neodymium chloride, 93, 269—Action on calcium hydrogen orthophosphates, 98, 21—

- Action on tri-bromide and tri-iodide of phosphorus, **93**, 44 — And aluminium chloride, compounds, **83**, 82 — And lithium phosphide, compounds of, **81**, 299 — And samarium chloride, compounds, **91**, 83 — Changes of colour of flowers in, **22**, 239 — Density, **92**, 57—Evolution from mushrooms, **20**, 106—Explosion caused by, **20**, 117
- Ammonia gunpowder, **21**, 95
- Ammonia hydrate, **50**, 128
- Ammonia hydriodate, **3**, 333
- Ammonia hydrochlorate, purification, **53**, 276
- Ammonia hydrocyanide, base isomeric with, **21**, 101
- Ammonia hydrosulphates, basic, **40**, 10
- Ammonia hydroxides and alkaline hydroxides, relative strengths as measured by their action on cotarnine, **89**, 17
- Ammonia iodomercurate, action of water on, **80**, 23
- Ammonia iron-alum (*see* Alum)
- Ammonia-magnesia phosphate (*see* Phosphate)
- Ammonia margarate, **68**, 210
- Ammonia molybdate, **1**, 71; **27**, 83 — Determination of phosphorus and arsenic by, **35**, 115 — Estimation of phosphoric acid by, **1**, 264—Estimation of phosphorus in iron and iron ores by, **2**, 227—For precipitating phosphoric acid, **23**, 143—Test for sulphur, **3**, 102, 204
- Ammonia muriate manufacture, **9**, 32
- Ammonia nitrate, **21**, 275—Action of ammoniacal gas on, **27**, 204—Ammoniated, chemical properties, **28**, 278 —Decomposition, **22**, 168 — Decomposition, pyrogenous, **33**, 210 — Formation in respiration, **25**, 118 — Union with ammonia, **27**, 37
- Ammonia nitrite, **23**, 203
- Ammonia oxalate, carbohic and alcoholic fermentation, **22**, 34 — Effects on precipitation of Prussian blue, **3**, 95 — Transformation, **36**, 90
- Ammonia persulphate, oxidising action on direct principles of animal organism, **83**, 40
- Ammonia phenate, coloured reactions in connection with erythrophenic acid, **29**, 113
- Ammonia phosphate, **21**, 264, 276
- Ammonia phosphates of the British Pharmacopoeia, **11**, 115
- Ammonia phospho-molybdate, **4**, 75
- Ammonia soda, and production of ammonia in coke burning, **39**, 229 — Process, **29**, 91; **30**, 83; **31**, 95; **51**, 201; **53**, 109; **61**, 169; **64**, 4—Use in ultramarine manufacture, **40**, 89
- Ammonia sulphate, **20**, 156, 168; **21**, 180, 102; **29**, 71, 91; **32**, 216; **55**, 106; **78**, 84; **80**, 10; **98**, 172—Determination of water in, **72**, 6—Failure in manuring experiments, **53**, 182, 223—For manure, **8**, 240—From gas liquor, **23**, 180, 101—Manufacture, **11**, 166; **25**, 309; **32**, 224, 238; **38**, 265 — Manufacture from nitrogenous refuse, **27**, 242; **28**, 9—Mineralising action, **66**, 121—Preparation, **11**, 150 — Purification of brown, **32**, 197 — Solubility in water, **3**, 175
- Ammonia sulphite, and nitrobenzene, reaction of, **33**, 65—Reaction on nitrobenzol, **36**, 102—Solubility of iodine in, **6**, 170
- Ammonia valerianate, preparation in dry crystals, **2**, 316
- Ammonias, aldehyd (*see* Aldehyd)—Compound, action on sulphocyanates of acid radicals, **33**, 181—Compound, history of, **2**, 160—Compound, new class, **15**, 19, 120—Compound, oxygenated, **49**, 46—Metallic, of metallamines, **23**, 131
- Ammoniac gum (*see* Gum)—Gum resin (*see* Resin)
- Ammoniacal alum (*see* Alum) — Aluminium chlorides (*see* Aluminium chlorides) — Arsenate of cobalt (*see* Cobalt arsenate) — Arsenate of nickel (*see* Nickel arsenate)—Chlorides (*see* Chlorides) — Citrates (*see* Citrates) — Compounds, dissociation of, **21**, 119 — Compounds, oxidation, **77**, 71—Copper (*see* Copper)—Copper solutions, nature of, **94**, 229; **99**, 106 — Derivatives of fructose (*see* Fructose) — Ferment (*see* Ferment)—Fermentation (*see* Fermentation)—Fumes (*see* Fumes)—Gas (*see* Gas)—Iridodisulphates (*see* Iridodisulphates)—Liquor (*see* Liquor)—Liquors (*see* Liquors)—Manures (*see* Manures)—Mercury (*see* Mercury)—Nitrogen (*see* Nitrogen)—Platinum (*see* Platinum)—Salts (*see* Salts)—Soda (*see* Soda)—Solutions (*see* Solutions)
- Ammoniac-magnesian phosphates, **31**, 240
- Ammoniated bases, action of heat on, **43**, 247
- Ammonio citrate (*see* Citrate)—Nitrate (*see* Nitrate) — Phosphomolybdate (*see* Phosphomolybdate) — Sulphate (*see* Sulphate) — Sulphide (*see* Sulphide) — Sulphydrate (*see* Sulphydrate)
- Ammonio-nitrometry, **28**, 141
- Ammonio-cadmium chloride, dimethyl- (*see* Dimethylammoniocadmiumchloride) — Hexa methyl- (*see* Hexamethylammonio-cadmium chloride)
- Ammonio-calcic phosphate (*see* Phosphate)
- Ammonio-chloride of magnesium (*see* Magnesium ammonio-chloride)
- Ammonio-cobaltic combinations, **47**, 117 — Tungstates (*see* Tungstates) — Vanadates (*see* Vanadates)
- Ammonio-earthy phosphates (*see* Phosphates)
- Ammonio-magnesium phosphate (*see* Phosphate)
- Ammonio-phosphate of magnesia (*see* Magnesia ammonio phosphate)
- Ammonio-phosphatic deposit near Cape Town, **47**, 230, 257
- Ammonio salts of aluminium (*see* Aluminium) — Salts of copper (*see* Copper) — Salts of iron (*see* Iron ammonio salts) — Salts of nickel (*see* Nickel) — Salts of silver (*see* Silver)—Of uranium (*see* Uranium)
- Ammonio-silver carbonate, **31**, 231
- Ammonised compounds, constitution, determination, **90**, 269
- Ammonium acid (*see* Acid)—Allyl, preparation, **58**, 221 — Amalgam, **12**, 207; **14**, 122; **21**, 265; **23**, 286; **26**, 210; **84**, 33, 291; **86**, 76; **96**, 60 — Amalgam, constitution, **93**, 246 — And aldehyde combinations, **24**, 195 — And arsenate of calcium, **54**, 168, 194—And calcium and potassium, double ferrocyanides of, **96**, 268 — And dimercureic ammonium, dissociation of double chlorides of, by water, **97**, 132—And double chloride of copper, behaviour with ferrous sulphide, **40**, 150—And iron, compound, **5**, 154—And potassium, double and triple ferrocyanides of magnesium, aluminium and cerium with, **100**, 31 — And sodium salts of fatty acids, **64**, 269 — And the solubility of metals without chemical action, **23**, 160—Benzylphenylallylmethyl- (*see* Benzylphenylallylmethylammonium) — Cesium- (*see* Cesium-ammonium)—Calcium, preparation, **79**, 22—Chloral, constitution, **35**, 264—Chrome, compounds (*see* Chrome ammonium)—Cobalt, chloride of (*see* Cobalt-ammonium chloride) — Cobaltic compound, **36**, 213; **47**, 170 — Cobalto- (*see* Cobalto-ammonium) — Compound of cantharidin, **26**, 95 — Compounds, **42**, 108; **43**, 47; **53**, 283 — Compounds, action of heat on, **62**, 105 — Compounds, combination heats, **49**, 256 — Compounds, constitution, **90**, 39, 52 — Compounds, double dissociation of quaternary, **98**, 48—Com-
- pounds, metallic, **93**, 187 — Compounds of alkalis, action of acetylene on, **79**, 47 — Compounds, optical activity of cyclic, **96**, 26—Compounds, replacement of alkyl radicals by methyl in substituted, **96**, 317 — Derivatives of acid ethers of pyridin and quinoline, **53**, 119—Dimercure- (*see* Dimercureammonium)—In alkali series, **88**, 8—Lithium- (*see* Lithium-ammonium) — Lithium-monomethyl- (*see* Lithium-monomethylammonium) — Mercer- (*see* Mercerammonium) — Organic, preparation and properties, **81**, 106 — Phenylidimethylallyl- (*see* Phenylidimethylallylammonium) — Potassium- (*see* Potassium-ammonium) — Radical, **32**, 152 — Relation to alkali metals, **91**, 276—Silver (*see* Silver ammonium)—Sodium (*see* Sodium ammonium)—Strontium, **91**, 268—Sulph- (*see* Sulph-ammonium) — Tetramyl- (*see* Tetramylammonium) — Rubidium (*see* Rubidium-ammonium) — Salts, **23**, 180 — Salts, action of hypobromite on, **37**, 270 — Salts and constituents of soil, interaction, **95**, 117—Salts and hypochlorites, interaction, **61**, 117—Salts and metals, reactions between, **90**, 142 — Salts, apparatus for dissociation, **43**, 66 — Salts, compounds of salts of the dichloro-chromium base with, **96**, 221—Salts, di-mercuri- (*see* Dimercure-ammonium salts) — Salts, hydrolysis of, **91**, 4; **94**, 59—Salts, luminous phenomena produced by action on fusing potassium nitrate, **79**, 263 — Salts of tartaric and citric acids, lead-free, **77**, 119—Trimethyl- (*see* Trimethylammonium) — Trimethylglycer- (*see* Trimethylglycerammonium)
- Ammonium acetate method, determination of iron oxide and alumina in phosphate rock by, **74**, 112
- Ammonium amidosulphite, preparation of sulphamide from, **85**, 163
- Ammonium aldehyde, **35**, 264; **77**, 23 —Action of hydrocyanic acid on, **89**, 22
- Ammonium amidosulphite, **81**, 102
- Ammonium antimonous halides, complex, **91**, 291
- Ammonium-barium, **86**, 269 — Action of gases on, **89**, 13
- Ammonium bicarbonate, decomposition by water, **54**, 250—In coal gas at Munich, **21**, 227 — Tension of dry, **64**, 237
- Ammonium bihydro-sulphate, **47**, 34
- Ammonium bisulph-hydrate, **45**, 174 — Vapour, **43**, 233
- Ammonium bromide, **82**, 298—And atomic weight of nitrogen, **83**, 241 — Dimercure- (*see* Dimercure-ammonium-bromide) — Tetraethyl- (*see* Tetraethylammonium bromide) — Tetraallyl- (*see* Tetraallylammonium bromide)
- Ammonium-caesium, action of acetylene on, **87**, 311 — Preparation and properties, **87**, 299
- Ammonium-calcium, decomposition by ammonium chloride, **84**, 268 — Preparation, **81**, 106
- Ammonium carbamate, dissociation, **44**, 253 — Dissociation and restoration, **24**, 265 — Limited hydration, **53**, 13 — Solutions, precipitation by calcium chloride, **21**, 247
- Ammonium carbonate, **11**, 144; **41**, 251 — Anhydrous, dissociation, **49**, 10 — Co-existence, in a specimen of guano effervescing with water and of potassium sulphate, **48**, 213
- Ammonium carnallite, iodised, production, **81**, 213
- Ammonium chloride, **3**, 96; **47**, 128—Action of potassium nitrate on, **43**, 241—Action on analcite and leucite, **81**, 187 — Action on natrolite, scolecite, prehnite, and pectolite, **82**, 91 — Alcoholic derivatives,

- 63, 200 — Alleged conversion of alkaline sulphates into chlorides by ignition with, 26, 247 — And chloride of mercury, double salts of, 5, 351 — And lead chloride and lead oxychlorides, 47, 128 — And nickel chloride, double, 25, 187 — And oxidising agents, 85, 60 — And silver, determining proportional relation between, 15, 255 — Bluish vapours, 5, 335, 349 — Crystalline form, 61, 181 — Decomposition, 55, 38 — Decomposition of calcium-ammonium and lithium-ammonium by, 84, 208 — Diethyl- (see Diethylammonium chloride) — Dissolved in liquefied ammonia, electrolysis, 84, 250 — Examination, 68, 186 — Molecular constitution, 35, 104, 164 — Preparation of pure, 15, 194, 231 — Solution, standard alteration of, 39, 17 — Substitution derivatives, 61, 73 — Vapour density, 63, 80 — Volatilised by heat, 18, 204
- Ammonium chlorides, mercury (see Mercury) — Dimercur- (see Dimercur ammonium)
- Ammonium chromate, potassio (see Potassio-ammonium chromate) — Slow decomposition by heat, 97, 274
- Ammonium chromates, 65, 223
- Ammonium citrate, behaviour of phosphates with, 45, 66 — Detection of lead in presence of, 46, 184 — Reversion of phosphates soluble in, 41, 173 — Reverted phosphoric acid with, 43, 178
- Ammonium cyanate, solid, 77, 209; 80, 277 — Transformation into ureas, 72, 46
- Ammonium cyanates, alkyl- (see Alkyl ammonium)
- Ammonium cyanohydrate, 45, 174
- Ammonium cyanide and copper cyanide, double, 65, 38 — Formation, 75, 215 — Synthesis, 53, 180
- Ammonium dichromate, decomposition by heat, 97, 92, 274
- Ammonium dithio-carbamate, use in analysis, 59, 76
- Ammonium ferrocyanide, tetramethyl- (see Tetramethylammonium ferrocyanide)
- Ammonium fluochromate, effect of heat on, 52, 15
- Ammonium fluoride and fluoride of silver, compound, 83, 45 — As a blow-pipe reagent, 49, 253 — Purification, 48, 274
- Ammonium fluo-silicate, 26, 90; 51, 166
- Ammonium formate, action of silvered zinc foil on, 36, 168
- Ammonium glyoxal-bisulphite, composition, 51, 165
- Ammonium hydrate, 95, 133 — Action on halogen salts of lead, 52, 43 — Non-existence of, 49, 224; 50, 128, 260
- Ammonium hydrochlorate, action of lead oxide on, 53, 311 — Behaviour of compounds of tellurium when heated with, 91, 23 — Purification, 53, 276
- Ammonium hydrosulphides, alkyl- (see Alkylammonium)
- Ammonium hydrosulphites, 80, 17
- Ammonium hydroxide solutions, 94, 222 — Tetramethyl- (see Tetramethylammonium hydroxide)
- Ammonium imidosulphite, 81, 260; 84, 6
- Ammonium iodide and copper iodide, double, 55, 295 — Dimercur (see Dimercurammonium iodide) — Mercury di- (see Mercurdian ammonium iodide) — Mercury di- (see Mercury diammonium iodide) — Monomercur- (see Monomercurammonium iodide) — Preparation, 9, 169 — Triethyl-benzyl- (see Triethylbenzyl ammonium)
- Ammonium iodides, 64, 250 — Mercury (see Mercurdian ammonium iodide) — Periodic decomposition, 50, 187 — Tetraalkyl- (see Tetraalkylammonium iodides) — Tetramethyl- (see Tetramethylammonium iodides)
- Ammonium iodomercurate, dissociation by water, 80, 315
- Ammonium isothionate, changes in at elevated temperatures, 40, 301
- Ammonium lithium, action on antimony, 85, 107 — Decomposition by ammonium chloride, 84, 208 — Preparation, 81, 106 — Monomethyl- (see Lithium-monomethyl-ammonium)
- Ammonium magnesium phosphate, 54, 297 — Of analysis, constitution, 79, 233, 244, 255 — Sulphate and selenate, 91, 276
- Ammonium malate, acid, racemisation of, 78, 304
- Ammonium metal, action on sulphuretted hydrogen, 84, 279 — Combinations of, 10, 85
- Ammonium metals, action of acetylene on, 81, 106 — Action of carbonic anhydride on, 89, 179 — Action on alcohols, 91, 280 — Action on halogen derivatives of methane, 91, 280 — Action on polyatomic alcohols, 91, 293 — Use in organic chemistry, 91, 224, 269
- Ammonium molybdate, 93, 265 — As reagent for stannous chloride, 80, 282 — Solution, modified, 74, 35
- Ammonium nitrate, 38, 267 — Action of cadmium on, 52, 47 — Action of manganese dioxide on, 35, 118 — And ammonia, equilibrium between, 77, 189 — Anhydrous ammoniacal, action on metals, 52, 58 — Explosives, nitrate of potash in, 80, 11 — Formation, 39, 150 — Rate of decomposition, 47, 303 — Tetramethyl- (see Tetramethylammonium nitrate) — Thermal phenomena attending solution, in water, 35, 9 — Transformation of melted, 62, 153
- Ammonium nitrite, 40, 70; 41, 252 — Decomposition, 87, 268 — Decomposition and sublimation, 99, 114 — Decomposition, speed of, 87, 96 — Dimercur- (see Dimercurammonium nitrite) — Formation, 37, 174 — Preparation, 70, 209
- Ammonium oxalate, acid, composition, 22, 14 — Acid, influence on solubility of the neutral oxalate, 53, 113, 252 — Carrying down by oxalates of rare earths, 95, 63, 74 — Solubility in water, 22, 244
- Ammonium paratartrate crystallisation, 53, 142
- Ammonium perchlorates, isomorphism of thallium perchlorate with, 14, 217, 242
- Ammonium perhalides, 99, 296
- Ammonium peroxide, 77, 165
- Ammonium persulphate, action on metallic oxides, 88, 83 — And sodium peroxide, reaction between, 98, 107 — As substitute for lead peroxide in colorimetric estimation of manganese, 84, 239 — Oxidation of aromatic nitro and nitroso-compounds by, 99, 288
- Ammonium phosphate and corrosive sublimate, interaction, 78, 174 — Of magnesium (see Magnesium ammonium phosphate)
- Ammonium phosphates, double, in analysis, 87, 74 — Of beryllium, zinc, and cadmium in analysis, 80, 305 — Of cadmium (see Cadmium)
- Ammonium phosphites, 56, 259
- Ammonium phosphomolybdate, variations in composition of, 97, 263
- Ammonium polysulphides, 42, 60; 68, 27
- Ammonium selenate, action of heat on, 38, 133 — And the question of isomorphism in the alkali series, 93, 288
- Ammonium selenide, 78, 51
- Ammonium selenite, 63, 291 — Ethyl (see Ethyl-ammonium selenite)
- Ammonium sodium tungstates, acid, 72, 12
- Ammonium sulphate, 27, 170; 48, 275; 66, 258 — Conductivity in mixtures of sulphuric acid and water, 93, 280
- Crystallised, 88, 8 — Decomposition by hot sulphuric acid in presence of platinum, 93, 120 — Determination of sulphocyanogen in, 74, 317 — Manufacture, 32, 192, 224, 238, 258, 269, 281 — Mineralising action, 66, 121
- Ammonium sulphates, acid, 36, 95 — Calcium (see Calcium)
- Ammonium sulphide, 14, 272 — Action on nitrated aromatic nitramines and nitrosamines, 80, 45 — And chloral hydrate, reaction of, 25, 37 — And double pyrophosphate, behaviour, 47, 188 — Dissociation, 39, 289 — Estimation of oxide of uranium by, 14, 48 — Formation of metallic sulphide by, 29, 176 — Group, separation of heavy metals of, 40, 273; 43, 153 — Influence in preventing action of various solutions on copper, 35, 82 — Influence of ammonia and its salts on precipitation of certain metals by, 4, 150 — Non precipitation by manganous by, 19, 137 — Precipitate, analysis, 60, 272 — Products of action of on strychnine, 18, 232 — With chloral hydrate, 76, 41
- Ammonium sulphides, 68, 97
- Ammonium sulphite, ethyl- (see Ethyl-ammonium sulphite)
- Ammonium sulphites, thiosulphate, and trithionate, products obtained by heating, 81, 102
- Ammonium sulphocyanate, 22, 72
- Ammonium sulphocyanide, 7, 72; 8, 14; 13, 76; 18, 109, 119, 131, 166; 29, 160; 48, 28 — In gas mains, 16, 229 — In volumetric analysis, 37, 77 — Injurious action, 48, 118 — Preparation, 8, 14
- Ammonium sulphocyanogen, 29, 160
- Ammonium sulphohydrate, formation, 94, 36
- Ammonium syngenite, 94, 255; 97, 143
- Ammonium tetra-chromate, 48, 71
- Ammonium thiocyanate, 89, 141 — Dynamic isomerism, 86, 287
- Ammonium thiosulphate, electrolysis, 84, 73 — Products obtained by heating, 81, 102
- Ammonium thiosulphocarbamate, action of halogenated ethers on, 86, 317
- Ammonium trichromate, slow decomposition by heat, 97, 274
- Ammonium tri-iodide, 37, 246
- Ammonium trithionate, products obtained by heating, 81, 102
- Ammonium tungstic acid, 93, 265
- Ammonium vanadates, 29, 62; 56, 47; 36, 29; 53, 225
- Ammonium zinc, sulphate and selenate, 91, 276
- Ammonozincate, potassium (see Potassium ammonozincate)
- Amorphous alumina (see Alumina) — Antimony (see Antimony) — Arsenio (see Arsenio) — Bismuth (see Bismuth) — Bodies, cellular structure of, 87, 58 — Boron (see Boron) — Carbon (see Carbon) — Cellulose (see Cellulose) — Elements (see Elements) — Gold (see Gold) — Mercurous iodide (see Iodide) — Phosphorus (see Phosphorus) — Selenides (see Selenides) — Silica (see Silica) — Silicon (see Silicon) — Sulphur (see Sulphur)
- Amort, E., and A. Partheil, Action of arseniuretted hydrogen on mercuric chloride, 78, 256
- Amos, Arthur, and Arthur Daniel Hall (see Hall, A. D.)
- Amose, cycl- (see Cyclamose)
- Ampelochroic acids (see Acids)
- Ampelopsis hederacea, chemical constituent of leaves of, 25, 202
- Ampelopsis quinquefolia, fruit of, 99, 99
- Ampere and residual magnetism, 40, 142 — Currents of, 40, 94 — Law of, 37, 262 — Neglected experiment, 71, 231
- Ampere's apparatus, 21, 287 — Currents in soft iron, application of pre-existence of, 41, 58
- Amphigene, production, 61, 313 — Reproduction of, 41, 134

- Amphlett, E. G., and H. E. Armstrong, Isomeric change in the naphthalene series, **57**, 8
- Amphoteric electrolytes (*see* Electrolytes)
- Amplitudes, measurements of, **40**, 256
- Amplola, G., and C. Ulpiani, Reducing action of denitrifying bacteria, **82**, 210
- Amputations, large, safety in performing, **16**, 279
- Amsler, E., Protochloride of iron, **4**, 75
- Amsterdam Exhibition of Food and Cookery, **55**, 219 — International Exhibition, **20**, 185
- Amthor, C., Detection of caramel, **51**, 83—Determination of tartar and tartaric acid, **47**, 24—Glycerin in beer, **47**, 73—Ripening of grapes, **48**, 170
- Amthor, C., and F. Musculus, Certain wines of the vintage 1879, **47**, 33
- Amthor, C., and J. Zinc, Analysis of horse fat, **66**, 269
- Amygdalin, **20**, 311; **22**, 83; **26**, 216; **27**, 200—Catalytic racemisation, **86**, 278 — Colour reaction for, **83**, 371 — Hydrolysis by acids, **95**, 138; **100**, 33 — Hydrolysis by emulsin, **95**, 139; **97**, 306; **98**, 35; **99**, 110—In vetch seeds, **23**, 23, 35—**100** (*see* Iso amygdalin)
- Amygdalin, **100**, 230
- Amygdalonic acid (*see* Acid)
- Amyglycol, synthesis by oxygenated water and amylen, **10**, 217
- Amyl derivatives of glyceric, diacetyl glyceric, and dibenzoylglyceric acids, **75**, 128 — Derivatives, piperidine from, **25**, 100—Ethyl (*see* Ethyl) — Report on, **14**, 230
- d-Amyl group, influence of, **99**, 167
- Amyl acetate, **10**, 272—Tertiary, decomposition by heat, **46**, 307
- Amylactic acid (*see* Acid)
- Amyl alcohol, action of light on, **74**, 252—Fermentation, isomery of amylen derived from, **35**, 241—Iso- (*see* Isoamylen) — Of fermentation, action on its sodium derivative, **79**, 143 — Preparation of active, **68**, 136 — Preparation of racemic, **92**, 280
- Amylamine, iso- (*see* Isoamyamine)
- Amylamines, ethyliso- (*see* Ethylisoamyamines) — Iso- (*see* Isoamyamines)
- Amylammonium, tetra- (*see* Tetramyl ammonium)
- Amylchloracrylic ethers (*see* Ethers)
- Amyl chloride, action on calcium carbide, **81**, 226—Preparation, **59**, 313
- Amyl cyanide, compounds, **16**, 255
- Amyldiacetate, cinn- (*see* Cinnamyl diacetate)
- Amyl ether and magnesium methyl iodide, crystalline compound of, **98**, 44
- Amyl formate, action on cyanacetic soda ether, **83**, 226
- Amyl hippurate, **37**, 263
- Amyl iodide, iso- (*see* Isoamyliodide) — Preparation and purification, **60**, 12
- Amyl iodides, **27**, 180
- Amyl isomers, **22**, 230; **23**, 30, 49
- Amyl monochloroacetate, **53**, 252
- Amyl-naphthalin, preparation, **50**, 10
- Amyl nitrate, **16**, 322—Iso- (*see* Isoamyli)
- Amyl nitrite, **16**, 322—Cyanodihydrocarbone and sodium ethoxide, interaction, **95**, 249; **96**, 278—Decompositions, **13**, 281
- Amyloxypropionic acid (*see* Acid)
- Amylpropionic acid (*see* Acid)
- Amyl-pyruvate, **67**, 158—Rotatory power of, **70**, 233
- Amylthiocarbimides, carboxy- (*see* Carboxyamythiocarbimides)
- Amylaceous bodies, and copper oxide combinations, **60**, 209 — Granules (*see* Granules) — Matter, chemical constitution, **19**, 209 — Matter in fruits, **5**, 98—Matter, transformation into glucose and dextrine, **2**, 299—Matters, determination of moisture in, **49**, 136 — Matters, saccharification of, **33**, 18—Substances, action of diastase on, **11**, 209
- α - and β -Amylam, **44**, 258
- Amylamine, active, **43**, 166
- Amylase, **71**, 317
- Amylate of sodium (*see* Sodium amylate)
- Amylen, **24**, 157; **31**, 40—Action of chlorine on, **15**, 3—And nitrogen peroxide, compound, **56**, 206—And oil of turpentine, relation between, **20**, 165—Boiling at 25°, structure of, **36**, 20—Chain structure of, **74**, 252 — Conversion into amylic alcohol by means of sulphuric acid, **26**, 205 — Derivatives, **8**, 133 — Isopropylsuccinic acid derivatives of, **78**, 84 — Preparation, **37**, 122 — Transformation in amylic alcohol by sulphuric acid, **27**, 219
- Amylendisulphuric acid (*see* Acid)
- Amylen nitrite, preparation, **26**, 156
- Amylene oxide, **1**, 279
- Amylens and oxidising agents, behaviour, **35**, 194, 232—And amylic alcohols, **37**, 93 — Isomeric, from the amylic alcohol of fermentation, **38**, 294—Isomery of, **36**, 20—Isomery of, derived from fermentation amylic alcohols, **35**, 241
- Amylic alcohol (*see* Alcohol)—Alcohol of fermentation (*see* Fermentation) — Aldehyde (*see* Aldehyde) — Series, alcohols of (*see* Alcohols) — Series, amine derivatives in, **36**, 51
- Amyliden aniline (*see* Aniline)
- Amylo-cellulose, transformation into starch, **91**, 130
- Amylodextrin, **59**, 295
- Amyloid and albumenoid matters, relations between, **2**, 59—Granules (*see* Granules) — Matter in yolk of egg, **15**, 31
- Amyolytic action, influence of amphoteric electrolytes on, **92**, 300 — And proteolytic action, influence of bile, etc., on, **51**, 256, 266, 279
- Amylose, estimation of dextrose, maltose, and dextrin in, **46**, 175
- Amylum, products of oxidation, **29**, 275
- α -Amyrine, identity of ilicic alcohol with, **98**, 305
- Anabsinthine, **79**, 251; **80**, 60
- Anacardic acid (*see* Acid)
- Anaerobiosis of micro-organisms, **38**, 46
- Anaesthesia, **87**, 275
- Anaesthesia, producing local, **5**, 56
- Anesthetic, new, **13**, 41; **41**, 154—O'd, revived, **16**, 26—Vapours, influence on living tissues, **53**, 311
- Anaesthetics, **12**, 96
- Anaesthetised animal, chloroform in blood of, **48**, 203
- Anagryne, **59**, 36
- Analime, artificial production, **42**, 35; **46**, 67
- Analcite, action of ammonium chloride on, **81**, 187 — Constitution, experiments relative to, **85**, 46, 54, 65, 80
- Analogies, cross, and natural groups, **71**, 39
- Analysator, thermo- (*see* Thermo-analysator)
- Analyses by dry way, carbide of calcium as reducing agent in, **83**, 34—Causes of disagreement in results, **70**, 186—Cheap, **48**, 45—Chemical for Local Government Board, **35**, 105 — Chemical, of fossil bones, **35**, 146—Commercial, **15**, 21, 47, 70, 95; **16**, 86; **29**, 190, 204, 215, 228, 249, 280; **31**, 8; **43**, 35; **46**, 148; **47**, 210; **50**, 32; **53**, 35—Commercial and scientific, **12**, 277 — Commercial, and universities, **100**, 201 — Fertiliser, influence of lime in, **49**, 25—Indirect employment of constant factors in calculation of, **19**, 265—Parish, **14**, 252 — Quantitative, colour comparison for, **37**, 229 — Rosin size (*see* Rosin size analyses) — Silica in **61**, 60—Simplification of calculation of, **58**, 107—Use of microbalance for, **91**, 106 — Volumetric, starch paste in, **58**, 245
- Analysis, agricultural (*see* Agricultural) — And investigations in laboratory of Geological Institute, **24**, 167 —
- And synthesis by blowpipe, **32**, 254; **33**, 2; **34**, 177; **35**, 99—Anhydrous, **50**, 227—Binoxide of lead in, **78**, 328 — Blowpipe, **12**, 240; **34**, 27; **177**; **40**, 232; **41**, 133, 158, 250; **47**, 58; **50**, 56; **59**, 47—Blowpipe, flux for, **18**, 203; **20**, 241—Blowpipe, new work on, **9**, 192 — Blowpipe, plaster-of-Paris method in, **74**, 242, 247, 264, 272; **77**, 15 — Blowpipe, qualitative, **35**, 146 — Blowpipe, use of metallic sodium in, **83**, 217—By electricity, **61**, 37—By electrolysis, **69**, 78—Checks in, **55**, 228—Chemical, **36**, 35, 95, 255, 274; **58**, 285—Chemical, application of hydrogen peroxide in, **47**, 288—Chemical, chart, **86**, 248 — Chemical, combination of wet and dry methods, **64**, 174, 185, 192 — Chemical, determining age of sandstone by, **18**, 133 — Chemical, "Drop" method of, **50**, 6—Chemical, inconvenience from the use of vessels of Bohemian glass in, **31**, 30—Chemical, improvements in, **55**, 308 — Chemical, in case of poisoning by strychnia, **2**, 186—Chemical, introduction of the principle of repetition into, **22**, 190—Chemical, of iron (*see* Iron) — Chemical, principle of repetition in, **72**, 269—Chemical rock, pea for greater completeness in, **69**, 163 — Chemical, separation of minerals for, **37**, 108, 120, 152, 160—Chemical, standardisation of methods, **86**, 177 — Chemical, uniformity of, **51**, 227, 283 — Chromometrical, **12**, 182 — Colorimetric, **27**, 299 — Combustion, **99**, 5—Commercial, **23**, 178, 190; **30**, 106, 107, 216, 294; **31**, 8; **32**, 238; **43**, 35; **47**, 210—Dairy (*see* Dairy) — Decomposition of silicates for, **58**, 310—Electro- (*see* Electro-analysis) — Electro-chemical, rotating electrode for, **93**, 283 — Electrolytic, **69**, 78 — Electrolytic, quantitative, **51**, 220; **56**, 90; **70**, 214, 226, 240 — Electrolytic, use of complex salts in, **90**, 215 — Elementary, **22**, 153 — Elementary, absorption apparatus for, **47**, 84 — Elementary, for estimating carbon, hydrogen, and nitrogen, at a single combustion, **13**, 207, 217 — Elementary, lead chromate in, **57**, 221; **74**, 110—Elementary, of sparingly combustible bodies, **47**, 106 — Elementary organic, **19**, 180 — Elementary organic, by a moist process, **38**, 133 — Elementary organic, founded on analysis of gaseous products, **17**, 2—Employment of fluohydrate of fluoride of potassium in, **10**, 27—Foreign, progress of, **23**, 15 — Gasometric, use of sulphate of hydrazine in, **90**, 247—Gravimetric, sulphocyanides of copper and silver in, **83**, 258 — Harmonic, **71**, 147, 242; **90**, 315—In dry way, reduction agent for, **58**, 207—Liquid diffusion applied to, **4**, 86—Made at departmental chemical laboratory of Mezieres, **26**, 47—Mercuric oxide in, **70**, 192, 204—Micro-chemical, **63**, 294, 303; **64**, 5, 32, 40, 52, 64, 76, 110, 122, 110, 150, 172, 183—Mineral (*see* Mineral)—Minimetric, **11**, 206 — Of a mixture, **57**, 152—Of ancient Roman mortar (*see* Mortar) — Of cobalt (*see* Cobalt)—Of cocoa (*see* Cocoa)—Of coffee (*see* Coffee) — Of copper (*see* Copper)—Of corn (*see* Corn) — Of cresotes (*see* Cresotes) — Of crude materials containing tartaric acid, **60**, 109 — Of dolomite (*see* Dolomite) — Of food (*see* Food)—Of highly dilute solutions (*see* Solutions) — Of lead ores (*see* Lead ores)—Of loss on ignition in water, **59**, 82 — Of organic compounds (*see* Compounds, organic)—Of raw materials and products of siderurg, **60**, 270—Of substances insoluble in water and acids (*see* Substances)—Of wines (*see* Wines)—Official methods of, **59**, 68, 70, 89, 101.

111, 128, 138, 152; 97, 208—Organic, 26, 168; 65, 119; 66, 185; 87, 130—Organic, apparatus for, 69, 130—Organic, general method of immediate, 26, 60—Organic, estimation of hydrogen in, 7, 201—Organic, in stream of oxygen, 14, 85, 97—Organic modification, 60, 74—Organic, oxide of copper for, 1, 23—Organic, use of silica in, 10, 110—Potassium manganate in, 59, 301—Principles and methods applied to silicate rocks, 78, 43, 55, 63, 79, 62, 168, 148, 159, 167—Proximate, cause of error in, 44, 81—Qualitative, application of electrolysis to, 68, 188—Qualitative, based on micro-chemical reactions, 54, 221—Qualitative, by means of microscope, 47, 247—Qualitative chemical, 30, 17—Qualitative, detection of zinc in, 11, 107—Qualitative, determining presence of an oxide, 90, 33—Qualitative, examples in, 9, 142; 23, 280—Qualitative, Eyster's scheme for, 54, 17—Qualitative, for common elements, 95, 89, 99, 113, 124, 136, 148, 157, 170, 188, 201, 211, 220, 243, 257, 269, 279, 294, 303—Qualitative, method in, for determining presence of certain metallic oxides, 91, 110—Qualitative, of mixed gases, 13, 117—Qualitative, rapid method of, 98, 211—Qualitative, sodium, magnesium, and aluminium in, 77, 105—Qualitative, substitution of sulphuretted hydrogen in, 71, 105—Qualitative, system of, 93, 134, 146, 156, 171, 179, 180, 205, 216, 226, 239, 250, 262—Qualitative, system of for common elements, 98, 6, 16, 32, 41, 55, 71, 81, 92, 107, 166, 171, 181, 194, 208, 219, 228, 239, 251, 274, 278, 291, 300, 311—Qualitative, use of diphenylamin and aniline in, 50, 34—Qualitative, use of dry reactions in, 63, 86—Qualitative, without using sulphuretted hydrogen and ammoniac sulphide, 16, 50—Qualitative, 22, 89, 99, 109, 163, 187, 275; 24, 8, 213, 292; 62, 4, 22, 32; 66, 181, 193, 205, 212, 224, 234, 254—Qualitative, accuracy of, 87, 250—Qualitative, applicable to alloys, 11, 129—Qualitative, application of measurement of gases to, 17, 260—Qualitative, by electrolysis, 72, 200—Qualitative chemical, by electrolysis, 53, 209; 72, 200—Qualitative chemical, spectrum photograph in relation to, 49, 128—Qualitative, colour comparator for, 37, 229—Qualitative electrolytic, 51, 220; 56, 90; 70, 214, 226, 240—Qualitative, employment of sand and glass filters in, 17, 210—Qualitative, examples in, 23, 289; 25, 16—Qualitative, fractional distillation as a method of, 85, 233—Qualitative, new work on, 21, 297—Qualitative spectral, 37, 31; 38, 47; 74, 258—Qualitative, use of alkaline solutions of formic aldehyde in, 81, 47—Qualitative spectrum, 39, 124—Sodium peroxide in, 71, 238; 77, 124—Spectroscopic, 64, 202—Spectroscopic, quantitative, 54, 25—Spectrum (see Spectrum analysis)—Standard methods, introduction, 73, 84, 89, 104, 118, 143, 159, 170—Thermometric, 71, 250—Use of term, 57, 140, 160, 170—Versus assaying, 67, 11—Volumetric, 17, 151; 35, 97; 130, 160, 170, 52, 87; 71, 31, 43—Volumetric, ammonium sulphocyanide in, 37, 77—Volumetric, apparatus for observing changes of colour in, 72, 243—Volumetric, burette for, 22, 66—Volumetric, history of, 84, 207—Volumetric, measurement of gases as a branch of, 20, 102—Volumetric, new principle in, 3, 360—Volumetric, normal liquids for, 19, 303

—Volumetric, sources of error in, 23, 13—Volumetric, titanium trichloride in, 92, 248—Volumetric, use of Iceland spar as standard in, 81, 73—With Dennstedt and Heraeus furnaces, 93, 280—Analyst for Cheshire, 34, 174—For City of London, 2, 252—For Sheffield, 27, 207—For Wandsworth, 27, 93—For Warwick, 34, 184—Official scientific, 45, 198—Public, 35, 146; 36, 206; 80, 184—Public, at Hackney, 71, 126—Public, for Islington, 57, 164—Work in Nova Scotia, 29, 9—Analysts' fees, 21, 213; 22, 11—Guide for, 2, 333—In Japan, 40, 87—Laboratory, Sheffield Borough, 74, 138—Meeting of, 30, 73—Public, 27, 258; 28, 95, 216, 219, 238, 262, 275, 287, 289—Public, and medical officers of health, 62, 11—Public, Association of, 30, 194—Public, extension of duties of, 61, 241, 277, 301—Public, salaries of, 34, 20—Public, Society of (see Society)—Testing, 54, 254—Analytical apparatus (see Apparatus)—Chemistry, electric current in, 41, 213—Chemistry, employment of bromine in, 25, 282—Chemistry, new work on, 21, 227—Chemistry, reviews of progress of, 14, 38—Chemists (see Chemists)—Laboratory (see Laboratory)—Methods, 44, 103; 47, 24, 93; 49, 18; 58, 90, 161—Mistake, 6, 117—Notes, 2, 159; 30, 65; 35, 77; 87, 101—Operations, use of organo-magnesium compounds in, 89, 139—Processes, 22, 199, 229—Query, 34, 164—Table, 14, 252—Touts, 61, 195, 313—Weighing, reduction to a vacuum of, 39, 105—Weighings, normal weights for, 68, 258—Work, dignity of, 77, 173, 185, 195—Anastase, crystals, producing artificially, 10, 71—Anatomic elements (see Elements)—Anatomical research, 16, 128—Specimens (see Specimens)—Anatomy, advances in, 23, 104—Anæsthetised animal (see Animal)—Anchor-ring wave-fronts and focal lines, 85, 115—Ancient Egyptian metallurgy (see Metallurgy)—Greeks (see Greeks)—Andor, J., Resorcine as a disinfectant, 43, 235—Anderlini, F., and R. Nasini, Detection of argon, 73, 233—Andersen, N., and L. Pelet-Jolivet (see Pelet-Jolivet, L.)—Andersohn, A., Air in water, 24, 133—Anderson, A., Aluminium bronze, 7, 220—Obtaining nitrogen by decomposition of solution of ammonia by chlorine, 5, 246—Anderson, A., and J. A. McClelland, Temperature of maximum density in water, 71, 74—Anderson, A. G., Manufacture of soap, 26, 263—Removal of sulphur from coal gas, 12, 301—Anderson, Emma Alexander, and John Kerfoot Wood (see Wood, J. K.)—Anderson, Fred A., Oil extraction, 81, 25—Anderson, J., Volcanic vapours of Mount Vesuvius, 26, 309—Anderson, J. B., Glycerin, 45, 12—Manufacture of caustic soda, 31, 160—Anderson, J. W., "The Prospector's Handbook" (review), 52, 316; 72, 20; 76, 48—Anderson, Prof. Barwood, 34, 222—Anderson, M. F., "Phosphates in Nutrition, &c." (review), 38, 18—Anderson, R. J., Apparatus to illustrate crystal forms, 59, 203—Anderson, Thomas, 18, 23—Chemistry of opium, 5, 265—"Elements of Agricultural Chemistry" (review), 3, 341—Growth of cinchona in India, 5, 317—Obituary, 30, 220—Presence of propionic and butyric acids among the products of destructive

distillation of wood, 14, 257—"Proceedings of the Chemical Department of the Highland and Agricultural Society of Scotland for 1865" (review), 13, 274—Products of destructive distillation of resin, 20, 76—Anderson, W., Heat in its mechanical applications, 48, 290—Manufacture of nitrate of potash and soda and application of products of such manufacture in manufacture of soap, 3, 239—Anderson, William Carrick, "The Chemistry of Coke" (review), 79, 225—Formation of magnesia from magnesium carbonate by heat and effect of temperature on properties of the product, 91, 55—Anderson, W. C., and G. Lean, Aluminium-tin alloys, 84, 163—Anderson, W. C., and O. Simmersbach (see Simmersbach, O.)—Anderson, W. R., and J. W. Mellor, Union of hydrogen and chlorine, 85, 103—Anderson's College, Glasgow (see Glasgow)—Reaction, 48, 226—Reaction formation of double salt in, 49, 36—University of Glasgow (see Glasgow)—Andersonian Institution, chemistry chair in, 20, 129, 188—Andes, Mineral treasures of, 1, 137—Andesite, copper in, 96, 245—Andouard, A., Chemical verification of purity of butters, 53, 25—Fluctuations of phosphoric acid in cows' milk, 55, 284—Incompatibility of nitrates and superphosphates, 55, 140—Poisoning by brass wine tap, 51, 275—Turbid root, 13, 123—André, C., Electric conditions of high regions of atmosphere, 68, 289—Formation of fog, 43, 60—André, F., Velocity of sound in water, 21, 142—André, G., Action of ammonia and water on chloroform, 53, 155—Action of certain oxides, 57, 150—Action of lime and calcium carbonate on certain natural earthy substances, 78, 316—Action of sulphurous and hydrosulphuric acids on pyridine, 82, 35—Action of water and ammonia on methylene chloride, 54, 23—Ammoniacal compounds of cadmium chloride, 55, 188—Ammoniacal copper sulphate, 51, 244—Ammoniacal zinc sulphate, 51, 106, 227—Barium oxychloride, 49, 178—Bases derived from piperidine, 78, 196—Basic copper sulphate, 52, 47—Behaviour of pyridine with propionic, acetic, and formic acids during distillation, 77, 45—Bismuthic acid, 65, 11, 119—Certain basic and ammoniacal nitrates, 51, 165—Certain basic compounds, 52, 36—Certain compounds formed by mercuric chlorides, 63, 261—Certain double salts of lead, 47, 270—Combinations of pyridine and of trimethylamine with formic and acetic acids, 77, 249—Compounds of acetamide and metallic chlorides, 53, 60—Constitution of natural earthy substances, 78, 303—Determination of ammonia in the soil, 53, 251, 274—Formation heat of calcium oxychloride, 44, 60—Formation heat of mercury oxybromides, 49, 167—Formation of oxalic acid in vegetation, 53, 253—Furfuryl alcohol, 79, 239—Gaiacyl, 77, 286—Lead and ammonium chlorides and lead oxychlorides, 47, 128—Magnesium oxychlorides, 45, 90—Nitrogenous matters in rain-water, 53, 251—Oxychlorides and analogous metallic compounds, 50, 296—Poisoning by formol, 80, 243—Reactions of mercury ammonium chlorides, 59, 97, 107, 301, 312—Strontium and barium oxychlorides, 44, 106—Thermic study of mercury

Angle measurer and protractor for field sketching and surveying, **27**, 42
 Angles, decimal division of, **22**, 106
 Angle-bar section, least moment of inertia of, **99**, 155

Anglesite and celestine, reproduction, **57**, 263

Ångström, A. J., Rays of solar spectrum, **14**, 203

Ångström, J., and T. R. Thalen, Investigations on the spectra of non metallic bodies, **36**, 111

Ångström, J. A., Spectrum of aurora borealis, **20**, 22

Anhydrazetone-benzil, **55**, 113 — Condensations with a dehydres, **80**, 18 — α - β Dimethyl (see α - β Dimethyl anhydrazetonebenzil) — Derivatives, **91**, 229 — Homologues of, **84**, 19 — Methyl (see Methyl anhydrazetonebenzil) — Methyl homologues of, oxidation products, **87**, 89

Anhydride, acet- (see Acetanhydride) — Acetic, action, **63**, 243; **65**, 239; **67**, 301 — Acetic, action on anilides of bibasic acids, **78**, 279 — Acetic, action on cellulose, starch, etc., **12**, 156 — Acetic, action on dibasic acids, **63**, 243 — Acetic, action on hydrides of salicyl, ethyl salicyl, etc., **16**, 253 — Acetic, and iodine, action of dry hypochlorous gas on mixture of, **18**, 129 — Acetic, preparation, **35**, 113 — Aceto-metantrobenzoic, **61**, 27 — Aceto-silicio, **15**, 160 — And phenol, compound, **46**, 149 — Arsenious, action on glycerin, **49**, 258 — Arsenious, etherification by alcohols and phenol, **94**, 304 — Azeto benzoic, **42**, 166 — Benzoic, preparation, **70**, 294 — Benzoic, transformation by hydrochloric and hydro sulphuric acid gases, **5**, 106 — Boric, and silica, action of aluminium powder on, **96**, 244 — Boric, behaviour of metallic oxide towards fused, **88**, 269 — Bromocamphoric, constitution, **83**, 116 — Bromo-citra-pyrotartaric, formation of allylen at expense of, **36**, 204 — Bromo-trimethylsuccinic, elimination of hydrogen bromide from, **88**, 291 — Camphoric, action, **62**, 297; **70**, 148 — Camphoric action of aluminium chloride on, **74**, 281; **77**, 210; **80**, 316; **81**, 94 — Camphoric, preparing, **93**, 247 — Carbonic, action of, **90**, 57 — Carbonic, action on ammonium metals, **89**, 179 — Carbonic, and ammonia and water, combinations, **22**, 73, 85 — Carbonic, atmospheric, problems connected with, **82**, 149 — Carbonic, carbometer for estimating, **35**, 81 — Carbonic, decomposition by plants, **17**, 34 — Carbonic, density, **76**, 315 — Carbonic, in air, Pettenkofer's method for determining, **74**, 287 — Carbonic, preparing, **56**, 245 — Chlorosulpho- (see Chlorosulpho-anhydride) — Chlorous, **17**, 265 — Chromic, combustion by means of, **58**, 21 — Crotonic acid, **99**, 240 — Dichlorophthalic, products of condensation with diethylaniline, **83**, 84 — Disulphuric, **85**, 175 — Ethyl-oxalic, **82**, 291 — Formation, **20**, 59; **77**, 116 — Formic, action, **57**, 171 — Hydrofluoric, action, **67**, 12 — Hydrofluoric, action of an electric current on, **54**, 36 — Hydrofluoric and water, combination, **70**, 246 — Hypochlorous, action on iodine tri chloride, **54**, 205 — Hyponitric, action, **72**, 98 — Hyponitric, action on organic bodies, **42**, 304 — Iodic, action of heat on, **99**, 35 — Iodic, preparation of pure, **99**, 263 — Isobutyric, action on aromatic aldehydes, **39**, 19 — Lactic acid, **23**, 71 — Molybdic, reduction, **77**, 45 — Nitric, **26**, 193 — Nitrous, **61**, 91 — Nitrous as a vapour, **40**, 45 — Nitrons in gaseous state, **51**, 235 — Nitrons, molecular weight of, **57**, 197 — Nitrons, non-existence of gaseous, **52**, 7; **70**, 187 — Nitrons, synthesis, **91**, 100 — Of arsenic (see Arsenic anhydride)

—Of b-naphthalene glycol (see B-naphthalene glycol) — Or camphoryl oxime (see Camphoryloxime) — Of diphenylanthracene (see Diphenylanthracene) — Of dulcite (see Dulcitol anhydride) — Of mannite (see Mannite) — Of molybdenum (see Molybdenum anhydride) — Of phenyl succinic acid, **94**, 264 — Of phosphorus (see Phosphorus anhydride) — Of sulphuric and nitric acids, mixed, **96**, 106 — Phosphoric, **50**, 79 — Phosphoric, action, **61**, 118, 214; **62**, 105; **67**, 117 — Phosphoric, and benzene, combination, **77**, 123; **80**, 316 — Phosphoric, and phosphorus oxychloride, reaction between, **24**, 264 — Phosphoric, molecular weight of, **73**, 103 — Phosphoric, preparing, **56**, 245 — Phthalic, absorption spectra, **95**, 92 — Phthalic, action on magnesium α -methyl bromide, **90**, 276 — Phthalic, action on diamines, **35**, 262 — Phthalic, action on quinoline bases, **48**, 204, 237 — Phthalic, direct fixation on benzol, **38**, 20 — Selenious, **93**, 166 — Silico-acetic, mixed, **20**, 228 — Sulphuric, **64**, 190; **85**, 175 — Sulphuric, action on proto-, and sesquichloride of carbon, **21**, 262 — Sulphuric, action on pseudo-sulphocyanate of phenyl, **40**, 144 — Sulphuric, analysis, **47**, 60 — Sulphuric, behaviour of tellurium with, **45**, 254 — Sulphuric, compounds, **23**, 142 — Sulphuric, evaporation heat of, **42**, 47 — Sulphuric, formed in roasting iron pyrites, **36**, 242 — Sulphuric, manufacture, **33**, 177; **52**, 256 — Sulphuric, modifications, **21**, 203 — Sulphuric lecture apparatus for making, **57**, 193 — Sulphurous, action on metallic sulphates, **82**, 256 — Sulphurous, and metallic iodides, compounds, **81**, 251 — Sulphurous, and phenol, compounds, **46**, 149 — Sulphurous, density, **90**, 82 — Sulphurous, preparation, **18**, 96; **56**, 245 — Tellurous, **51**, 50 — Tellurous, dimorphism of, **54**, 249 — Trichloroacetic, **35**, 185 — Tungstic, and silica, separating, **98**, 47 — Tungstic, as a colouring matter for glass, **91**, 217 — Tungstic, reduction by zinc, **82**, 95, 225 — Use of word, **11**, 205

Anhydrides, acid as standards in alkali-metry and acidimetry, **100**, 3 — Action of hydrogen peroxide on, **91**, 10, 29, 40 — Action of phosphoric chloride on, **25**, 106 — B-basis acid, reduction, **91**, 47 — Chlor- (see Chlor-anhydrides) — Effect on organo-magnesium bromides, **90**, 276 — In chloroformic solution, action of aluminium chloride on, **85**, 107 — Mixed, non-existence of, **72**, 110 — Mixed, of acyclic and cyclic acids, **80**, 255 — Of acids (see Acids) — Of aliphatic acids (see Acids) — Of bromonitrocumene (see Bromonitrocumeneanhydrides) — Of cyclic and acyclic acids, preparation, **99**, 204 — Of lactic acid (see Acid) — Of mannite (see Mannite) — Of organic acids (see Acids) — Of para-oxobenzoic acid (see Acid) — Of sulphonic acids (see Acids) — Organic, action of phenylhydrazin on, **53**, 131 — Phosphoric, **87**, 154 — Preparation by action of thionyl chloride on salts of organic acids, **100**, 314 — Production, **11**, 88 — Sulphonic acid, **92**, 82

Anhydrite, artificial production, **10**, 207 — Formation, **24**, 168 — Hydration, **84**, 289

Anhydrazetonebenzil, proofs of presence of hydroxyl group in derivatives of, **100**, 241 — And derivatives, isomerides of, **100**, 241

Anhydrosulphates, **88**, 252 — From triamido benzene, **36**, 231

Anhydrosulphate, ferrous, **28**, 324 — Of

ethylamine (see Ethylamine anhydrosulphate)

α - and β -Anhydrotrimethylbrazilone, constitution, **99**, 105

Anhydrous acid (see Acid) — Acids (see Acids) — Alums (see Alums) — Alumina (see Alumina) — Aluminium chloride (see Aluminium chloride) — Ammonia (see Ammonia) — Analysis (see Analysis) — Calcium dioxide (see Calcium dioxide) — Carbonates (see Carbonates) — Chloral (see Chloral) — Chloral hydrate (see Chloral hydrate) — Chloride (see Chloride) — Chlorides (see Chlorides) — Ether (see Ether) — Fluorides (see Fluorides) — Glucose (see Glucose) — Hydrosulphates (see Hydrosulphates) — Lime (see Lime) — Metallic chlorides (see Chlorides, metallic) — Oxides (see Oxides) — Protoxides (see Protoxides) — Salts (see Salts) — Silicate (see Silicate) — Sodium (see Sodium)

Anhydroxycoaltanines, **77**, 201

Anilide, acet- (see Acetanilide) — Benzenesulpho- (see Benzenesulphoanilide) — Benzenesulphon- (see Benzenesulphonanilide) — Benzo-nitr- (see Benzo-nitrilide) — Diacet- (see Diacetanilide) — Diacet- (see Diacetanilide) — Diazobenzene- (see Diazobenzeneanilide) — Dibenz- (see Dibenzobenzeneanilide) — Dibromo-gall- (see Dibromogallianilide) — Dichloracet- (see Dichloracetanilide) — Dipropion- (see Dipropionanilide) — Dipropion- (see Dipropionanilide) — Electroconductivity of, **61**, 289 — Form- (see Formanilide) — Gall- (see Gallianilide) — Hexanitro- (see Hexanitroanilide) — Meta-nitroso-acet- (see Meta-nitrosoacetanilide) — Methyl- (see Methylanilide) — Methylbenzoyl- (see Methylbenzoylanilide) — Nitr- (see Nitrilide) — Nitrobenz- (see Nitrobenzanilide) — Nitro-oxy-sulphobenzid- (see Nitro-oxy-sulphobenzid-anilid) — Of gallic acid (see Acid) — Of glucose (see Glucose anilide) — Of glyceric acid (see Acid) — Paranitroacet- (see Paranitroacetanilide) — Phenacyl-ethyl- (see Phenacyl-ethyl-anilide) — Salicyl- (see Salicylanilide) — Sebacedinitr- (see Sebacedinitranilide) — Thioacet- (see Thioacetanilide) — Thioform- (see Thioformanilide)

Anilidedichloride, paraidoacet- (see Paraidoacetanilide)

Anilides, acyl- (see Acylanilides) — Chloracet- (see Chloracetanilides) — Chlorobromoacet- (see Chlorobromoacetanilides) — Diacyl- (see Diacylanilides) — Nitr- (see Nitrilanilides) — Of bibasic acids (see Acids) — Of carbo-hydrates (see Carbo-hydrates) — Of glucose (see Glucose anilides) — Of glucoses (see Glucoses) — Of normal fatty acids (see Acids) — Of oxybutyric acid (see Acid) — Ortho-substituted, nitrogen chlorides and bromides derived from, **86**, 45 — Preparation, **90**, 21 — Quantitative decomposition, **100**, 32 — Trihalogenacet- (see Trihalogenacetanilides)

Anilidoacetoneitril, **28**, 106

Anilidophenosafranine, phenylated, synthesis of symmetrical, **87**, 35

Anilidoximes, action of hydroxylamines on, **77**, 225

Aniline, **2**, 76; **3**, 346; **35**, 276; **93**, 66

— Acid (see Acid) — Action, **56**, 90; **72**, 98 — Action of caustic potash on, **100**, 219 — Action of chloral, anhydrous and hydrated, on, **33**, 98 — Action of chloride of chloroacetyl on, **27**, 208, 257 — Action of chloride of lime on, **18**, 256 — Action of chloride of sulphur on, **22**, 59; **23**, 142, 275 — Action of *p*-chlorised and *p*-bromised derivatives of bromomethylphenylacetone on, **79**, 227 — Action of chromic acid on, **11**, 262 — Action of halo-

gen sulphur compounds on, 38, 210
 —Action of halogenous substitutes of fatty acids on, 49, 94—Action of induction spark on, 50, 80—Action of monobromacetic acid on, 12, 228
 —Action of nitrogen acid on, 12, 82—Action of oxygen on, 3, 98—Action of phenylhydroxylamine on, 79, 216
 —Action of phosphorus on, 23, 214
 —Action of phosphorus pentachloride on, 76, 42, 54—Action of phosphorus trichloride on, 50, 220 — Action of sodium on, 27, 81—Action of sulphur on, 91, 256—Action on cetic acids, 81, 264—Action on dichlorhydrin, 32, 51—Action on dioxytartaric acid, 78, 279—Action on epichlorhydrine, 58, 72—Action on mannite, 51, 250—Action on ureine, 54, 46—Action on pyromucic acid, 35, 217—Addition to benzaldehyde ester, 71, 252—Alums containing, 38, 1—Amyliden, 40, 11—And derivatives, affinity constants of, 90, 302—And derivatives, nitration, 95, 30 — And diazobenzene, union, 91, 70 — And homologues in coal-tar oils, 29, 284 — And metallic salts, double compounds of, 74, 185—And methylated toluidins, 39, 149 — And naphthylamine homologues, derivatives, 91, 189—And pigment colours, fixing in printing and dyeing, 5, 97 — And rosanilin, alums containing, 38, 1—And sulphates of meta's compounds with, 63, 225—And toluidine, methylation and ethylation of, 48, 95 — And water, experiment to illustrate temperature of equal density of, 99, 144 — Application of voltaic electricity to detection of, 5, 178—Application to photography, 28, 60 — Artificial production, 25, 21 — Attempt to make take the form of amino-magnesian phosphate, 89, 35 — Benzidine. (*see* Benzidine aniline) — Benzylidene, action on ethers of non-saturated oxy-acids, 79, 203 — Benzylidene, additive products of with ethyl acetate and ethyl methyl-acetate, 89, 259 — Benzylidene, isomeric additive products of methyl, ethyl, and propyl benzyl ketone with, 85, 310 — Black dye from, 6, 287, 311 — Brom-dimethyl. (*see* Brom-dimethyl-aniline) — Butylation, 45, 208 — Case, Simpson v. Holliday, 10, 48—China ink, 24, 181 — Chlorination, 70, 267—Chrys. (*see* Chrysaniline) — Colour, cinnamobrown, 28, 325 — Colour factories, iodine in residues of, 18, 5—Coloured derivatives, 2, 195—Coloured reactions, 18, 179 — Colouring matters, 3, 78; 4, 156, 196, 209, 220; 5, 130, 141, 151, 155; 7, 274; 25, 215—Colours, 4, 156, 196, 209, 220; 8, 21; 9, 265; 12, 169; 14, 76, 89, 157; 20, 120, 132, 21, 236; 22, 17, 29, 40, 53, 64, 79, 92, 100, 324; 27, 94; 78, 36—Colours, action of chlorides on, 43, 71—Colours, arsenic-free and arsenic-containing, 21, 179 — Colours, arsenic in production of, 32, 84—Colours, commercial testing of, 16, 62—Colours, dangers of, 53, 144—Colours, determination, 28, 109 — Colours, Congo-red in titration of, 53, 299 — Colours, fixing in printing and dyeing, 5, 97—Colours from protein compounds, 15, 201—Colours, in oil and aquarelle painting, 11, 264 — Colours in red wines, 43, 169, 202, 221 — Colours in spectroscopy, 33, 260 — Colours, injurious effects of impure alcohol on, 21, 35 — Colours, instantaneous apparition of, 21, 143 — Colours, manufacture, 11, 22, 203—Colours on cotton, 16, 22—Colours on cotton, fixation, 52, 106—Colours, preparation, 26, 58, 71 — Colours, printing on calico, 28, 227 — Colours, priority of discovery, 23, 125—Colours, production without arsenic acid, 31, 83; 32, 146—Colours

soluble in benzene, 57, 24 — Colours, spectroscopy in manufacture of, 53, 287 — Commercial, alkaloid in, 18, 52 — Commercial, decomposition, 25, 191—Compound of chromic acid with, 56, 24—Compounds, 59, 97 — Conversion into toluidine, 26, 94 — Cyan. (*see* Cyananiline) — Derivatives, decomposition by passing through heated tubes, 35, 142 — Derivatives, electrolysis, 34, 118 — Derivatives of succinic and phthalic acids, 96, 18 — Derivatives, synthesis of indols from, 36, 41 — Determination, 59, 313; 73, 236 — Diethyl. (*see* Diethyl-aniline) — Dimethyl. (*see* Dimethyl-aniline) — Dinitro. (*see* Dinitro-aniline) — Dinitrodimehyl. (*see* Dinitrodimehyl-aniline) — Dyes, 1, 9; 2, 244; 3, 204; 8, 87; 13, 117; 17, 37; 19, 181; 30, 161; 46, 245—Dyes and colours, 82, 244—Dyes and dye-stuffs other than, 26, 7, 19, 31, 41, 54, 65, 89, 114, 140, 151, 166—Dyes, colouring power, 22, 130—Dyes, estimating value, 25, 34 —Dyes, manufacture, 18, 142—Dyes, patents for, 6, 302, 314—Dyes from, and its analogues, 10, 118—Electroconductivity of, 61, 289—Estimating value, 4, 310 — Ethylation, 48, 95 — Ethylbenzyl. (*see* Ethylbenzyl-aniline) — Ethylene. (*see* Ethylene aniline) — Formation from bromide of benzol, 20, 190 — Formation heat, 57, 181 — Freezing-point, 25, 155—Gris d' (*see* Gris d'aniline)—Halogen-magnesium derivatives of, action of chlor-acetic ethers on, 92, 21 — History of, 3, 259 — Homologues of, 56, 169 — Homologues, hydrogenation, 89, 310 — Hydrazo. (*see* Hydrazo-aniline) — Hydrogenation, 89, 155—In fungi, 6, 194—In presence of toluidine, 17, 94—In quantitative analysis, 50, 34—In soda, 12, 240—In urine, detection, 58, 61—In varnishes, 10, 74 — Inks, 28, 185, 31, 229, 261 — Introduced into blood and stomach, 34, 32 — Leuc. (*see* Leucaniline)—Leuk. (*see* Leucaniline) — Manufacture, 7, 94; 8, 65; 25, 58 — Manufacture, products from, 5, 235 — Marking ink, 17, 178 — Meta-nitro-dimethyl, 53, 228 Metals, spectra of, 6, 304—Metanitr. (*see* Metanitr-aniline) — Meta-sulphonation of, 82, 46 — Methyl. (*see* Methyl-aniline) — Methylation, 48, 95 — Methylation of phenyl group in, 24, 133, 229—Moisture in, 73, 270 — Mono-benzoyl-dimethyl. (*see* Mono-benzoyl-dimethyl-aniline) — Mono-ethyl. (*see* Monoethyl-aniline) — Monomethyl. (*see* Monomethyl-aniline) — Nascent oxygen tests for, 5, 71—Nitr. (*see* Nitraniline) — Nitrobenzal. (*see* Nitrobenzal-aniline) — Nitro-ethyl. (*see* Nitro-ethyl-aniline) — Of arsenic acid, action of heat on formation of, 8, 20—Oenanthal. (*see* Oenanthal-aniline) — Or coal-tar colours, 22, 17, 29, 40, 53, 64, 79, 92, 100, 112, 324 — Orthochloro. (*see* Orthochloro-aniline) — Ortho-nitr. (*see* Ortho-nitr-aniline)—Ortho-nitro. (*see* Orthonitro-aniline) — Orthotoluidine, and paratoluidine, separation, 50, 46 — Oxethen. (*see* Oxethen-aniline) — Oxidation, 16, 62; 87, 119 — Oxidation products, 86, 269 — Para-brom. (*see* Parabrom-aniline) — Para-brom-derivatives, 42, 97 — Paranitro. (*see* Paranitro-aniline) — Paranitro-sodimethyl. (*see* Paranitrosodimethyl-aniline) — Paratolueneazodimethyl. (*see* Paratolueneazodimethyl-aniline) — Persulpho-azo, 21, 275 — Poisoning by, 54, 58 — Polychromatic, formation, 11, 240 — Preparing, 2, 331; 33, 99; 74, 108 — Preparation of colouring matters from, 9, 59 — Purple, 3, 346 — Reaction, 34, 72 — Reaction

with chloride of sulphur, 32, 180—Reagent for, 3, 198 — Red Violet, 27, 322 — Residue, examination, 40, 108 — Ros. (*see* Rosaniline) — Salts, dissociation, 38, 21—Salts, electrolytic colouration, 33, 107 — Salts, testing, 50, 299 — Solubility in a solution of aniline salt, 50, 35 — Solutions, aqueous, action of carbon dioxide on, in presence of nitrites, 89, 59—Specific heat, 70, 231 — Specific heat and heat of volatilisation or fusion, 87, 251 — Sulphuretted, 23, 71 — Synthesis of, 83, 203 — Thio. (*see* Thioaniline) — Transformation into nitrobenzene, 66, 258 — Tribrom. (*see* Tribromaniline)
 Anilineacetate, ethyl benzylidene. (*see* Ethylbenzylidene anilineacetate)
 Aniline arseniate, action of heat on formation, 8, 20
 Aniline black, 9, 289; 11, 65; 13, 51; 19, 108, 132, 276; 21, 275; 30, 43; 31, 99, 120; 33, 33, 254; 34, 174; 38, 142; 40, 3, 47, 56, 190; 53, 203 —Action on wool and other textiles, 39, 137 — Cerium, 39, 150—Conversion into a fluorescent rose colouring matter, 35, 134—Dye from, 6, 287, 311; 7, 11—Dyeing, 34, 251; 39, 137; 64, 297—Dyeing, poisoning by, 22, 191 — Electrolytic, 33, 78; 34, 21—For cotton, 19, 132—For printing yarns, 30, 167—Formation, 34, 184 — Formation by electrolysis of its salts, 32, 168 — Marking ink, 43, 107—On wool and other textiles, 39, 137—Paste oxidised, 24, 181 — Production by means of salts of vanadium, 33, 65, 70, 116, 169 — Reserve for, 44, 93—Resists for, 44, 76—Synthesis, 33, 64 — Use in America, 34, 196 — Vanadium in manufacture of, 34, 92 — Varnish, 17, 299—Which does not turn green, 36, 63; 39, 36—With ferrocyanide of aniline, 31, 173
 Aniline blacks, 27, 131, 257; 30, 157, 296; 39, 270—Dyeing, 34, 251—Dyeing on cotton yarn, 28, 23—Greening, 35, 31—Value of certain chemical agents used in printing, 39, 239
 Aniline blue, 2, 89; 4, 262; 7, 264, 271; 8, 49; 21, 11—For cottons, 30, 156 —On garments, 29, 187 — Sulphoacids of, 25, 287; 26, 72
 Aniline bromide, derivatives from, 20, 201
 Aniline bronze, 36, 63
 Aniline chlorhydrate, action of sulphur on, 91, 256
 Aniline chromates, preparation, 56, 114
 Aniline ferrocyanide with aniline black, 31, 173
 Aniline fluosilicate, 6, 301
 Aniline green, 3, 349; 17, 266, 278, 290; 19, 136; 20, 153, 202—Dyeing on wool, 27, 257 — Preparation, 9, 217; 11, 294
 Aniline greens, 28, 19
 Aniline grey, 19, 154
 Aniline hydrochloride, hydrolysis, 89, 77
 Aniline nitrate, action of heat on, 271
 Aniline orange, 13, 72
 Aniline ortho-sulphates, acid, 69, 312
 Aniline picrate, crystallised film of, 7, 202
 Aniline red, 3, 289; 28, 202; 29, 62—Adulteration of orohil with, 47, 118 — For printing, 8, 42—Formation, 25, 106—Free from arsenic, 21, 35—How to combine fat and oil with, 11, 228—Prepared by arsenic acid, 3, 297 — Production, 7, 207
 Aniline reds, arsenical, 20, 60—Composition, 6, 57
 Aniline sebate and diphenyl sebacamide, 55, 296
 Aniline sulphate, properties, 4, 286 — Test for nitric acid, 19, 104
 Aniline violet, 3, 383; 29, 83 — Conversion of magenta into, 37, 250 — Mordant for, 8, 14

- Aniline violets, pearl grey with, **28, 23**
 Aniline yellow, formation, **9, 265**
 Anilines, alkyl (see Alkyl anilines) — Benzal- (see Benzalanilines) — Bromo- (see Bromoanilines) — Chlor- (see Chloroanilines) — Chloro- (see Chloroanilines) — Dichlor- (see Dichloroanilines) — Halogen (see Halogen anilines) — Isomeric, dibenzylketone benzal-, and deoxybenzoin benzal-anilines, **82, 240** — Leuco- (see Leucoanilines) — Methyl- (see Methylanilines) — Nitr- (see Nitranilines) — Nitro- (see Nitroanilines) — Nitrochlorobromo- (see Nitrochlorobromoanilines) — Replacement of bromine by chlorine in, **83, 274** — Substituted, **35, 276** — Substituted, action of sulphuric acid on, **28, 20** — Substituted, derivatives of highly, **89, 81** — Substituted, reactions of, **82, 315** — Tertiary, preparation of pure, **81, 119** — sym-Trichlorobromo- (see sym-Trichlorobromoanilines) — Trihalogen, nitration, **85, 139**
 2-Anilinoethoxazole, **97, 274**
 Anilindiacetic esters (see Esters)
 Anilindihydrobenzoxazole, **97, 274**
 Animal amides (see Amides) — Anaesthetised, chloroform in blood of, **43, 203** — And microbian toxins, **74, 37** — Black, revivifying, **8, 229** — Body, aromatic products of, **42, 108** — Body, formation of fat in, **52, 109** — Body, urea in, **26, 36** — Cellulose, **25, 107, 40, 264** — Charcoal, **30, 171, 202, 33, 100, 34, 174, 67, 169** — Charcoal, action on salts, **33, 245**; **35, 162**; **39, 135** — Charcoal, analysis of, **27, 104, 111, 225**; **28, 13, 29, 109**; **32, 276** — Charcoal and phosphate of lime, **26, 205** — Charcoal, antidote against phosphorus, **25, 214** — Charcoal, apparatus for re-burning and revivifying, **11, 263** — Charcoal, artificial, **39, 252** — Charcoal, assay of, **10, 186** — Charcoal, decolourising action, **26, 104** — Charcoal, decolourising power of, testing, **19, 167** — Charcoal, decolourising property, **22, 240** — Charcoal, estimation of sulphur and gypsum in, **21, 35** — Charcoal, in sugar refining, **17, 249** — Charcoal, manufacture, **22, 118** — Charcoal, oxidising action, **35, 101, 114, 125** — Charcoal, preparing, **21, 210, 253**; **21, 275**; **29, 62** — Charcoal, strongly-decolourising, **27, 59** — Charcoal, substitute for, **35, 156** — Charcoal, suppression in sugar manufacture, **41, 220** — Charcoal, treating, **40, 100, 48, 76**; **19, 11, 153** — Charcoal, water in, **25, 276** — Chemistry, **12, 30, 30, 52, 65, 76, 89, 101, 112, 121** — Chemistry in daily press, **45, 36** — Chemistry, lectures on, **13, 188** — Economy, alkalies in, **36, 275** — Economy, biological part of iron in, **50, 128** — Electricity, **16, 112** — Fats, extraction of, **24, 145** — Fats, falsification of butter with, **36, 91** — Fatty matters, **10, 53** — Fibre and vegetable fibre, separation, **21, 84** — Fibre and vegetable fibre, method of distinguishing, **57, 12** — Fibre, effect of acids on, **25, 155** — Fluids, biliary constituents in, **67, 254** — Fluids, reaction of, **59, 61** — Fluids, volumetric estimation of potassium in, **100, 12** — Food (see Food) — Gum, **51, 37** — Gum in urine, **53, 24** — Heat, **25, 100**; **28, 313**; **60, 282, 293** — Heat, production, **61, 253** — Kingdom, commensalism in, **22, 120** — Kingdom, relation to inorganic kingdom, **4, 31** — Life, effect of carbon dioxide, etc. on, **69, 159** — Life, influence of manufacturing refuse on, **41, 161** — Life, presence at vast depths in ocean, **3, 263** — Liquids, determination of chlorides in, **52, 118** — Manure concentrated, preparation, **8, 47** — Manure, phosphated and chlorinated, **21, 179** — Manure, phosphated and chlorinated, manufacture and use, **20, 48** — Manures, mode of preparing, **27, 245** — Matter, destruction, **48, 170** — Matter, use of brine for preservation of, **38, 276** — Matters, disinfection, **42, 330** — Matters, improvements in mode of heating, **11, 80** — Matters, preserving, **4, 267**; **9, 81** — Matters, spontaneous fermentations, **45, 276** — Miasma (see Miasma) — Morphography (see Morphography) — Nutrition, action of amido compounds on, **48, 226** — Oil (see Oil) — Oils (see Oils) — Organisation, synthesis of albumenoids in, **38, 90** — Organism, arsenious acid in, **68, 281** — Organism, calcareous matter in, **24, 108** — Organism, dehydration in living, **27, 61** — Organism, origin and destiny of cholesterol in, **99, 245** — Organism, soluble ferment reducing nitrates in, **80, 243** — Organism, urea in, antecedents of, **21, 46** — Organisms, action of turpentine and homologues of phenol on, **34, 270** — Organisms, blue pigment in, **80, 29, 41** — Organisms, cholesterol in, **100, 263** — Organism, intended for human food, examination, **67, 221, 233** — Organisms, new organic base in, **38, 244** — Organisms, oxidising action of persulphate of ammonia on direct principle of, **83, 40** — Origin, rock phosphates of, **67, 240** — Pepsine (see Pepsine) — Pigments, extraction, **39, 136** — Product collection in South Kensington Museum, **1, 245**; **2, 66, 103, 114** — Protein matters, alkaloids from, **45, 207** — Refuse, utilisation, **39, 150** — Salts, action on salts, **39, 135** — Series, arsenic in, **87, 275** — Substances, and vegetable substances, separating, **7, 276** — Substances, preservation, **4, 123**; **8, 61, 133**; **9, 48** — System, action of cacodylic acid on, **40, 10** — System, physiology of carbohydrates in, **49, 128, 140, 155, 162, 172, 183** — System, typography of chemical processes in, **42, 186** — Tannin, **56, 175** — Tar, **42, 186** — Tar, carbons from, **41, 220** — Tar, compounds from, **40, 277** — Tissue, influence of arsenious acid on waste of, **2, 245** — Tissues after death, acid reaction, **42, 164** — Tissues, alcohol in, **42, 186** — Tissues, base currents in, **88, 22** — Urine, gum in, **53, 34** — Versus plant, **51, 105**
 Animals, action of oxygen on, **9, 70** — Arsenic in, **87, 130** — Arsenic in organs of, **81, 135** — Blood of (see Blood) — Congelation of, **12, 203** — Dead of contagious maladies, destruction and utilisation of body of, **48, 38** — Diseases of, prevent on or cure, **14, 154** — Distinction between human blood and that of other animals, **42, 258** — Equivalent substitution of mineral matters in, **34, 134** — Herbivorous, copper in blood of wild, **35, 220** — Influence of fattening on constitution of fats formed in their tissues, **41, 283** — Invertebrate, composition of cartilage in, **51, 42** — Invertebrate, nerve tissues of, **66, 230** — Iron in ash of, **74, 306** — Localisation of normal arsenic in, **87, 312** — Lower organism, chemical conditions of life of, **21, 154** — Lower, poisonous matters produced by, **45, 57** — Manganese in, **50, 24** — Noxious, poisoning, **4, 291** — Physiology of, **94, 61** — Preparation of hides of, **23, 142** — Respiration of, **65, 227, 240** — Slaughtered, use of offal of, for producing soap, **1, 263, 286** — Transformation of fat into carbohydrates in, **73, 280** — Vertebrate, properties and composition of a cellular tissue found in the organism of, **27, 234** — Warm-blooded, and cold-blooded, temperature-limits of nerve activity in, **88, 22** — X-rays upon temperature of, **76, 95** — Zinc in, **35, 182**
 Anion, sulphur (see Sulphur)
 Anisal camphors, crystallographic properties, **87, 47**
 Anis-aldehyde, **20, 165**
 Anisaidenydecanohydrin, condensation products from, **99, 177**
 Aniseed oil (see Oil)
 Anisic acid (see Acid) — Alcohol (see Alcohol) — Aldehyde (see Aldehyde)
 Anisidine, dinitro (see Dinitroanisidine) — dinitro-ortho- (see Dinitro-ortho-anisidine) — Ortho- (see Ortho-anisidine) — Paranitro-ortho (see Paranitro-ortho-anisidine)
 Anisidines, chlor- (see Chloranisidines) — Dinitro- (see Dinitroanisidines)
 Anisols, derivatives, **31, 109**
 Anisol, **69, 184** — Antimonic derivatives, **78, 24** — Chlor- (see Chloranisols) — Effect of light and oxygen on, **100, 68, 81, 94** — Isobutyl- (see Isobutyl-anisol) — Synthesis, **79, 71**
 Anisol camphors, crystallographic properties, **14, 49**
 Anisoles, mono-nitro- (see Mononitroanisoles)
 Anisylacetone, transformation of glycol of anethol into, **90, 35**
 Ankersmit, H. J., and A. Pietet, Phenanthridine, **63, 188**
 Ankum, Dr. von (see von Ankum, Dr.)
 Annabie, H., and G. Young, Benzoyl-phenylsemicarbazide, **76, 280** — Formation of substituted oxytriazoles from phenylsemicarbazide, **16, 44**
 Annaheim, J., New colouring matter derived from cresylol, **35, 59** — Nitro-oxy-sulpho-benzidamide and diamido-oxy-sulpho-benzide, **30, 10** — Oxy-sulpho-benzide derivatives, **23, 83** — Tetranitroxy-sulpho-benzide, **39, 43** — Weight of an atom of hydrogen, **34, 280**
 Annan, J. G., Apparatus for saponification of fats, oils, etc., **70, 51**
 Annatto, **38, 25** — In butter, **55, 308**
 Annealing glass (see Glass)
 Annesling, M., Aseptol, **50, 189**
 Anode, aluminium (see Aluminium) — Copper (see Copper) — Influence of physical nature of, on constitution of electrolytic peroxide of lead, **89, 278** — Iron (see Iron) — X-rays emanate from, **73, 119**
 Anodes, irid-o-platinum, used in electrolysis of alkaline chlorides, resistance of, **89, 138**
 Anodic disturbances in electrolysis of fused salts, **90, 84**
 Anorthite, production, **61, 313**
 Anrep, B., von (see von Anrep, B.)
 Ans, J. D' (see D'Ans, J.)
 Anschütz, A., and R. J. Meyer (see Meyer, R. J.)
 Anschütz, R., Action of acetyl-chloride upon dibasic acids, **35, 105** — Action of acetyl chloride and acetic anhydride on dibasic acids, **30, 243** — Action of ethyl iodide upon silver maleate and fumarate, **39, 42** — Action of phosphorus pentachloride on salicylic acid, **52, 84** — Bromine substitution products of ethane and ethylene, **48, 281** — Constitution of tartarazine, **81, 107** — Formation of anhydrides of monobasic and dibasic acids, **50, 271** — Fumaric and maleic ether, **41, 172** — Preparation of pure chloroform, **69, 121**
 Anschütz, R., and F. Eltzbacher, anthracene, **48, 239**
 Anschütz, R., and P. N. Evans, Antimony perchloride, **50, 1, 16**
 Anschütz, R., and A. Glaser, Modification of Glaser's combustion furnace, **54, 74**
 Anschütz, R., and L. Kinnicutt, Attempt to prepare phenylglyceric acid, **38, 220** — Diphenylketone from anthraquinone, **38, 220**
 Anschütz, R., and J. W. Leather, Pipit-zaholic acid, **55, 105**

- Anschutz, R., and A. Pietet, preparation of tartaric and uric ether, **43**, 280
- Anschutz, R., and G. Schultz, Action of sodium amalgam upon phenanthrenquinone, **35**, 105 — Determining fusing-points, **36**, 242 — Phenanthren, **35**, 39 — Phenanthrenquinone, **39**, 163
- Anschutz, R., and E. F. Smith, "Rich-ter's Organic Chemistry, or Chemistry of the Carbon Compounds" (review), **81**, 105, 284

- Anthracene, **15**, 175; **20**, 119; **21**, 132, 252; **22**, 59, 83, 204, 210; **23**, 143, 156; **24**, 47, 74, 120, 241; **25**, 180, 275; **27**, 168; **28**, 121; **29**, 195; **30**, 180, 203, 213, 216, 222, 235; **43**, 238; **71**, 77 — Acid (see Acid) — Action of chlorochromic acid on, **35**, 145 — Action of nitric acid on, **85**, 167 — And chrysogen, fluorescent relations of, **26**, 199 — And halogens additive compounds derived from, **35**, 104 — Bromine derivatives, **36**, 40 — Chemical constitution, **50**, 104 — Chemical history, **27**, 114 — Chlorination, **28**, 167 — Compounds belonging to chrysogen series, **40**, 32 — Crude, analysis, **31**, 177, 190, 209 — Crude, ascertaining quantity of pure anthracene in, **34**, 167 — Crude, compounds occurring in, **37**, 250 — Crude, determining pure in, **38**, 91 — Crude, substances accompanying, **36**, 80 — Crude, testing, **30**, 190 — Crude, valuation of commercial, **23**, 175 — Derivatives, **22**, 37, 283; **25**, 21, 94; **26**, 106; **27**, 21; **34**, 145 — Determining, **29**, 102; **74**, 50 — Dimethyl- (see Dimethylanthracene) — 2,7-Dimethyl- (see 2,7-Dimethylanthracene) — Diphenyl- (see Diphenylanthracene) — Formation, **29**, 264; **48**, 58 — From coal-tar, **27**, 114 — From water-gas tar, **51**, 44 — Hydrocarbon isomeric with, **28**, 252, 277 — Impurities, determination, **88**, 11 — In coal tar, **34**, 94 — Iodination, **28**, 167 — Iso-dibrom (see Iso-dibromanthracene) — Methyl derivatives, **36**, 213 — Nitro- (see Nitroanthracene) — Oil (see Oil) — Orange, **22**, 166 — Oxidation, electrolytic, **89**, 236 — Pigments, **22**, 59 — Preparation of, **20**, 227; **25**, 165; **28**, 72 — Preparation of anthracene by action of chloride of lime and a metallic salt on, **35**, 155 — Preparation, secondary colouring matter in, **25**, 284 — Production, **34**, 210, 236, 237 — Pure, in crude, **34**, 167; **36**, 91 — Series, colouring matters of, **19**, 237 — Series, fluorescence in, **43**, 258 — Series, synthesis in, **90**, 70; **91**, 105, 118, 304 — Solubility, **86**, 45 — Sulphuric test for, **44**, 227, 239 — Synthesis of, **27**, 46; **28**, 294 — Testing, **34**, 77, 136, 191, 201, 211, 227, 267; **71**, 202 — Tests, **26**, 96; **34**, 279; **35**, 10 — Triphenyl- (see Triphenylanthracene) — Valuation, **29**, 169
- Anthracene blue, **27**, 207; **28**, 46 — Dye from, **37**, 276
- Anthracencarbonic acid (see Acid)
- Anthracene dihydride reactions of the 0.10, **99**, 118 — 2,7,9,10-Tetramethyl- (see 2,7,9,10-Tetramethylanthracene dihydride) — Tetraphenyl- (see Tetraphenylanthracene dihydride)
- Anthracene ketones, **85**, 132
- Anthracene octohydride, **90**, 256 — Oxidation products, **91**, 95
- Anthracensulpho acid (see Acids)
- Anthracene tetrahydride, **90**, 256
- Anthracens, dimethyl- (see Dimethylanthracens) — Use of spectroscope in discriminating, **41**, 52, 95, 117
- Anthracenamine, **27**, 97
- Anthrachinon, **22**, 130 — Behaviour to nascent hydrogen, **22**, 166 — Formation by preparation of benzophenone, **26**, 276 — Nitrogen compounds, **24**, 264; **25**, 22; **27**, 71, 83, 131 — Oxidation by means of hydrate of potash, **25**, 202 — Preparation, **31**, 42
- Anthrachinonsulphuric acid (see Acid)
- Anthracis vaccination (see Vaccination)
- Anthracite assaying, **73**, 178 — Carbon in, **25**, 271 — Peculiarity concerning, **19**, 179
- Anthraflavic acid (see Acid)
- Anthraflavinic acid (see Acid)
- Anthraflavon, **38**, 110 — Acid (see Acid) — And an accessory product of manufacture of artificial alizarin, **34**, 21 — And anthraflavic acid, **38**, 10, 25 — Nitro-derivatives, **35**, 8
- Anthranal-tetramethyldiamide, tetramethyldiamidodiphenyl- (see Tetramethyldiamidodiphenylanthranal-tetramethyldiamide)
- Anthranilate, methyl methyl- (see Methyl methylanthranilate)
- Anthranilic acid (see Acid)
- Anthranol, benzylidene derivatives of, **92**, 302 — Condensations with, **94**, 83 — Reactions, **99**, 118; Reactions with, **100**, 183
- Anthrapurpurine, **27**, 81; **34**, 131 — Action of ammonia on, **37**, 110
- Anthraquinon acid (see Acid) — Action of phenylmagnesium bromide on, **89**, 130 — Amino- (see Aminoanthraquinon) — Constitution, **41**, 92; **50**, 104 — Derivatives, **70**, 254; **72**, 289; **100**, 34 — Derivatives, electrolysis, **34**, 118 — Derivatives obtained during action of sodium dioxide on aloines and their halogen products, **85**, 275 — Derivatives, production from aloines of Natal aloes, **87**, 95 — Derivatives, synthesis by means of phthalic acid, **31**, 269 — Detection of traces, **35**, 241 — Diortho-amido- (see Diortho-amido-anthraquinon) — Diortho-nitro- (see Diortho-nitro-anthraquinon) — Diphenyl-keton from, **38**, 220 — Homologues, synthesis, **53**, 264 — Hydroxylamido- (see Hydroxylamido-anthraquinon) — Isomer of, **25**, 286 — Meta-benz-bioxy- (see Meta-benz-bioxy-anthraquinon) — Nitroso- (see Nitrosoanthraquinon) — Phen- (see Phenanthraquinon) — Preparation by action of chloride of lime and a metallic salt on anthracene, **35**, 155 — Probable orthoquinon from, **58**, 54 — Series, reduction experiments in, **46**, 67
- Anthraquinons, **96**, 242; **97**, 128 — Derivatives, **52**, 9 — Dialcylamidised, and corresponding dialcylamidised oxyanthraquinons, **85**, 166 — Dialcylamido- (see Dialcylamidoanthraquinons) — Dialcylamidodichlor- (see Dialcylamidodichloranthraquinons) — Dibrom- (see Dibromanthraquinons) — Hydroxy- (see Hydroxyanthraquinons)
- Anthraquinon disulphonic acid (see Acid)
- Antimonic acid (see Acid) — Acids (see Acids)
- Anthraquinon, **38**, 198 — And chrysanthin from anthracene, synthesis of, **39**, 42 — Preparing, **48**, 214
- Anthrocerin, **40**, 46
- Anthrol, **40**, 77
- Anthrone, benzylidene derivatives of, **92**, 302 — Diphenyl- (see Diphenylanthrone) — Hexahydro- (see Hexahydroanthrone)
- Anthrones, tetraalcylamidodiphenyl- (see Tetraalcylamidodiphenylanthrones)
- Anthrophyllite from Balme, in Norway, **36**, 43
- Anthropology, **25**, 83, 95
- Anthropophagi of Chauvaux, **21**, 251
- Anti-Adulteration League, **2**, 37
- Antialdoxime, benz- (see Benz-antialdoxime)
- Antianodic phosphorescent system (see Phosphorescent)
- Antiaris toxicaria, milky juice of, **19**, 237
- Antiaesthetic paper (see Paper)
- "Antichlore," efficacy of compounds employed as, **39**, 172 — Nitrate of soda as ad, **35**, 166
- Antichlores, patent for, **4**, 11
- Antichloride for paper making, **8**, 253
- Anti-coagulating substances, immunity conferred by, **74**, 196
- Anti-combustion substances, **25**, 202
- Anti-crustation composition for steam boilers, **27**, 34
- Antidote and disinfectant, **23**, 35 — For hydrofluoric acid (see Acid) — For snake poison (see Poison)
- Antifebrine, detection, **60**, 109 — Reactions, **55**, 296 — Test for, **58**, 57
- Antiferment substances (see Substances)
- Antifermentation action of silicate of soda (see Soda silicate)
- Antifriction alloys (see Alloys)
- Antimonial and arsenical spots, distinguishing, **62**, 300 — Cinnabar (see Cinnabar) — Combinations, **1**, 263 — Compounds, action of liquids of digestive canal on, **48**, 82 — Poisoning (see Poisoning) — Preparations, testing for arsenic, **23**, 119 — Vermilion (see Vermilion)
- Antimonates, **76**, 241 — And antimonic acids, **81**, 67 — Of copper (see Copper antimonates) — Sulpho- (see Sulphoantimonates)
- Antimonic acid, (see Acid) — Acids (see Acids)
- Antimonide, Mercury iodo- (see Mercury) — Of copper (see Copper) — Of hydrogen (see Hydrogen) — Of lithium (see Lithium) — Reaction of, **90**, 197

- Antimonious acid (*see* Acids)
- Antimonite, 74, 113 — Mineral, conversion into orange compound, 65, 232
- Antimonites, crystallised, 13, 82, 241 — Pyrogallol, 66, 221; 67, 25 — Selenio-alkaline (*see* Alkaline) — Silver sulphide (*see* Silver sulphantimonites)
- Antimonium potassium oxalate, analysis, 57, 193, 241
- Antimonure of copper (*see* Copper) — Of iron (*see* Iron) — Of lead (*see* Lead) — Of nickel (*see* Nickel) — Of silver (*see* Silver)
- Antimonuret hydrogen (*see* Hydrogen)
- Antimonoxide, 20, 312
- Antimonotungstic compounds, 75, 11
- Antimonous halides, ammonium (*see* Ammonium) — Sulphide (*see* Sulphide)
- Antimon-trisulphide in aqueous solution, 47, 306
- Antimony, 24, 207, 221; 64, 160; 87, 78; 89, 173 — Action, 66, 305 — Action of lithium-ammonium on, 85, 107 — Action of silicon on, 74, 73 — Alloys, analysis, 50, 150 — Amorphous, 58, 108 — And aluminium alloys, 90, 45 — And antimony trisulphide mixtures, 89, 119 — And arsenic, absorption from a solution of their oxides in hydrochloric acid, by charcoal, 36, 6 — And arsenic associated with copper, iodometric determination, 98, 51 — And arsenic, reactions, 64, 235 — And arsenic, separations, 2, 159; 14, 289; 18, 36; 38, 113; 40, 33; 50, 269; 62, 273; 64, 203; 68, 270; 76, 137; 87, 18 — And arsenic and tin, separation, 49, 98; 51, 286; 75, 221 — And arsenic, lead and tin alloys, analysis, 73, 25 — And arsenic metalloids from a thermochemical standpoint, 99, 133 — And bismuth, compounds containing two halogens, 47, 175 — And bismuth, determination of small quantities of, 58, 49 — And bismuth, Docimastic separation, 25, 85, 100 — And copper alloys, 56, 275; 91, 155 — And copper alloys, density, 47, 304 — And copper and iron, determination, 46, 285 — And copper and lead alloys, experiments with, 45, 105 — And copper separation, 71, 104; 79, 78; 90, 215 — And copper, simultaneous precipitation, 67, 103, 133 — And gold and platinum, separation, 4, 284 — And iron alloys, density and specific heat, 74, 85 — And lead, alloys, 40, 43 — And lead in the form of sulphide, estimation, 91, 280 — And lead, separation, 8, 164; 71, 104 — And lead and tin separation, 6, 248 — And manganese, ferromagnetic compounds, 95, 227 — And mercury, separation, 74, 145 — And oxide, manufacture, 8, 33 — And selenium, mixtures, 93, 93 — And silver, separation, 71, 104 — And tellurium, mixtures, 93, 93 — And tellurium separation, quantitative, 89, 168 — And tin, arsenic associated with, 70, 22 — And tin, determination, 46, 172 — And tin separation, 19, 103; 21, 124; 40, 257; 46, 172, 268; 54, 80, 99; 57, 124; 62, 216; 70, 93; 75, 221; 82, 304; 87, 18; 98, 230; 99, 300; 100, 53, 66 — And tungsten separation, 46, 133 — And zinc, apparent perturbation of law of definite proportions in compounds of, 1, 288, 302; 2, 49 — Arsenic in, 78, 73 — Arsenic-tin- (*see* Arsenic-tin-antimony) — Atomic weight, 5, 126; 40, 203; 41, 107, 201; 43, 258, 270; 57, 102; 85, 124; 93, 55; 99, 69; 100, 278 — Blue, 28, 325; 29, 73 — Cryoscopic constancy of, 93, 93 — Decomposition of water by, under influence of nitric acid, 9, 232 — Derivatives, action of magnesium alkyl compounds upon the halogen, 90, 255 — Detection, 70, 224 — Detection by hydrogen compound, 10, 163 — Detection of tin in presence of, 48, 140 — Detection of zinc in presence of, 45, 69 — Determination, 2, 267; 38, 11; 46, 285; 57, 211; 72, 158; 75, 11 — Determination in lead-antimony alloys, 97, 271 — Determination in presence of arsenic, 84, 256 — Electrochemical deposits, 34, 227 — Electrodeposited, properties of, 8, 257, 281 — Electrolytic analysis, 92, 33 — Equivalent weight of, 50, 47 — Estimation, 8, 292; 9, 13; 10, 215; 18, 96; 50, 278; 77, 36; 89, 299; 94, 288; 95, 40 — Estimation by stannous chloride, 85, 71 — Estimation in ores, etc., 95, 85 — Estimation of small quantities, 27, 74 — Evolution from stibnite, by nascent hydrogen, 34, 147 — Explosive, 28, 59; 43, 13 — Halogen compounds of, action of boron bromide on, 83, 95 — In arsenic, estimation, 88, 261 — In copper, 4, 264; 70, 207 — In minerals, 58, 296; 59, 15 — In ores, 80, 259 — In ores, determination, 81, 178, 184 — In presence of tin, 45, 101 — In sources and beds of streams and rivers, 2, 218; 3, 212 — In tin-foil, 78, 101 — In tube sublimates, 12, 231 — Influence on vegetation, 70, 263 — Isomorphism with bismuth and arsenic, 1, 299 — Metallic, action of organic acids on, 88, 172 — Metallic, and Australian gold, 57, 64 — Minerals, 20, 106 — Minerals, detection, 58, 296 — Modifications, 92, 304 — Mordant with whey, 59, 84 — Ores, assay, 65, 197 — Raw, purification, 18, 183 — Poisoning cases, 2, 102 — Poisonings at Liverpool, 2, 60, 96, 102, 128 — Precipitation, 63, 269 — Precipitation, phenomena observed in, 72, 32, 43, 53 — Salts, hydrochloric acid, and hydrogen sulphide, reciprocal actions between, 53, 60 — Separation and estimation by electrolytic method, 87, 282 — Series, silver bases of, 3, 78 — Substitution of graphite by, in galvanic batteries, 19, 203 — Test for, 51, 267 — Testing for arsenic by moist way, 20, 275 — Tetravalent, halogen double salts of, 91, 245 — Transmutation of phosphorus into, 82, 166 — Yellow, and antimony hydride, 91, 144 — Yellow, modification of, 70, 139
- Antimony bromide, and iodide, formation heat, 52, 64
- Antimony chloride, action of water on, 24, 23 — As reagent for salts of cesium, 29, 288 — Free from arsenic, preparation, 24, 102 — And carbon disulphide, reactions, 43, 106 — Solution, 65, 36, 194
- Antimony chlorides, type of, 13, 85
- Antimony chlorosulphide and arsenic chlorosulphide, 68, 36
- Antimony cinnabar, 75, 20
- Antimony fluoride, 16, 12; 49, 157
- Antimony fluosalts, 17, 8, 22
- Antimony halides, double, 84, 194
- Antimony hydride, action on dilute silver solution, 99, 312 — And yellow antimony, 91, 144 — Decomposition, 91, 143; 95, 191; 97, 311 — Heat of formation, 97, 168
- Antimony hydrochlorate and bismuth hydrochlorate, 58, 20
- Antimony iodide, double salts of, 2, 143 — Formation heat, 52, 64
- Antimony iodides, 2, 132; 32, 232
- Antimony iodosulphide, 68, 73
- Antimony-lead alloys (*see* Alloys)
- Antimony oxide and bismuth oxide, coloured reactions of, 54, 332 — Free from arsenic, preparation, 24, 192 — From Algeria, 22, 58 — Stibiconise, 5, 74
- Antimony oxides, crystallised, 13, 82, 241 — Sulphates of, 19, 52, 63
- Antimony oxychloride, crystallised, 18, 151
- Antimony oxychlorides, 24, 224
- Antimony oxysulphuret, 1, 46
- Antimony pentachloride and antimony pentafluoride, compounds, 100, 328 — Compounds, 12, 22 — Compounds with alcohols and ether, 33, 256 — Double salts of, 86, 257 — Pentabromide and pentaiodide and their double salts, 87, 72
- Antimony pentafluoride and antimony pentachloride, compounds, 100, 328 — Preparation and properties, 95, 58
- Antimony pentasulphide, 64, 321
- Antimony pentoxide, 86, 223
- Antimony perchloride, 56, 1, 16
- Antimony peroxide, action of high temperatures on, 75, 179
- Antimony phosphide, 29, 102
- Antimony protochloride, 1, 11; 23, 60, 72
- Antimony selenide, 4, 116 — Compounds of silver selenide with, 97, 288 — Reduction, 94, 24, 36
- Antimony sulphate, 61, 58
- Antimony sulphide, 53, 60; 61, 145; 65, 53 — Accidental use, 31, 238 — Action of alkaline carbonates and alkaline earthy bases on, 29, 72 — Action of hydrogen on, 81, 202 — Action on potassium sulphide, 53, 72 — Allotropic forms, 90, 70 — Analysis, 81, 72 — And bismuth protosulphide mixtures, fusibility, 89, 12 — And silver sulphide, fusibility of mixtures, 88, 35 — Black, obtaining a regular stream of sulphuretted hydrogen from, 21, 226 — Fusibility of mixtures with cuprous sulphide and mercuric sulphide, 91, 293 — Influence of sulphide of arsenic on solubility of, 3, 114 — Native, 24, 163 — Solutions in, cryoscopic examination, 89, 311 — Sulphide of arsenic in commercial, 5, 257
- Antimony sulphuret, treatment of, 8, 83; 9, 47
- Antimony tartrate, 46, 160; 49, 28; 55, 176; 93, 166
- Antimony tetrachloride, action of nitrogen peroxide on, 74, 61
- Antimony-tin-arsenic, triple alloy of, 93, 231, 303
- Antimony tribromide, 29, 179
- Antimony trichloride, action of cacodylic and methylarsinic acids on, 100, 72 — Action on cobalt and its alloys with antimony, 99, 23 — Action on nickel, 99, 22 — And bismuth trichloride, decomposition, 32, 229 — Hydrochlorates of, 58, 244
- Antimony tri-iodide, 29, 255
- Antimony trioxide, esters of, 99, 170
- Antimony trisulphide, action of hydrogen on, in presence of arsenic, 87, 226 — And antimony mixtures, 89, 119 — Black variety, 67, 291
- Antimony trisulphides, heat of formation, 90, 117
- Antimony chloride, 18, 151
- Antiphyloxeric mixtures, estimation of sulphur and sulphate of copper in, 79, 280
- Antiputrescent properties of sulphuric ether, 17, 142
- Antipyrine, action of iodine on, 77, 141; 81, 203 — Action of mercurous nitrate and the neutral mercurous-mercuric reagent on, 88, 61 — And aldehydes, compounds, 77, 47, 95 — And diphenols, combinations, 72, 221 — And mercury, chlor compound of, 81, 191 — And oxybenzoic acids, combination, 74, 11 — And phenols, combination, 75, 119 — And thaline, behaviour, 57, 102 — Determination, 72, 258 — Halogen derivatives, 81, 264 — Iod. (*see* Iodantipyrine) — Nitro-derivative of, 65, 107 — Reactions of, 55, 206 — Salts, 87, 71 — Test for, 58, 51 — Triazo- (*see* Triazoantipyrine)
- Antipyrinemethane, di. (*see* Diantipyrinemethane)
- Antisell, T., Cundurango, 24, 46 — "Manufacture of photogenic or hydrocarbon oils from coal and other bituminous substances capable of

- supplying burning fluids" (review), 1, 55.
- Antisepsis, theory of, 46, 58.
- Antiseptic acids (*see* Acids)—Action of acids, 40, 57—Action of salicylic acid, 42, 67—Agents, 6, 309—And disinfecting power of iodate of calcium, 28, 297—And hydrogen, 47, 237—And poisonous vapours, action on fermentation of fruits, 35, 243—Experiments in a mortuary vault, 49, 215—Iodoform as, 55, 309—Oil of wintergreen as, 48, 292—Properties of carbonic acid, 48, 104—Properties of bichromate of potassa, 35, 155—Properties of formaldehyd, 65, 200—Soaps (*see* Soaps)—Treatment of contagion, 22, 195.
- Antisepses, 15, 7, 54; 17, 47; 22, 160; 23, 33, 45, 58; 45, 252; 46, 166; 49, 136; 51, 72; 58, 132; 80, 72—Effects of, 40, 276—For food preservation, 53, 130—On muscular fibres, 76, 195, 220—Properties of, 46, 269.
- Antiseplicity of copper (*see* Copper).

- Apomorphia, reactions, 28, 264.
- Apothecaries' Hall, 18, 285—Conversion at, 9, 288.
- Apparatus, 74, 25, 79, 217; 93, 230—Alkali, 21, 27—Analytical, 73, 158; 51, 285—And method for incineration, 86, 233—B'owpipe, 18, 303; 25, 274; 35, 210; 37, 114—Butter (*see* Butter)—Chemical, 18, 251; 57, 213, 249—Chemical catalogue, 58, 284—Chemical, improved cock for, 47, 159—Chlorinating, 79, 217—Chlorine water, 20, 91—Combustion, 57, 150—Connected with gas manufacture, 5, 251—Constant level, 27, 59—Cooking, Norwegian, 18, 298—Cooking, portable, 17, 85—Cooking, Swedish, 17, 85—Cooling, 12, 260—Diffusion, Horsley's, 28, 70—Distillatory, for determinations of alcohol, 48, 119—Distillatory, lute for, 40, 181—Drop, for fluids, 21, 10—Drying, 58, 207—Ebullioscopic, modification of Beckmann's, 69, 279—Electric, 95, 22—Electric, for preventing boiler explosions, 47, 281—Electric gas-lighting, 55, 177—Electric heating, 86, 186—Electric telegraph, 5, 83, 209—Electric, transportation of power by batteries of, 47, 176—Electrolytic, 1, 242; 79, 227; 88, 102—Electro-magnetic, 21, 94, 264; 25, 276—Electro-magnetic, for medicinal application, 20, 72—Elementary, 87, 223—Exhibition of, 71, 85; 90, 267—Extraction, 44, 47, 57, 235; 74, 25, 258—Extraction, for plant products, etc., 99, 242—Fat extraction, 57, 130; 83, 299; 84, 47—Filter-cutting, 57, 221—Filtering, 15, 48; 29, 71, 81, 176; 45, 148, 167; 99, 112—For alcoholometric assay of wines, 27, 284—For analysis of gases, 27, 70; 45, 273; 48, 156—For application of spectral analysis to recognition of gases, 75, 179—For applying sulphuretted hydrogen without smell, 34, 280—For ascertaining quantity of sulphuretted hydrogen in crude gas, 15, 112—For automatic examination of carbon dioxide, 97, 236—For calceining bones, 11, 263—For chemical laboratories, 35, 220—For collecting samples of water, 70, 54—For combustion of petroleum oils, 24, 312—For composition of mixed colours, 23, 108—For continuous extraction of liquids with ether, 93, 75—For continuous manufacture of superphosphates, 31, 250—For decanting and filtering, 99, 112—For decomposition and absorption, 67, 229—For delineation of coloured surfaces, 65, 220—For demonstrating propagation of alternate current waves in cables, 97, 189—For detection and determination of arsenic, 86, 3—For detection and estimation of arsenic in beer, 87, 245—For detection of explosive gases in mines, 12, 280—For determining composition of sulphur dioxide, 77, 213—For determining composition of water, 77, 203—For determining curvature of lenses, 90, 279—For determining furnace gases, 47, 227—For determining fusing points, 36, 242—For determining hardness of metals, 57, 200—For determining hydrogen, 34, 163—For determining mechanical equivalent of heat, 85, 298—For determining melting-point, 55, 248; 59, 312; 95, 215—For determining molecular weights, 94, 21—For determining rate of diffusion of solids dissolved in liquids, 79, 127—For determining specific inductive capacity of organic liquids, 97, 262—For determining temperature of explosions, 66, 62—For determining transport numbers, 100, 185—For determining volatile substances by loss of weight, 93, 62—For determining weight and volume of gases, 72, 25—For distillation, 81, 16—For d'stil-
- lation of coal and peat and other substances used for manufacture of solid and liquid hydrocarbons, 8, 229—For drying and absorbing gases, 74, 257—For drying and purifying gases, 86, 85—For estimating carbon in steels, 48, 260—For estimating carbon dioxide, 78, 293, 320—For estimating carbonic acid, 5, 142; 95, 237—For estimating halogens and ammonia, 79, 85—For estimating nitrogen by Kjeldahl process, 100, 50—For estimating urea, 31, 36—For evaporation at low temperatures, 18, 73—For exact incineration, 86, 233—For examination of contact action, 87, 106—For exhibiting combustion experiments in a lecture room, 20, 202—For experiments at high temperatures and pressures and application to study of carbon, 97, 273; 99, 248—For extracting dissolved substances, 53, 281—For extracting solids, 99, 124—For finding density of gases and vapours, 3, 79—For fractional distillation, 71, 258; 74, 25; 78, 257—For gas analyses, 28, 295; 33, 43; 35, 207, 249; 48, 189; 58, 30; 62, 109, 204; 68, 170; 78, 9—For generating chlorine, 58, 250—For generating gases, 57, 213, 241, 249—For generating sulphuretted hydrogen, 58, 99, 123—For heating molasses, 21, 178—For heating substances in glass tubes, 63, 232—For heating substances in a vacuum at constant temperatures, 91, 194—For illustrating tangent and sine laws, 95, 225—For inhalation of medicinal powders or vapours for treatment of diseases of throat and lungs, 8, 84—For isolation of the element, fluorine, 57, 200—For keeping a liquid at a constant level, 1, 192, 204—For lecture experiment on gaseous diffusion, 86, 315—For liquefying hydrogen, 85, 298—For lixiviation, 76, 195—For maintaining constant temperatures, 54, 302—For making ice, 23, 59—For manufacture of coal gas, 24, 299—For manufacture of gas from petroleum, 9, 47—For measuring and dropping mercury, 60, 98—For measuring contents of human blood, 89, 245—For measuring coronal radiation during an eclipse, 92, 223—For measuring disengagements of gas at constant volume, 82, 95—For measuring gas, 56, 30—For measuring intensity of perfumes, 86, 26—For measuring liquids, 65, 68, 125—For measuring magnetic rotations and obtaining powerful sodium light, 93, 196—For measuring mechanical equivalent of heat, 86, 22—For measuring rotatory power, 22, 168—For measuring small inductances, 91, 256—For mechanically illustrating the tangent and sine laws, 95, 225—For melting-point determinations, 95, 215—For metrical study of stationary electric waves on spiral wires, 89, 245—For molecular weight determinations, 93, 201—For nitrogen determinations, 47, 55—For object lessons, lectures to schoolmistresses on, 41, 130—For observing changes of colour in volumetric analyses, 72, 243—For obtaining extracts from tea, 11, 92—For obtaining gas, 4, 267—For obtaining sulphuretted hydrogen, 31, 193—For preparation of gases in chemical laboratories, 28, 24—For preparation of pure gases, 88, 148—For preparation of pure oxygen, 95, 58—For producing ferrous salts for titration, 39, 46—For producing spark spectra of solutions, 97, 35—For rapid analysis of gases, 48, 156, 189—For rapid electro-analytical separation of metals, 100, 47—For rapid estimation of barium sulphates and salts, 96, 21—For rapid vapour-

- isation at limited heat, 20, 222 — For re-burning and re-vivifying animal charcoal, 11, 203 — For receiving drying and deodorising human excrement, 5, 34 — For regeneration of phosphorus, 11, 174 — For regulating the action of vacuum pumps, 89, 101
- For relay working of long submarine telegraph cables, 95, 285 — For reproducing an invariable quantity of electricity at will, 53, 179 — For saponification of fats, oils, etc., 79, 50 — For securing stoppers for bottles, 11, 33 — For showing combustion of air in atmosphere of coal-gas, 58, 55 — For showing formation of water, 23, 120 — For showing internal resistance in battery cells, 30, 246 — For showing longitudinal motion of sound waves, 33, 29 — For showing reciprocal nature of combustion, 19, 166 — For simultaneously extracting a solid and filtering the solution so obtained, 97, 280; 99, 53 — For steam distillation, 75, 137, 279 — For storing solutions, 83, 47 — For students in elementary practical chemistry, 76, 199 — For students' practical work in physics, 94, 252 — For sublimation, 97, 198 — For teaching law of helical springs, 92, 265 — For technical analysis of petroleum and lignite tar, 38, 211 — For testing explosibility of liquid hydrocarbons, 9, 119 — For testing petroleum, 41, 283 — For testing petroleum in tropical climates, 49, 193, 213 — For treating a liquid at boiling point with gases, 95, 103 — For vapour-pressure measurements, 85, 188 — For washing and absorbing gas, 24, 73 — For washing precipitates, 58, 256; 66, 55 — For water examination, 55, 124 — Forms of, 39, 160, 193; 40, 25 — Fractionating, use of condensation in, 51, 37 — Freezing, 20, 168; 50, 56 — Frigorific, 26, 169 — Gas-drying, 99, 178 — Gas-evolving, 26, 36 — Gas, for determining very slight pressure, 47, 55 — Gas generating, 60, 98; 93, 230 — Gas, Hempel's, 87, 37 — Gas-making, for domestic use, 26, 21 — Gas, new form, 24, 282 — Gasometric, 77, 225 — Gazogene, 26, 47 — German, in New Zealand, 86, 148 — Glass, 56, 67 — Glass syphoning, 64, 194 — H_2S , 52, 178 — H_2S , CO_2 and H , 26, 67 — Heating, 55, 34 — Heating, electric, 86, 186 — Heating, for laboratory uses, 48, 119 — Hydrogen, 22, 216 — Induction, chemical actions produced by means of discharges from, 33, 95 — Induction coil, 92, 265 — Integrating, 70, 11 — Interference, for calibration of extensometers, 90, 242 — Iridium, 95, 233, 238 — Kathodic, generating X-rays, 75, 215 — Kipp's, 90, 154, 286; 94, 106 — Kipp's, simple substitute for, 60, 228 — Laboratory, 28, 30; 34, 198; 55, 248; 62, 274; 82, 56; 98, 46 — Landsberger's, 86, 252 — Lecture, 49, 52; 72, 180; 76, 152 — Life-saving, for use in noxious atmospheres, prize for, 95, 312 — Macerating, 14, 135 — Magnetic, of M. Etard, 42, 258 — Magneto-electric explosion, 24, 277 — Magneto-electric, for medicinal application, 20, 72 — Melting-point, 83, 121 — Mercurial pneumatic, 30, 217 — Mercury distilling, 61, 131 — Microphonic, receiving words at a distance, 41, 183 — Of fused silica, 95, 238 — Of malleable iridium and rhodium and of pure transparent vitreous silica, 95, 233 — Of rhodium, 95, 233, 238 — Optical, 95, 22 — Oxygen rescue, 93, 230 — Ozon generating, 24, 25 — Ozonising, 70, 41 — Pelon's, 12, 260 — Phase-turning, for use with electrostatic voltmeters, 82, 242 — Philosophical, second-hand, 18, 154 — Photo-electric, 4, 239 — Photometric, 42, 318; 67, 216 — Photomicrographic, for ultra-violet light, 93, 303 —
- Physical, 95, 22 — Physico-chemical measuring, modified forms, 85, 76 — Platinum, 14, 179 — Platinum, catalogue of modern forms, 70, 234 — Polarising, 17, 286 — Polarising, illumination of the scale, 64, 82 — Polarising, principal section of Nicol prisms in, 37, 153 — Potassium chlorate making, 34, 139, 151 — Refraction, of rock-salt, 48, 203 — Registering, 21, 47 — Respiratory, action after opening the thoracic wall, 28, 238 — Sarony's posing, 13, 36 — Scientific, catalogue of, 79, 24; 92, 282 — Scientific, exhibition at South Kensington, 33, 197 — Solar, 45, 173 — Sounding, 9, 204 — Soxhlet's, 57, 56, 91, 130 — Specific gravity, for liquids, 38, 168, 194, 195, 204 — Spectral, 73, 270 — Spectroscopic, 95, 290 — Spectrometer, measurement of absorption of light by, 22, 35 — Stenographic printing, 21, 83 — Sulphur dioxide, 58, 187 — Sulphuretted hydrogen, 15, 240; 20, 167, 187, 321; 41, 243; 43, 191, 70, 95, 160; 74, 25 — Sulphuretted by drogen, adapter to be used in connection with, 15, 259 — Telegraph, autographic, 25, 59 — Telegraph, electric, 5, 83, 209 — Thermo-electrical, with galena and iron, 21, 59 — To be used in manufacture of sulphuric acid, 9, 46 — To compare thermometers, 35, 273 — To facilitate hydrogen sulphide precipitations, 79, 305 — Triple-action, incrustations formed in, 42, 247 — Useful in evaporation, 36, 143 — Vacuum distilling, 59, 249 — Vapour density, 87, 91 — Vapour-density, form of release for Victor Meyer's, 97, 73 — Voltaic decomposition, 22, 188 — Volumetric, accurate, 89, 240 — Washing, 24, 217; 47, 59; 57, 221 — Wireless telegraphy, 93, 230 — Wort-cooling, 25, 166 — X-ray, 92, 265

- Arsenate, methyl- (see Methylarsenate)—Of calcium (see Calcium)—Of cobalt (see Cobalt)—Of lead (see Lead)—Of nickel (see Nickel)—Of sodium (see Sodium)

Arsenates of cobalt (*see* Cobalt)—Vanadates, and phosphates, analogous, 54, 295

Arseniate and lead phosphate, solubility in dilute acetic acid, 42, 105—And phosphate, distinction between, 24, 119—Detection in sodium phosphate and nitrate, 50, 46—Of aniline (*see* Aniline)—Of bismuth (*see* Bismuth)—Of cerium (*see* Cerium)—Of copper (*see* Copper)—Of gold (*see* Gold)—Of iron (*see* Iron)—Of lead (*see* Lead)—Of silver (*see* Silver)—Of soda (*see* Soda)—Of zinc (*see* Zinc)—Sulph- (*see* Sulpharseniate)

Arsenites, 22, 61; 44, 180—Alkaline (*see* Alkaline)—Amino-magnesian (*see* Amino-magnesian)—Crystalline, 54, 50, 84—Crystallised, 3, 96—Crystallised, production, 10, 35—Meta-, non-existence of, 60, 85—Methyl-amino-magnesian, 89, 35—Mineral, analysis, 26, 286—Neutral, to litmus-paper, 46, 122—Of nickel (*see* Nickel)—Of rubidium (*see* Rubidium)—Pyro-, non-existence of, 9, 85—Sulphoxy- (*see* Sulphoxyarsenites)—Trimethyl-amino-magnesian, 89, 35

Arsenic, 3, 147; 7, 219; 61, 168; 64, 160—Absorption by charcoal, 17, 157—Acid (*see* Acid)—Acids (*see* Acids)—Action of magnesium alkyl compounds upon the halogen derivatives of, 90, 255—Action of potassium on, 80, 230—Action of sodium ammonium on, 79, 10—Action of sulphur on, 27, 293—Action on cobalt, 98, 51—Action on copper, 88, 23—Alloyation, systematic, 89, 12—Allotropic, 47, 128; 58, 268; 62, 309—Allotropic form of, and estimation when in minute quantities, 94, 156—Amorphous, action on alkyl haloids, 96, 293—Amorphous, action of water and dilute caustic soda solutions on, 88, 290—And alkaline earths, separation, 53, 39—And antimony, absorption from a solution of their oxides in hydrochloric acid by charcoal, 36—And antimony associated with copper, iodometric determination, 98, 51—And antimony, reactions, 64, 235—And antimony, separation, 2, 189; 14, 280; 18, 36; 38, 113; 40, 33; 62, 273; 64, 293; 68, 270; 75, 221; 76, 125; 87, 18—And antimony, lead and tin alloys, analysis, 73, 25—And antimony metalloids from a thermochemical standpoint, 99, 133—And antimony and tin, separation, 49, 68; 50, 269; 51, 286; 54, 99; 58, 96; 65, 213; 75, 221—And bismuth, doctimastic separation, 25, 85, 100—And cobalt and nickel, separation, 35, 147—And copper alloys, 89, 200—And copper, separation, 21, 133; 34, 174; 71, 104; 79, 104; 83, 221, 230, 247; 85, 300; 90, 215—And copper and lead, separation, 77, 172—And iodides, separation, 73, 28, 38—And lead, separation, 71, 104—And lithia in selenitic water, 47, 10—And mercuric cyanide, 34, 167—And mercury, separation, 65, 51; 73, 28, 38; 74, 145—And other elements, separation, 37, 196; 72, 191—And phosphoric acids, action on sodium tungstates, 44, 60—And phosphorus, analogy between allotropic states of, 47, 246—And selenium compounds, 73, 198—And silver, separation, 71, 104—And stannic chloride, temperature of solidification, 61, 11—And sulphuric acid, separation, 33, 74—And tellurium, compound, 79, 237—And tin, separation, 15, 307; 21, 124; 40, 257; 75, 221; 87, 18—And vanadium, separation, 75, 26—And aniline red free from, 21, 35—Antidote for, 1, 71; 7, 179—Apparatus for detection and determination of, 48, 170; 86, 3—Associated with antimony and tin, 70, 22—Atomic weight, 5,

126; 93, 55; 99, 69; 100, 278—Can it be quantitatively volatilised as arsenic hydride? 66, 71, 83—Chromium, compound (*see* Chromium)—Colloidal solution of, 96, 270—Compounds, poisoning by, 46, 233—Conversion of phosphorus into, 81, 257—Crusts, 1, 200, 238—Crystalline, action of water and dilute caustic soda solutions on, 88, 290—Davy's method of examining for, 36, 265—Decomposition of water by under influence of nitric acid, 9, 242—Delicacy of various reactions, 66, 173—Derivatives of benzene, 35, 163—Detection, 27, 189; 38, 165, 174; 39, 207; 40, 144; 41, 177; 50, 76; 57, 221, 263; 66, 173; 67, 125, 142, 148, 249; 82, 398, 315; 83, 10, 12, 34, 88, 177—Detection by hydrogen compound, 10, 163—Detection in cases of poisoning, 17, 202—Detection in criminal cases, 1, 47—Detection, microscopical, 46, 184—Detection of small quantities, 86, 193—Detection, purification of the sulphuretted hydrogen used for, 88, 213—Detection, sensitiveness of methods, 19, 288—Determination, 30, 65; 38, 21; 41, 109; 44, 280; 53, 221, 232, 243; 60, 133; 67, 125, 142, 148, 249; 73, 121, 134—Determination as magnesium pyroarseniate, 44, 82—Determination as pentasulphide, 56, 263—Determination by molybdate of ammonia, 35, 115—Determination by standard solutions, 35, 95—Determination of antimony in presence of, 84, 256—Determination of small quantities, 72, 91—Determinations, use of sodium carbonate and zinc oxide in, 96, 240—Difficulty of obtaining sulphuric acid perfectly free from, 40, 45—Diffusion in nature, 87, 23—Dissemination, 23, 95—Distribution in organism after ingestion of arsenious acid, 40, 181—Eating, 2, 103; 12, 36—Eating in Styria, 1, 280; 2, 261; 4, 19—Estimation, 3, 67; 4, 75; 8, 56; 24, 300; 41, 177; 48, 7, 85, 168; 61, 219; 82, 303; 88, 7, 107, 177; 89, 272—Estimation of antimony in, 88, 261—Estimation of cobalt in presence of, 18, 235—Estimation of minute quantities, 88, 7—Estimation of small quantities, 27, 74—Examination of coal pyrites for, 2, 261—Extraction from magenta residues, 36, 5—From alkali works, 26, 176—From antimony, 24, 207, 221—Halogen compounds of, action of boron bromide on, 83, 95—In animal matters, 32, 289—In animal series, 87, 275—In animals, 87, 130, 312—In antimony, 78, 73—In beer, 82, 287, 302; 83, 25, 61, 108; 88, 228—In beer and articles of food, 84, 173—In beer, brewing materials, and food-stuffs, detection and estimation, 86, 179—In beer, detection and estimation, 87, 128, 245—In bird's eggs, 39, 262—In bone-meal, 59, 181—In brain, localisation, 39, 28—In chemico-legal investigations, 52, 104—In coal, 73, 191; 83, 119, 132—In colours, evil effects of, 26, 29, 39, 52, 68, 90, 102, 105—In commercial chloride of lime, 52, 79—In commercial preparations of bismuth, 6, 304—In commercial products, 83, 61—In commercial sodium, 47, 59—In copper, 4, 264; 8, 27; 45, 136, 255; 46, 46, 77—In Dale's patent magnetic muriate of iron, 2, 149—In food-stuffs, 88, 228—In food-stuffs, detection and estimation, 87, 128—In foods, especially in beer, detection, 85, 122—In fuel, estimation, 88, 7—In glass, presence of as a source of error in detection of arsenic, 48, 119—In glycerin, 79, 171; 86, 312—In green colours, evil effects, 26, 29, 39, 52, 68, 90, 102—In home, 58, 189, 206—In hydro-

chloric acid, 2, 107; 7, 76; 22, 214—In iron, 51, 115; 53, 300—In iron ores, 51, 115; 53, 300—In iron pyrites, 44, 216—In lead-antimony alloys, determination, 97, 271—In malt, 88, 228—In malt, detection and estimation, 87, 128—In medicinal preparations of bismuth, 7, 77—In metals and alloys, estimation, 81, 242—In mineral waters, 49, 125; 54, 25—In mineral waters, estimation, 88, 107, 180—In non-metallic liquids, 42, 331—In note-paper, 24, 86—In ores, 53, 302; 80, 259—In ores, &c., estimation, 95, 85—In ores, Parnell's process for estimation, 26, 24—In organic compounds, 100, 231—In organic matter, 1, 35; 43, 21—In organic matters, detection, 89, 226—In organic substances, 36, 133—In organism, 87, 130—In organism, Berthelot's calorimetric bomb to prove, 89, 291—In organs of animal economy, 89, 298—In organs of animals, 81, 135—In paper-hangings, 44, 177; 48, 170—In paper-hangings and other combustible matters, 33, 161—In paper-hangings, deadly effects, 2, 206—In paper-hangings, green, 1, 12—In perchloride of iron, 2, 100—In plants, 87, 312—In presence of sulphites, etc., 83, 2—In production of aniline colours, 32, 84—In pyrites, 23, 221; 58, 49—In river, 2, 96, 109, 155—In rock-salt, estimation, 88, 180—In rosaniline, 21, 70—In sea-salt, estimation, 88, 189—In sea-water, estimation, 88, 107, 189—In selenitic waters, origin of, 47, 10—In soda of commerce, 20, 220—In soil of cemeteries, 52, 24—In sources and beds of streams and rivers, 2, 218; 3, 212—In subnitrate of bismuth, 17, 260—In sulphide of arsenic, 15, 306—In sulphur, 45, 58; 47, 94—In sulphuric acid, 5, 95; 22, 214; 38, 153; 49, 202; 83, 107—In table-salt, 88, 107—In textile goods, 47, 179; 71, 137—In tissues, 48, 170; 58, 128; 80, 315—In tissues of poisoned animals, 32, 130—In urine, 43, 222—In wall-papers, fabrics, &c., estimation by electrolytic method, 93, 125—In water, 2, 127—In water-colours, 39, 263; 41, 110—In water supply, 2, 111—In wines artificially coloured, 34, 71—In wines in absence of foreign colouring-matter, 48, 203—Influence of fatty bodies on solubility, 1, 216—Isomorphism with bismuth, 1, 200—Medicinal, elimination and distribution of, in the organism, in the form of methyl arsenate of soda, 89, 23—Medico-legal contributions on, 6, 50, 61, 101—Mercurous nitrate as micro-chemical reagent for, 98, 280—Metallic, fusion of, 26, 97—Metallic, purifying, 22, 167—Metallic, volatilising point of, 41, 180—Methyl (*see* Methyl arsenic)—Obtained from arsenious acid, &c., by baryta, 43, 82—Microchemical reactions of, 98, 245—On copper, effect, 83, 3—Organic derivatives of, 98, 315; 100, 231—Organic derivatives of, preparation, 93, 204—Phosphorescence, 30, 68—Poisoning by, 4, 292—Poisonous character, chemical cause, 41, 122—Preparation of hydrochloric acid free from, 20, 189—Preparation of magenta without, 31, 141—Preparation of sulphuretted hydrogen free from, 50, 47—Preparation of zinc free from, 49, 150—Presence of, 30, 31—Reagent for, 30, 263—Regulations, forms for general, 48, 170—Removal from sulphuric acid, 1, 240—Sensibility to certain tests, 1, 72—Separation, 44, 210; 85, 144—Separation by distillation in hydrogen chloride, 90, 31—Series, silver bases of, 3, 78—Sulphuric acid free from, 35, 76—Synthesis of,

- 81, 274, 286—Test, 1, 12; 3, 77; 20, 180; 38, 301; 39, 32, 41; 51, 202; 82, 300—Test, Outzeit's, 67, 254; 83, 223; 93, 254—Test for, influence of decomposition of selenium and tellurium compounds by moulds on, 86, 10—Test for, influence of selenium on, 83, 277—Test for, Marsh's, 82, 295; 83, 10, 166—Testing, 85, 258—Testing ammoniacal preparations for, 23, 110—Testing antimony for by moist way, 20, 275—Transformation of phosphorus into, 81, 304; 82, 166—Volatility of, 99, 110—Yellow, 89, 71—Yellow, preparation, 91, 34, 231
- Arsenio anhydride and hydrates, 85, 263—Formation by fungi, 50, 6
- Arsenic chloride, action on cobalt, 98, 179—Ammoniacal, 98, 46—Alcohol, compound of, 2, 11—Temperature of solidification, 61, 61
- Arsenic chlorosulphide and antimony chlorosulphide, 63, 36
- Arsenic chromium compound, 34, 220
- Arsenic cyanide, 57, 245; 65, 287
- Arsenic di-iodide, 95, 283
- Arsenic ethers, 22, 96
- Arsenic fluoride, 18, 12; 30, 169, 226; 32, 258
- Arsenic fluosalts, 17, 8, 22
- Arsenic hydrates, 85, 263
- Arsenic hydride, 29, 92—Decomposition, 97, 312—Formation by fungi, 50, 69—Preparation, 79, 66—Solid, 8, 222—Transformation into a solid hydrogen under influence of nitric acid, 8, 58
- Arsenic iodide, preparation, 36, 11
- Arsenic iodosulphide, 68, 73
- Arsenic pentachloride, 87, 65
- Arsenic pentafluoride, 93, 116
- Arsenic pentasulphide, 54, 287—Reduction to disulphide, 96, 281
- Arsenic pentoxide and sulphuretted hydrogen, interaction in presence of hydrochloric acid, 92, 236
- Arsenic selenide, 4, 110—Compounds of silver selenide with, 97, 288
- Arsenic sesquioxide, constitution, 89, 30
- Arsenic sulphide, 81, 152—Accurate recognition of, 65, 44—As a poison, 43, 196—Colloidal solutions of, precipitation, 89, 215—In aqueous solution, 46, 124—In commercial sulphide of antimony, 5, 267—Influence on solubility of sulphide of antimony in hydrochloric acid, 3, 114
- Arsenic sulphides, action of hydrogen on, 82, 110—Action of hydrogen on, in presence of antimony, 87, 226
- Arsenic telluride, 98, 60
- Arsenic-tin-antimony, triple alloy of, 93, 231, 303
- Arsenic tribromide, preparation, apparatus for, 83, 143
- Arsenic trichloride, action on nickel and on arseno-nickels, 98, 166—Tribramide, and triiodide, action of ammonia gas on, 90, 70
- Arsenic trifluoride, 50, 272; 52, 36
- Arsenic triiodide, 82, 129
- Arsenic trisulphide, reduction to disulphide, 96, 281
- Arsenical and antimonial compounds solution, 41, 110—And antimonial spots, distinguishing, 62, 309—Colours (see Colours)—Compounds aromatic, 42, 20—Compounds, detecting, 33, 58—Copper (see Copper)—Fumes (see Fumes)—Mundic, 49, 179—Paper (see Paper)—Pigments (see Pigments)—Playthings, 19, 103—Poisoning, 4, 202; 68, 281—Poisoning at Lugano, 70, 260—Poisoning by wall-papers, 76, 184—Poisoning, condition of bodies after, 56, 36—Sulphides (see Sulphides)—Vapours (see Vapours)—Wall-papers (see Wall-papers)—Water (see Water)—Wine (see Wine)—Zinc (see Zinc)
- Arsenide of barium (see Barium)—Of cadmium (see Cadmium)—Of calcium (see Calcium)—Of hydrogen (see Hydrogen)—Of lithium (see Lithium)—Of nickel (see Nickel)—Of tungsten (see Tungsten)—Reaction of, 90, 197
- Arsenides, formation by pressure, 48, 204—Metallic, formation, 37, 227—Metallic, oxidation by electric current, 65, 55, 66—Of copper (see Copper)—Of strontium (see Strontium)—Preparation, 81, 130
- Arseniferous bismuth (see Bismuth)—Sulphur (see Sulphur)—Zinc (see Zinc)
- Arsenio- and naphthyl-phospho-compounds, 39, 34
- Arsenio-molybdic acid (see Acid)
- Arsenio-sulphurets, extracting silver and gold from, 23, 126
- Arsenious acid (see Acid)—And Sulphurous Ore Reduction Company, 13, 24—Anhydride (see Anhydride)—Hydride (see Hydride)—Oxide (see Oxide)—Sulphide (see Sulphide)
- Arsenite, aceto- (see Aceto-arsenite)—Action on thiosulphonic acid salts, 98, 281—Of silver (see Silver)—Of sodium (see Sodium)
- Arsenites, 5, 320; 71, 293—Of rubidium (see Rubidium)
- Arsenium and phosphonium compounds, 44, 83
- Arseniuret of copper (see Copper)—Of iron (see Iron)—Of lead (see Lead)—Of nickel (see Nickel)—Of silver (see Silver)
- Arseniuretted alcohol (see Alcohol)—Hydrogen (see Hydrogen)
- Arseno-cyanogen, 34, 203
- Arseno-nickels, action of arsenio trichloride on, 98, 166
- Arsenophobia, 42, 36
- Arsine, action of selenium and tellurium on, 95, 308; 98, 13—And mercuric cyanide, 34, 167
- Arsine oxide, triaminotriphenyl- (see Triaminotriphenylarsine oxide)
- Arsines, action of chlorides of platinum palladium, and gold on, 22, 58
- Amines, and phosphines, production of mixed, 2, 331
- Arsinic acids (see Acids)
- Arson, M., Montyon prize, 22, 46
- Arsonic acids (see Acids)
- Arsonval, A. D' (see D'Arsonval, A.)
- Arsonville, M. D' (see D'Arsonville, M.)
- Art bronze castings, 75, 309—Ceramic and glass, 64, 285

- Atlas, physical, of France, 24, 241
- Atmismometer, 25, 311
- Atmosphere, absorption of ultra-violet rays by, 40, 32 — Alcohol in, 43, 166 — Ammonia in, 64, 309 — Ammonia, of absorption by plants, 30, 64 — And living beings, exchange of gases between, 69, 51 — And plants, exchange of carbonic acid and oxygen in, 66, 294, 318—And plants, gaseous exchange between, 82, 255—Blue colour of, 42, 305 — Carbonic acid in, 39, 96; 39, 243; 73, 146—Chemical and physical modifications, consequent on habitation, 5, 146 — Chemical constitution, 67, 135, 209; 70, 148—Chemical history, 68, 75 — Combustible gases in, 82, 35—Composition, 10, 313; 74, 292; 94, 161—Correcting the weight of a body for the buoyancy of, 48, 39—Detection of carbonic acid in carburised gas in, 78, 23—Detection of organic and other nitrogenised matter in, 26, 25 — Dust in, 21, 180—Earth's, absorption spectrum of, 44, 286—Earth's, origin of oxygen in, 68, 45—Earth's, researches on past and present history of, 88, 284—Electric conditions of high regions of, 68, 289—Electrifying, 88, 254 — Fixing nitrogen from, 86, 238, 269, 293, 305—Free oxygen of, 70, 223—Gaseous, detecting ammonia in, 77, 267—Gaseous interchange of living organisms and the surrounding, 70, 222—Gases of, (*see* Gases) — Hydrogen in, 87, 11, 46, 50—Hydrogen peroxide in, 20, 23; 32, 193; 37, 35; 38, 72—Identity of body in, which decomposes iodide of potassium, with ozone, 17, 32—Impregnating with perfume or purifying vapours, 4, 201—Inert portion of, 88, 245—Iodine in, 2, 118, 238—Lunar, 30, 260 — Magnetic particles of, 53, 85—Metallic dust in, 34, 93—Methane in, elimination of, 83, 118—New constituents of, 71, 51; 77, 295—New constituents of, place in periodic system, 80, 74—New element in, 70, 87, 109, 120; 71, 91 — Nitrogen of, ammonia from, 41, 272 — Nitrogen of, does mould developed in organic bodies accumulate? 33, 10 — Nitrogen of, fixation by association of algae and bacteria, 74, 293 — Nitrogen of, oxygen compounds of, 4, 285—Nitrous and nitric acids in, 4, 136—Of Metropolitan railway, 16, 128, 197, 235, 237, 18, 46—Of planetary bodies, 35, 232—Opalescence of, 14, 28 — Organised dust held in suspension by, 38, 34—Ozone in, 19, 179; 36, 54; 38, 224, 235, 243, 249, 257; 74, 286; 97, 288—Ozone in, influence of conifers on temperature and amount of, 35, 46—Ozone in, origin of, 97, 288—Ozone in, ponderable determination of, 36, 54 — Phosphorus in, 2, 310—Presence of vesicles of vapour in, 25, 70—Removal of aqueous vapour from, 43, 176 — Researches on, 25, 251 — Search for solid bodies in, 17, 189—Sodium sulphate in, 59, 301—Solar (*see* Solar) — Temperature of elevated regions of, 33, 10, 18—Terrestrial, free hydrogen in, 82, 70 — Transparency of, 33, 10; 34, 9 — Variability of properties of, 4, 43
- Atmospheres, microscopic appearances obtained from special, 21, 296
- Noxious, life-saving apparatus for use in, 95, 312—Of planets, permanence of certain gases in, 80, 161—Planetary, kinetrical theory of, 81, 217 — Which extinguish flame, composition, 70, 27
- Atmospheric air (*see* Air) — Ammonia (*see* Ammonia) — Argon (*see* Argon) — Bacteria (*see* Bacteria) — Dust (*see* Dust) — Electricity (*see* Electricity) — Formaldehyde (*see* Formaldehyde) — Hydrogen (*see* Hydrogen) — Moisture (*see* Moisture) — Nitrication (*see* Nitrication) — Nitrogen (*see* Nitrogen) — Oxidation (*see* Oxidation) — Oxygen (*see* Oxygen) — Ozone (*see* Ozone) — Phenomena, decemdiurnal or tridouble period in,

- 23, 154, 167—Phenomena in Ceylon, 33, 227—Poisoning (see Poisoning) Polarisation (see Polarisation)—Precipitation (see Precipitation)—Pressure (see Pressure) Purifier (see Purifier) — Refraction (see Refraction)
- Atom, asymmetric, optical activity of, 100, 295 — Carbon (see Carbon) — Composition and crystal form of chemical compounds, 53, 3, 16—Constitution of, 96, 94—Forms, 77, 251—Nitrogen (see Nitrogen) — Space relation of forces in the, 99, 302
- Atoms, 28, 230, 281, 304, 317; 29, 23—And energies, 85, 274—And equivalents, 36, 10—And etched figures, arrangement of, 54, 62—Caloric of, 22, 154—Carbon (see Carbon) — Chemical, definition, 58, 309 — Combining powers of, 12, 166, 175, 187—Di- (see Diatoms) — Form of, 74, 168—In molecules, 43, 154; 49, 31—Ions and molecules, relations of the colours of, 73, 48, 260, 271—Isolated, real existence of a matter formed of, 34, 93—Of hydrogen (see Hydrogen) — Power of, 29, 13 — Size, 73, 63; 86, 231—Specific heat, 68, 116 — Transformation of theory of, 50, 47 — Transient equilibrium, 61, 12—Valence of, and negative electricity, connection between, 89, 25 —Versus equivalents, 24, 274
- Atomechanics, programme of, 16, 289
- Atom-fixing and atom-displacing powers, 21, 109, 145
- Atomic and molecular solution volume, 71, 3—Bonds, 23, 249—Colour-cross, 65, 206 — Composition and physical properties, connexion between, 14, 90 — Considerations, 60, 299—Constitution of bodies, 34, 8—Constitution, pretended association by crystallisation of bodies having no analogy in their, 60, 80—Diagram, 67, 157 — Formulae, 21, 155—Hypothesis, 25, 309—Latent heats of fusion of the metals, 88, 237—Models, 75, 263 —Motion, 55, 263—Motion of elements, 74, 53—Periodicity, history of, 43, 15—Phyllotaxy, 44, 265 —Quantivalence, 13, 262—Ratio, 20, 82 — Relations between, and condensed symbolic expression of chemical facts and changes known as dissected formulae, 25, 67, 74—Specific heats, 29, 101—Theory, 1, 81, 107, 142, 153, 154, 20, 235, 222, 25, 118, 240, 251, 262, 273; 28, 205; 34, 217; 87, 260—Theory and divisibility of matter, connection between, 1, 166—Theory, development of, which correlates chemical and crystalline structure and leads to a demonstration of the nature of valency, 94, 238 — Theory, Gaudin's application to minerals, 39, 83—Theory, John Dalton and 100 years of, 99, 57—Theory, physical aspects of, 97, 109—Theory without hypothesis, 86, 144, 188, 163—Units of force, 18, 302—Valency, 52, 293—Vibrations (see Vibrations)—Volume and atomic weight and melting point, relations between, 83, 243 — Volume and limit-density of gases, 51, 165—Volume and valence, relation between, 72, 9 — Volume of iodine, 45, 182—Volume of nitrogen, 43, 43 — Volume, possible significance of changing, 86, 81, 91—Volumes, 23, 250, 284—Volumes, atomic weights, and properties of chemical elements, relations between, 2, 61, 74—Volumes of elements, relation between, 42, 171—Volumes of phosphorus, 96, 222; 98, 256—Volumes of solid compounds, 22, 190
- Atomic weight and atomic volume and melting-point, relations between, 83, 243 — And magnetism, relation between, 63, 171 — And radio activity, 83, 130—And specific gravity, relation between, 8, 24 — And specific heat, relation between,
- 1, 286; 25, 39; 81, 133; 87, 100; 89, 165—Choice of most probable value for an, 97, 58 — Determinations, 63, 45; 69, 178, 190, 196, 208—Definition, 57, 218—Of aluminium, 41, 212; 45, 256, 268, 281; 46, 15, 27, 41; 99, 69; 100, 278—Of antimony, 5, 126; 40, 203; 41, 197, 201; 43, 270; 57, 102; 85, 124; 93, 55; 99, 69; 100, 278—Of argon, 85, 215; 93, 55; 99, 69; 100, 278—Of arsenic, 5, 126; 93, 55; 99, 69; 100, 278—Of barium, 67, 55; 99, 69; 100, 278—Of beryllium, 222, 232, 246, 257, 269, 283, 293; 69, 64, 79, 91, 101, 112, 129, 136, 150, 164, 174; 93, 55; 99, 69; 100, 278—Of beryllium, 42, 261, 273; 45, 111; 47, 251; 49, 171—Of berzelium, 91, 239—Of bismuth, 44, 236; 49, 200; 51, 73; 63, 235; 64, 237; 70, 294; 93, 55, 204; 95, 217; 99, 69; 100, 278—Of boron, 65, 215; 68, 92, 278; 68, 281; 69, 178; 77, 78, 104; 80, 230, 255; 82, 35; 93, 55, 224; 99, 69; 100, 278—Of bromine, 63, 55, 183; 94, 260, 271; 95, 208, 263; 99, 69; 100, 278—Of cadmium, 62, 252; 67, 87; 78, 103, 93, 55, 195; 94, 224, 236, 248; 95, 217; 99, 69; 100, 278—Of cesium, 7, 211; 8, 18; 33, 261; 93, 55; 99, 69; 100, 278—Of calcium, 87, 181; 93, 55; 99, 69; 100, 278 — Of carbon, 23, 72; 62, 285; 69, 27; 70, 89, 121, 147, 172, 247; 72, 164; 75, 103, 77, 224; 79, 297; 91, 219; 93, 55, 184; 99, 69, 72, 306; 100, 278, 299—Of cerium, 91, 230 — Of cerium, 50, 251, 271, 284; 54, 220, 55, 261; 74, 318; 78, 23, 137, 153, 77, 43; 99, 69; 100, 278—Of cerium metals, 27, 117; 32, 176 — Of chemical elements, 25, 63 — Of chlorine, 76, 119; 91, 263; 93, 55, 179, 175, 181, 192, 202, 218, 228, 237, 253, 260, 276, 287; 95, 208, 98, 70; 97, 135, 146, 159; 98, 97, 256, 99, 69; 100, 278 — Of chrome, 65, 179—Of chromium, 5, 126; 59, 106; 93, 55; 99, 69; 100, 180, 189, 213, 228, 278—Of cobalt, 7, 48; 16, 25, 310; 20, 20; 24, 86, 234; 53, 287; 69, 179; 72, 40, 52, 109; 74, 110; 77, 20, 30; 79, 190, 208, 219; 81, 112, 125, 139; 93, 55, 95, 76, 86, 209; 99, 69; 100, 278—Of columbium, 93, 55; 99, 69; 100, 278—Of copper, 32, 9; 58, 55; 60, 110; 63, 43; 65, 236, 244, 260, 265, 281, 293, 302; 66, 7, 20, 29, 47, 57, 74, 82; 68, 171; 93, 105; 95, 217, 99, 69; 100, 278—Of didymium, 47, 203; 74, 318 — Of dysprosium, 94, 241; 95, 22, 218; 99, 69; 100, 278—Of elements (rare), 74, 318 — Of erbium, 93, 55, 95, 219; 99, 69; 100, 278 — Of europium, 91, 239; 95, 219; 97, 173; 99, 69; 100, 278 — Of fluorine, 63, 180; 93, 55; 99, 69, 100, 278 — Of gadolinium, 54, 241; 91, 153, 239; 93, 55; 95, 219; 99, 69; 100, 278 — Of gadolinium oxide, 54, 241 — Of gallium, 37, 138; 93, 55; 99, 69; 100, 278 — Of germanium, 54, 4, 165; 57, 71; 93, 55, 99, 69; 100, 278 — Of glucina, 45, 131 — Of glucinum, 38, 9, 59; 42, 95; 46, 150; 47, 181, 297; 51, 121; 91, 227; 93, 55, 184; 99, 69; 100, 278 — Of gold, 19, 302; 55, 198; 56, 132, 205; 58, 257; 59, 243; 61, 79, 79, 102, 115, 127, 137, 151, 164; 93, 55; 99, 69; 100, 278 — Of helium, 72, 281; 75, 71; 93, 55; 99, 69; 100, 278 — Of hydrogen, 68, 269; 77, 224; 89, 261, 297; 91, 176, 219; 93, 55; 97, 56, 58, 64, 76; 98, 256; 99, 69; 100, 278 — Of indium, 26, 21; 83, 191; 91, 228; 93, 55; 95, 227; 99, 69; 100, 278 — Of iodine, 87, 181; 90, 94; 91, 37, 220; 93, 55, 183; 95, 208; 99, 69; 100, 278, 278, 286, 310 — Of iridium, 19, 302; 39, 74; 61, 301; 93, 55; 99, 69; 100, 278 — Of iron, 81, 174; 93, 55; 99, 69; 100, 278 — Of krypton, 85, 215; 93, 55; 99, 69; 100, 278 — Of lanthanum, 19, 132, 190; 47, 154; 61, 50; 74, 318; 83, 196; 87, 49, 61, 73, 85, 169, 182, 183; 88, 13; 93, 55; 95, 218; 99, 69; 100, 278 — Of lead, 67, 133; 93, 55, 196; 98, 64, 78; 99, 69; 100, 278—Of lithium, 1, 166; 5, 139, 182; 47, 72; 98, 55; 99, 69; 100, 278—Of lutecium, 99, 69; 100, 278—Of magnesium, 62, 267; 75, 148, 158, 172; 93, 55; 99, 69; 100, 278 — Of manganese, 47, 98; 93, 55; 95, 102, 111, 123, 209; 96, 34; 99, 69; 100, 278—Of mercury, 93, 55; 99, 69; 100, 278—Of metal in radiferous barium chloride, 80, 281 — Of molybdenum, 29, 52; 36, 241; 68, 207; 69, 179; 72, 281; 74, 62; 92, 55; 99, 69; 100, 278 — Of neodymium, 77, 280, 292; 79, 148; 91, 238; 93, 55; 95, 218, 219; 99, 69; 100, 278—Of neon, 85, 215; 93, 55; 99, 69; 100, 278 — Of neoytterbium, 100, 278 — Of nickel, 7, 13, 79; 16, 25, 310; 20, 20; 24, 86, 234; 42, 207; 53, 287; 68, 108; 69, 179; 72, 40; 52, 109; 76, 284, 293, 307; 79, 163, 174, 185; 93, 55; 99, 69; 100, 278 — Of nitrogen, 76, 119; 77, 224; 78, 184; 80, 279; 82, 298; 83, 241; 90, 34, 269, 91, 176, 220, 230, 292; 92, 21, 261, 275, 283; 93, 4, 13, 20, 33, 55, 169, 257; 94, 214, 55, 208; 96, 189, 190; 98, 318; 99, 54, 64, 69, 76; 100, 278 — Of osmium, 19, 302; 59, 179; 93, 55; 99, 69; 100, 278 — Of oxygen, 23, 72; 49, 37; 59, 245, 272; 62, 285; 63, 197; 65, 311; 66, 149; 71, 263; 89, 261; 91, 219; 93, 55; 99, 69; 100, 278 — Of palladium, 19, 302; 59, 262; 68, 35; 67, 73; 69, 141, 197, 211; 83, 55; 95, 217; 99, 69; 100, 278 — Of pentagon, 98, 294 — Of phosphorus, 93, 55; 99, 69; 100, 24, 278 — Of platinum, 19, 302; 43, 252; 44, 82; 93, 55; 99, 69; 100, 278 — Of potassium, 93, 55, 184; 94, 260; 95, 209; 96, 133, 145, 156, 170; 99, 69, 180; 100, 278 — Of praseodymium, 77, 280, 292; 79, 148; 83, 197; 91, 238; 93, 55; 95, 218, 219; 99, 69; 100, 278 — Of radioactive barium, 82, 98—Of radium, 86, 61; 87, 184; 88, 150; 93, 55, 301; 98, 127; 97, 220; 99, 69; 100, 278 — Of rhodium, 19, 302; 99, 69; 100, 278 — Of rubidium, 33, 261; 89, 223; 91, 221; 93, 55; 99, 69; 100, 278 — Of ruthenium, 99, 11, 265; 93, 55; 99, 69; 100, 278 — Of samarium, 89, 277; 91, 239; 93, 55; 95, 219; 99, 69; 100, 278 — Of scandium, 42, 83; 45, 130; 99, 69; 100, 278 — Of selenium, 87, 181; 93, 55; 99, 69; 100, 278 — Of silicon, 6, 311 — Of silicium, 55, 199; 93, 55, 195; 99, 69; 100, 278 — Of silver, 54, 17, 76, 119; 93, 55; 94, 183; 95, 208; 96, 180, 190; 98, 305; 99, 17, 54, 64, 69, 76; 100, 250, 274, 278, 286, 310 — Of sodium, 93, 55, 175, 181, 183, 192, 202, 218, 228, 237, 253, 260, 276, 287; 95, 209; 99, 69; 100, 278 — Of strontium, 72, 18, 29, 41, 54, 72; 93, 55, 195; 99, 69; 100, 278 — Of sulphur, 91, 210; 93, 56; 96, 201, 215; 99, 69; 100, 278 — Of tantalum, 16, 64; 93, 56; 94, 241; 95, 218; 99, 69; 100, 278 — Of tellurium, 42, 84; 71, 196; 78, 184; 85, 235, 270; 87, 181; 92, 274; 93, 56, 203; 95, 54, 217; 96, 275; 97, 25, 290; 99, 69, 101; 100, 278—Of tellurium, irregularities of, 90, 260—Of terbium, 93, 56, 305; 95, 218; 99, 69; 100, 278—Of thallium, 26, 231; 29, 14, 20, 30, 55, 65, 75, 85, 96, 105, 115, 126, 137, 147, 157; 87, 171; 89, 196; 93, 56; 99, 69; 100, 278 — Of thorium, 11, 279; 46, 232; 77, 160; 91, 239; 93, 56, 204; 99, 69; 100, 278 — Of thulium, 93, 56; 99, 69; 100, 278 — Of tin, 93, 56; 99, 69; 100, 278 — Of titanium, 48, 251; 51, 46; 93, 56; 99, 69; 100, 278 — Of tungsten, 55, 101, 112; 72, 221; 75, 71; 90, 37, 49, 66; 91, 238; 93, 56; 99, 69; 100, 278 — Of uranium,

- 27, 22; 83, 154; 85, 177, 186, 201, 207, 222, 229, 249; 99, 60; 100, 278 —Of vanadium, 93, 56; 99, 69; 100, 278 —Of xenon, 85, 215; 93, 56; 99, 69; 100, 278 —Of ytterbium, 42, 61; 45, 130; 87, 182; 93, 56; 95, 219; 99, 69; 100, 278 —Of yttrium, 47, 4, 143; 71, 155, 170, 243, 305; 74, 62; 83, 56; 95, 219; 99, 69; 100, 278 —Of zinc, 59, 207; 73, 107, 226, 238, 259, 264; 93, 56; 99, 69; 100, 278 —Of zirconium, 60, 9, 17, 32; 77, 221, 231; 93, 56; 99, 69, 100, 278 — Queries, 16, 294 — Rectification, 70, 247 — Revision, 73, 226, 238, 250, 264 — Standards and Prout's hypothesis, 86, 147, 173
- Atomic weights, 19, 107, 202; 20, 286, 22, 24; 24, 34; 25, 252; 47, 187; 63, 130, 152, 177; 71, 116, 135, 244; 80, 143; 84, 2 — Absence of exact relations among, 98, 178 — And otherwise, cause of variation, 16, 16 — And atomic volumes of simple bodies, relations between, 38, 170 — And physical properties of elements, relations between, 80, 282, 214; 81, 12, 34, 59 — And specific gravities of diamond, graphite, and charcoal forms of carbon, numerical relations between, 2, 1, 18 — And their mutual relations, 14, 75, 87, 205, 229, 241, 279 — As mathematical functions, 99, 148, 167, 241; 100, 37, 120, 281, 302 — Atomic volumes, and properties of chemical elements, relations between, 2, 61, 74 — Calculating, method for, 67, 193, 204; 98, 245 — Calculating, unit used in, 53, 245 — Calculation, 86, 77 — Classification, 60, 164, 178 — Colour of the ion as a function of, 73, 28 — Deduced from Stas, probable value, 70, 62 — Determination, 51, 61; 83, 191 — Harmonising, 100, 231 — International, 89, 305; 90, 28 — Law of, 81, 70, 104 — New system, 67, 120 — Numerical relations of, 13, 113, 130; 63, 51; 73, 203 — Of analogous elements, relationship between, 94, 245 — Of beryllium, argon, and tellurium, irregularities of, 90, 260 — Of copper and silver, relations of, 58, 69 — Of elements, 25, 63; 82, 58; 94, 245; 96, 176, 197 — Of elements and their physical properties, relation between, 80, 282, 314 — Of elements and their properties, reciprocal relations between, 41, 283 — Of elements and their spectra, relationship between, 86, 231 — Of elements, numerical relations in, 73, 203 — Of elements, relations among, 27, 21; 37, 161, 255; 39, 281; 43, 242; 97, 46 — Of hydrogen and oxygen, ratio of, 79, 268 — Of hydrogen and oxygen, relative values of, 58, 7, 17, 30, 52 — Of lighter elements, divergence from whole numbers, 99, 91 — Of metals, 17, 284 — Of oxygen and hydrogen, 89, 261 — Of precision, 69, 144 — Of simple bodies, 60, 208 — Of simple substances, succession of, 74, 233, 260 — Of Stas, and verification, 54, 52, 66, 78, 88, 101, 163, 171, 180; 68, 13 — Ratios of, 86, 88 — Re-calculation, 47, 275; 48, 3, 17, 32, 42, 52, 68, 78, 91, 103, 115, 168, 165, 177, 198, 210, 221, 231, 258, 263, 275, 289; 49, 4, 19, 32, 42, 54, 64, 76, 89, 99, 112, 132, 145, 151, 164, 174, 186, 197, 219, 231, 239, 249, 260, 273, 282; 50, 7, 21, 28, 39, 51, 62, 74, 87; 59, 77, 89; 73, 293 — Relations between, 4, 124, 181, 206, 215, 228, 243, 257, 270, 282, 297, 307, 324, 335; 51, 15, 29, 57; 57, 318; 62, 21; 43, 124; 65, 123; 70, 37; 68, 298 — Report on, 72, 93, 105, 157, 167, 179; 75, 75, 88, 100, 110, 282, 293; 77, 239; 79, 195, 206; 80, 142; 81, 146, 161; 82, 66; 83, 161, 169; 86, 25, 37; 87, 78, 181, 89, 68, 164, 173; 91, 43, 219, 227, 238; 93, 54, 169, 183, 195, 203, 215; 95, 65, 208, 217; 97, 46; 98, 192, 201, 99, 67, 100, 25, 277 — Specific gravities, and hardness of the metallic elements, relation subsisting between, 27, 215; 28, 142 — Standard of, 63, 307; 63, 196; 82, 130, 195 — Symmetry in law of, 97, 99 — System of precise, 69, 25 — Table, 10, 96; 30, 266; 63, 76; 78, 182, 193; 81, 113 — Unity of, 54, 86; 75, 49 — Variation in, 53, 74
- Atomistic periodicity, history of, 41, 203
- Atomistics, 23, 86 — Classification of elements in relation to, 9, 277
- Atomistry as a principle of classification, 34, 46 — And Chemical affinity, 44, 4 — Of boron (*see* Boron) — Of compounds, 48, 291 — Of elements, 9, 157, 200, 277, 283; 48, 291; 57, 194 — Of sulphur (*see* Sulphur) — Of tellurium (*see* Tellurium) — Or valency, 24, 156, 166, 189 — Reply to critical objections by J. A. de Bel, 34, 93 — Tubes, 64, 40.
- Atomiser, diffusion of fluids by, for purposes of decomposition and disinfection, 12, 100
- Attractates, 20, 44
- Attracting acid (*see* Acid)
- Atrolactic acids (*see* Acids)
- Atropia, English, 9, 169
- Atropine, solutio glycerinae, 2, 210
- Atropine, 9, 230; 33, 242; 38, 274; 44, 215; 47, 225 — And its kindred alkaloids, reaction, 54, 98 — Physiological action of, 40, 46 — Poisoning by, 12, 48, 72; 54, 86 — Preparation from belladonna, 26, 47 — Reaction, 52, 21 — Reactions, chemical, 2, 13 — Reactions, coloured, 45, 288; 47, 106 — Recognition, 50, 273 — Resolution of, 100, 287 — Uncrystallisable, 1, 300
- Atropine, sulphate crystallised, 8, 18
- Attenuated gases (*see* Gases)
- Atterberg, A., Bromated combinations of molybdenum, 26, 118 — Compounds of glucinum, 29, 241 — Constitution of naphthalin compounds, 34, 270 — Decomposition of wood tar at a red heat, 38, 220 — Derivatives from dinitro-naphthalin, 34, 270 — Derivatives of naphthalen, 35, 164 — Furfuran in destructive distillation of pine wood, 43, 258 — Kjeldahl process, 66, 161 — Modifications of Kjeldahl's method for estimation of nitrogen, 81, 99

- Barium permanganate, preparing, 49, 148
- Barium peroxide, 30, 65; 65, 127—Action, 66, 182, 221—Decomposition in a vacuum at a red heat, 43, 235—Dissociation, 66, 257—Hydrates of, 81, 170, 101—Tolometry of, 89, 96—Manufacture, 85, 209
- Barium peroxides, hydrated, 81, 101
- Barium phosphate, decomposition by water at 100°, 78, 266
- Barium phosphates, 55, 212—Acid, 49, 277
- Barium phosphides, crystalline, 80, 286
- Barium platinate and hydrate of platonic acid, 22, 47
- Barium platinocyanide, preparation, electrolytic, 91, 124
- Barium poly-meta-lanthanate, 89, 198
- Barium silicate, crystallised, 35, 272
- Barium sodium hyposulphate, 59, 133
- Barium sub-salts, 87, 191
- Barium sulphate, 88, 194, 208, 209—As a cementing material, 68, 176, 107, 209, 234—As a cementing material in sandstone, 52, 194; 79, 109
- Barium sulphate, 98, 46, 310; 99, 22—Determination, 70, 40—Nottingham sandstone containing, 68, 176, 107, 209, 234—Precipitation, 69, 62—Precipitation and purification, 44, 221—Reaction under pressure, 52, 273—Reduction to sulphide, 59, 309—Solubility, 53, 87; 73, 276; 74, 109—Solubility in concentrated sulphuric acid, 45, 22—Solubility, peculiar relations of, 73, 276
- Barium sulphates from mine-water, 60, 80—Apparatus for estimation, 96, 21
- Barium sulphide, anhydrous, 77, 140—Electrolysis with a diaphragm, 87, 311
- Barium sulphite, 58, 128, 155
- Barium sulphocyanide, adulteration, 46, 268
- Barium tetrachromite, crystalline, 73, 281
- Barium thiosulphate, use of, 71, 145
- Barium titanates, crystalline, 64, 60, 261
- Bark, Alder (see Alder)—Alstonia (see Alstonia)—Buckthorn (see Buckthorn)—Calisaya (see Calisaya)—Chemical products from, 4, 258—Cinchona, 22, 82—Cinchona, alkaloids in, 10, 77; 22, 119; 44, 301—Cinchona, from Java, 21, 238—Cinchona, testing, 19, 190—Cinchona, value, 21, 178—Coto (see Coto-bark)—Dita, 33, 41, 146—Dita, physiologically active basic constituent of, 39, 171—Lotura, 39, 34—Nutritious matters in, upward passage of, 28, 314—Of Cinnamomum pedatinervium of Fiji, constituents of volatile oil of, 88, 251—Of *Coprosma grandifolia*, examination for alkaloids, 23, 18—Of coto tree of Bolivia, components of, 35, 84—Of gualicum, crystals in, 2, 47—Of *Rhamnus purpurascens*, 80, 59—Olive (see Olive bark)—Panama, active principles of, 60, 120—Pereiro, 42, 61—Willow (see Willow)
- Barks, Cinchona, 23, 107; 24, 263, 301; 25, 58, 154; 41, 252—Cinchona, alkaloid from, 23, 43—Cinchona, alkaloids in, 27, 208; 45, 175—Cinchona, analyses, 40, 209—Cinchona assay, Herbelin's method, 34, 261—Cinchona, determination of quinine in, 36, 110; 51, 179—Cinchona, estimation of quinine in, 1, 99—Cinchona, fat or wax obtained from, 52, 83—Cinchona, of Java, 43, 117—24, 132—Coto (see Coto-bark)—Of eucalypts, calcium oxalate in, 92, 20—Tannin, in, 14, 34; 62, 19; 63, 5

 Benz bioxy-anthraquinon, meta- (see Meta-benzobioxyanthraquinon)
 Benzene, **61**, **241** — Acetylchloramino- (see Acetylchloraminobenzene) — Acid (see Acid) — Action of acetylene on, **55**, **284**—Action of bromine on, **77**, **125**—Action of bromine on derived chlorated compounds of, **80**, **230**—Action of isobutylene bromide on, in presence of aluminium chloride, **83**, **312**—Action of nascent bromine on, **74**, **109**—Action of nitrate of copper on, **87**, **155**—Action of oxygen, ozone, etc., on, **44**, **219**—Action of stannio chloride on, **35**, **40** — Amido azo- (see Amido-azobenzene) — And cellulose, relation between, **88**, **255** — And certain mono-substituted derivatives, **92**, **7** — And chlorine, chemical dynamics of the reactions between, under the influence of different catalytic agents, and of light, **87**, **248** — And ethyl alcohol, **81**, **42** — And homologues, hydrogenation of, **36**, **180** — And methyl alcohol, **81**, **42** — And naphthalen, compounds, **39**, **181** — And normal hexane, boiling-points, and specific gravities of mixtures of, **78**, **262** — And phosphoric anhydride compounds, **77**, **123**; **80**, **316**—Artificial colouring matters from, **41**, **225** — Azo-derivatives, **57**, **262**—Azo- (see Azo-benzene) — Bistriazo (see Bistriazobenzene) — Capillary constant, **54**, **206** — Chlor-acetyl (see Chlor-acetyl benzene) — Chlorination, **79**, **48** — Chlorine derivatives, **35**, **105** — Chlordinitro- (see Chlordinitrobenzene) — Chlorbrom- (see Chlorbrombenzene) — Chloroketodimethyltetrahydro- (see Chloroketodimethyltetrahydrobenzene) — *c*-Chloro-3-keto-1:1-dimethyl- Δ -2-tetrahydro- (see 5-Chloro-3-keto-1:1-dimethyl Δ -2-tetrahydrobenzene) — Condensation of tetramethyldiaminophenyl-oxanthranol with, **88**, **256** — Constitution, **55**, **44**; **58**, **239**; **76**, **68** — Containing thiophene, action of aluminium chloride on, **74**, **97** — Derivatives, **36**, **262**, **270**; **59**, **157**—

Derivatives and radium rays, **90**, **216** — Derivatives, bi-substituted, nitration, **82**, **304** — Derivatives, influence of nitro-groups on reactivity of halogen, **87**, **90**—Derivatives, isomeric change in, **87**, **13**, **295**; **96**, **241** — Derivatives, isomorphous, **82**, **174** — Derivatives, isomorphous sulphonic, **86**, **175**; **88**, **180**—Derivatives, transformation of aromatic nitro-amines and allied substances, and relation to substitution in, **96**, **85**—Determination of carbon disulphide in, **97**, **119** — Determination of thiophen in, **74**, **50**—Diazo- (see Diazo-benzene) — Diazoamido- (see Diazoamido-benzene) — Dibenzoylhydrazo- (see Dibenzoylhydrazobenzene) — Dibromoaminoazo- (see Dibromoaminobenzene) — 3:5-Dichloro-18:1:1:2-trimethyl- Δ -2,4-dihydro, **88**, **276**—Dichloromethene-dioxypropyl- (see Dichloromethene-dioxypropylbenzene) — Dihydro- (see Dihydrobenzene) — 2:3-Dimethoxy-4:5-methylene dioxy-1-allyl- (see 2:3-Dimethoxy-4:5-methylene-dioxy-1-allylbenzene) — Dimethyl- (see Dimethylbenzene) — 1:1-Dimethylhexahydro- (see 1:1-Dimethylhexahydrobenzene) — Dimethyl- Δ -3-tetrahydro- (see Dimethyl- Δ -3-tetrahydrobenzene) — Dinitrohydro- (see Dinitrohydrobenzene) — Dinitrosulphocyan- (see Dinitrosulphocyanbenzene) — Diphenylbisdiazaminobenzene (see Diphenylbisdiazaminobenzene) — Diphenyldisazo-amino- (see Diphenyldisazo-amino-benzene) — Di-substituted derivatives, **92**, **9** — Ethyl- (see Ethylbenzene) — Ethyldimethylamidobenzene (see Ethyldimethylamidobenzene) — Estimation of quinones derived from, **80**, **208**—Formule, **35**, **40**—Hexahydro- (see Hexahydrobenzene) — Hexa-iodo- (see Hexa-iodo-benzene) — Homologues, oxidation, **85**, **203** — Hydrazines, synthesis, **71**, **95** — Hydrazo- (see Hydrazobenzene) — Hydrogenation of, **36**, **232**, **276**—In illuminating gas, determination, **89**, **14**, **29**; **96**, **260**; **97**, **282**, **293**—In rosin, light oils, **33**, **199** — Influence on rotation of ethyl tartrate, **85**, **310**—Isocyan- (see Isocyanobenzene) — Isomer of, **56**, **114** — Latent heat of evaporation of, **72**, **243**; **91**, **127** — Metadichloro- (see Metadichlorobenzene) — Metadinitro- (see Metadinitrobenzene) — Metadiphenyl- (see Metadiphenylbenzene) — Metho-ethyl- (see Methoethenylbenzene) — Molecule, new space representation of, **100**, **305** — Monochlor- (see Monochlorbenzene) — Mono-derivatives, experiments, **65**, **138** — Nitroso- (see Nitrosobenzene) — Nucleus, **70**, **149**, **210**; **73**, **59**—Nucleus, substitution in, **55**, **199** — Orthodibenzoyl- (see Orthodibenzoylbenzene) — Oxy-chloro derivatives, **35**, **27** — Ozo- (see Ozo-benzene) — Para-diazoimino (see Para-diazoimino-benzene) — Part played by, in poisoning by coal-gas, **89**, **74**—Phenyl-diazoamino- (see Phenyl-diazoaminobenzene) — Phospho- (see Phosphobenzene) — Production of phenol from, **44**, **229** — Products of action of aluminium chloride and hydrochloric acid on, **97**, **239** — Progressive chlorination in presence of aluminium-mercury couple, **92**, **235** — Propyl- (see Propylbenzene) — Ring system of, **90**, **208** — Series, diazoic primary colouring materials of, **80**, **41** — Series, hydrocarbons of, electrolytic oxidation, **90**, **232**; **92**, **235**; **98**, **241** — Series, nitrosoacetyl-amino-derivatives of, **99**, **235**—Series, unsaturated acids of, **98**, **254**—Solubility in water of certain substitution derivatives, **73**, **153** — Solution, influence of temperature on association in, and value of molecular rise of boiling point for benzene at different tem-

peratures, **85**, **93** — Space formula for, **76**, **76** — Spectrum, absorption bands in, **77**, **103** — Stereochemical formulae of, **86**, **33** — Substituted carbides of, **67**, **289**—Symbols, **35**, **61** — Tetrahydro- (see Tetrahydrobenzene) — Toly- (see Tolybenzene) — 8-Tribromodiaz- (see 8-Tribromodiazobenzene) — Trin-tro- (see Trin-tro-benzene) — Vapour and ethylene separation, **77**, **105** — Vapour in gas, **59**, **37** — Vapours, absorption spectra and its homologues, **97**, **97**
 Benzenazobenzoin aldehyde (see Aldehyde)
 Benzenazocoumarin, preparation, **92**, **234**
 Benzenazocyanacetio ethers (see Ethers)
 Benzenazodimethylcoumarin, preparation, **92**, **301**
 Benzenazonaphthol, action of substituting agents on, **86**, **252**
 Benzenazo- α -naphthol, relationship between substitution and constitution, **85**, **22**
 Benzenazonaphthols, action of mercuric acetate on, **100**, **230**
 Benzenazooorthobenzylo alcohol (see Alcohol)
 Benzenazo-orthenitrophenol, preparation, **80**, **301**
 Benzenazophenol, bromination, **81**, **201**, **308**
 Benzenazo-2-pyridone, **98**, **33**
 Benzenazosalicylic acid (see Acid)
 Benzenediazonium chloride, determination of rate of decomposition, **99**, **297**
 Benzenediazonium hydroxides, interchange of halogen and hydroxyl in, **87**, **295**
 Benzenediazo- ψ -semicarbasinocamphor and its derivatives, **83**, **77**
 Benzene dibromide, metho-ethenyl- (see Metho-ethenylbenzene dibromide)
 Benzene dichloride, iodo- (see Iodobenzene-dichloride)
 Benzenehexabromide, **77**, **125**
 Benzenehexachlorides, isomeric, **76**, **312**
 Benzenethiodisulphonic acid (see Acid)
 Benzeno- α -nitrophenol, action of bromine on, **93**, **66**
 Benzene oxide, metho-ethenyl- (see Metho-ethenylbenzene oxide)
 Benzene paruchloride, hexachloro- (see Hexachlorobenzene paruchloride)
 Benzenesulphhydrate, preparation from benzenesulphinic acid, **35**, **241**
 Benzenesulphinic acid (see Acid)
 Benzenesulphonanilide, action of sodium hypochlorite on, **85**, **22**
 Benzene sulphonate, menthyl (see Menthyl)
 Benzenesulphonic acid (see Acid)—Acids (see Acids)
 Benzenesulphonylaminobenzylamines, aliphatic aromatic *w*-, diazo-derivatives of the mixed, **94**, **8**
 Benzenesulphonylbenzidine, diazo derivatives of, **96**, **232**
 Benzenesulphonylnaphthylenediamines, 1:5-, and 1:8-, diazo-derivatives of, **93**, **10**
 Benzenesulphonylphenylenediamines, diazo-derivatives of, **91**, **54**
 Benzenes, acetyl-bromo-amino- (see Acetyl-bromo-amino-benzene) — Acetylchloro-amino- (see Acetylchloroaminobenzene) — And mercurio compound of thiophene, separation, **71**, **173**—Azoxy- (see Azoxybenzenes) — Bromo- (see Bromobenzene) — Chlorobromodiaz- (see Chlorobromodiazobenzene) — Chlorodibromo- (see Chlorodibromobenzene) — Chloronitro- (see Chloronitrobenzenes) — Chloronitroamino- (see Chloronitroaminobenzene) — Coal-tar, nature of volatile products in, **44**, **138** — Dichloro- (see Dichlorobenzene) — Dichlorobromo- (see Dichlorobromobenzene) — Dihydro- (see Dihydrobenzenes) — Dinitrodiaz- (see Dinitrodiazobenzene) — Dinitro- (see Dinitrobenzenes) — Dioxy- (see Dioxyben-

- zenes) — Nitro- (*see* Nitrobenzenes) — Nitroamino- (*see* Nitroaminobenzenes) — Nitroaminobromo- (*see* Nitroaminobromobenzenes)
- Benzenic series, 66, 210**
- Benzenoid amines (*see* Amines)** — Compounds, substitution, explanation of laws which govern, 55, 65, 136 — Compounds, laws of substitution in, 80, 32, 164 — Diamines, rate of formation of azo-derivatives from, 99, 306 — Preparation, 64, 119
- Benzyl chloride, action of acetate of lead in acetic solution on, 80, 147**
- Benzylthrene, 37, 162**
- Benzhydrazide, dextrose- (*see* Dextrosebenzhydrazide)**
- Benzhydryl condensation, 42, 109 — Tetramethylamido- (*see* Tetramethylamidobenzhydrazide) — Tetramethylamino- (*see* Tetramethylaminobenzhydrazide)**
- Benzhydryl acetate (*see* Acetate)**
- Benzhydryl methylene, tetramethyldiamino- (*see* Tetramethyldiaminobenzhydryl methylene)**
- Benzhydroxamic acid (*see* Acid)**
- Benzhydrylpropionic acid (*see* Acid)**
- Benzide, azo- (*see* Azobenzide) — Azoxy- (*see* Azoxybenzide) — Bichlorosulpho- (*see* Bichlorosulphobenzide) — Diamido-oxyulpho- (*see* Diamido-oxyulphobenzide) — Diamidosulpho- (*see* Diamidosulphobenzide) — Dichlorosulpho- (*see* Dichlorosulphobenzide) — Oxyulpho- (*see* Oxyulphobenzide) — Tetra-nitroxyulpho- (*see* Tetra-nitroxyulphobenzide)**
- Benzidaniid, nitro-oxyulpho- (*see* Nitro-oxyulphobenzidaniid)**
- Benzidination in diphenyl, diphenylmethane and diphenylethane series, 100, 207**
- Benidine, 25, 190 51, 25—And toluidine, valuation of, 73, 275; 74, 109—Base isomeric with, 54, 109 — Benzene-sulphonyl- (*see* Benzenesulphonylbenzidine) — Bis-diazo chlorides of (*see* Bis-diazo) — Body homologous with, 21, 299 — Cyan- (*see* Cyanbenzidine) — Ethoxy- (*see* Ethoxybenzidine) — Tetramethylmetadiamidic, 66, 210 — Transformation of hydrazobenzene into, 86, 46**
- Benidine-aniline, 93, 166**
- Benidine chromate and allied substances, 94, 230**
- Benidine ether, 59, 206**
- Benidine hydrochlorates, 58, 280**
- Benzil, 3, 223; 48, 236—Action of aldehydes and ammonia on, 50, 232—And benzylamine, interaction, 69, 118 — And ethyl malonate, condensation, 70, 267 — And ketone, condensation compounds, 55, 114 — Anhydrazetone- (*see* Anhydrazetonebenzil) — Chlor- (*see* Chlorbenzil) — Condensation, 72, 56 — Condensation with dibenzyl ketone, 84, 264—Condensation with ethyl alcohol, 75, 151 — α -Dimethylanhydrazetone- (*see* α -Dimethylanhydrazetonebenzil) — Formula, 48, 305 — Iso- (*see* Isobenzil) — Methylanhydrazetone- (*see* Methylanhydrazetonebenzil) — *o*- and *p*-nitrated, condensation of chlorides of, with acetylacetone, 98, 60—Reduction, 81, 228**
- Benzil alcohol (*see* Alcohol)**
- Benzil chlorides, condensation of ortho and para-nitrated, with acetylacetone, 98, 60**
- Benzil cinnamate, 19, 0**
- Benzil dihydrocyanide, 91, 229**
- Benzilic acid (*see* Acid)**
- Benzioid bodies, decomposition by potassium cyanide, 43, 238**
- Benziolazone, modification, 71, 279**
- Benziimidazole, azimide combinations of, 77, 226; 78, 260**
- Benzimide, 20, 251, 286**
- Benzone, 2, 76; 25, 232; 40, 57—Action of methylene chloride on, 49, 287—And aromatic compounds, hydrogenation, 36, 232, 276—Aniline col-**
- ours soluble in, 57 24—Arsenic derivatives of, 35, 163—As- and P-derivatives of, 35, 163—As an insecticide, 10, 228—Benzol from, 24, 110 — Benzylpentaethyl- (*see* Benzylpentaethylbenzene) — Bromine derivatives of, preparation, 41, 58—Butyl- (*see* Butylbenzene) — Chlorated, action of sodium on, 88, 70—Chlorinated derivatives, 13, 139—Constitution, 33, 10 — Derivatives, constitutions of, 34, 142—Diethyl- (*see* Diethylbenzene) — Ethyl- (*see* Ethylbenzene) — Fixation of sulphur and oxygen on, 37, 203—Hexamethyl- (*see* Hexamethylbenzene) — In regenerated alcohols, detection, 82, 71 — Iodine derivatives of, preparation, 41, 58—Petroleum, 28, 10—Phosphorus derivatives of, 35, 163 — Trimethyl- (*see* Trimethylbenzene)**
- Benzine hexabromide, 52, 106**
- Benzine hexachloride, isomeric, 50, 80—New compound when preparing, 49, 157**
- Benzine pentachlorides, 28, 34**
- Benzenes, coal, and petroleum, 41, 263 — Crude, nature of highly volatile products in, 37, 104 — Ethyl- (*see* Ethylbenzenes)**
- Benzing, E., and H. Kammerer, Iodine derivatives of phenols, 38, 9**
- Benzing, R., and C. Liebermann, Mono-nitro-thymol, 35, 39**
- Benzinic carbides (*see* Carbides)**
- Benzoate, Di- (*see* Dibenzoate) — Ethylic, oxidation of, 14, 283 — Of ammonia (*see* Ammonia) — Of baryta (*see* Baryta) — Of iron (*see* Iron) — Of isopropyl (*see* Isopropyl) — Of isopropylmethyl (*see* Isopropylmethyl) — Of potassium (*see* Potassium) — Of propylene-chlorohydrol (*see* Propylene-chlorohydrol) — Of soda (*see* Soda) — Of sodium (*see* Sodium) — Phenylthiophenoxy- (*see* Phenylthiophenoxybenzoate)**
- Benzoates, 3, 253 — Absorption spectra of, 95, 91—Metallic, 22, 48—Metallic composition of, 21, 215—Oxy- (*see* Oxybenzoates)**
- Benzochloride, Diazo- (*see* Diazo-benzochloride)**
- Benzo-dihydrofurfuran derivatives, 91, 95, 280 — Derivatives, condensation into the γ -substituted anthracene series, 91, 304**
- Benzo-flavine, action of methyl iodide on, 92, 233**
- Benzo-flavol, 96, 231**
- Benzoic acid (*see* Acid) — Acid ether (*see* Ether) — Acids (*see* Acids) — Alcohol (*see* Alcohol) — Aldehyde (*see* Aldehyde) — Anhydride (*see* Anhydride) — Chloride (*see* Chloride) — Ether (*see* Ether) — Ethers (*see* Ethers) — Phenols (*see* Phenols) — Series, constitution, 28, 280—Series, isomers of, 20, 47—Sulphimide (*see* Sulphimide) — Sulphinide (*see* Sulphinide)**
- Benzoilquinine, 70, 121**
- Benzoil, 22, 167; 23, 252; 26, 253 — Ammonia-derivatives of, 53, 259 — And derivatives, application of Baeyer's reduction to, 96, 231—Condensation with methyl alcohol, 97, 260 — Deoxy- (*see* Deoxybenzoil) — Desoxy- (*see* Desoxybenzoil) — Derivatives, 16, 24 — Diazo- (*see* Diazo-benzoil) — Dimethoxy- (*see* Dimethoxybenzoil) — Furfuran derivatives from, 80, 19—Gum, 21, 142 — Hydro- (*see* Hydrobenzoil) — Interaction with phenylene diamines, 80, 19 — Isohydro- (*see* Isohydrobenzoil) — Orthodimethoxy- (*see* Orthodimethoxybenzoil) — Resin, acid of, 2, 252 — Synthesis, extension of, 95, 177 — Type, formation of ethers from compounds of, 98, 231**
- 1-Benzoin and derivatives, racemisation phenomena observed in study of, 100, 241 — Preparation, 97, 92**
- Benzo-kreatine, 22, 154; 30, 66**
- Benzol, 22, 36, 48; 23, 84; 25, 232; 40, 57; 44, 24—Acetyl- (*see* Acetylbenzol) — Action of chlorinated aldehydes on, in presence of aluminium chloride, 49, 190—Action of chlorinated aldehydes on, 50, 11—Action of chlorochromic acid on, 21, 12—Action of electrolysis on, 42, 95—Action of heat on, 14, 237, 249—Action of induction-spark on, 50, 80 — Action of potassium on, 27, 22 — Action of sodium on, 34, 24—Action of sulphur on, 23, 131—Aethyl- (*see* Aethylbenzol) — Amido- (*see* Amido-benzol) — Ammonia derivatives, 30, 186; 31, 61—And ammonia, transformation of nitrobenzol into, 6, 131—And analogous hydrocarbons, action of heat on, 14, 237, 249—And bromal, combinations, 28, 196—And chloral, combinations, 28, 196 — And chlorous anhydride, 17, 265—And homologues from illuminating gas, 20, 34—And homologues, hydrogenation, 36, 120 — And mono-chloro-aldehyde, combination, 29, 96 — Azoxy- (*see* Azoxybenzol) — Benzyl-ethyl- (*see* Benzyl-ethylbenzol) — Bibrom- (*see* Bibrombenzol) — Binitro compounds, of higher homologues of, 27, 283—Boiling-points, 43, 46—Bromamido- (*see* Bromamido-benzol) — Bromonitro- (*see* Bromonitro-benzol) — Bromoxyl derivatives, 40, 241 — Chloracetyl (*see* Chloracetyl) — Chlorated azo-derivatives, 26, 276 — Commercial, elimination of carbon disulphide from, 43, 148, 250; 44, 105 — Commercial, pure, impurity of, 65, 11—Constitution, 20, 178; 25, 287; 43, 198, 210; 46, 160; 50, 13; 60, 210; 69, 217—Derivatives, 18, 188; 23, 275; 25, 95—Derivatives, nitrogenous methylated, oxidation of, 43, 198 — Diazoamido- (*see* Diazo-amido-benzol) — Diazocyan- (*see* Diazocyanbenzol) — Dibrom- (*see* Dibrombenzol) — Dimethyl- (*see* Dimethylbenzol) — Dinitro- (*see* Dinitrobenzol) — Dinitrochloro- (*see* Dinitrochlorobenzol) — Diphenyl- (*see* Diphenylbenzol) — Ethyl- (*see* Ethylbenzol) — Ethylated, 14, 242—Fixation of carbonic acid, sulphurous acid, and phthalic anhydride on, 38, 20 — Fluor- (*see* Fluorbenzol) — Formation of chlormaleic acid from, 21, 239 — Formula, 20, 72—Fractional distillation, 42, 183 — From benzene, 24, 110 — From coal-gas, 22, 238; 35, 155 — Group, isomerism of, 23, 23 — Homologues, oxidising properties, 15, 214 — Hydrazo (*see* Hydrazobenzol) — Hydrocarbons in, crude, 14, 18 — Hydrogen in, 22, 144 — In coal-gas, estimation, 81, 241 — Isobutyl- (*see* Isobutylbenzol) — Law of congelation of solutions of neutral substances in, 46, 77 — Luminosity when burnt with non-combustible gases, 37, 36, 61, 72, 101 — Manufacture, 7, 94; 25, 58 — Mercuric compounds in, 46, 303 — Meta-diamido- (*see* Meta-diamido-benzol) — Mononitroazoxy- (*see* Mononitroazoxybenzol) — New use for, 13, 228 — Nitro- (*see* Nitrobenzol) — Nitro-ethyl- (*see* Nitro-ethylbenzol) — Orthodinitro- (*see* Ortho-dinitrobenzol) — Oxidation, 17, 155; 54, 7 — Para- (*see* Para-benzol) — Para-dimethyl- (*see* Para-dimethylbenzol) — Para-di-propyl- (*see* Para-di-propylbenzol) — Phenylpseudo-azimido- (*see* Phenylpseudo-azimido-benzol) — Physiological action, 39, 253 — Position hydrogen occupies in, 22, 84, 144 — Preparation, 9, 229 — Propyl- (*see* Propylbenzol) — Propyl-isopropyl- (*see* Propyl-isopropylbenzol) — Pure, from coal-naphtha, 1, 48—Pure, preparation, 23, 179 — Purifying, 9, 229; 68, 27 — Safe keeping, 20, 280 — Series, contributions to his-**

- tory of, 15, 271 — Series, conversion of normal paraffins into, 36, 140 — Series, hydrocarbons of, action of nitric acid upon, 3, 155 — Series, isomerism in, 22, 167, 288; 25, 299 — Series, place to be assigned to, 20, 180 — Series, process for preparing chlorinated derivatives of, 1, 4 — Solubility of mercuric compounds in, 46, 303 — Sugar-like body from, 23, 161 — Sulphoacids of, 24, 67 — Sulpho-derivatives, 15, 292 — Sulpho-nitro-bibrom- (see Sulpho-nitro-bibrom-benzol) — Synthesis, 14, 153, 254, 278 — Testing, 43, 93, 115, 128, 164, 186, 210 — Thiopheniferous, 53, 312 — Tetramethyl- (see Tetramethylbenzol) — Transformation into phenic and benzoic acids, 7, 70 — Transformation into tartaric acid, 19, 197 — Transport, 20, 286 — Tri-amido- (see Tri-amidobenzol) — Trinitroazoxy- (see Tri-nitroazoxybenzol)
- Benzol-aldehyde, 21, 275
- Benzol allyl, 28, 21 — Attempts to prepare, 27, 321
- Benzobisulphuric acids (see Acids)
- Benzol bromide, formation of aniline from, 20, 196
- Benzol-bromides, mono-brom- (see Monobrom-benzol-bromides)
- Benzol chloride, action on trioxymethylene, 74, 147 — Bichlor- (see Bichlorbenzol-chloride)
- Benzol-disulpho acid chloride (see Chloride)
- Benzol disulphoxide, constitution and formation, 39, 185
- Benzoleparaphenol-sulphuric acid (see Acid)
- Benzol-green, 39, 229; 40, 35
- Benzol-haloids, halogen, 56, 250
- Benzol-hexachloride, 24, 192
- Benzol nitrate, diazo- (see Diazo-benzol nitrate)
- Benzol-paraphenolsulphuric acid (see Acid)
- Benzol perchloride, and formation from toluol and xylol, 19, 251
- Benzol-phenol, homologues, 59, 185, 195, 213
- Benzol-sulphinic acid (see Acid)
- Benzol-sulpho acid (see Acid)
- Benzol-sulphochloride, brom- (see Brombenzol-sulphochloride)
- Benzolsulphurous acid (see Acid)
- Benzols, 23, 23; 24, 109; 27, 322 — Diamido- (see Diamidobenzols) — Diazonitro- (see Diazonitrobenzols) — Dibrom- (see Dibrombenzols) — Dinitro-paradibrom- (see Dinitro-paradibrombenzols) — Estimation of light hydrocarbons etc., in, 52, 170 — Nitramido- (see Nitramido-benzols) — Nitro- (see Nitrobenzols) — Pentachlor- (see Pentachlorbenzols) — Threefold substituted, 25, 46
- Benzoline, or petroleum spirit, 40, 101 — Vapour, detection, 65, 211
- Benzo-nitrilamide, action of reducing agents on, 29, 167
- Benzonitrile, action of zinc-ethyl on, 41, 270 — And paratolunitrile, hydrogenation, 91, 222 — Brom- (see Brom-benzo-nitrile) — Decomposition, 50, 191 — Preparation, 93, 132 — Saponification, 81, 215
- Benzonitrile hexachloride, 82, 252
- Benzonitrotoluidine, 30, 212
- Benzophenone, action of phosphoric sulphide on, 53, 260 — Allotropy of, 81, 35 — Amino- (see Aminobenzophenone) — And derivatives, 11, 56; 28, 204; 77, 198; 82, 48; 94, 250, 301 — And methylpropylketone, phosphorus acids derived from, 87, 142 — Di-oxy- (see Di-oxy-benzo-phenon) — Modifications, 24, 34 — Paranitro- (see Paranitrobenzophenone) — Solubility, 81, 168 — Sulpho- (see Sulphobenzophenone) — Sulphonation, 77, 210 — Synthesis of symmetric dihalogen derivatives, 88, 280 — Tetramethyl-diamido- (see Tetramethyldiamidobenzophenone) — Trans-
- formation into triphenyl carbinol, 90, 38
- Benzoylamine chloride, 26, 27 — Action of sodium methoxide and its homologues on, 83, 295; 89, 272 — And α -naphthol, condensation products of, 94, 13, 70 — Condensation with α - and β -naphthols, 93, 268
- Benzophenones, amido-substituted, reaction in sulphuric medium, 83, 216 — Benzoylaminomethyl- (see Benzoylaminomethylbenzophenones)
- Benzopinacoline, 90, 197
- Benzopinacone, 90, 197
- Benzopyrone and its homologues, 83, 117, 297 — Synthesis, 82, 239
- Benzoquinonemethane acids (see Acids)
- Benzoquinone, para- (see Parabenzoquinone) — Reaction, 60, 187
- Benzoquinonediazides, ortho- (see Orthobenzoquinonediazides)
- Benzoquinones, tetrahalogen, action of pyridic bases on, 84, 72, 84
- Benzothiazoles, producing, 94, 171
- Benzo-trichloride, action on phenols, 35, 40; 41, 284 — Action on primary amines, 42, 7 — And phenols, and phenylamines, compounds, 47, 259 — Formation of colouring matters by action of, on phenols and tertiary aromatic bases, 38, 220
- Benzoxazole, 2-anilino- (see 2-Anilino-benzoxazole) — Anilodihydro- (see Anilodihydrobenzoxazole)
- Benzoxycamphene formation, 86, 289
- Benzoxycamphene formation, 86, 289
- Benzoyl acid (see Acid) — Chlor- (see Chlorbenzoyl) — Chloro- (see Chlorbenzoyl) — Compounds, 45, 77 — Derivatives of N-methylsalicylamide, 95, 78 — Derivatives of ortho-paramidophenol, 35, 124 — Derivatives of salicylamide, labile isomerism among, 92, 234 — Di- (see Dibenzoyl) — Dimethylamido-diethylamido-ortho- (see Dimethylamido-diethylamido-ortho-benzoyl) — Formation, racemisation during, 81, 167 — Methyl (see Methyl) — Mesitylene (see Mesitylene) — Mono- (see Monobenzoyl) — Nitro (see Nitrobenzoyl) — Preparation and purification, 9, 229 — Radicle, detection, 67, 25 — Radicle, detection in organic substances, 74, 276 — Radicle, coloured reaction of, 79, 206
- Benzoylacetate, ethyl- (see Ethylbenzoylacetate) — Ethyl hexahydro- (see Ethyl)
- Benzoylactic acid (see Acid) — Ester (see Ester) — Ethers (see Ethers)
- Benzoylacetone, dithio- (see Dithiobenzoylacetone) — Thio- (see Thiobenzoylacetone)
- Benzoylacyl peroxide, preparation and use as an intestinal antiseptic in cholera and dysentery, 87, 112
- Benzoylacrylic acid (see Acid)
- Benzoylamido- p -benzoyl- β -naphthol, 87, 263
- Benzoylaminomethylbenzophenones, transformation of dibenzoyltoluidines into isomeric, 89, 176
- Benzoylanilide, methyl- (see Methylbenzoylanilide)
- Benzoylbenzene, orthodi- (see Orthodibenzoylbenzene)
- Benzoylbenzoic acid (see Acid)
- Benzoylcamphor derivatives, stereoisomeric halogen, 85, 8 — Enolic, constitution, 86, 302 — Nitro- (see Nitrobenzoylcamphor)
- Benzoylcarbinol, behaviour on oxidation, 43, 47
- Benzoyl-carbonic acid (see Acid)
- Benzoyl chloride, action, 68, 38 — Action of phenolic thetines with, 97, 262 — Action on leucin, 37, 122 — Action on mono-substituted orthodiamines, 76, 71 — Action on phenols, 41, 284 — Action on trioxymethylene, 84, 147 — Ortho-nitro- (see Ortho-nitrobenzoyl-chloride) — Synthesis of, 9, 225
- Benzoyl chlorides, action on dried copper sulphates, 80, 198
- Benzoyl-chlorimide, di- (see Dibenzoyl-chlorimide)
- Benzoyl cinchonine, 68, 73
- Benzoyl cinchonine, 68, 221
- Benzoyl-dimethyl-aniline, mono- (see Monobenzoyl-dimethyl-aniline)
- Benzoyldiphenylbutadiene, di- (see Dibenzoyldiphenylbutadiene)
- Benzoylen-urea, 59, 169
- Benzoyl-para-nitrated chloride (see Chloride)
- Benzoylethane, diacetyl- (see Diacetylbenzoylethane)
- Benzoylethoxy-sulphocarbamic acid (see Acid)
- Benzoyl fluoride, 62, 296
- Benzoylformate of menthyl (see Menthyl) — Of methyl (see Methyl)
- Benzoyl furfuran, 80, 72
- Benzoylglyoxalate, ethyl (see Ethyl)
- Benzoylhydrazobenzene, di- (see Dibenzoylhydrazobenzene)
- Benzoyliodocamphor, 85, 260
- Benzoylised acids (see Acids)
- Benzoyl ketoximes, isomeric, 80, 182
- Benzoyl mesitylene, 47, 121 — Di- (see Dibenzoylmesitylene) — Tri- (see Tribenzoylmesitylene)
- Benzoyl monochloride methyl, 52, 59
- Benzoylnaphthylamide, 5, 324
- Benzoyl-1,4-naphthylenediamine, coloured diazo-salts derived from, 96, 9
- Benzoyl nicotine, 63, 85
- Benzoyl nitrate, 95, 35 — Preparation and reactions, 93, 18
- Benzoylnitrocamphor, 85, 260
- Benzoylonanthyldiene, 82, 255
- Benzoyl pentane, α - ω -Di- (see α - ω -Dibenzoylpentane)
- Benzoylphenol, 36, 255
- Benzoylphenyl acetylene (see Acetylene)
- Benzoylpropane, di- (see Dibenzoylpropane)
- Benzoyl-tannin, 61, 300; 64, 38
- Benzoyltoluidines, di- (see Dibenzoyltoluidines)
- α -Benzoyl- β -trimethacetylstyrenes, 90, 277
- Benzulmic acid (see Acid)
- Benz-synaldoxime, curves of molecular vibrations, 81, 141
- Benzyl acid (see Acid) — And mercury, compound, 12, 251 — Blue, 40, 47 — Chloro- (see Chlorobenzyl) — Compounds, substituted, 46, 44, 52 — Cyano- (see Cyanobenzyl) — Di- (see Dibenzyl) — Displacement by methyl in substituted nitrogen compounds, 84, 276 — Iod- (see Iodobenzyl) — Methyl (see Methyl) — Optical properties, 21, 286 — Paradinitro di- (see Paradinitro-dibenzyl) — Sulphoacids of, 21, 275 — Thio- (see Thiobenzyl)
- Benzyl acetate, 59, 301
- Benzylacetic acid (see Acid)
- Benzylacetophenone, α , β -dibromo- (see α , β -Dibromobenzylacetophenone)
- Benzyl alcohol, amines of chlorinated, 20, 166 — In fluid storax, 26, 229
- Benzyl alcoyl-cyano-acrylic ethers (see Ethers)
- Benzylamine, di- (see Dibenzylamine)
- Benzylamide, maldi- (see Maldi-benzylamide) — Nitro- (see Nitrobenzylamid)
- Benzylamines, 16, 208
- Benzylamine and benzil, interaction, 69, 118 — And ethylic chlor-acetate, interaction, 69, 70 — Base of cumine series which agree with, 19, 297 — Derivatives, 26, 94 — Formation, 84, 242 — Mono-, di-, and tri-, 68, 134 — Salts, 85, 312 — Tri- (see Tribenzylamine)
- Benzylamines, benzenesulphonylamino- (see Benzenesulphonylamino-benzylamines)
- Benzylaminocarbonic acids (see Acids)
- Benzylammonium iodide, triethyl- (see Triethylbenzyl-ammonium iodide)
- Benzylaniline, ethyl- (see Ethylbenzylaniline)

- Benzyl bisulphide, 5, 252
 Benzylanilinesulphonic acids (see Acids)
 Benzylborneol, 93, 187
 Benzylcamphene, 93, 187
 Benzylcamphor, bromised derivatives of, crystallographic constants of, 87, 93 — Derivatives, 84, 59 — Mono-bromo- (see Mono-bromo-benzyl camphor)
 Benzylcamphors, right-handed, halogen derivatives, 87, 70
 Benzyl chloride, 14, 273—Action of ammonia on, 84, 242—Action of zinc powder on, 84, 250—Action on camphor, 29, 80, 102—Action on naphthylamin, 28, 58—Action on non-symmetric metaxylidine, 65, 204—Action on orthotoluidin, 64, 61—Nitrated derivatives of, condensation with the naphthylamines, 87, 165—Para-chlor- (see Para-chlor-benzyl-chloride)
 Benzyl cinnamate, 19, 191
 Benzyl cyanide, action of bromine at high temperatures on, 43, 48 — Action of dry silver oxide and ethyl iodide on, 83, 189 — Condensation of, leading to formation of 1:3:di-aminonaphthalene and its derivatives, 94, 263 — Nitro- (see Nitro-benzyl-cyanide)
 Benzylcyclohexanol, 1-Methyl-4-di, (see 1-Methyl-4-dibenzyl-cyclohexanol)
 Benzylcyclohexanols, 1-Methyl-4 (see 1-Methyl-4-benzylcyclohexanols)
 Benzyl dichloride simultaneously treated with chlorine and nitric acid, 28, 84
 Benzyl-dihydroxy-pyridine, formation, 67, 36
 Benzyl diselenide, 100, 254 — Di- (see Dibenzyl-diselenide) — Nitro- (see Nitro-benzyl-diselenide)
 Benzyl-disulphide, di- (see Dibenzyl-disulphide) — Nitro- (see Nitro-benzyl-disulphide)
 Benzyl-dithio-urethane, 57, 108
 Benzyl ether, 24, 132; 25, 202
 Benzyl ethers of bromised nitrophenols, 52, 213
 Benzyl-ethyl-benzol, 26, 94
 Benzylethylidipropylsilicane, sulphonation, 97, 69
 di-Benzylethylpropylisobutylsilicane-sulphonic acid (see Acid)
 Benzylethylpropylsilicyl oxide, sulphonation, 97, 69
 Benzylethylsilicone, 97, 92
 Benzylhydrazide, action on glucose, 77, 152
 Benzylhydrindamine bromocamphorsulphonates, isomeric, 83, 116
 Benzylidene, crystallographic properties, 87, 47 — Derivatives of anthranol (see Anthranol) — Derivatives of anthrone (see Anthrone)—Formation, racemisation during, 81, 167—Methyl and ethyl silicidenes and anisol camphors, crystallographic properties of, 74, 49 — Right-handed, halogen derivatives, 87, 70
 Benzylidene acetophenone, addition of hydrogen cyanide to, 90, 253
 Benzylidene aniline (see Aniline)
 Benzylideneanilineacetacetate of ethyl (see Ethyl)
 Benzylidene bromide, 11, 188; 14, 166
 Benzylidene camphor, bromised derivatives, crystallographic constants, 87, 94—Derivatives, 84, 59—Oxidation products, 72, 61
 Benzylidene camphors, hexahydro- (see Hexahydrobenzylidene camphors)
 Benzylidene camphoroxime, 85, 226
 Benzylidene chloride, action of acetate of lead in acetic solution on, 80, 147—Action of sodium methoxide on, 89, 272
 Benzylidene menthone preparation, 84, 47
 Benzylidene-menthones, isomerism in the, 80, 24
 Benzylidene metamethylcyclohexanone, action of magnesium organic compounds on, 95, 312
 Benzyl iodide, action of, 93, 65
 Benzyl isocyanate, 25, 131, 108
 Benzyl isocyanurate, 25, 131
 Benzylisophthalic acid (see Acid)
 Benzylketone, di- (see Dibenzylketone)—Ethyl- (see Ethyl)—Methyl- (see Methyl)—Propyl- (see Propyl)
 Benzyl-ketons, oxidation products, 26, 23
 Benzyl magnesium chloride, action on crystal violet, 91, 58
 Benzyl mercaptan, 5, 252
 Benzyl mercaptans, nitro- (see Nitro-benzyl)
 Benzyl mesitylene, action of heat on, 52, 273—Di- (see Dibenzylmesitylene)
 di-Benzylmethylethylpropylsilicane, 95, 162
 Benzyl-naphthalenes, isomeric, 48, 203
 Benzylpentaethylbenzene, 66, 270
 Benzyl-phenol and derivatives, 44, 283; 45, 84—Para-, (see Para-benzyl-phenol)
 Benzylphenylallylmethylammonium compounds, 92, 244
 Benzylphosphine oxide, tri- (see Tri-benzylphosphine oxide)
 Benzylquinolium, camphorsulphonate, 88, 47
 Benzylquinolium chloride, 88, 47
 Benzyl-selenium and methyl-selenium compounds, 33, 18
 Benzyl selenosulphate, 100, 254—Nitro- (see Nitrobenzyl-selenosulphate)
 Benzyl silicon and diphenylsilicon oxide, 93, 57—Di- (see Dibenzylsilicone)
 Benzyl-sulpho acid (see Acid)
 Benzyl sulphoxide, 99, 20
 1-Benzyltetrahydroisquinolines oxidation of substituted, 100, 253
 Benzylthiourac, isomeric tertiary, 79, 103
 Benzyl-toluol, 26, 94; 28, 98
 Benzyl-urea, mono-, (see Monobenzyl-urea)
 Benzylate of soda (see Sodium)
 Benzylated camphor (see Camphor)—Cresol (see Cresol)—Naphthaline (see Naphthaline)—Phenol (see Phenol)
 Benzylc acid (see Acid)—Alcohol (see Alcohol)—Chloride (see Chloride)—Derivatives of salicyl series, 17, 81, 95—Ether (see Ether)

trogen in the elementary state, 95, 114—Combination of carbon disulphide with hydrogen and nitrogen, 80, 83—Combination of free hydrogen with ethylene, 47, 148—Combination of free oxygen with ethylene, 45, 173—Combination of free nitrogen with the elements of carbon disulphide, 72, 11—Combustion heat of camphor, 66, 281—Combustion heat of glycolic acid, 66, 172—Compound metallic radicles, 80, 315—Compounds of nitrogen with oxygen, 80, 83—Condensation of carbon monoxide, 61, 191—Condition of substances when in solution: salts of peroxide of iron, 25, 69—Constitution of hydricids when in solution, and inverse reactions which they call forth, 27, 168—Constitution of sugars isomeric with cane-sugars, 35, 155—Contribution to the history of ethers, 42, 210—Contribution to the history of sulphur and mercury, 52, 11; 53, 109—Contributions to the history of chemistry, 73, 214—Copper hydride, 41, 47—Copper mines of Sinai worked by the ancient Egyptians, 74, 121—Crystalline hydrates of sulphuric acid, 29, 206—Cyanides, 28, 124—Cyanogen and its action on potassium cyanide, 90, 3, 56—Cyanogen; solubility and polymerisation, 90, 56—Decomposition of formic acid, 10, 274, 285—Decomposition of hydricids by metals, 38, 253—Decomposition of hydroselenic acid by mercury, 40, 240—Decomposition of nitric acid by heat at low temperatures, 78, 254—Decomposition of nitric ethers and nitroglycerin by alkalis, 82, 169—Decomposition of oxygenated water and derivatives of barium binoxide, 41, 159—Decomposition of potassium permanganate by oxygenated water, 41, 195—Decomposition of water by the salts of protoxide of chromium, 78, 243—Definite hydrates formed by hydricids, 37, 102—Desiccation of gases, 61, 191—Detection of ordinary alcohol mixed with wood-spirit, 31, 238—Determination of heat of fusion, 36, 195—Determination of nitrogen as ammonia by means of soda-lime, 62, 322—Determination of organic carbon in soils which fix free nitrogen, 53, 251—Determination of volatile organic compounds of chlorine, 49, 213—Detonation of acetylen, cyanogen and endothermic compounds in general, 44, 260—Diagnoses of gaseous supersaturations of a chemical and physical order, 82, 243—Diagnosis of alcohols, 8, 75—Different varieties of carbon, 21, 274—Direct combination of cyanogen with hydrogen and with metals, 40, 88—Direct fixation of free atmospheric nitrogen by certain clayey soils, 52, 249—Direct fixation of gaseous nitrogen of atmosphere by arable soils, 55, 104—Direct fixation of gaseous nitrogen of atmosphere by vegetable earths, 55, 153—Direct reaction of sulphuric acid with mercury, 76, 323—Direct transformation of marsh gas into more condensed hydrocarbons, 18, 150—Direct union of propylen with hydricids, 32, 104—Distillation of mixed liquids, and purity of amylic alcohol, 8, 121—Distribution of an acid among several bases in solution, 32, 50—Does ozone combine with free nitrogen in presence of alkalis to form nitrous compounds and nitrates? 35, 44—Double cyanides, 79, 167—Double decompositions of haloid salts of mercury, 45, 251; 47, 36—Double decompositions of haloid salts of silver, 45, 162—Double salts formed by haloid salts of mercury, 45, 99—Dynamic isomerism, 69,

275—Earthy phosphates, 56, 23—Election as Fellow of Académie des Sciences, 27, 131—Electro-chemical relations between the allotropic forms of metals, particularly silver, 83, 191—Electrolysis of oxygenated water, 46, 46—Electromotor force of a zinc-carbon element, 46, 46—Equilibria and reciprocal displacements of the volatile alkalis, 62, 110, 322—Equivalent of organic compounds, 36, 43—Ethers contained in wines, 8, 82—Ethers of hydricids, 33, 107—Ethyl peroxide, 43, 233—Evaporation-heat of sulphuric anhydride, 42, 47—Exchanges of gases between living beings and the atmosphere, 69, 61—Explosion of gunpowder, 33, 129—Explosion of potassium chlorate, 80, 315—Explosive wave, 45, 86; 63, 49—Facts on mellitose, 61, 61—Faraday's law, 49, 148—Ferrocyanonyl, 64, 12; 66, 185—Fixation of atmospheric nitrogen, 60, 184—Fixation of atmospheric nitrogen by microbia, 66, 245—Fixation of atmospheric nitrogen by micro-organisms, 70, 233—Fixation of nitrogen by certain soils and vegetable moulds, 57, 121, 180, 191—Fixation of nitrogen by vegetable mould, 60, 161—Fixation of nitrogen by vegetable soil, 59, 217—Fixation of nitrogen during slow oxidations, 59, 167—Fixation of nitrogen upon organic bodies, 36, 89, 276—Force exerted by detonating gaseous mixtures, 23, 181—Force exerted by gunpowder and other explosive substances, 23, 131—Force of explosive bodies according to thermo-chemistry, 49, 69—Force of explosives, 48, 213—Formation and decomposition of binary compounds by electric effluve, 34, 21, 93—Formation of acetylen by means of electric discharges not attended with sparks, 25, 310—Formation of acetylene in incomplete combustions, 13, 77—Formation of amides, 33, 107—Formation of bromide of acetylen, 19, 273—Formation of endothermic combinations at high temperatures, 94, 46—Formation of ethers, 33, 95—Formation of ethers of hydricids in gaseous state, 39, 63—Formation of nitrates in plants, 61, 73—Formation of nitric acid during combustion of hydrogen, 82, 35—Formation of nitric acid during combustions, 81, 299, 311—Formation of oxygenated water, ozone, and persulphuric acid during electrolysis, 37, 82—Formation of precipitates, 24, 252, 288—Formation heat of fluorides, 49, 124—Formation-heat of hydrocyanic acid and cyanides, 42, 83—Formation-heat of oxides of nitrogen and those of sulphur, 42, 35—Formation-heat of persulphuric acid, 41, 159—Formenic fermentation, 61, 277—Formic acid, 10, 258—Fundamental data of thermo-chemistry, 35, 188—Galvanic oxidation of gold, 40, 240—Gases isomeric with propylene and their sulphates, 63, 253—General conditions of reactions, 15, 252—General method for estimation of simple bodies contained in organic compounds, 80, 316—Generation of hydrocarbides by means of metallic carbides, 83, 118—Graduation of tubes for use in gas-analysis, 56, 189—Haloid salts of silver and potassium, 45, 173—Heat attending formation of cyanogen, 39, 244—Heat evolved during reaction between free oxygen and potassium pyrogallate, 84, 256—Heat liberated by chemical combinations in gaseous state, 37, 21—Heat liberated by chemical reactions in the various states of bodies, 30, 43—Heat liberated in

reaction between water, ammonia and alkaline earths, baryta, strontia and lime; constitution of alkaline solutions, 27, 250 — Heat of combination in reference to the solid state; new thermic expression of reactions, 28, 57 — Heat of combustion and formation of iodine compounds, 81, 251 — Heat of combustion of principal gaseous hydrocarbons, 42, 12 — Heat of formation of ammonia, 40, 288 — Heat of formation of carbon disulphide, 13, 270 — Heat of formation of chloral hydrate, 41, 79 — Heat of formation of dimethyl, 42, 293 — Heat of formation of ethers formed by hydracids, 42, 270 — Heat of formation of gaseous chloral hydrate, 41, 47 — Heat set free by mixing two liquids, 22, 119 — Heats of combustion, 42, 132 — Heating and spontaneous ignition of hay, 69, 251; 70, 243 — High temperatures, 30, 98 — Historical notice of Lavoisier, 61, 169 — Hydrides of hydrocarbons, 18, 187 — Hydrocarbons, their compounds with picric acid, 15, 174 — Hydrochlorates of metallic chlorides and reduction of chlorides by hydrogen, 43, 46 — Hydrochloric ether of glycol, 44, 159 — Hydrogen and silver, 83, 35 — Hydrogenation of benzol and of aromatic compounds, 36, 276 — Hyposulphite of potassa, 33, 107 — Impurities of compressed oxygen and their effect on combustions in the calorimetric bomb, 86, 293 — Influence of oxygen upon the decomposition of hydracids by metals, 76, 325 — Influence of pressure on chemical phenomena, 35, 145 — Insoluble potassium compounds contained in the trunk and bark of oak trees, 93, 116 — "Introduction to the Study of the Chemistry of the Ancients" (review), 59, 192 — Isomeric inosites and their transformation-heat, 62, 309 — Isomeric states of haloid salts, 44, 304 — Isomeric states of styrol, 15, 227 — Isomeric states of styrolene, 14, 166 — Isomerism (allotropy) of the elements, 23, 47 — Isomerism of elementary bodies, 21, 288 — Lavoisier medal, report, 95, 12 — Law of electromotive forces of saline solutions, 87, 142 — Law relating to electromotive forces of piles depending on the reciprocal action of saline solutions and soluble electrolytes, 87, 129 — Limits of electrolysis, 44, 273 — Limits of etherification, 37, 21 — Liquid contained in a very ancient glass vase, 37, 52 — Magnetic oxide of iron, 43, 59; 44, 93 — Metals and minerals from ancient Chaldaea, 55, 114 — Meta-naphthaline, 22, 168 — Meta-sulphites, 47, 105 — Method for studying gaseous interchange between living organisms and the surrounding atmosphere, 70, 222 — Method of making a qualitative analysis of mixed gas, 13, 117 — Micro-organisms, 67, 228 — Micro-organisms of the soil which fix nitrogen, 70, 233 — Moderated oxidation of carbides of hydrogen; amylen, 31, 40 — Multiple conditions of antimony sulphide, 53, 60 — The name "bronze," 62, 296 — Natural formation of manganese dioxide, 47, 93 — Nature of the chemical elements, 29, 171 — Neutralisation; Titration of acids and alkalis of complex function, 84, 11 — Neutralisation of aromatic acids, 52, 224; 53, 96 — Neutralisation of phosphoric acid, 83, 311 — New carburetted hydrogen, 1, 46 — New class of compound metallic radicals, 13, 116, 139, 218, 230 — New class of perbromides, 51, 166; 52, 48 — New combination of argon, 72, 1 — New compounds of

sugar with acids, 3, 15 — New contribution to history of carbon, 24, 134 — New experiments on the isomers of trichlorhydrine, 26, 118 — New experiments on the limit of intensity of the current from a pile corresponding to the manifestation of an exterior electrolytic action apparent in a voltameter, 86, 209 — New method for the synthesis of organic acids, 22, 168 — New method of organic analysis, 65, 119; 66, 185 — New methods for testing the purity of alcohols and ethers, 7, 279 — New observation on the part played by pressure in chemical phenomena, 37, 41 — New observations on the chemical reactions of the electric effluve and on persulphuric acid, 37, 102 — New relation between the electromotive forces of saline solutions, 85, 19 — New remarks on formation-heat of gaseous chloral hydrate, 41, 171 — New remarks on quantities of heat liberated by mixture of water with sulphuric acid, 36, 256 — New researches on the action of hydrogen peroxide on silver oxide, 83, 226; 84, 231 — New researches on the chemical phenomena produced by electricity of tension, 34, 272; 36, 276 — New researches on formation of hydrocarbons, 6, 115 — New researches on insoluble alkaline compounds contained in living vegetables, 93, 105 — New researches on the isomerism of sulphocyanic ethers, 83, 71 — New researches on pyrogenous carbides and on the compositions of coal-gas, 33, 200 — New researches on relative stability of salts, whether alone or in presence of water, 62, 74 — New researches on thermo-chemistry, 20, 192 — New studies on the fluorescence of argon and combination with elements of benzene, 72, 13 — Nickel carbonyl, 66, 185 — Notation of Berzelius, 36, 33 — Observations on argon, fluorescent spectrum, 71, 212; 72, 78 — Observations on the density of vapour of iodine, 42, 82 — Observations on M.M. Nobel and Abel's memoir on explosives, 40, 90 — Observations on M. Pasteur's paper on "Alcoholic fermentation," 39, 21 — Observations on the principle of maximum work and on spontaneous decomposition of hydrated bin-oxide of barium, 36, 245 — Observations on reply of M. Wurtz relative to chloral hydrate, 40, 143 — Observations on solution of solid metals in mercury and other molten metals, 83, 118 — Organic synthesis and thermo-chemistry, 47, 155 — Origin of bronze, 59, 265 — Origin of carbides and combustible minerals, 13, 214, 277 — Origin of chemical combination, 83, 35, 107 — Origins of alchemy, 51, 165 — Oxidation of alcohols, 8, 293 — Oxidation of carbides of hydrogen, 19, 273 — Oxidation of hydrocarbons, 21, 274 — Oxidation of nickel carbonyl, 64, 284 — Oxidation of wine, 9, 94 — Oxychloride of carbon, 21, 107 — Oxygenated water and chromic acid, 59, 157 — Oxysulphide of carbon, 26, 83 — Part played by auxiliary acids in etherification, 37, 274; 38, 8 — Part played by time in formation of salts, 42, 234; 44, 92 — Permeability of glass vessels, 91, 279 — Permeability of quartz vessels, 91, 264, 256 — Persulphates, 64, 37 — Persulphuric acid, 37, 73 — Phenols of a complex function, 52, 213 — Piles consisting of different liquids with identical metallic electrodes, 83, 185 — Polymers of acetylene, 14, 152, 165, 254, 278 — Preparation of chlorine, 42, 132 — Preparation of nitrogen

from atmospheric air, 61, 61 — Preparation of pure nitrogen, 21, 250 — Presence of benzene vapour in lighting gas, 59, 37 — Presence of benzol in coal-gas, 35, 155 — Present state and future of thermo-chemistry, 40, 214 — Principle of maximum work and of entropism, 70, 12 — Principle of surfaces of separation, 45, 22 — Properties of acetylene, 13, 117, 134 — Proportion of ethers in brandies and vinegars, 9, 45 — Proportion of ethers in wines, 8, 71 — Protochloride of copper, 41, 11 — Purple dye of the Ancients, 48, 279 — Pyrogenous decomposition of nitrate of ammonia, and on volatility of ammoniacal salts, 33, 210 — Pyrogenous decomposition of potassium sulphite, 49, 36 — Quadricarbide of hydrogen, 1, 287 — Quantity of caloric set free during formation of organic nitrated compounds, 24, 85 — Raffinose, 60, 221 — Reaction between mercury and hydrochloric gas, 38, 264 — Reaction between nitrogen and water, 36, 22 — Reaction of argon and nitrogen with mercury alkyls, 80, 135 — Reaction of bromine with the chlorides and with hydrochloric acid, 51, 166; 52, 48 — Reaction of hydrogen upon sulphuric acid, 76, 325 — Reaction of oxygenated water with chromic acid, 59, 48 — Reaction of phenol on ammonia, 21, 250 — Reactions between sulphur, carbon, their oxides and their salts, 49, 11 — Reactions between vegetable soil and atmospheric ammonia, 61, 181 — Reactions developed between pyrogallol and oxygen in presence of alkalies, 78, 71 — Reactions of argon and nitrogen on mercurial radicals, 81, 46 — Reactions of hydrogen peroxide with chromic acid, 59, 97 — Reagent for alcohol, 24, 144 — Reciprocal actions and equilibria between hydrochloric acid, hydrogen sulphide, and salts of antimony, 53, 60 — Reciprocal actions of hydrocarbons, 15, 4 — Reciprocal displacements among the hydracids, 23, 106; 43, 166 — Reciprocal displacements between oxygen and halogens, 39, 196; 60, 251 — Reciprocal displacements between oxygen, sulphur and the halogens combined with hydrogen, 38, 264 — Reciprocal displacements between weak acids, 38, 264 — Reciprocal displacements of acids combined with mercuric oxide, 46, 34 — Reciprocal displacements of halogens, 41, 250; 46, 23 — Reduction by, and saturation with, hydrogen of organic compounds, 23, 227 — Reduction of alkaline sulphates by hydrogen and carbons, 61, 301 — Reduction of organic compounds, 15, 187, 279 — Refrigerating mixtures formed by an acid and a hydrated salt, 41, 295 — Relation between heat of solution and heat of dilution in complex solvents, 41, 10 — Relation between luminous and chemical energy and displacement of halogen elements by oxygen, 79, 34 — Relative affinities and reciprocal displacements of oxygen and halogens combined with metals, 37, 152 — Remarks concerning the influence of atmospheric electricity of low tension upon vegetation, 38, 69 — Remarks on the characters of the organic chlorinised gases and vapours, 43, 105 — Remarks on decomposition of ammoniacal salts by metallic bases and oxides, 54, 11 — Remarks on real existence of a matter formed of isolated atoms comparable to material points, 34, 8, 93 — Remarks on the Saccharoses, 41, 10; 43, 117 — Remarks

- on the specific heats of elementary gases, their atomic constitution, 75, 95 — Remarks on the use of zinc-coke elements in electrolysis, 46, 10 — Remarks on M. Wurtz's note on chloral hydrate, 40, 99 — Reply to note by M. Wurtz relating to law of Avogadro and atomic theory, 35, 276 — Reply to M. Pasteur, 39, 63 — Researches on aldehyd, 33, 54 — Researches on alkaline sulphites, 47, 105; 49, 36 — Researches on anhydrous chloral and its hydrate, 36, 54 — Researches on antimony sulphide, 53, 60 — Researches on argon and its combinations, 80, 80 — Researches on basic salts and atacamite, 42, 210; 44, 94 — Researches on chemical combination, 91, 256 — Researches on chloral and its hydrate, 37, 21 — Researches on the chromates, 47, 128; 49, 35 — Researches on the compounds of silver and mercury, 83, 107 — Researches on cyanic acid, 74, 121 — Researches on diamines, 80, 268 — Researches on direct synthesis of nitric acid and nitrates from their elements at ordinary temperatures, 94, 36 — Researches on drainage, 56, 200 — Researches on electric piles formed by reciprocal action of oxidising and reducing liquids, 85, 251 — Researches on electrolysis, 44, 285 — Researches on electromotive forces, 85, 227 — Researches on fatty acids and their alkaline salts, 31, 269 — Researches on formation of organic compounds containing sulphur, 83, 71 — Researches on glycolic ether and oxides of ethylen, 44, 143 — Researches on helium, 75, 95 — Researches on the insoluble potassium compounds contained in wood charcoal, 93, 44 — Researches on iodic acid, 35, 196 — Researches on isomerism in aromatic series, 52, 176 — Researches on the law of electromotive forces developed by reciprocal actions of saline solutions, 87, 286 — Researches on lead iodide, 46, 290 — Researches on organic alkalies, 42, 95 — Researches on the oxygen compounds of nitrogen, 29, 82 — Researches on ozone and electric effluve, 39, 63 — Researches on perchloric acid, 44, 168 — Researches on persulphuric acid, 41, 133 — Researches on phenylhydrazine, 70, 49 — Researches on phosphates, 54, 285 — Researches on reciprocal action of two liquids, 86, 35 — Researches on relations existing between luminous energy and chemical energy, 78, 266 — Researches on so-called hydride of copper, 41, 22 — Researches on solution, 30, 81 — Researches on sugars, 54, 213 — Researches on trimethylene and propylene and new class of hydrogen carbides, 69, 276 — Researches on uric series, 81, 118 — Re-solution of precipitates, 28, 124 — Refene; its constitution, 15, 253 — Rotatory power of metastyrolen, 37, 40; 38, 34 — Rotatory power of styrolen, 33, 116; 36, 153 — Role of hydrogen and carbon in manufacture of steel, 30, 30 — Saltpetre industry in France before the 19th century, 24, 35 — Scale of temperatures, and molecular weights, 49, 255 — Silica vessels as used in chemistry, 91, 191 — Silver and carbonic oxide, 83, 35 — Silver teroxide, 41, 195 — Simultaneous phenomena, oxidation, and hydration under combined influence of free oxygen and light, 80, 243 — Simultaneous reaction of several acids and alcohols, 8, 20 — Slow changes in copper objects, 69, 205 — Solution of chlorine in water, 42, 119; 44, 195 — Sources of tin in ancient world, 55, 116 — Specific heats and melting heat of gallium, 37, 195; 39, 228 — Spectra of argon and of aurora borealis, 71, 176 — Speed of propagation of explosive phenomena in gases, 44, 105 — Spontaneous oxidation of mercury and other metals, 42, 329; 44, 169 — Stability of oxygenated water, 41, 250 — Stability of ozone, 37, 83 — Stability of salts of fatty acids in presence of water and reciprocal displacement of acids, 31, 185 — Studies on persulphuric acid and its salts, 66, 185 — Sublimation of yellow and red mercury iodides, 68, 318 — Suboxides of carbon, 93, 160 — Sulphovinat, 27, 195 — Synthesis of acetic acid from acetylen, 20, 153; 21, 274 — Synthesis of acetylene by direct combination of carbon with hydrogen, 5, 184 — Synthesis of alcohol, 80, 217 — Synthesis of camphors by oxidation of camphenes, 32, 18 — Synthesis of formic acid, 10, 201 — Synthesis of oxalic acid, 15, 149 — Synthesis of phenol, 20, 166 — Synthesis of phenol by acetylene, 79, 47 — Synthetical and analytical studies on coal-tar, 15, 227 — Systems of chemical notation, 36, 275 — Thermic formation of compounds of carbonic oxide with other elements, 38, 231 — Thermic formation of isomeric bodies, 37, 21 — Thermic formation of ozone, 34, 93 — Thermic formation of pyrogenous carbides, 43, 105 — Thermic formation of two isomeric propylic aldehyds, 34, 133 — Thermic researches on different states of aggregation of sulphur, 21, 214 — Thermic researches on formation of alcohols and on etherification, 33, 86 — Thermic researches on hydro-sulphurous acid, 34, 133 — Thermic researches on the reaction between ammonia and magnesium salts, 54, 273 — Thermic researches on sulphur, 21, 214; 22, 168; 26, 82 — Thermic studies on the aromatic series, 52, 213 — Thermo-chemical conditions of pyrogenic reactions, 15, 227 — Thermo-chemical data, 40, 88, 288; 49, 82 — Thermo-chemical determinations, 36, 256; 80, 123 — Thermo-chemical investigations on solution and polymerisation of cyanogen, 90, 82 — Thermo-chemical relations between the isomeric states of ordinary glucose, 71, 269 — Thermo-chemical researches on ammoniacal salts, 24, 181, 240 — Thermo-chemical researches on cyanogen series, 24, 144 — Thermo-chemical researches on phosphorus fluoride, 51, 60 — Thermo-chemical researches on sulphurets, 22, 82; 23, 226 — Thermo-chemistry, heat of formation of nitrogen compounds, 23, 154 — Thionio series, 59, 265, 277 — Tools and arms of the age of pure copper in Egypt, 75, 311 — Total synthesis of acetyl-propylene and terphenic carbides, 83, 166 — Transformation of aromatic carbides into formenic carbides, 34, 184 — Transformation of carobn oxysulphide into ordinary urea and sulphurea, 45, 198; 47, 154 — Transformation of the diamond into black carbon during its oxidation, 87, 11 — Transformation of nitrates into nitrogenous organic compounds in the soil, 57, 131 — Tribromhydrines, 22, 21 — Trichlorhydrine and substances isomeric therewith, 21, 166, 287 — Trimethylene, 80, 183 — Union of carbides of hydrogen with hydracids and halogens, 33, 54 — Union of silver with oxygen, 73, 35 — Universal presence of nitrates in vegetable kingdom, 50, 45 — Use of alternating currents in chemistry, 89, 285 — Use of calorimetric bomb, 66, 121 — Use of compressed oxygen in calorimetric bomb, 65, 119 — Use of hot and cold tubes in chemical reactions, 91, 211 — Vapour density of iodine, 44, 94 — Various liquids contained in antique vases, 75, 312 — Various modes of the explosive decomposition of picric acid and of nitro-compounds, 57, 23 — Various phenols, 53, 96 — Velocity of propagation of detonation in solid and liquid explosives, 51, 142 — Volatile nitrogenous compounds given off by vegetable mould, 63, 95

- Bishop's process of lime generation, 37, 89
- Bismuth, 12, 96; 15, 216; 64, 159 — Action on hydrochloric acid, 67, 24 — Action of silicon on, 74, 73 — Action on phosphoric acid, 15, 111 — Administration in soluble form, 8, 288 — Alka line (*see* Alkaline) — Amorphous, 59, 107 — And alkalis, double hypsulphites of, 90, 71 — And aluminium alloys, 90, 35 — And aluminium alloys, determination of fusion-points, 94, 170 — And bismuth compounds, 42, 242 — And cadmium, separation, 65, 136 — And cadmium and copper, separation, 41, 263 — And chlorine compounds, 1, 154 — And cobalt, separation, 72, 91 — And copper alloys, 91, 188 — And copper, separation, 25, 85, 100; 48, 296; 68, 51; 93, 22 — And lead, separation, 65, 28, 137; 58, 129; 75, 27 — And lead and tin, state of equilibrium of the ternary system, 78, 95 — And magnesium, manganese and zinc, equivalent weights of, 50, 69 — And mercury, separation, 72, 64; 79, 48 — And other metals, separation, 18, 36 — And oxybenzoic acids, compounds, 90, 57 — And potassium iodides, double, 61, 300 — And sulphur mixtures, fusibility, 88, 269 — And tannin compounds, 99, 238 — And thallium, separation, 7, 109 — And water, freezing, 16, 321 — Aromatic compounds containing, 78, 24 — Arsenic and thallium in, 7, 77 — Arsenic in commercial preparations of, 6, 304 — Arseniferous, and nitric acid, behaviour, 41, 23 — Assay, 85, 3 — Atomic weight, 44, 236; 49, 200; 51, 73; 63, 235; 64, 237; 70, 204; 89, 174; 93, 55, 204; 95, 217; 99, 69; 100, 278 — Coating brass with, 21, 168 — Commercial, silver in, 44, 24 — Compounds, 32, 277; 33, 199; 34, 203; 35, 122, 176, 216; 37, 130; 88, 243 — Compounds, fluorescence of, 54, 225 — Deposition, electrolytic, 97, 26 — Deposits of Meymac, minerals from, 29, 61 — Detection, 26, 150; 34, 16; 35, 176; 36, 249, 261, 286; 43, 135 — Determination, 28, 249; 58, 49; 64, 253, 75, 50 — Determination, electrolytic, 98, 202 — Determination, quantitative, and separation from copper, cadmium, mercury and silver, 93, 31 — Determination, quantitative, and separation from heavy metals as phosphoric acid salt, 93, 31 — Determinations of small quantities, 97, 45 — Effects on ductility of silver, 56, 224, 232, 247 — Electric resistance, 51, 142; 59, 301; 60, 10 — Electro-chemical deposits, 34, 227 — Electrolysis, 50, 175 — Electrolysis of solutions of, 48, 10, Estimating, 33, 39; 35, 122; 36, 211; 41, 153; 79, 156; 81, 227; 82, 84; 89, 10 — Estimation by electrolysis, 87, 131; 90, 118 — Estimation in state of sulphurets, 1, 119 — Estimation of small amounts of in anti-friction alloys, 74, 160 — Estimation, titrimetric, by arsenious acid in alkaline solution, 81, 72 — Fluorescences of, 54, 309; 56, 90 — Freezing, 16, 21 — From Joachimthal pitchblende, radio-active constituents, 83, 224 — From Meymac, 30, 156, 175 — From Peru, 20, 249 — Glance, 65, 53 — In form of chromate, iodimetric estimation, 89, 143 — In a magnetic field, variations of physical properties of, 49, 277 — In a magnetic field, transparency of, 77, 116 — In alloy with lead, determining, 13, 291 — In commercial lead, detection by electrolysis, 48, 193 — In copper, 4, 264 — In lead, 49, 36 — In lead alloys, 16, 25 — In metallic iron and slags, 58, 27 — In Saxony, production, 24, 181 — In silver, effect, 57, 191, 192 — Influence on quality of copper, 2, 179 — Iso-morphism with antimony and arsenic, 1, 209 — Lead tin (*see* Lead tin-bismuth) — Means of obtaining, 9, 102 — Metallic, and liquor bismuthi et ammonia citratis, 18, 74 — Metallurgy, 29, 219; 55, 71; 56, 241; 63, 30; 67, 63 — Minerals of Bolivia, Peru, Chili, 36, 256 — Ore, discovery of, 20, 164 — Ore of Meymac, metallurgic treatment, 29, 133 — Ores, docimastic assaying and separation from copper, arsenic, antimony and lead, 25, 85, 100 — Pentavalent, 97, 133 — Purification, 35, 206 — Pyrophosphoric, 90, 148 — Radio-active, 86, 52 — Reaction, 58, 221 — Salts, 34, 119 — Salts and mercury, separation, 77, 165 — Salts, crystallised, production, 81, 195; 89, 87 — Salts, halogen, 44, 236 — Separation in the cold, 69, 184 — Separation from the metals of the copper and the iron group, 74, 162 — Silver containing, 55, 137 — Solution, alkaline, as a reagent for starch-sugar in urine, 50, 176 — Tellur (*see* Tellur-bismuth) — Test for glucose, 14, 21 — Thermo-electrical properties of, effect of magnetisation on, 57, 49 — Use as a means of separation in the rare earth series, 89, 52 — Von Kobel's test for, 92, 168
- Bismuth-aluminium alloys, property of, 92, 10
- Bismuth arseniate, 89, 87
- Bismuth bromide, 30, 190
- Bismuth carbonate, commercial, 10, 259
- Bismuth carbonates and oxalates, 99, 24
- Bismuth chloride, 65, 96 — And oxygen bases, compounds, 86, 26 — Hydrolytic dissociation, 99, 252
- Bismuth, citrate, 25, 290
- Bismuth fluoride, 56, 257
- Bismuth, gallanilide, 69, 13
- Bismuth, haloal compounds and hydrogen sulphide, interaction, 71, 35
- Bismuth hydrochlorate, 58, 20
- Bismuth hypophosphite, 71, 72
- Bismuth iodide, 56, 257; 95, 213, 228 — Double salts of, 4, 225 — Hydrolytic dissociation, 100, 207
- Bismuth iodides, alkyl (*see* Alkyl-bismuth) — Of vegetable basis, 77, 138
- Bismuth ion, existence of a bivalent, in aqueous solution, 97, 176
- Bismuth mellate, 90, 148
- Bismuth nitrates, 35, 276
- Bismuth nitrites, complex, 91, 209
- Bismuth nitrosalicylates, 70, 238; 71, 186
- Bismuth oxalates and carbonates, 99, 24
- Bismuth oxide, 83, 146 — Action on metallic solutions, 86, 186 — Action on solutions of sesquioxides, 3, 147 — And sulphuric acid, combinations, 24, 265 — As an agent for opening up silicates, 45, 81 — Hydrated, action on acid isomers of gallic acid, 89, 227 — Velocity of reduction by carbon monoxide, 96, 315
- Bismuth oxides, coloured reactions, 54, 312 — Two new, 43, 289
- Bismuth oxychloride, 4, 83
- Bismuth oxyiodide, 74, 200
- Bismuth perchlorate, 33, 15
- Bismuth peroxide, electrolytic, constitution, 87, 283
- Bismuth phosphate, 89, 87
- Bismuth phthalate, 90, 148
- Bismuth protosulphate, action of hydrogen on, 83, 71 — And antimony sulphide mixtures, fusibility, 89, 12 — And silver sulphide mixtures, fusibility, 89, 11
- Bismuth salicylate, 63, 284 — Basic, 64, 200 — Crystallised, 84, 210
- Bismuth selenide, 4, 116 — Compounds of silver selenide with, 97, 288
- Bismuth silver, 20, 108 — Alloys, cupellation of, 69, 255 — Alloys, cupellation of losses in, 74, 318 — Glance, artificial, 62, 206
- Bismuth subazotate, 68, 87, 209
- Bismuth subnitrate, 3, 31 — 24, 46; 33, 33; 89, 87 — Adulteration, 18, 74 — 21, 105 — Arsenic in, 17, 200 — Pharmaceutical, plumbic oxide in, 37, 184 — Phosphate of lime in, 18, 124 — Silver in, 27, 84 — Titration, 43, 118
- Bismuth suboxide, 86, 217
- Bismuth sulphates, 80, 300

- Bismuth sulphide, solubility in sodium sulphide, 74, 169
- Bismuth super-oxide, electrolytic, 87, 93
- Bismuth tannate, 1, 137
- Bismuth telluride, 98, 60
- Bismuth trichlorides, decomposition, 32, 229
- Bismuth trisulphide, solubility in alkali sulphides, 100, 251
- Bismutate of sodium (*see* Sodium)
- Bismuthates, 54, 293
- Bismuthi et ammonie citras, 11, 28—Liquor, preparation, 13, 61
- Bismuthic acid (*see* Acid)—Gold (*see* Gold)—Minerals (*see* Minerals)
- Bismuthine, 43, 232
- Bismuthogallie acid (*see* Acid)
- Bismuthophenic compounds, 82, 315
- Bismuthoprotocatechuic acid (*see* Acid)
- Bismuthous nitrate (*see* Nitrate)—Oxide (*see* Oxide)
- Bisons, preparation of hides of, 23, 142
- Bisson, E., electro-magnets, 38, 34

BOOKS, REVIEWS AND NOTICES OF.

A.B.C., Five-figure Logarithms, 89, 48
 Aachen, Programme of the Royal Rhenish-Westphalian Polytechnic School at, 28, 108; 32, 81; 34, 236; 36, 108
 Aachen, Royal Technical High School, New Institute for Smelting and Electro-metallurgy, 87, 273
 Aberdeenshire Agricultural Association, Proceedings of the, 40, 42; 42, 232
 Abrus Poison, Non-Bacillar Nature of, 49, 286
 Accidents with Mineral Oil Lamps, 62, 48
 Accounts, Process Cost, 97, 287
 Accumulators and Private Light Installations, Management of, 57, 100
 Accumulators, Production of, 88, 136
 Acetates and Vinegar, Practical Treatise on the Manufacture of, 61, 47
 Acetopathy, or the Application of Medical Chemistry to Acute and Chronic Diseases, 21, 79
 Acetylene, 82, 168
 Acetylene and its Applications, Incandescence by Gas and Petroleum, 74, 80
 Acetylene, its Theory and Applications, 87, 226
 Acetylene, Lighting by, 78, 264; 85, 226
 Acid, Acetic and Vinegar, Ammonia and Alum, 51, 237
 Acid, Boracic, and Borax, Third Treatise on the Effects of, on the Human System, 93, 177
 Acid, Carbolic, and its Compounds Antiseptic System, a Treatise on, 25, 31
 Acid, Hydrochloric, and Chlorine, Production of, Independently of the Leblanc Alkali Process, 69, 59
 Acid, Hydrochloric, Recovery of, 63, 94
 Acid, Phosphoric, Arseniates, Phosphates, and Modifications of, 71, 135
 Acid, Phosphoric, Estimation by Magnesia for Commercial Purposes, 40, 22
 Acid, Salicylic, Part of in the Formation of Salts with Medicinal Bases, 47, 164
 Acid, Solfuric, 54, 249
 Acid, Sulphuric, and Alkali, Theoretical and Practical Treatise on the Manufacture of, with the Collateral Branches, 39, 287; 42, 21; 43, 0; 64, 199, 210; 71, 148; 73, 268; 88, 202
 Acid, Sulphuric, Manufacture, Chemistry of, 28, 123
 Acid, Sulphuric, Manufacture, Improvements in, 39, 288
 Acids and Alkalies, Manufacture of, Practical Treatise on the, 39, 120
 Acid Sulphuric, Sulphate of Soda, and Bleaching Powder, Manual of the

Alkali Trade, including the manufacture of, 42, 22
 Acids, Abridgments of Specifications Relating to, 1022-1866, 20, 116
 Acids and alkalies, manufacture of, 69, 107
 Acids and Alkaline Carbonates, Attending's Saturation Tables for, 21, 212
 Acids usually met with in Analysis, Notes on the Detection of the, 47, 222
 Acoustics, Electricity, and Magnetism, 14, 129
 Acting and Kindred Subjects Considered in Relation to Genius and Talent, 11, 80
 Actinograph, Hunter and Driffeld's, Instructions for the Use of, 65, 142
 Adulterants, Food, Detection of the Common, 97, 191
 Advertising, Philosophy of, 47, 140
 Aerial Autometry, Inkings of, 29, 249
 Aeronautics, Abridgments of Specifications Relating to, 1815-1866, 22, 19
 Aetherischen Oele, 80, 122
 Affinity and Chemical Action, Correlation Theory of, 57, 315
 Africa, South, Proceedings of the Chemical and Metallurgical Society of, 77, 248; 89, 46
 Agenda du Chimiste, 30, 88; 41, 217, 250; 47, 154; 61, 240
 Agendas Dunod, No. 4, Arts et Manufactures, Chemie, 36, 243
 Agglutinants of all Kinds for all Purposes, 95, 274
 Agricultural Analysis, 68, 232; 69, 106; 72, 244
 Agricultural Analysis, Principles and Practice of, 75, 165; 95, 147
 Agricultural and Horticultural Association, Address to, 55, 138
 Agricultural Chemical Analysis, 48, 34
 Agricultural Chemistry, 66, 171, 197; 68, 316
 Agricultural Chemistry and Geology, Catechism of, 40, 132
 Agricultural Chemistry and Geology, Elements of, 37, 17, 44, 224
 Agricultural Chemistry and Zoology, Elementary, 73, 93
 Agricultural Chemistry, Economical Aspect of, 55, 151
 Agricultural Chemistry, Elements of, 3, 341
 Agricultural Chemistry, Johnston's Catechism of, 67, 14
 Agricultural Chemistry Johnston's Elements of, 69, 94
 Agricultural Chemistry, Laboratory Guide for Students of, 10, 166; 29, 152; 36, 31
 Agricultural Chemistry of Sugar-Cane, Observations on, 28, 80
 Agricultural Chemistry, Practical, 68, 316
 Agricultural Chemistry, Report of some Experiments in, carried out in the Laboratory of the Royal Agricultural College, 16, 200

 Ammonia Refrigeration, **71**, 268
 Ammonia, the New Procedures for its Manufacture and its Applications, **74**, 48
 Ammonia Salts and Nitrogen, Comparative Value of, **55**, 33
 Ammonia-Soda Process in its Application to the Disposal of Gas-Liquors, as Patented by Dr. G. T. Gerlach, **35**, 242
 Ammonia Sulphate in Agriculture, Utility of, **81**, 167
 Ammoniacal Waters of Gas-Works, Investigation of some of the, and on the Presence of Chlorine Compounds in Coals, **26**, 226
 Ammunition and Gunpowder, **91**, 7
 Anæsthesia, Surgical, **42**, 183

Anæsthetics, Induction of Sleep, and Insensibility to Pain, by the Self-administration of, **31**, 19
 Analyses, Chemical, and Commercial Values and Prices of Fertilisers Sold in Georgia for the Season 1875-6, **34**, 50
 Analyses, Chemical, Ceylon Manual of, **71**, 159
 Analysis, Agricultural, **68**, 232; **69**, 106; **72**, 244
 Analysis, Agricultural Chemical, **48**, 44
 Analysis, Agricultural, Principles and Practice of, **71**, 242; **75**, 165
 Analysis, Biochemical, Summary of General, **96**, 220
 Analysis, Blowpipe, **40**, 287; **65**, 237; **84**, 267
 Analysis, Blowpipe, Alphabetical Manual of, **41**, 249
 Analysis, Blowpipe, and Determinative Mineralogy, Elderhorst's, Manual of Qualitative, **29**, 70
 Analysis, Blowpipe, Contributions to, **12**, 240
 Analysis, Blowpipe, Manual of Determinative Mineralogy, with Introduction to, **32**, 60
 Analysis, Blowpipe, Plattner's Manual of, **31**, 270
 Analysis, Blowpipe, Qualitative, **66**, 293
 Analysis, Blowpipe, Qualitative and Quantitative, **46**, 265
 Analysis, Capillary, Appendices to Investigation on, **60**, 158
 Analysis, Chemical, **95**, 106; **98**, 196
 Analysis, Chemical, Abstract of, **75**, 110, 189
 Analysis, Chemical, and Research, Practical Manual of, applied to the Arts and Manufactures, **34**, 171
 Analysis, Chemical, Auxiliary Tables for Instruction in, **40**, 311
 Analysis, Chemical, by Quantitative Electrolysis, **57**, 68
 Analysis, Chemical, Commercial Handbook of, **31**, 248
 Analysis, Chemical, Complete Treatise of Technical, **97**, 71
 Analysis, Chemical Course of Qualitative, **27**, 160; **31**, 59; **41**, 282; **50**, 224
 Analysis, Chemical, Cyclopædia of Quantitative, **22**, 297
 Analysis, Chemical, Elementary, **67**, 11
 Analysis, Chemical, Elementary Qualitative, **71**, 12
 Analysis, Chemical, Elementary Quantitative, **74**, 173
 Analysis, Chemical, Elements of Qualitative, **13**, 261
 Analysis, Chemical, Exercises in Qualitative, **29**, 121
 Analysis, Chemical, Exercises in Quantitative, **56**, 228
 Analysis, Chemical, Handbook of, **81**, 105
 Analysis, Chemical, Handbook of Applied Pharmaceutical and Technical, **23**, 81
 Analysis, Chemical, Inorganic Qualitative, **95**, 154
 Analysis, Chemical, Introduction to, **92**, 178
 Analysis, Chemical, Introduction to Science and Practice of Qualitative Inorganic, **78**, 231
 Analysis, Chemical, Laboratory Guide in Qualitative, **78**, 33
 Analysis, Chemical, Laboratory Outline for Determinations in Quantitative, **97**, 297
 Analysis, Chemical, Manual of, **91**, 84
 Analysis, Chemical, Manual of, as Applied to the Examination of Medicinal Chemicals, **27**, 112
 Analysis, Chemical, Manual of Qualitative, **1**, 20; **33**, 208
 Analysis, Chemical, Manual of Qualitative, Tables Forming an Appendix to W. Dittmar's, **34**, 68
 Analysis, Chemical, Notes on Qualitative, **66**, 208
 Analysis, Chemical, of Industrial Products, Treatise on, **96**, 83

BOOKS, REVIEWS AND NOTICES OF.

- Analysis, Chemical, of Inorganic Substances, Detailed Course of Qualitative, 75, 168; 76, 117
- Analysis, Chemical, of Inorganic Substances, Systematic Course of Qualitative, 66, 109
- Analysis, Chemical, of Iron, 99, 117
- Analysis, Chemical, Outlines of Qualitative, 95, 46
- Analysis, Chemical, Post's Technical, 95, 46, 310; 96, 180; 98, 23, 232
- Analysis, Chemical, Practical Treatise on, 49, 276; 67, 202
- Analysis, Chemical, Qualitative, 20, 55; 31, 59; 35, 251; 41, 282; 42, 208; 45, 162; 56, 179; 65, 208; 66, 208; 68, 184; 77, 297; 100, 232
- Analysis, Chemical, Qualitative, and Laboratory Practice, 30, 17
- Analysis, Chemical, Qualitative and Quantitative, 79, 286; 93, 222
- Analysis, Chemical, Qualitative and Quantitative, Manual of, 7, 261; 10, 274; 23, 120; 79, 34
- Analysis, Chemical, Qualitative, by Electrolysis, 67, 68; 77, 176
- Analysis, Qualitative Chemical, Compensum Manual of, 28, 94
- Analysis, Chemical, Qualitative, Organic and Inorganic, 84, 276; 92, 301
- Analysis, Chemical, Qualitative, Tables for, 90, 254
- Analysis, Chemical, Qualitative, Treatise on, 82, 230
- Analysis, Chemical, Quantitative, 28, 193, 324; 33, 210; 42, 82, 208; 64, 318; 69, 82; 72, 220; 77, 104, 272
- Analysis, Chemical, Quantitative, 82, 93, 302; 87, 178
- Analysis, Chemical, Quantitative, by Electrolysis, 87, 261
- Analysis, Chemical, Quantitative, Compendium of, 92, 34
- Analysis, Chemical, Quantitative Electrolytic, 81, 44
- Analysis, Chemical, Quantitative Manual of, 42, 82; 77, 272
- Analysis, Chemical, Quantitative Spectrum Photography in Relation to, 49, 128
- Analysis, Chemical, Quantitative Tables for Students of, 87, 298
- Analysis, Chemical, Quantitative, Text-book of, 87, 105; 90, 262
- Analysis, Chemical, Select Methods in, 23, 190; 54, 331; 92, 223
- Analysis, Chemical, Smaller, 94, 279
- Analysis, Chemical, System of Instruction in Qualitative, 9, 95; 67, 11
- Analysis, Chemical, System of Instruction in Quantitative, 2, 285
- Analysis, Chemical, Tables for Qualitative, 77, 297
- Analysis, Chemical, Tables of, 50, 307
- Analysis, Chemical Technical, Introduction to, 81, 34
- Analysis, Chemical, Technical Methods of, 99, 11
- Analysis, Chémico-Technical, Post's, 98, 23
- Analysis, Commercial and Industrial, Methods of, 81, 154
- Analysis, Electro-chemical, 62, 200; 70, 159
- Analysis, Electrolytic Quantitative, 76, 70
- Analysis, Elementary, Percentage Tables for, 90, 255
- Analysis, Fuel, Water, and Gas, for Steam Users, 95, 275
- Analysis, Inorganic, Introductory, 57, 261
- Analysis, Inorganic, Practical, 62, 224
- Analysis, Inorganic, Select Methods, 92, 116
- Analysis, Metallurgical, and Assaying, 85, 178; 89, 166
- Analysis, Metallurgical, Notes on, 70, 147; 87, 273
- Analysis, Metallurgical, Tables for Quantitative, for Laboratory Use, 80, 268
- Analysis, Micro-chemical, Manual of, 69, 191
- Analysis, Notes on the Detection of the Acids usually met with in, 47, 222
- Analysis of Air, 62, 190
- Analysis of Ashes and Alloys, 98, 196
- Analysis of Beer, Spirits, and Vinegar, 71, 219
- Analysis of Coal Gas, 15, 288
- Analysis of Fermented Liquors, 44, 314
- Analysis of Food and Drugs, 81, 58
- Analysis of Food and Drugs, Part I., Milk and Milk Products, 76, 80
- Analysis of Gas, 70, 317
- Analysis of Milk, 69, 12
- Analysis of Minerals, 80, 122
- Analysis of Ores, Pig-iron, and Steel, Methods for the, 81, 22; 85, 190
- Analysis of a Simple Salt, Tables for, 42, 207
- Analysis of Single Salt, 73, 163
- Analysis of Spectrum, 73, 273
- Analysis of Water, 64, 37; 73, 196
- Analysis of Wines, 70, 232
- Analysis, Organic, 57, 179
- Analysis, Organic, Commercial, 45, 75; 52, 9; 54, 283; 60, 36; 60, 244; 74, 108; 78, 136; 79, 9, 225; 82, 157; 84, 184; 95, 179, 274; 100, 280
- Analysis, Organic, Elementary, 84, 277
- Analysis, Organic, Introduction to the Practice of Commercial, 40, 30
- Analysis, Organic, Manual of Qualitative, 43, 255
- Analysis, Organic, Outlines of Proximate, 32, 40
- Analysis, Primer of Chemistry, including, 35, 230
- Analysis, Public, Extension of, 61, 226
- Analysis, Qualitative, 57, 179; 60, 245; 69, 191; 75, 119; 95, 189
- Analysis, Qualitative and Elementary Practical Chemistry, 74, 71
- Analysis, Qualitative, and Practical Chemistry, Treatise on, 62, 37; 72, 21; 80, 33; 98, 45
- Analysis, Qualitative, Elements of Systematic, 40, 30
- Analysis, Qualitative Inorganic, and Practical Chemistry, Treatise on, 30, 182; 51, 225
- Analysis, Qualitative, Introduction to the Study of, 85, 299
- Analysis, Qualitative, Laboratory Manual of, 99, 34
- Analysis, Qualitative, Laboratory Tables for, 73, 163
- Analysis, Qualitative, Laboratory Text-book of Practical Chemistry, or Introduction to, 23, 58
- Analysis, Qualitative, Manual of, 4, 211; 10, 250; 21, 212
- Analysis, Qualitative, Notes on, 48, 21; 60, 245; 75, 10, 60; 95, 45
- Analysis, Qualitative, Outlines of, 58, 219; 69, 191
- Analysis, Qualitative, Principles of, 95, 70
- Analysis, Qualitative, Short Course in Inorganic, 78, 33
- Analysis, Qualitative, Systematic Course of Practical, 40, 132
- Analysis, Qualitative, Tables for Systematic, 40, 30
- Analysis, Qualitative, Text-book of Organic, 43, 44, 255
- Analysis, Qualitative, with the Blow-pipe, Laboratory Guide to, 88, 220
- Analysis, Quantitative, 51, 130; 54, 307; 60, 316; 61, 48; 63, 152; 75, 180; 87, 44
- Analysis, Quantitative, by Electrolysis, 98, 107
- Analysis, Quantitative, Elements of, 93, 29
- Analysis, Quantitative, Examples of, 9, 142
- Analysis, Quantitative, Exercises in Elementary, 97, 206
- Analysis, Quantitative, for Mining Engineers, 90, 0
- Analysis, Quantitative, for Students Course of, 57, 20
- Analysis, Quantitative, Fresenius's, 51, 139; 63, 152; 76, 10
- Analysis, Quantitative, Introductory Course of, 75, 188
- Analysis, Quantitative, Practical Chemistry, the Principles of, 41, 294
- Analysis, Quantitative, Practical Examples in, 27, 280; 29, 121
- Analysis, Quantitative, Select Methods in Inorganic, 74, 317
- Analysis, Quantitative, Student's Guide in, 46, 112
- Analysis, Spectrum, 19, 284; 52, 93; 73, 70; 77, 130
- Analysis, Spectrum, applied to the Heavenly Bodies, Results of, 15, 54
- Analysis, Spectrum, as applied to Microscopic Observation, 29, 195
- Analysis, Spectrum, in its Application to Terrestrial Substances, and the Physical Constitution of the Heavenly Bodies, 22, 284; 25, 80
- Analysis Tables for Chemical Students, 54, 190
- Analysis, Techno-Chemical, 91, 152
- Analysis, Theory and Practice of Electrolytic Methods of, 78, 46
- Analysis, Urinary, Praxis of, 88, 220
- Analysis, Volumetric, 35, 20, 97, 130, 160, 170; 54, 205; 81, 154
- Analysis, Volumetric, Handbook of, 6, 67; 37, 226
- Analysis, Volumetric, Introduction to, 93, 80
- Analysis, Volumetric, Manual of, 100, 84
- Analysis, Volumetric, Notes on, 79, 250
- Analysis, Volumetric, System of, 36, 180
- Analysis, Volumetric, Systematic Handbook of, 8, 45; 24, 307; 35, 20; 45, 128; 63, 0; 74, 172; 82, 258
- Analysis with the Blow-pipe, Plattner's Manual of Qualitative and Quantitative, 28, 80; 32, 81
- Analyst, Public, for Kensington, Report of the, 58, 25; 61, 50
- Analyst, Public, of St. George, Hanover Square, Report of the, 58, 25; 61, 50
- Analyst, Public, for St. Mary's, Battersea Report of the, 61, 50
- Analyst, Public, to the Town Council of the Borough of Portsmouth, Report of the, 33, 22
- Analyst's Annual Note Book, 31, 106; 34, 28
- Analyst's Laboratory Companion, 58, 28; 77, 201; 91, 211
- Analytical Chemistry, Qualitative and Quantitative, Course of, 29, 131
- Analytical Chemistry, Scientific Foundations of, 70, 116
- Analytical Chemistry, Short Manual of, 89, 47
- Analytical Notes, 97, 203
- Analytical Tables, Coloured, 60, 201
- Analytical Tables for Complex Inorganic Mixtures, 83, 132
- Angina Pectoris, Nitroglycerin in, 45, 120
- Anhydride, Carbonic, of the Atmosphere, 82, 10
- Aniline and its Derivatives, a Treatise upon the Manufacture of Aniline and Aniline Colours, 18, 22
- Aniline Black, Chemical History and Progress of, 26, 68
- Aniline Black, History of, 60, 72
- Aniline Black, Scientific and Industrial Analysis of, 60, 72
- Aniline Colours, Directions for the Preparation of the, in Dyed Leather, 35, 123
- Animal Alkaloids, Treatise on, 59, 159
- Animal and Microbian Toxins, 74, 25
- Animal and Vegetable Fixed Oils, Fats, Butters, and Waxes, 88, 184
- Animal and Vegetable Fixed Oils in the Manufacture of Soaps, etc., 68, 215
- Animal and Vegetable Oils and Fats, 57, 130
- Animal Chemistry, 38, 220

BOOKS, REVIEWS AND NOTICES OF.

- Animal Chemistry, Lectures on, **13**
189
- Animal Nutrition, Principles of, **87**,
117
- Animals, Chemistry of the Feeding of,
for the Production of Meat and
Manure, **11**, **8**
- Animals, Slaughtering, in the City of
New York, Report of the Sanitary
Committee of the Board of Health
on the Concentration and Regula-
tion of the Business of, **13**, **19**
- Annalen der Chemie und Pharmacie,

BOOKS, REVIEWS AND NOTICES OF.

Buckmaster's Physiology, **15**, 54, 66
 Budapest, Catalogue Générale de l'Exposition Nationale du Millénaire 1896, **75**, 11
 Building Construction, Subject List of Works on, in the Library of the Patent Office, **88**, 82
 Building Materials, Introduction to the Chemistry and Physics of, **99**, 311
 Bulletin de l'Académie de Belgique, **15**, 200; **15**, 111; **17**, 47
 Bulletin de l'Académie des Sciences de Belgique, **14**, 255; **15**, 146
 Bulletin de l'Académie Impériale des Sciences de St. Petersburg, **18**, 47, 81; **19**, 24, 48
 Bulletin de l'Académie Royale de Belgique, **16**, 198, 245; **17**, 25, 109; **18**, 177; **19**, 72
 Bulletin de la Société Chimique de Paris, **10**, 227, 285; **11**, 57, 92, 117, 165, 225, 298; **12**, 59, 275; **13**, 83, 117, 166, 262, 304; **14**, 81; **16**, 204, 317; **17**, 14, 40, 85, 170, 206, 254; **18**, 12, 24, 35, 84, 178, 190, 249; **19**, 168
 Bulletin de la Société d'Encouragement, **14**, 262, 290; **15**, 158, 224; **16**, 62, 87, 234, 282, 317; **17**, 25, 98, 294, 254; **18**, 35, 47, 71, 214
 Bulletin de la Société Industrielle de Mulhouse, **15**, 9, 158; **17**, 14, 25, 61, 98, 290, 302; **18**, 190, 238
 Bulletin of the Agricultural Experiment Station, Baton Rouge, **76**, 157
 Bulletin of the Bussey Institution, **29**, 248; **32**, 60; **34**, 90; **35**, 194; **36**, 232; **37**, 60; **50**, 234
 Bulletin of the North Louisiana Experiment Station, **70**, 35
 Bulletin of the Philosophical Society of Washington, **42**, 182; **49**, 276
 Bulletin of the Society of Physical Science, **70**, 108
 Bulletin of the Sugar Experiment Station, **69**, 311
 Bunsen, Robert, Collected Works of, **90**, 146
 Burdett's Hospital Annual and Year Book of Philanthropy, **64**, 223
 Burial, Premature, **92**, 167
 Business Illustrated, **86**, 168
 Bussey Institution, Bulletin of the, **29**, 248; **32**, 60; **34**, 90; **35**, 194; **36**, 232; **37**, 261; **50**, 234
 Butter, Cream and Cheese, Milk Analysis, a Practical Treatise on the Examination of Milk and its Derivatives, **29**, 23
 Butter, Dutch, Composition of, **85**, 58
 Butter, its Analysis and Adulterations, **30**, 174; **36**, 244
 Calculating Tables, **89**, 214
 Calculations, Laboratory, and Specific Gravity Tables, **54**, 109
 Calcutta Water Supply, Muddy Waters of the Hugli during the Rainy Season, with Reference to its Purification and to the, **30**, 37
 Calendar, Chemists', for 1882, **45**, 162
 Calendar of the Pharmaceutical Society, **16**, 210
 Calendar, Imperial University of Tokyo, **34**, 7; **89**, 249
 Calico Printing and Bleaching, **73**, 58
 Calico Printing and Dyeing, **32**, 300
 Calico Printing and Dyeing, Dictionary of Dyes, Mordants and other Compounds used in, **84**, 255
 Calico Printing, Dyeing and Bleaching, **49**, 45
 Calico Printing, Dyeing and Bleaching, Chemistry of, **2**, 214
 Calico Printing, Dyeing and Bleaching, Introductory Lecture to a Course of Technical Instruction in, **44**, 272
 Calico Printing and Dyeing, Dictionary of, **6**, 68; **7**, 68
 Calico Printing and Dyeing, Lectures on Coal-tar Colours, and on Recent

Improvements and Progress in, **7**, 201
 California, North, Treatment of Mercury in, **35**, 242
 California State Mining Bureau, **70**, 10
 Calming the Waves, **69**, 166
 Calorimetry of Producer and Illuminating Gases, **85**, 213
 Calvert's Mechanic's Almanack, **61**, 60, 83, 20
 Cambridge Natural Science Series, **72**, 160
 Camera, **54**, 21
 Camphor and its Most Important Derivatives, Constitution of, **87**, 310
 Camphor, Italian, **98**, 186
 Canada, Report of the Chemist at the Central Experimental Farm, **78**, 280
 Canada, Statements relating to the Home and Foreign Trade of the Dominion of, also Annual Report of the Commerce of Montreal, **26**, 213
 Canadian Graphite, Report on, **38**, 7
 Canadian Institute, Transaction of the, **66**, 60
 Candles and Soaps, **57**, 261
 Candles and Soap, Lubricants and Glycerine, Treatise on the Manufacture of, **52**, 45; **72**, 268
 Candles, Soaps and Glycerins, Modern, **94**, 217
 Canned Goods, Poisoning by, **51**, 164, 268
 Cape of Good Hope, Agricultural Journal, Published by the Department of Agriculture, **71**, 160; **75**, 214, 225; **76**, 34, 46
 Cape of Good Hope, Report of the Senior Analyst on the Analytical Laboratory and Agricultural and Mineralogical Museum, **70**, 108
 Cape of Good Hope, Department of Agriculture, Report of Senior Analyst on the Analytical Laboratory, **70**, 108; **72**, 83; **75**, 262; **78**, 289
 Cape of Good Hope, Report of the Senior Analyst for the Year 1899, **83**, 70
 Capillary Action of Soils, **16**, 200
 Capillary Analysis, and its various Applications, Appendices to Investigation on, **60**, 158
 Carbides, Metallic, Review and Bibliography of, **78**, 34
 Carbides of Hydrogen, **85**, 82
 Carboxylic Compounds, Stereo Chemistry of the, Alfred Werner's Theory of the Carbon Atom, and the, **89**, 46
 Carbohydrates and Ferments, Researches on (1884-1908), **99**, 190
 Carbohydrates of Wheat, Maize, Flour, and Bread, **75**, 213
 Carbohydrates, Physiology of the, **70**, 107; **73**, 34
 Carbon and Hydrogen, Determination of, **84**, 277
 Carbon Atom, Alfred Werner's Theory of the, and the Stereo-Chemistry of the Carboxylic Compounds, **89**, 46
 Carbon, Chemical Changes of, Course of Six Lectures on the, **19**, 248
 Carbon, Compounds, Chemistry of the, **65**, 72
 Carbon Compounds, Chemistry of the, or Richter's Organic Chemistry, **81**, 105
 Carbon Compounds, Colour Reactions of the, **62**, 61
 Carbon Compounds, Determination of Radicles in, **80**, 254; **87**, 237
 Carbon Compounds, History of, **55**, 126
 Carbon Compounds, Introduction to, **80**, 47
 Carbon, Compounds of, Introduction to Study of, **52**, 109
 Carbon Compounds, Lexicon of the, **80**, 229; **81**, 191
 Carbon Compounds, Manual of the Chemistry of the, or Organic Chemistry, **29**, 227

Carbon Compounds, Scheme for Detection of more Common Classes of the, **90**, 268; **96**, 234
 Carbon Compounds, Text-Book of Inorganic Chemistry and Chemistry of the, Translation of, **55**, 126
 Carbon Bisulphide, Report on Presence of in Gas, **4**, 24, 38
 Carbon Blacks, Manufacture of Soot and, **95**, 70
 Carbons for Electric Lighting and other purposes, Manufacture of, **80**, 251
 Case School of Applied Science, Catalogue of, **74**, 255
 Cash Book, Comprehensive, **69**, 265
 Cassell's Cookery, **43**, 45
 Cassell's Popular Educator, **43**, 45
 Cast-Iron, Iron, and Steel, Influence of Copper on, **71**, 107
 Catalog of A. L. A. Library, **70**, 36
 Catalogue Générale de l'Exposition Nationale du Millénaire Budapest, **75**, 11
 Catalogue of Apparatus for Chemical Lecture Experiments, **99**, 12
 Catalogue of Apparatus from Philip Harris and Co., **68**, 208
 Catalogue of Apparatus, Technical Instruction and, **57**, 69; **61**, 10
 Catalogue of Bacteriological Apparatus sold by A. Gallenkamp and Co., Ltd., **96**, 22
 Catalogue of Balances and Weights, **99**, 11
 Catalogue of Books, **59**, 10; **61**, 24; **64**, 10; **66**, 148; **69**, 59; **71**, 125; **75**, 46; **76**, 158

 Chemistry, General, Experiments in, 65, 72
 Chemistry, General, Foundations of, 80, 230
 Chemistry, General, Laboratory Instructions in, 83, 117
 Chemistry, General, Laboratory Manual of, 58, 253
 Chemistry, General, Laboratory Outline of, 89, 154
 Chemistry, General, Medical and Pharmaceutical, 20, 247; 32, 236; 53, 21
 Chemistry, General, Outlines of, 62, 307
 Chemistry, General, Quantitative Experiments in, 99, 84
 Chemistry, General, Treatise on the Applications of, 83, 190
 Chemistry, Handbook of, Index to Gmelin's, 26, 20
 Chemistry, Hindu, History of, 87, 93; 96, 304
 Chemistry, Historical, Essays on, 69, 119; 86, 94
 Chemistry, History of, 16, 267; 63, 259; 94, 206, 265; 96, 220
 Chemistry, History of, from the Earliest Times to the Present Day, 78, 254; 82, 10
 Chemistry, History of, since the time of Lavoisier, 81, 249
 Chemistry, History of the Development of, from Lavoisier to the Present Time, 99, 189
 Chemistry, Household, for the Non-chemical, 45, 261
 Chemistry, How to Teach, 32, 80
 Chemistry in Daily Life, 73, 303; 79, 129; 92, 94
 Chemistry in its Relations to Medicine and its Collateral Sciences, Address on, 9, 165
 Chemistry in Space, 65, 189
 Chemistry, Industrial, 37, 234
 Chemistry, Industrial, in Germany, 82, 254
 Chemistry, Industrial, Laboratory Guide of, 99, 227
 Chemistry, Industrial Organic, 64, 319; 72, 290
 Chemistry, Industrial, Outlines of, 79, 235
 Chemistry, Inorganic, 15, 6; 30, 292; 36, 89, 139; 43, 45; 44, 58, 212; 51, 12; 62, 211, 235; 68, 234
 Chemistry, Inorganic, 86, 208; 96, 280
 Chemistry, Inorganic, according to Periodic Law, 78, 232
 Chemistry, Inorganic and Organic, 15, 172; 38, 6; 57, 30; 88, 184
 Chemistry, Inorganic and Organic, Manual of, 81, 214
 Chemistry, Inorganic and Organic, Synoptical Tables of, 61, 156
 Chemistry, Inorganic, Course of, 99, 12
 Chemistry, Inorganic, Elementary, 29, 131; 59, 71, 72; 64, 315; 82, 47
 Chemistry, Inorganic, Elementary Text-book of, 92, 178
 Chemistry, Inorganic, Elements of, 82, 278; 89, 166; 90, 267; 91, 243
 Chemistry, Inorganic, First Lessons in, 21, 128
 Chemistry, Inorganic, First Stage (Practical), 100, 182
 Chemistry, Inorganic, for Advanced Students, 81, 44
 Chemistry, Inorganic, for Elementary Classes, 24, 273
 Chemistry, Inorganic, for Science Classes, 12, 263
 Chemistry, Inorganic, General, 98, 186
 Chemistry, Inorganic, Gmelin and Kraut's Handbook of, 92, 280; 95, 70
 Chemistry, Inorganic, Guide to Preparation Work in, 86, 196
 Chemistry, Inorganic, Guide to Study of, 84, 291
 Chemistry, Inorganic, Handbook of, 93, 30
 Chemistry, Inorganic, Introduction to, 27, 11
 Chemistry, Inorganic, Introduction to Study of, 92, 302
 Chemistry, Inorganic, Journal of, 65, 142
 Chemistry, Inorganic, Karl Heumann's Directions for Lecture Experiments in, 89, 166
 Chemistry, Inorganic, Laboratory Companion for Use with Shenstone's, 84, 231
 Chemistry, Inorganic, Laboratory Methods of, 100, 171
 Chemistry, Inorganic, Manual of, 17, 81; 36, 97; 73, 46; 94, 135
 Chemistry, Inorganic, Modern Conceptions in the Sphere of, 92, 211
 Chemistry, Inorganic, Non-metallic and Metallic Elements, 83, 70
 Chemistry, Inorganic, Notes on, 57, 240
 Chemistry, Inorganic, Outlines of, 92, 93
 Chemistry, Inorganic, Practical, 62, 224; 69, 95; 73, 34; 78, 277; 79, 82
 Chemistry, Inorganic, Practical Instruction in, 62, 282
 Chemistry, Inorganic, Practical Methods of, 94, 279
 Chemistry, Inorganic, Principles of, 85, 273; 87, 153; 89, 261; 91, 7; 99, 155
 Chemistry, Inorganic, Short Manual of, 84, 218; 87, 214
 Chemistry, Inorganic, Short Text-book of, 49, 275; 57, 249; 65, 167
 Chemistry, Inorganic, Skeleton Notes on, 57, 240
 Chemistry, Inorganic, Synthetic, 98, 287
 Chemistry, Inorganic, System of, 63, 211
 Chemistry, Inorganic, Text-book of, 55, 126; 57, 139; 70, 195; 85, 274; 99, 34
 Chemistry, Inorganic, Text-book, and Chemistry of Carbon Compounds, 55, 126
 Chemistry, Inorganic, Twenty Lessons in, 40, 31
 Chemistry, Insurance, Technological Dictionary of, 61, 215
 Chemistry, Intermediate Course of Laboratory Work in, 99, 117
 Chemistry, Introduction to, 9, 58
 Chemistry, Introduction to Modern Scientific, 85, 165
 Chemistry, Introduction to Study of, 21, 128; 42, 33; 53, 166; 75, 69
 Chemistry, Introductory, for Intermediate Schools, 86, 232
 Chemistry, its Evolution and Achievements, Science Sketches, 80, 279
 Chemistry, Junior, 87, 129
 Chemistry, Law and Theory in, 69, 274
 Chemistry, Leather Trades, 97, 287
 Chemistry, Lecture Notes on, for Dental Students, 94, 135
 Chemistry, Lectures on the History of the Development of, from Lavoisier to the Present Day, 95, 214
 Chemistry, Legal, Detection and Examination of Poisons and Stains, 34, 18
 Chemistry, Manual of, 4, 174, 250, 304; 35, 136; 36, 81; 48, 269; 51, 282; 53, 189, 212; 60, 220; 75, 188; 94, 266
 Chemistry, Mathematical, Outlines of, 71, 37
 Chemistry, Mathematical, Principles of, 75, 226
 Chemistry, Matriculation, 66, 183; 99, 47
 Chemistry, Medical and Pharmaceutical, Introduction to, 30, 183; 39, 248
 Chemistry, Medical, Application of to Acute and Chronic Diseases, Acetopathy or, 21, 79
 Chemistry, Medical, Programme of, 75, 70
 Chemistry, Metallurgical, Introduction to, 88, 256
 Chemistry, Method of Teaching in Schools, 94, 303
 Chemistry, Mineral Analytical, 69, 119, 144
 Chemistry, Mineral, and its Relations to the Other Sciences, 92, 168
 Chemistry, Mineral, Industries of, 86, 59; 89, 45
 Chemistry, Mineralogy, and Geology, Blowpipe in, 50, 30, 56, 230; 59, 35
 Chemistry, Modern, Chemia Coartata, or the Key to, 34, 271
 Chemistry, Modern, Elementary Lessons in, 15, 319
 Chemistry, Modern, Elements of, 40, 132; 72, 196
 Chemistry, Modern, Experimental and Theoretic, Introduction to, 12, 202
 Chemistry, Modern, First Principles of, 17, 12
 Chemistry, Modern, Handbook of, 38, 6; 57, 213
 Chemistry, Modern, John Dalton and the Rise of, 72, 21
 Chemistry, Modern, Theoretical and Systematic, 83, 152
 Chemistry, Modern Theories of, 57, 119
 Chemistry, Modern, Theories and Notations of, 58, 231
 Chemistry, New, 22, 284
 Chemistry, New and Old Notation of, 13, 299
 Chemistry, New Basis for, 55, 294
 Chemistry, Newer, Dr. Nernst's, 68, 48
 Chemistry, Notes for Students in, 11, 287; 21, 79
 Chemistry, Numerical Exercises in, 49, 243

BOOKS, REVIEWS AND NOTICES OF.

- Chemistry of Agriculture, 41, 250
 Chemistry of Albuminous Substances, 90, 82
 Chemistry of the Ancients, Introduction to Study of, 59, 192
 Chemistry of Artificial Colouring Matters, 75, 286
 Chemistry of Breakfast Table, 30, 61
 Chemistry of Brewing-Room, 36, 244
 Chemistry of Calico Printing, Dyeing, and Bleaching, 2, 214
 Chemistry of Carbon Compounds, Manual of, or Organic Chemistry, 29, 227
 Chemistry of Carbon Compounds, or Richter's Organic Chemistry, 65, 72, 81, 195
 Chemistry of Carbon Compounds, Text-book of Inorganic Chemistry, and, 55, 126
 Chemistry of Chlorophyll, 59, 287; 73, 23
 Chemistry of Coal, 44, 285
 Chemistry of Coal-Tar Colours, 53, 142; 60, 61, 161
 Chemistry of Cod Liver Oil, 71, 112
 Chemistry of Coke, 79, 225; 91, 162
 Chemistry of Common Life, 39, 203
 Chemistry of Common Things, 13, 248
 Chemistry of Daily Life, 73, 303
 Chemistry of Dairying, 75, 117
 Chemistry of Diazo-compounds, 97, 228
 Chemistry of Essential Oils and Artificial Perfumes, 99, 58
 Chemistry of Farm, 44, 69
 Chemistry of Feeding of Animals for the Production of Meat and Manure, 11, 8
 Chemistry of Fermentation in the Process of Bread-Making, 30, 62
 Chemistry of Fire, 68, 233
 Chemistry of Fire and Fire Prevention, 82, 457
 Chemistry of Food in relation to the Breeding and Feeding of Live Stock, Stock-Feeder's Manual, 17, 287
 Chemistry of Gas Manufacture, 97, 95
 Chemistry of Iron and Steel Making, 62, 224
 Chemistry of Nutrition, 72, 255
 Chemistry of Organic Colouring Matters, 85, 154
 Chemistry of Organic Dye-Stuffs, 66, 96
 Chemistry of Paint and Paint Vehicles, 93, 281, 94, 104
 Chemistry of Paints and Painting, 61, 264; 84, 277
 Chemistry of Perfumes and the Manufacture of Essences, 86, 304
 Chemistry of Photography, 59, 191
 Chemistry of Pottery, 73, 45
 Chemistry of Proteids, 93, 140
 Chemistry of Secondary Batteries, 48, 235
 Chemistry of Soils and Fertilisers, 80, 286
 Chemistry of Soils, Handy Book of, 5, 26
 Chemistry of Sulphuric Acid Manufacture, 28, 123
 Chemistry of the Sun, 56, 267
 Chemistry of Urine, 72, 97
 Chemistry of Vegetation and Agriculture, 81, 104
 Chemistry of Wheat, Flours, Bread, 54, 82
 Chemistry, Old and New, 55, 22
 Chemistry, Organic, 43, 45 54, 46; 70, 47, 107; 71, 11, 184, 243; 77, 212; 87, 33; 99, 58
 Chemistry, Organic and Inorganic, with Experiments, 57, 30; 72, 36
 Chemistry, Organic, Application of some General Reactions to Investigations in, 91, 82
 Chemistry, Organic, Course of, 94, 240
 Chemistry, Organic, Course of Practical, 96, 269
 Chemistry, Organic, Elementary Course of, 77, 224
 Chemistry, Organic, for Advanced Students, 96, 197
 Chemistry, Organic, for Medical Students, Text-book of, 96, 256
 Chemistry, Organic, Fundamental Notions of, 87, 11
 Chemistry, Organic, Introduction to Study of, 29, 163; 47, 189; 77, 273
 Chemistry, Organic, Laboratory Manual of, 72, 220
 Chemistry, Organic, Lessons in, 70, 107
 Chemistry, Organic, Manual of, 23, 238; 39, 275; 40, 9; 72, 220
 Chemistry, Organic, Modern, 99, 311
 Chemistry, Organic, or Manual of Chemistry of Carbon Compounds, 29, 227
 Chemistry, Organic, or Chemistry of Carbon Compounds, Richter's, 81, 105, 284
 Chemistry, Organic, Outlines of, 27, 174; 53, 70; 66, 269
 Chemistry, Organic, Outlines of Modern, 36, 265
 Chemistry, Organic, Practical, 59, 178; 79, 117; 80, 171; 100, 12
 Chemistry, Organic, Practical, for Advanced Students, 84, 230
 Chemistry, Organic, Practical Methods of, 75, 23
 Chemistry, Organic, Practical Work in, 63, 283
 Chemistry, Organic, Principles of General, 62, 59
 Chemistry, Organic, Recent Advances in, 99, 57
 Chemistry, Organic, Rise and Development of, 70, 245
 Chemistry, Organic, Short Text-book of, 44, 289; 93, 80; 97, 250
 Chemistry, Organic, Systematic, 94, 10
 Chemistry, Organic, Systematic Course of Practical, 92, 79
 Chemistry, Organic, Systematic Practical, 96, 22
 Chemistry, Organic, Text-book of, 60, 281; 70, 256; 87, 214; 88, 23; 97, 71
 Chemistry, Organic, Text-book of Practical, for Elementary Students, 44, 59
 Chemistry, Organic, Theoretical, 87, 83
 Chemistry, Organic, Year Book of, 72, 61
 Chemistry, Outline Facts of, with Exercises, 13, 117; 14, 214
 Chemistry, Outlines of, or Brief Notes of Chemical Facts, 20, 260
 Chemistry, Outlines of, with Practical Work, 100, 210
 Chemistry, Parallelogram of Forces as Foundations of the Periodic System in, 74, 11
 Chemistry, Pharmaceutical, 16, 267
 Chemistry, Pharmaceutical and Medical, Introduction to, 30, 183; 39, 248
 Chemistry, Pharmaceutical, and Therapeutics, Report on the Advancements of, 94, 240
 Chemistry, Pharmaceutical, and Therapeutics, Report of Recent Advances in, 99, 270
 Chemistry, Pharmaceutical, Complete Text-book of, 94, 279
 Chemistry, Photographic, 47, 234
 Chemistry, Photographic, Dictionary of, 89, 274
 Chemistry, Photographic, Theoretical and Practical, Manual of, 9, 119
 Chemistry, Physical, and Inorganic, Recent Advances in, 100, 315
 Chemistry, Physical, and its applications in Medical and Biological Science, 92, 211
 Chemistry, Physical, Elementary Treatise on, 90, 327
 Chemistry, Physical, Elements of, 79, 129; 85, 152, 165; 92, 269; 99, 107
 Chemistry, Physical, Exercises in, 100, 170
 Chemistry, Physical, for Electrical Engineers, 93, 233
 Chemistry, Physical, in Service of Medicine, 95, 214
 Chemistry, Physical, in Service of the Sciences, 88, 243
 Chemistry, Physical, Introduction to, 85, 23; 89, 214; 90, 68; 95, 203
 Chemistry, Physical, Introduction to Study of, 89, 154
 Chemistry, Physical, Laboratory Exercises in, 98, 22
 Chemistry, Physical, Lectures on, 78, 290
 Chemistry, Physical, Lessons in, 81, 117
 Chemistry, Physical, of the Metals, 100, 12
 Chemistry, Physical, Outlines of, 81, 310; 99, 239
 Chemistry, Physical, Practical, 95, 10, 298
 Chemistry, Physical, Principles of, 87, 261
 Chemistry, Physical, Technical Applications of, 95, 175
 Chemistry, Physical, Text-book of, 77, 247
 Chemistry, Physical, Year Book of Electrochemistry and Applied, 100, 171
 Chemistry, Physiological and Pathological, Demonstrations in, 43, 44
 Chemistry, Physiological and Pathological, Text-book of, 86, 23
 Chemistry, Physiological and Pathological, Laboratory Manual of, 90, 9
 Chemistry, Physiological, Directions for Laboratory Work in, 86, 254; 90, 9
 Chemistry, Physiological, Outlines of, 27, 174; 92, 156
 Chemistry, Physiological, Studies from Laboratory of, at Yale College, 53, 21
 Chemistry, Physiological, Text-book of, 79, 22; 81, 39; 91, 57; 99, 46
 Chemistry, Plant and Organic, and Literary Papers, Studies in, 95, 311
 Chemistry, Practical, 11, 201; 44, 212, 303; 47, 56; 56, 268; 68, 184; 74, 209; 81, 225; 85, 142; 86, 268; 87, 262, 286; 89, 214; 90, 146; 96, 293
 Chemistry, Practical, Aids to, 56, 34; 86, 172
 Chemistry, Practical, Analytical, Tables for Students of, 23, 273
 Chemistry, Practical, and Qualitative Analysis, Treatise on, 62, 37; 72, 21; 80, 33
 Chemistry, Practical, and Qualitative Inorganic Analysis, 51, 225
 Chemistry, Practical and Qualitative Inorganic Analysis, Elementary Treatise on, 30, 182
 Chemistry, Practical, arranged for Use of Medical Students, Course of, 12, 46; 34, 89
 Chemistry, Practical, Course of, 81, 69
 Chemistry, Practical, Course of, Part I, Elementary, 76, 94
 Chemistry, Practical, Elementary, 71, 63; 73, 196; 81, 44; 95, 262; 99, 298
 Chemistry, Practical, Elementary, and Qualitative Analysis, 74, 71
 Chemistry, Practical, Elementary, and Quantitative Analysis, 82, 10
 Chemistry, Practical, Exercises in, 20, 223; 43, 24; 61, 249; 74, 317; 93, 177
 Chemistry, Practical, First Lessons in, 54, 46
 Chemistry, Practical, for Medical Students, especially arranged for the M.B. Course, 38, 111
 Chemistry, Practical, for Medical Students, 71, 11
 Chemistry, Practical, for Public Schools, 100, 327
 Chemistry, Practical, Guide to, 74, 209
 Chemistry, Practical, including Analysis, Introduction to, 13, 189; 24, 274
 Chemistry, Practical, Introduction to, 53, 84; 65, 238, 273
 Chemistry, Practical, Junior Course of, 74, 281

BOOKS, REVIEWS AND NOTICES OF.

- Chemistry, Practical Laboratory Guide in, 48, 180
- Chemistry, Practical, Laboratory Teaching, or Progressive Exercises in, 20, 43
- Chemistry, Practical, Laboratory Text-book of, or Introduction to Qualitative Analysis, 23, 58
- Chemistry, Practical, Manual of, the Analysis of Foods, and the Detection of Poisons, 39, 215
- Chemistry, Practical, of the Non-Metallic Elements and their Compounds, Notes on, 33, 238
- Chemistry, Practical, or Qualitative Chemical Analysis, Course of, 78, 45
- Chemistry, Practical, Owens College Junior Course of, 27, 57
- Chemistry, Practical, the Principles of Quantitative Analysis, 41, 294
- Chemistry, Practical Text Book of, 96, 210
- Chemistry, Practical, Three Years' Course, 92, 224; 93, 222
- Chemistry, Practical, Valentin's, 97, 95
- Chemistry, Primer of, including Analysis, 35, 230
- Chemistry, Principles of, 59, 311; 65, 351; 76, 228; 91, 152
- Chemistry, Principles of, Founded on Modern Theories, 17, 71
- Chemistry, Pure, Applied, and Physical, Experimental Researches in, 37, 69
- Chemistry, Qualitative, First Book of, 41, 19; 86, 23
- Chemistry, Questions on, 41, 19
- Chemistry, Radical Theory in, 1, 105
- Chemistry, Report on Teaching, 75, 117
- Chemistry, Rudimentary, Class-Book of, 10, 92
- Chemistry, Rudiments of, 53, 190
- Chemistry, Sanitary, and Applied, Text-Book of, 94, 183
- Chemistry, Sanitary, Nature's Hygiene and, 96, 256
- Chemistry, School, 6, 166; 80, 219; 82, 278
- Chemistry, Scientific, Short History of the Progress of, in Our Own Times, 81, 33
- Chemistry, Second Step in, 9, 71
- Chemistry, Second Year, 92, 189
- Chemistry, Select Bibliography of, 68, 220; 90, 327
- Chemistry, Self-Educator in, 84, 184
- Chemistry, Service, 60, 220; 73, 10; 94, 266
- Chemistry, Story of, 61, 9, 111
- Chemistry, Story of Alchemy and the Beginning of, 87, 129
- Chemistry, Students, 20, 284; 62, 177
- Chemistry, Student's Handbook of, 44, 259; 57, 11
- Chemistry, Sun and Earth as Great Forces in, 31, 127
- Chemistry, Synopsis of, 46, 232
- Chemistry, Synthetical, Essay on, 69, 288
- Chemistry, Technical, Steam in, 98, 196
- Chemistry, Technical, Study of, at the Universities and Technical High Schools of Germany, 76, 10
- Chemistry, Technological Year Book of, 47, 33
- Chemistry, Text-book of, 55, 126; 75, 310
- Chemistry, Text Book of General, Physical, and Theoretical, 95, 94
- Chemistry, Textile, Methods of, 99, 131
- Chemistry, Theoretical, 56, 285; 71, 124
- Chemistry, Theoretical, Lecture Notes for, 68, 49
- Chemistry, Theoretical, Outlines of, 65, 166; 81, 105
- Chemistry, Theoretical, Principles of, 36, 285; 49, 56; 67, 83
- Chemistry, Theories of, 11, 80; 95, 262
- Chemistry, Treatise on, 36, 194; 39, 20; 40, 274; 44, 249; 49, 253; 57, 68; 59, 217; 61, 215; 63, 212; 65, 130, 166; 70, 244; 74, 317, 92, 156; 97, 178
- Chemistry, Treatise on the Principles of, 51, 59; 59, 311
- Chemistry, True, 76, 218
- Chemistry, Tutorial, 75, 93; 77, 200
- Chemistry, Year Book of, 66, 23
- Chemists' Almanac, 44, 294
- Chemists' Calendar for 1882, 45, 162
- Chemists' and Druggists' Diary, 37, 71; 41, 21; 86, 305
- Chemists and Druggists, Directory of, 42, 45; 52, 45; 68, 62; 73, 303; 81, 298; 90, 24
- Chemists and Industrialists, Manual for, 76, 194
- Chemists and Metallurgists, Pocket Book for, 48, 192
- Chemists and their Wonders, 72, 48
- Chemists, Biographical Literary Dictionary of, 63, 95
- Chemists, Chemical Manufacturers, Dyers, Distillers, etc., Pocket-Book for, 39, 21; 44, 212; 53, 239; 81, 285
- Chemists' Legal Handbook, 67, 11
- Chemists, Logarithmic Tables for, 86, 304; 87, 214
- Chemist's Manual, 36, 108; 61, 240
- Chemists, Manufacturing, Machinery and Appliances for, 73, 57
- Chemist's Memorandum Book, 47, 154
- Chemists of Beet-sugar Houses and Seed-culture Farms, 76, 288
- Chemists' Pocket Manual, 83, 71
- Chicory and Coffee, their Culture, etc., 10, 178
- Children, Cry of the, 66, 328
- Children and Infants, Prescribing and Treatment in the Diseases of, 70, 170
- Children, Young, Outlines of Natural Philosophy for, 38, 111
- Chile, Comparative Cost in, of Gas and Electricity, 73, 221
- Chile, General Scientific Congress, 1894, 74, 149
- Chilian Review of Hygiene, 74, 61, 280; 76, 10
- Chimica Industriale, 80, 230
- Chimie des Matières Colorantes Artistiques, 75, 286
- Chimie Inorganique Elementaire, 29, 153
- Chimie Minerale, 75, 226
- Chimie Organique, 75, 226
- Chimie Organique Elementaire, 26, 34
- Chimie Organique fondée sur la Synthèse, 3, 12
- Chimique Mecanique, 42, 53
- Chimneys, Smoky, Treatise on their Cure and Prevention, 10, 285
- Chlorate, Electrolytic, Industry, 92, 167
- Chlorates, Manufacture of Potassium Chlorate and other, 58, 57
- Chlorination Process, 76, 33
- Chlorine and Hydrochloric Acid, Production of Independently of the Loblaw Alkali Process, 69, 59
- Chlorine Compounds in Coals, Investigation of some of the Ammoniacal Waters of Gas Works, and on the Presence of, 26, 226
- Chlorine, Contributions to the Knowledge of Deacon's Process for the Production of, 35, 230
- Chlorine, Early History of, 77, 70
- Chlorine, Elementary Nature of, 70, 316
- Chlorophyll, Chemistry of, 59, 287; 73, 23
- Cholera and Diarrhoea, their Origin, etc., 12, 119
- Cholera, Arrest and Prevention of, 14, 260; 15, 7, 54
- Cholera, Asiatic, 14, 260; 15, 7, 54
- Cholera, Asiatic, Treatise on, 20, 321
- Cholera, Handbills relating to Precautions to be taken against the, 14, 260; 15, 7, 54
- Cholera: How to Prevent and Resist it, 31, 139
- Cholera Prospects, 13, 179
- Cholera Vaccine, 52, 285
- Chromatography, Field's, or Treatise on Colours and Pigments as used by Artists, 20, 163
- Chromoelectro-Chemical Communications, 60, 159
- Chromium and its Compounds, Preparation by the Aid of the Electric Current, 87, 45
- Chymistry, Introduction to Study of, written for the People, 21, 128
- Cinchona Barks, 49, 243
- Cinder, Basic, of the North Eastern Steel Works, Middlesboro', Manurial Value of, 53, 274
- Cinematograph in Science, Education and Matters of State, 95, 310
- Cirencester, Royal Agricultural College, Guide to Chemical Department of the College Museum, 16, 11
- City Record, 28, 301
- Classification of Elementary Substances, 89, 225
- Clay Farming, Profitable, 44, 57
- Clay Industries, Handbook of, 95, 166
- Cleveland and its Metropolis, 20, 177
- Climatologist, 65, 178
- Clinical Chemistry, Manual of, 89, 167
- Clinical Lectures and Reports, 12, 213, 228, 239
- Clinical Medicine, Lectures on, 13, 179
- Clinical Use of Prisms, 60, 292
- Closet, Dry, System, 45, 139
- Coal, 39, 20; 45, 285; 97, 45
- Coal and other Matters, Remarks on, 33, 137
- Coal, and What we get from it, 63, 271
- Coal, Chemistry of, Principles and Objects of the, 44, 285
- Coal Dust an Explosive Agent, 70, 83
- Coal Gas, 3, 61
- Coal Gas, Commercial Uses of, 77, 44
- Coal Gas, Treatise on the Purification of, 50, 199
- Coal Gas, Treatise on the Science and Practice of the Manufacture and Distribution of, 35, 74
- Coal, its History and Uses, 39, 20
- Coal, Petroleum, and other Distilled Oils, Practical Treatise on, 4, 54; 12, 180
- Coal, Solid, Presence of Gas in, 44, 303
- Coal-Tar and Ammonia, 56, 167; 84, 230
- Coal-Tar Colours, 67, 10
- Coal-Tar Colours, Chemistry of the, 53, 142; 60, 61, 161
- Coal-Tar Colours, Dictionary of, 65, 166
- Coal-Tar Colours, Hygiene of, 48, 20
- Coal-Tar Colours, Lectures on, and on Recent Improvements and Progress in Dyeing and Calico-Printing, 7, 261
- Coal-Tar, Distillation of, 46, 157
- Coal-Tar, Industrial Products of, and their Applications, 97, 203

 Gas Leakage on Metropolitan Street Earth, Report to the New River Company on the Corrosion of Iron Mains and the Effects of, 2, 57
 Gas Lighting, 82, 200
 Gas Managers' Handbook, 29, 248; 47, 189
 Gas Manipulation, 16, 75
 Gas Manufacture, Chemistry of, 73, 21; 90, 327; 95, 189
 Gas Manufacture, Manual of, 57, 10
 Gas Nuisance in New York, Report on, 22, 44
 Gas Plants, Suction, 99, 262
 Gas, Pressure of, in Solid Coal, Experiments showing, 44, 303
 Gas, Producer, 95, 45
 Gas, Producer, and Gas Firing, 99, 58
 Gas Reactions, Thermodynamics of, Technical, 92, 100; 97, 287
 Gas, Report on Presence of Bisulphide of Carbon in, 4, 24, 38
 Gas, Results of Experiments to Ascertain the Consumption of, at the Public Lamps, and on the Application of the Carbureting Process etc., 6, 283
 Gas, Town, and its Uses, 97, 14
 Gas Users, Common Sense for, A Catechism of Gas Lighting, 37, 235
 Gas Works, Construction of, Practically Described, 65, 262
 Gas Works, Investigation of some of the Ammoniacal Waters of, and on the Presence of Chlorine Compounds in Coals, 26, 226
 Gas Works of London, 11, 153
 Gas Works Statistics, 46, 76; 49, 223; 52, 11; 54, 107; 56, 238; 58, 160; 59, 288; 64, 151
 Gas Works, their Construction and Arrangement, and the Manufacture and Distillation of Coal Gas, 65, 261; 90, 115
 Gases and Saturated Vapours, Thermodynamics of Reversible Cycles in, 70, 25
 Gases and Vapours Evolved on Heating Iron and other Metals, Spectra of the, 54, 176
 Gases, Compressed and Liquefied, 98, 270
 Gases, Dynamical Theory of, 91, 82
 Gases, Experimental Study of, 85, 105, 119; 91, 129
 Gases, Kinetic Imaging of, 78, 10, 107
 Gases, Kinetic Theory of, 81, 297
 Gases, Laboratory Book for the Liquid and Compressed Gases Industry, 100, 71
 Gases, Lessons on the Theory of, 85, 113; 92, 34
 Gases, Liquefaction of, Liquid Air, and the, 79, 249
 Gases, Liquefaction of, Rise and Development of, 80, 255
 Gases of the Atmosphere, 74, 291; 93, 199
 Gases, Physical Properties of, 63, 9
 Gases, Producer and Illuminating, Calorimetry of, 85, 213
 Gauging, Mensuration, etc., Pocket-book of, 64, 24
 Geber, a Tale of the Reign of Harun al Raschid, Khalif of Baghdad, 81, 274
 Gelatine and Glues, 95, 297
 Gelatine, Glue, and Allied Products, 93, 29
 Gems, American, and Precious Stones, 49, 264
 Gems and Precious Stones of North America, 61, 275; 66, 303; 79, 213
 Gems and Precious Stones, their History, Sources, and Characteristics, 79, 213
 Geneva University, Meeting for the Distribution of the Competitive Prizes, 96, 69
 Genie Industriel, 14, 250; 15, 56, 212; 16, 186, 222; 17, 61
 Geological and Chemical Essays, 32, 7
 Geological Map of Sutherland, 45, 250
 Geological Phenomena, Notes on the Nebular Theory in Relation to
 Stellar, Solar, Planetary, Cometary, and, 73, 57
 Geological Record, 33, 187; 38, 271; 47, 224; 57, 109; 60, 297
 Geological Time, Chemical Denudation in Relation to, 40, 189
 Geologie Comparée, Etude Mineralogique du fer Météorique de Deesa, 21, 33
 Geology, Applications of, to the Arts and Manufactures, 11, 208
 Geology, Blowpipe in Chemistry, Mineralogy, and, 50, 30, 59, 230; 59, 35
 Geology, Catechism of Agricultural Chemistry and, 40, 132
 Geology, Elements of Agricultural Chemistry and, 37, 17, 61; 44, 224
 Geology of the Goldfields of British Guiana, 99, 227
 Geometry, Plane and Solid, Elements of, 24, 107
 Georgia, Chemical Analyses and Commercial Values and Prices of Fertilisers sold in, 34, 50; 70, 250; 75, 213
 Georgia, State of, Report of T. P. Jones, Commissioner of Agriculture, for the Year 1875, 34, 170
 German and English Technical Vocabulary, 40, 299
 German East Africa, Reports on Agriculture and Forestry in, 86, 95
 German Educational Exhibition, World's Fair, St. Louis, 91, 95
 German Electro-chemical Patents, 94, 279
 German Empire, Directory and List of Products of the Chemical Industries of the, 66, 36
 German Grammar for Science Students, 94, 45
 German Patents dealing with Remedies and Disinfectants, 97, 239
 German Scientific and Technological Reader, 94, 206
 German, Scientific, Course of, 36, 182
 Germanium and Titanium, Physical Constants of, 55, 186
 Germany, Chemical Industries of, at the Beginning of the Twentieth Century, 87, 45
 Germany, Electro-chemical Industry of, 90, 116
 Germany, Industrial Chemistry in, 82, 254
 Germany, List of Products of Chemical Industries of, 66, 36
 Germany, Made in, 74, 148
 Germany, Study of Technical Chemistry at the Universities and Technical High Schools of, 76, 10
 Germinal Matter and the Contact Theory, 16, 99
 Geschichte der Chemie, 16, 267
 Ghost, as Produced in the Spectra Drama, 9, 30
 Ghosts Everywhere and of Every Colour, Spectroscopia, or Spectral Illusion showing, 9, 46
 Glasgow and West of Scotland Technical College Calendar for 1896-7, 74, 108
 Glasgow and West of Scotland Technical College, Reports on the Experiments on the Manuring of Oats, Hay, Turnips, and Potatoes, 76, 57
 Glasgow, Report on Air of, 38, 8, 161; 39, 248
 Glasgow Sewage, 41, 207
 Glass, etc., Decoration of, 98, 23
 Glass-blowing, Methods of, 54, 164
 Glass-blowing, Methods of, and of Working Silica in the Oxygen Flame, 85, 105
 Glass Industry in Jena, 100, 206
 Glass, Jena, and its Scientific and Industrial Applications, 87, 45
 Glazes, Leadless, Researches on, 83, 215
 Gloucester Diary for 1901, 83, 20
 Glucinum, Chemistry and Literature of, 99, 312; 100, 61
 Glucosides, 54, 331
 Glue, Gelatine, and Allied Products, 93, 29

BOOKS, REVIEWS AND NOTICES OF.

- Glue, Practical Treatise on the Fabrication of, **51**, 195
 Glues and Gelatine, **95**, 307
 Glycerin and Cod Liver Oil, **2**, 166
 Glycerin and its Uses in Medicine, Surgery, and Pharmacy, **8**, 274
 Glycerin, Modern Soaps, Candles, and, **94**, 319
 Gmelin's Handbook of Chemistry, Index to, **26**, 20
 Gold and Forest Industries of British Guiana, Report of the Council of the Institute of Mines and Forests on the, **76**, 218; **79**, 204
 Gold and Silver, Field Testing for, **81**, 284
 Gold and Silver Ores, Cyaniding, **89**, 249; **95**, 310
 Gold Assaying, **90**, 115
 Gold, Cyanide Process for Extraction of, **71**, 100; **74**, 195; **78**, 232; **85**, 105; **86**, 255; **87**, 157; **88**, 101; **89**, 145; **95**, 110
 Gold, Diamond, and Forest Industries of British Guiana, General Information with Regard to the, **89**, 130
 Gold Fields, Chemistry for the, **53**, 285
 Gold, Jeweller's Assistant in the Art of Working in, **66**, 108
 Gold, Metallurgy of, **58**, 253; **59**, 253; **63**, 260
 Gold, Nickel, Silver, Copper, etc., Galvanic Deposition of, **79**, 70
 Gold Ores, Stamp Milling of, **76**, 157
 Gold, Prospecting for, **84**, 290
 Gold, Silver, and Platinum, Precious Metals Comprising, **100**, 159
 Gold, Silver, Copper, and Lead Ores, Manual of Assaying, **47**, 270; **54**, 284; **60**, 316; **62**, 282; **65**, 262
 Goldfields of British Guiana, Geology of, **99**, 227
 Gout and Rheumatic Gout, A New Method of Cure, **23**, 120
 Graham, Thomas, Life and Works of, **50**, 223
 Grande Industria Chimica, **76**, 194
 Graphite, Artificial, **91**, 129
 Graphite, Canadian, Report on, **38**, 7
 Graphite, Rapid Methods for the Chemical Analysis of Special Steels, Steel-making Alloys, and, **99**, 189
 Gravitation, Speed of Propagation of the Rays of, and the Laws of their Action, **74**, 149
 Gravities, Specific, Tables of, **59**, 252
 Great Britain and Ireland, Year Book of the Scientific and Learned Societies of, **52**, 282
 Great Britain, Electro-Chemical and Electro-Metallurgical Industries of, **96**, 280
 Great Britain, Fields of, a Text-book of Agriculture, **43**, 184
 Great Britain, Her Finance and Commerce, **86**, 22
 Great Britain, Pharmaceutical Society of, **67**, 186
 Guanos, Natural History and Properties of the Different Varieties of, **2**, 116
 Gunpowder and Ammunition, **91**, 7
 Gutta-percha Trees, **80**, 23
 Handbuch der Angewandten, Pharmaceutisch und Technisch Chemischen Analyse, **23**, 81
 Handbuch der Chemischen Manipulationen, **2**, 177
 Handbuch der Kohlenhydrate, Kurzes, **72**, 206
 Handels-Berichte, **37**, 248; **41**, 293; **55**, 246
 Handicraft, Scientific, **28**, 155
 Handling Dangerous Goods, **72**, 280
 Harmerstein, a new Chemical Round Game, with Instructions for Playing it, **40**, 8
 Harrogate Waters, **44**, 70
 Harvard College, Addresses at the Inauguration of C. W. Eliot as President, **21**, 32
 Harvard University, Bulletin of the Bussey Institution, **29**, 248; **32**, 60; **34**, 90; **35**, 194; **36**, 232; **37**, 201; **50**, 234
 Hay, Oats, Turnips, and Potatoes, Reports on Experiments on Manuring of, **76**, 57
 Hay Fever, New Observations on, with New Experiments on the Quantity of Ozone in the Atmosphere, **36**, 97
 Hay Fever or Hay Asthma, Experimental Researches on the Causes and Nature of Catarrhus Aestivus, **29**, 204
 Health and Beauty, Helps to, **73**, 34
 Health and Disease, Ozone in Relation to, **39**, 133
 Health, Bad, and Bad Air, **70**, 110
 Health, Board of, New York State, **61**, 227
 Health, Laws of, **42**, 207
 Health, Notes and Curiosities of Medical Science, **78**, 264
 Health of the Senses, **49**, 275
 Health, Philosophy of, **11**, 104
 Health, Public, Dictionary of Hygiene and, **33**, 127
 Health, Public, Laboratory Work, and Food Analysis, Handbook of, **79**, 286
 Health, Public, Manual of, **29**, 9
 Heart Disease, Cycling as a Cause of, **74**, 305
 Heat, **91**, 57; **99**, 47
 Heat and Other Forces, **99**, 239
 Heat as a Form of Energy, **63**, 130
 Heat, Chemical Notes for the Lecture room on, **17**, 179
 Heat Considered as a Mode of Motion, **7**, 224; **22**, 116
 Heat, Elementary Treatise on, **14**, 262; **60**, 23
 Heat Energy and Fuels, **99**, 239
 Heat, Inquiry into the Nature of, and into its Mode of Action in the Phenomena of Combustion, Vaporisation, etc., **8**, 205
 Heat, Laws of Chemical Combination, and Chemistry of the Non-Metallic Elements, Chemical Notes for the Lecture-room on, **25**, 128
 Heat, Light and Power, Electrical Distribution of, **60**, 315
 Heat, Numerical Examples in, **52**, 304
 Heat, Practical Work in, **68**, 220
 Heat Radiant, Contributions to Molecular Physics in the Domain of, **26**, 104
 Heat, Sound, and Light, **53**, 108
 Heat, Sound, and Light, Lectures on, **52**, 304
 Heat, Sound, and Light, Organised Science Series, First Stage, **76**, 182
 Heat, Sun's, Origin of the, and the Chemical Constitution of the Matter of His System, **35**, 143
 Heat, What is, **71**, 85
 Heating and Lighting of London by Pipe Lines, **62**, 211
 Heating and Ventilation of Schools, **59**, 142
 Heavenly Bodies, Results of Spectrum Analysis applied to the, **15**, 54
 Heavenly Bodies, Spectrum Analysis in its Application to Terrestrial Substances, and the Physical Constitution of the, **22**, 284; **25**, 80
 Helbing's Pharmaceutical Record, **67**, 120
 Hemp and Flax, Preparation of with out rot-steeping, **38**, 188
 Heroes of Science, **54**, 272
 Heroes, Spiritual, a Collection of Biographies, **73**, 21
 Heumann's, Karl, Directions for Lecture Experiments in Inorganic Chemistry, **89**, 166
 High Temperatures, Measurement of, **81**, 250
 Highland and Agricultural Society of Scotland, Proceedings of the Chemical Department of the, for 1865, **13**, 274
 Hindu Chemistry, History of, **87**, 93; **96**, 304
 History of Chemistry, Since the time of Lavoisier, **81**, 249
 History of the Progress of Scientific Chemistry in Our Own Times, A Short, **81**, 33
 Hofmann's Polarimeter and its Use as a Saccharimeter and Diabetometer, **25**, 29
 Holborn District Board of Works, Report of Medical Officer of Health, **14**, 200; **15**, 7; **54**
 Homeopathy, Errors of, **34**, 70
 Hong Kong, Report of Government Analyst, 1896, **74**, 149
 Hop-manuring, Notes on Five Years' Experiments conducted at Golden Green, Hadlow, Tonbridge, **82**, 194
 Horticultural and Agricultural Association, Address to, **55**, 138
 Hospital Annual Year Book of Philanthropy, Burdett's, **64**, 223
 Hospital, London, Pharmacopoeia of the, **45**, 261
 Hospital, St. Bartholomew's, Reports, **12**, 213, 228, 239
 Hospitals, London, Pharmacopoeias of the, **8**, 9; **21**, 55
 House Painting, **98**, 258
 House-Surgeon, or the Doctor at Home, **64**, 24
 Household, Non-chemical, Chemistry for the, **45**, 261
 How do I Stand? **64**, 24
 Hudson River, Reports on the Waters of the, **55**, 57, 224
 Hugg, Muddy Waters of the, During the Rainy Season, with Reference to its Purification and to the Calcutta Water Supply, **30**, 37
 Human Body, Experiments on the Metabolism of Matter and Energy in, **89**, 261
 Human Conduct, Scientific View of, **99**, 48
 Human System, Third Treatise on the Effects of Borax and Boracic Acid on, **93**, 177
 Hunter and Driffeld's Actinograph, Instructions for the Use of, **65**, 142
 Hunyadi Janos, Aperient Natural Mineral Water, **34**, 90
 Hydrogen and Carbon, Determination of, **84**, 277
 Hydrogen, Carbides of, **85**, 82
 Hydrogen Sulphide, Preservation of Solutions of, **67**, 120
 Hydrogenation, New General Methods of, and of Molecular Condensation, **93**, 11
 Hydrometry, Handbook of, **31**, 172
 Hygiene and Demography, Congress of, **71**, 63
 Hygiene and Public Health, Dictionary of, **33**, 127
 Hygiene, Chilian Review of, **74**, 61, 280; **76**, 10
 Hygiene, Dictionary of, **89**, 22
 Hygiene, Domestic, and Home Nursing, **38**, 150
 Hygiene, First Stage, **82**, 106
 Hygiene, Nature's, **36**, 283; **41**, 293; **51**, 70; **57**, 229; **69**, 228
 Hygiene, Nature's, and Sanitary Chemistry, **96**, 256
 Hygiene of Air and Water, **26**, 134
 Hygiene of Coal-tar Colours, **48**, 20
 Hygiene of Ships, etc., Practical Points on the, **70**, 171
 Hygiene, Pocket Dictionary of, **78**, 232
 Hygiene, Practical, **68**, 106
 Hygiene, Practical, Handbook of, **81**, 117; **84**, 315
 Hygiene, Public and Private, Manual of, **31**, 96
 Hypochlorites and Electric Bleaching, **89**, 46; **92**, 94
 Hyposulphite Solutions, Researches on the Time Taken for the Appearance of Precipitates in, **92**, 270
 Ice Formation, **95**, 46
 Ice from Lakes Onondaga and Cazenovia and Erie Canal, Purity of, **55**, 283
 Iceland, Peculiar Fog seen in, and on Vesicular Vapours, **31**, 84
 Iceland, Sulphur in, **30**, 72
 Il Movimento Scientifico, etc., **13**, 22

 Kerosene Oil Sold in the Metropolitan District, New York, Report on the Quality of the, 22, 33
 Key to Modern Science, 34, 271
 Key to Organic Materia Medica, 37, 249
 Khartoum, Gordon Memorial College, Report of the Wellcome Research Laboratories at, 94, 206; 100, 71
 Kinetic Imaging of Gases, 78, 10, 107
 Knowledge Diary and Scientific Handbook, 83, 8; 86, 305; 88, 316
 Kunst und Gewerbeblatt der Polytechnischen Vereins von Bayern, 14, 250, 287; 15, 50, 132, 146, 199; 16, Kurzes Handbuch der Kohlenhydrate 114, 129, 282, 316; 17, 98; 18, 24, 177
 72, 206
 Labels, Chemical, 19, 248, 296; 25, 272; 33, 93; 52, 188; 54, 272; 66, 303
 Labels, Chemical Laboratory, 58, 254; 61, 186; 71, 281
 Labels for Chemical Students, 19, 272
 Labels for Reagents, Set of, and a Table of Atomic Weights of the Elements, 1, 117
 Labels, Photographic, Complete Series of, 19, 248
 Laboratories, Arrangement of, 100, 152
 Laboratories, Chemical and Physical, Planning and Fitting-up of, 88, 233
 Laboratories, Chemical, Apparatus and Utensils for, 71, 230
 Laboratories, Chemical, Applicability of Ductile Nickel in, 51, 283
 Laboratories, Electrolytic, Arrangement with special reference to the Requirements for Smelting, 87, 238
 Laboratories of Owens College, Studies from the, 69, 107
 Laboratory, Analytical, Cape of Good Hope, Report of the Senior Analyst of the, 70, 108
 Laboratory Arts, 98, 232
 Laboratory Book for the Liquid and Compressed Gases Industry, 100, 71
 Laboratory Book for the Brown Coal Tar Industry, 99, 203

BOOKS, REVIEWS AND NOTICES OF.

- Laboratory Book for the Perfumery Industry, 98, 221
 Laboratory Book for the Petroleum Industry, 99, 227
 Laboratory Book for Theoretical Chemists, etc., 99, 180
 Laboratory Calculations and Chemical Percentage Tables, 47, 57
 Laboratory Calculations and Specific Gravity Tables, 54, 199
 Laboratory, Chemical, Elementary Manual for, 90, 267
 Laboratory, Chemical, Labels, 58, 254; 61, 186; 71, 281
 Laboratory Companion for Use with Shennstone's Inorganic Chemistry, 84, 231
 Laboratory Companion to Fats and Oils Industries, 85, 70
 Laboratory Experiments on the Class Reactions, and Identification of Organic Substances, 77, 296
 Laboratory, Government, Report of the Principal Chemist upon the Work of the Inland Revenue Branch of the, 79, 130
 Laboratory Guide, 22, 201; 29, 152; 36, 31; 45, 261; 58, 57; 70, 25; 94, 210
 Laboratory Guide for Students of Agricultural Chemistry, 10, 166
 Laboratory Guide in Qualitative Chemical Analysis, 78, 33
 Laboratory Guide of Industrial Chemistry, 99, 227
 Laboratory Handbook, Gas Engineers, 69, 311
 Laboratory Instructions in General Chemistry, 83, 117
 Laboratory Manual, 75, 118; 80, 229
 Laboratory Manual of Dyeing and Textile Chemistry, 100, 71
 Laboratory Manual of Qualitative Analysis, 99, 34
 Laboratory Methods of Inorganic Chemistry, 100, 171
 Laboratory Note-book for Chemical Students, 81, 250
 Laboratory Notes on Industrial Water Analysis, 99, 227
 Laboratory of Missouri State University, 85, 230
 Laboratory, Physiological, Manual for, 42, 45
 Laboratory of Physiological Chemistry, Sheffield Scientific School of Yale College, Studies from the, 53, 21; 56, 104
 Laboratory, Physiological, of the Imperial University at Moscow, 69, 132
 Laboratory Practice, 65, 215
 Laboratory Studies for Brewing Students, 91, 46
 Laboratory Tables for Qualitative Analysis, 73, 163
 Laboratory Teaching, 20, 43; 40, 22; 68, 305
 Laboratory Work, Elements of, 61, 168
 Laboratory Work, Public Health and Food Analysis, Handbook of, 79, 286
 Lamps, Mineral Oil, Accidents with, 62, 48
 Lamps, Patent Safety, 47, 153
 Lamps, Pentane, and Pentane Standard, 59, 288
 Landwirtschaftliches Centralblatt für Deutschland, 15, 69
 Lantern, Magic, 68, 292
 Lantern, Magic, Manual, 39, 32
 Lantern, Optical, as an Aid to Teaching, 65, 155
 Lanterns, Magic, How Made and How Used, 32, 245
 Latin Grammar of Pharmacy, 89, 46
 Laundry Management, 60, 231
 Lavoisier, Collected Works of, 7, 236
 Law Against Adulteration of Articles of Food and Drink, 5, 306
 Law and Practice of Letters Patent for Inventions, 62, 35; 75, 214
 Law and Practice of Letters Patent for Inventions, Digest of the Reported Cases Relating to the, 32, 70
 Law and Practice of Patents, 49, 263
 Law, Case, of the Workmen's Compensation Act, 1897, 83, 129
 Law Connected with Letters Patent for Inventions, Concise View of the, 23, 213
 Law of Copyright in Designs, 72, 22
 Law of Cremation, 68, 72
 Law of Master and Servant, 97, 95
 Law of Trade Marks, 62, 60
 Law Relating to the Pollution and Obstruction of Watercourses, Treatise on the, together with a Brief Summary of the Various Sources of Rivers Pollution, 35, 274
 Laws of Health, 42, 207
 Laws, Patent, Epitome of, 69, 83
 Laws, Patent, Handbook of, 49, 156
 Laws, Patent, Treatise on, 63, 164
 Lazy Lays and Prose Imaginings, 36, 181
 Lead, Action of Water on, 63, 163
 Lead and Copper Smelting and Copper Converting, Notes on, 77, 43
 Lead and Mercury Industries, 100, 182
 Lead and Silver, Metallurgy of, 80, 303; 82, 107
 Lead and Tin, Causes of the Increase of, on Calcination, 71, 209
 Lead and Zinc Pigments, 100, 232
 Lead, Argentiferous, Metallurgy of, 65, 9
 Lead, Gold, Silver, and Copper Ores, Manual of Assaying, 47, 270; 54, 284; 60, 316; 62, 282; 65, 262
 Lead, Paints and Colours Containing Report on the Manufacture of, 92, 79
 Lead Smelting, 86, 254
 Leather, Directions for the Use of Aniline Colours in Dyeing, 35, 133
 Leather for Libraries, 92, 157
 Leather Industries Laboratory Book, 98, 131
 Leather Manufacture, Art of, 50, 305
 Leather Manufacture, Principles of, 89, 166
 Leather, Technical and Practical, 99, 58
 Leather Trades Chemistry, 97, 287
 Leclanché Battery, Treatise on the, 20, 297
 Leçons de Chimie Physique Professées à l'Université de Berlin, 78, 290
 Leçons Elementaires de Chimie Moderne, 40, 319
 Lecture Notes for Chemical Students, 14, 237, 286; 22, 10; 26, 34; 44, 58
 Lectures Scientifiques, 90, 268
 Leeds Chemists' Association, Inaugural Address delivered before, 7, 141
 Leeds, Yorkshire College, 46, 231
 Legal Chemistry, Detection and Examination of Poisons and Stains, 34, 18
 Legal Handbook, Chemists', 67, 11
 Leguminous Root Tubercles, 75, 285
 Lehrbuch der Organischen Chemie oder der Chemie der Kohlenstoffverbindungen, 2, 141, 321; 5, 124
 Lehrbuch der Organischen Qualitativen Analyse, 43, 185
 Letts's Diaries, 22, 311; 29, 48; 32, 310; 38, 208; 41, 21; 44, 302; 46, 242; 48, 278; 50, 294; 53, 22; 55, 11; 56, 270; 60, 305; 62, 286; 64, 322; 66, 294
 Lexicon of the Carbon Compounds, 80, 229; 81, 191

 Oils, Vegetable and Animal Fixed, in the Manufacture of Soap, etc., 68, 315
 Old Riddle and the Newest Answer, 89, 225
 Oleine, Crystal Cod Liver, 14, 153
 Olefatics and the Physical Senses, 57, 61
 Ophthalmic Review, 9, 189, 190; 10, 46; 11, 104; 12, 34, 229; 14, 225
 Ophthalmic Surgery, Progress of, from the Invention of the Ophthalmoscope, 1851, up to the Present Time, 1863, 8, 83
 Optical Activity, and Chemical Composition, 81, 190
 Optical Pyrometry, 91, 243
 Optische, Das, Drehung's vermögen Organischer Substanzen und dessen Praktische Anwendungen, 77, 284
 Oratorio Verse on the Chemical Elements, 30, 174
 Ores, Gold and Silver, Cyaniding, 89, 249
 Ores, Gold, Stamp Milling of, 76, 157
 Ores, Iron, and Fuel, Iron and Steel, Assay and Analysis, 51, 60
 Ores, Metals, Fuels, etc., Aids to the Analysis and Assay of, 86, 232
 Ores, Pig Iron, and Steel, Methods for the Analysis of, 81, 22; 85, 190
 Ores, Trentine of, 34, 50
 Original Research, 38, 149
 Organic Analysis, Outlines of Proximate, 32, 40
 Organic Chemical Preparations, Catalogue of Essential Oils and, 70, 170
 Organic Chemistry, Practical, 59, 178; 79, 117; 80, 171
 Organic Chemistry, Practical Work in, 63, 283
 Organic Chemistry, Principles of General, 62, 59
 Organic Compounds, Electrolysis and Organic C-synthesis of, 79, 82
 Electro

BOOKS, REVIEWS AND
NOTICES OF.

Organic Compounds, Exercises in the Preparation of, **73**, 22
Organic Compounds, Method for the Identification of Pure, **90**, 69
Organic Compounds of Every-day Life, Introduction to the, **69**, 180, 275
Organic Preparations, Handbook of, **97**, 45
Organic Substances, Laboratory Experiments on the Class Reactions, and Identification of, **77**, 296
Organic Substances, Optical Activity of, and its Applications, **77**, 284
Organic Substances, Optical Rotating Power of, **89**, 129
Organic Substances, Qualitative Chemical Analysis of, **75**, 188
Organization of Science, **66**, 159
Organischen Qualitativen Analyse, **43**, 184
Organised Science Series, **75**, 188; **76**, 182; **78**, 242, 277
Organism, Living, An Introduction to the Study of Biology, **78**, 302
Oriental Miscellany, Constable's, **66**, 149
Ortho-condensation Products, Nitrogenous, **69**, 191
Oscillations Regulator, **29**, 23
Ostwald, Wilhelm, **89**, 261
Our Daily Water Supply, **55**, 185
Our Domestic Poisons, **39**, 121
Our Foreign Competitors, **69**, 132
Our Inheritance in the Great Pyramid, **10**, 252, 296
Our Meat Supply from Abroad, **23**, 153
Our Secret Friends and Foes, **67**, 59; **70**, 199; **75**, 154
Our Sun, from a Physical, a Philosophical, and a Mythological Point of View, **36**, 97
Our Supply of Phosphates, **59**, 24
Owens College, Manchester, Description of the Chemical Laboratories at, **44**, 249
Owens College, Junior Course of Practical Chemistry, **27**, 57
Owens College, Studies from the Laboratories of, **69**, 107
Oxen, Sheep, and Pigs, Composition of, and of their Increase whilst Fattening, **3**, 296
Oxfordshire, Sanitary Condition of, **30**, 143
Oxides, Abridgments of Specifications Relating to 1622-1866, **20**, 116
Oxyanthrachinon, Contributions to the Knowledge of Alazarin and, **32**, 144
Oxygen, Discovery of, **70**, 119
Ozone, **68**, 72
Ozone and Antozone, their History and Nature, **27**, 82
Ozone, in Relation to Health and Disease, **39**, 133
Ozone in the Atmosphere, New Observations on Hay-fever, with New Experiments on the Quantity of, **36**, 97
Pain et la Panification, **75**, 118
Pain, Insensibility to, and the Induction of Sleep by the Self-administration of Anæsthetics, **31**, 19
Paint and Varnish, Industrial and Artistic Technology of, **91**, 32
Painters' Colours, Oils, and Varnishes, **66**, 316; **74**, 47; **84**, 277; **95**, 94
Painters' Laboratory Guide and Handbook on Paints, Colours, and Varnishes for Students, **86**, 268
Painting, House, **98**, 258
Painting, Pigments, Paints and, **69**, 11
Paints and Colours containing Lead, Report on the Manufacture of, **92**, 79
Paints and Paint Vehicles, Chemistry of, **94**, 194
Paints and Painting, Chemistry of, **61**, 264; **84**, 277
Paints, Chemistry and Technology of Mixed, **96**, 46

Paints, Colour Pigments and Varnishes, Analysis of Mixed, **97**, 287
Paints, Pigments, and Painting, **69**, 11
Panatons, Programme of Atom-mechanics, or Chemistry as Mechanics of the, **16**, 289
Panification, Bread and, **75**, 118
Paper Makers, Directory of, **75**, 130
Paper Makers' Directory of all Nations, **52**, 270; **92**, 59; **98**, 131
Paper Makers of the United Kingdom, Directory of, **77**, 166; **85**, 156; **89**, 193
Paper Making, Art of, **61**, 226
Paper Making, Chapters on, **96**, 256; **99**, 58
Paper Making, Practical, **69**, 252; **95**, 214
Paper Making, Textbook of, **57**, 21; **83**, 11
Paper, Manufacture of, **99**, 311
Paper Mill Chemist, **97**, 192
Paper Technology, **94**, 265; **96**, 106
Paper Trade Directory, **87**, 155; **89**, 168
Parallelogram of Forces, as Foundations of the Periodic System in Chemistry, **74**, 11
Paris Exhibition, 1867, Sketch of the Mineralogy of Nova Scotia, as Illustrated by the Collections of Minerals sent to the, **16**, 11
Paris, Sewage of, **41**, 171, 193
Paris Universal Exposition, 1867, Reports of the United States Commissioners, Progress and Condition of Several Departments of Industrial Chemistry, **22**, 68
Parthenogenesis, Researches on Artificial, **95**, 70
Passaic River Pollution, **47**, 153
Pasteur, Louis, His Life and Labours, **51**, 140
Pasteur, Life of, **85**, 69
Patent for Inventions, Concise View of the Law connected with, **23**, 213
Patent for Inventions, Digest of the Reported Cases Relating to the Law and Practice of Letters, **32**, 70
Patent for Inventions, Law and Practice of Letters, **75**, 214
Patent Law and Practice of Letters, **62**, 35
Patent Laws and Cases, Digest of, **49**, 134
Patent Laws, Epitome of, **69**, 83
Patent Laws, Handbook of, **49**, 156
Patent Laws of all Countries, Handbook of, **46**, 103
Patent Laws, Treatise on, **63**, 164
Patent Office Library, Class List and Index of Periodical Publications in, **85**, 262
Patent Office Library, Subject-list of Works on Architecture and Building Construction in, **88**, 82
Patent Office Library, Subject List of Works on Certain Chemical Industries in, **85**, 238
Patent Office Library, Subject-list of Works on Chemistry and Chemical Technology in, **85**, 23
Patent Office Library, Subject-list of Works on Domestic Economy, Foods and Beverages in, **86**, 196
Patent Office Library, Subject-list of Works on Electricity, Magnetism, and Electro-technics in, **89**, 310
Patent Office Library, Subject-list of Works on Fine and Graphic Arts (including Photography) and Art Industries in, **91**, 7
Patent Office Library, Subject-list of Works on General Science, Physics, Sound, Music, Light, Microscopy, and Philosophical Instruments in, **87**, 93
Patent Office Library, Subject-list of Works on Mineral Industries and Allied Sciences in, **88**, 316
Patent Office Library, Subject-list of Works on Textile Industries and Wearing Apparel in, **86**, 208

Patents, Abridgments of Specifications of, **17**, 180
Patents, Abstracts of Specifications of applied for from 1854 to 1866, A to Bu, Victoria, **23**, 93
Patents Acts, Compulsory Licensees under, **81**, 310
Patents and Copyright for Inventions, **40**, 41
Patents and Designs Act, 1907, **98**, 10
Patents and Patentees from 1854 to 1866, Victoria, **23**, 44
Patents, Designs, and Trade Marks Acts, **48**, 235; **59**, 251; **49**, 244
Patents, English Electro-chemical, **97**, 192
Patents for Inventions, Abridgments of Specifications, **76**, 193
Patents for Inventions, British, Grant and Validity of, **89**, 142
Patents for Inventions, Epitome of the Law and Practice connected with, **82**, 302
Patents, German Electro-chemical, **94**, 279
Patents, Law and Practice of, **49**, 263
Patents, Monopolies by, **76**, 81
Patentees' Guide, **53**, 23
Patentees' Manual, **39**, 122; **51**, 104, 116
Pathological and Physiological Chemistry, Laboratory Manual of, **90**, 9
Pathology and Chemical Physiology, Journal of, **85**, 35, 82, 106, 214
Pathology and Physiology, Chemical, Contributions to, **86**, 60, 95, 268; **87**, 34, 83, 202, 311; **88**, 10, 243, 305; **90**, 34, 81; **91**, 94, 104
Pathology, Manual of Chemical Physiology, including its Points of Contact with, **26**, 34
Peace and War, **94**, 11
Peat, its Use and Manufacture, **96**, 69
Pennsylvania, Pharmaceutical Association of, **46**, 266; **52**, 270
Pentane Standard and Pentane Lamps, **59**, 288
Pepsine, **5**, 255
Pereira's Elements of Materia Medica and Therapeutics, **30**, 154
Perfumery Industry, **99**, 238
Perfumery Industry, Laboratory Book for, **98**, 221
Perfumery, Piesse's Art of, **64**, 37
Perfumery, Reports of the International Jury of the Paris Exhibition, 1900, **86**, 59
Perfumes, Artificial, **81**, 69
Perfumes, Artificial, Chemistry of Essential Oils and, **99**, 58
Perfumes, Book of, **11**, 250
Perfumes, Chemistry of, and the Manufacture of Essences, **86**, 304
Perfumes, Synthetic and Isolated, and their Preparation, **98**, 293
Perfumes used in Soap-making, Dictionary of, **79**, 22
Periodic Classification and the Problem of Chemical Evolution, **84**, 196
Periodic Law, **100**, 278
Periodic Law, Development of, **74**, 221
Periodic Law, Discovery of, **49**, 198
Periodicals, Scientific and Technical, Catalogue of, **63**, 141
Perkin, Son, and Rayment's Illustrated Catalogue of Photographic Apparatus, etc, **72**, 268
Perplexed Farmer, **64**, 199
Petrogenesis, **93**, 233
Petrol Tanks, Fire Tests with, **96**, 234
Petroleum, **72**, 36; **73**, 130
Petroleum and Gas, Incandescence by, Acetylene and its Applications, **74**, 60
Petroleum and its Allies, **94**, 183
Petroleum and its Products, **94**, 240
Petroleum and its Products, Examination of, **94**, 266
Petroleum and other Mineral Oils, Examination of, according to the Petroleum Act, 1868, **21**, 10
Petroleum, Coal, and other Distilled Oils, Practical Treatise on, **4**, 54; **12**, 180

Bromated toluidine (*see* Toluidine)
 Bromazonaphthalin, penta- (*see* Penta-brom-azo-naphthalin)
 Brombenzene, chlor- (*see* Chlorbrombenzene)
 Brombenzoic acid (*see* Acid)
 Brombenzol, di- (*see* Dibrombenzol)
 Brombenzols, di- (*see* Dibrombenzols)
 Brombenzol-sulphohalide, mono- (*see* Mono-brom-benzol-bromides)
 Brombenzol-sulphochloride, 22, 144
 Brombenzonitrile, 24, 132
 Bromcarben oxide, 43, 258
 Bromdimethylaniline, 41, 35
 Bromdiphenylmethane, action on ethyl sodoocto acetate, 75, 274
 Bromethane, hexa- (*see* Hexabromethane)
 Bromethyl, action on naphthalin potassium, 27, 22
 Bromethyl-acrylic acid (*see* Acid)
 Bromethylene, action on strychnine, 5, 260—Di- (*see* Dibromethylene)—Tri- (*see* Tribromethylene)
 Bromethylenes, di- (*see* Dibromethylenes)
 Bromhydrates of allylene (*see* Allylene)—Of quinine (*see* Quinine)
 Bromhydric acid (*see* Acid)
 Bromhydrine, epi- (*see* Epibromhydrine)—Epidi- (*see* Epidibromhydrine)—Tri- (*see* Tribromhydrine)
 Bromhydrines, Tri- (*see* Tribromhydrines)
 Bromic acid (*see* Acid)
 Bromide, action of nitrogen oxides on, 75, 143—Action on gallic acid, 29, 95—Action on mono-methylamin, 42, 24—Action on protocatechuic acid, 29, 95—Action on tannin, 29, 95—Allyl, preparing, 38, 152—And aniline compounds, 57, 219—And chlorine, separation, 75, 236—Argentio, solubility in solutions of sodic thiosulphate, 79, 109—Benzylic, 15, 214; 16, 24—Bromacetyl- (*see* Bromacetyl-bromide)—Butylenic, 27, 84—Butylic, 23, 299—Carbon-tetra (*see* Carbon-tetrabromide)—Carbon-trichlor- (*see* Carbontrichlorbromide)—Carbo-trithiohexa (*see* Carbo-trithiohexabromide)—Chromous, 43, 263—Cupric, 69, 241—Cupric, absorption spectra of, 69, 257, 275—Cupric, analysis, 63, 29, 34, 43—Cupric, hydrobromide solutions of, absorption spectra, 69, 275—Cupric, precipitation with sulphuric acid, 86, 95; 87, 203—Cyan- (*see* Cyano-bromide)—Di- (*see* Dibromide)—Dichlorochromic, 96, 55—Diethylauric, 96, 277—Dimercury-ammonium- (*see* Dimercury - ammonium - bromide)—Ether-oxonium di- (*see* Ether-oxonium dibromide)—Ethyl- (*see* Ethyl-bromide)—Ferric, action on aromatic carbides, 80, 47—Ferric, reduction, 60, 270—Ferrous, absorption of nitric oxide by, 74, 317—Ferrous, action of ammonia on, 82, 245—Hexamethylenedi (*see* Hexamethylenedibromide)—Isobutyl (*see* Isobutyl)—Isobutylene (*see* Isobutylene)—Magnesium a-naphthyl (*see* Magnesium)—Mercuric, action of gaseous PH_3 on, 97, 35—Mercuric, calorimetric and cryoscopic constants of, 100, 208—Mercurous, 71, 269—Metho-ethylenbenzene di- (*see* Metho-ethylenbenzene)—Of acetyl (*see* Acetyl)—Of acetylene (*see* Acetylene)—Of aluminium (*see* Aluminium)—Of ammonium (*see* Ammonium)—Of aniline (*see* Aniline)—Of antimony (*see* Antimony)—Of barium (*see* Barium)—Of benzol (*see* Benzol)—Of benzylidene (*see* Benzylidene)—Of bismuth (*see* Bismuth)—Of boron (*see* Boron)—Of cadmium (*see* Cadmium)—Of calcium (*see* Calcium)—Of carbon (*see* Carbon)—Of cerium (*see* Cerium)—Of chromium (*see* Chromium)—Of copper (*see* Copper)—Of dimercury-ammonium (*see* Dimercury-ammonium)—Of ethylene (*see* Ethylene)—Of ethylenide (*see* Ethylenide)—Of hydrogen (*see* Hydrogen)—Of gold (*see* Gold)—Of iodine (*see*

Iodine)—Of isobutylene (*see* Isobutylene)—Of lithium (*see* Lithium)—Of magnesium (*see* Magnesium)—Of magnesium a-naphthyl (*see* Magnesium a-naphthyl)—Of manganese (*see* Manganese)—Of mercury (*see* Mercury)—Of morphia (*see* Morphia)—Of a naphthylmagnesium (*see* a-Naphthylmagnesium)—Of nitrosyl (*see* Nitrosyl)—Of oxylylene (*see* Oxylylene)—Of pentamethylene (*see* Pentamethylene)—Of phenylmagnesium (*see* Phenylmagnesium)—Of phosphonium (*see* Phosphonium)—Of platinum (*see* Platinum)—Of potassium (*see* Potassium)—Of propylene (*see* Propylene)—Of quinine (*see* Quinine)—Of radium (*see* Radium)—Of silver (*see* Silver)—Of sodium (*see* Sodium)—Of strontium (*see* Strontium)—Of strychnine (*see* Strychnine)—Of sulphur (*see* Sulphur)—Of tetra-ethylammonium (*see* Tetraethylammonium)—Of tetraethylammonium (*see* Tetraethylammonium)—Of tetramethylene (*see* Tetramethylene)—Of thorium (*see* Thorium)—Of tin (*see* Tin)—Of trimethylene (*see* Trimethylene)—Of vinyl (*see* Vinyl)—Of xylylene (*see* Xylylene)—Oxy (*see* Oxybromide)—Pinene tetra- (*see* Pinene)—Potassic, analysis, 96, 150, 170—Potassic, and sodic chloride, double decomposition, 36, 86—Propionyl (*see* Propionyl)—Propyl (*see* Propyl)—Propylene chloro- (*see* Propylene)—Propylenedi- (*see* Propylene)—Propylenic, 27, 84—Propylic, 23, 299—Sesqui- (*see* Sesquibromide)—Silicon sulpho- (*see* Silicon)—Silver colloidal- (*see* Silver)—Silver photo- (*see* Silver)—Tetra- (*see* Tetrabromide)—Thionyl (*see* Thionyl)—Thorium tetra (*see* Thorium)—Tribromophenol (*see* Tribromophenol)—Trichloracetyl (*see* Trichloracetyl)—Triphenyl methyl (*see* Triphenyl)
 Bromide-bromate mixture and potassium-aluminium sulphate, reaction between, 97, 102
 Bromides, alcoholic, action of phenylhydrazine on, 80, 72; 83, 137—And chlorides and alkaline iodides, separation of iodine in the form of cuprous iodide from a mixture, 88, 293—And chlorides, quantitative separation, 96, 183, 210—And hydrocarbon of hexylic series, 10, 130—Chloro- (*see* Chlorobromides)—Commercial, purity of, 12, 162—Conversion of organic iodides into, 22, 46—Detecting, 53, 193—Detecting chlorides in presence of, 52, 107—Determination in presence of sulphocyanates, 96, 299—Dextro-benzyl phenylallylmethylammonium, 80, 232—Di- (*see* Dibromides)—Diazonium (*see* Diazonium)—Double, 74, 196—Double phosphorus and indium, 62, 49—Electrolysis, 78, 268—Estimation in presence of chlorides and iodides, 86, 84—Estimation of iodides in presence of, 85, 287—Fluo- (*see* Fluobromides)—Isomeric, 40, 44—Levo-benzylphenylallylmethyl - ammonium (*see* Levo-benzylphenylallylmethylammonium bromides)—Metallic, detection of iodine in, 42, 312—Monobrombenzol (*see* Mono-brom-benzol-bromides)—Of alkaline (*see* Alkaline)—Of alkyl (*see* Alkyl)—Of cobalt (*see* Cobalt)—Of gold (*see* Gold)—Of magnesium (*see* Magnesium)—Of metals (*see* Metals)—Of morphia (*see* Morphia)—Of nitrogen (*see* Nitrogen)—Of olefines (*see* Olefines)—Of phosphorus (*see* Phosphorus)—Of propylene (*see* Propylene)—Of quinine (*see* Quinine)—Of silver (*see* Silver)—Of sulphur (*see* Sulphur)—Of tin (*see* Tin)—Of tungsten (*see* Tungsten)—Of xylyls (*see* Xylyls)—Organo-magnesium, effect of anhydrides on, 90, 276—Poly- (*see* Polybromides)—Preparation, 17, 117—Silicon tetra- (*see* Silicon)—Silver chloro- (*see* Silver)—Soluble, determination, 65,

191—Test for, 17, 208—Test for, alone or in solution with chlorides, 97, 307
 Brominated acetamide (*see* Acetamide)—Ketones (*see* Ketones)
 γ - and δ -Brominated ethers (*see* Ethers)
 Bromination by means of aluminium bromide, 81, 251—By means of aluminium in fatty series, 78, 255—Experiments with diazobenzene perbromides, 98, 198—Of para-hydroxydiphenylamine, 97, 92—Of phenols (*see* Phenols)
 Bromindanones, oxybenzal- (*see* Oxybenzalbromindanones)
 Bromindenone, monoxylbenzal- (*see* Monoxylbenzalbromindenone)
 Bromine, 7, 253; 21, 300; 22, 12; 33, 244; 253; 37, 39; 49, 101; 64, 184—Action, 65, 58, 308; 66, 185; 67, 160; 68, 255; 69, 144—Action of heat on, 24, 75—Action of ether on, 20, 322; 98, 280—Action of light on, 24, 229; 25, 22—Action on acetate of ethyl, 8, 268—Action on acetone, 35, 85—Action on aldehyd, 31, 130—Action on alizarin, 27, 317—Action on amines in alkaline solution, 48, 237—Action on benzene, 77, 125—Action on benzene- α -nitrophenol, 93, 66—Action on benzylenamide at high temperatures, 43, 48—Action on betanaphtholsulphonic acid, 54, 256—Action on bibromosuccinic acid, 27, 94, 106; 29, 273—Action on bilirubin, 35, 9—Action on boiling ethylbenzol, 27, 303—Action on bromoform, 78, 47—Action on bromo-pyrocatechin and on bromo-pyrogallol in presence of water, 29, 96—Action on cane-sugar, 40, 241—Action on carvacrol in presence of bromide of aluminium, 85, 180—Action on chloral, 76, 278—Action on cinchonidine, and on bibromo-cinchonidine isomers, 83, 227—Action on derived chlorated compounds of benzene, 80, 230—Action on 3,5-dichloro-1,1-dimethyl-2,4-dihydroxybenzene, 89, 93—Action on dichlorhydrine, 21, 286; 22, 59, 167—Action on diphenylmethan, 42, 72—Action on dihydromol, 97, 143—Action on ether, 20, 322; 98, 280—Action on ethylbenzol, 21, 52—Action on ethylphthalonide, 36, 230—Action on β -hydrindone, 98, 231—Action on isobutyl bromide, 80, 96—Action on isodinaphthyl, 29, 282—Action on methylenic soda compounds, 85, 167—Action on mononitrated veratrols, 86, 317—Action on nitroaminobenzes, 86, 46—Action on normal propylbromide, 78, 279—Action on organic compounds, 80, 239—Action on para-isobutylphenol, 78, 266—Action on pentachlorethane, 78, 47—Action on phenols, 78, 12—Action on 5-phenylacridine and halogen derivatives, 96, 231—Action on phloroglucin, 36, 247—Action on phosphorus trifluoride, 52, 11—Action on pinene in presence of water, 88, 83—Action on pinene with reference to question of its constitution, 74, 94—Action on propenyl-tricarboxylic acid, 57, 78—Action on protocatechuic acid, gallic acid, and tannin, 30, 246—Action on protochloride of phosphorus, 25, 190—Action on pyrotartaric acid, 22, 23; 36, 61—Action on quinoline and pyridine, 46, 57—Action on silver salts of benzene sulphonic acids, 35, 40—Action on strychnine, 91, 50—Action on sugar, 10, 253—Action on sulphur, 37, 212; 38, 240—Action on tetrabromide, 78, 47—Action on tetra-chloride of acetylene, 79, 118—Action on thallous chloride in presence of organic solvents, 86, 40—Action on thallous chloride in presence of water, 86, 15—Action on toluene azophenols, 84, 19—Action on triamidophenol in presence of water, 36, 7—Action on trimethylamine, 93, 31—Action on trinitrophenol in presence of iodine, 26, 307—Action on uric acid, 30, 196—Action on water-salts of succinic, malic, maleic and pyro-

citric acids, 28, 246, 260—Addition to acet-acetic ether, 48, 204—Addition to α - and β -chloro- and bromocinnamic acids and their methyl esters, 95, 273—Addition to cinnamic acid and its esters, 95, 32—Addition to unsaturated compounds, 95, 273—Affinity for oxygen, 27, 321—And acetic acid, molecular compound, 29, 107—And allyl alcohol, compounds, 23, 22—And boron combinations, 11, 281—And bromide of aluminium, compound of, 86, 197—And chlorine, direct combination of metals with, 64, 261—And chlorine, ozoniferous aldehyds for the detection of iodine in presence of, 74, 7—And chlorine, relative orienting effect, 65, 138—And chlorine, separation, 70, 31; 76, 151—And chlorine, separation, 70, 31; 76, 151—And chlorine, separation in acid solution with hydrogen peroxide, 94, 286—And chlorine and iodine, agreement of oxygen-stere, 54, with the stere of, 41, 263—And chlorine and iodine compounds, heat of solution, 35, 263—And chlorine and iodine, differences of affinities of, 38, 47—And chlorine and iodine, estimation in presence of one another, 49, 3; 80, 167—And chlorine and iodine, refraction and dispersion equivalents of, 14, 149—And chlorine and iodine, separation, 2, 325; 40, 168; 65, 263, 276; 77, 67; 80, 6—And chlorine mixtures, density curve of, 96, 165—And ether, combination, 26, 287—And gold compounds, 99, 151—And hydrobromic acid, addition products of acetic acid with, 40, 108—And hydrogen, effect of light on combination of, 77, 111—And iodine, 87, 23—And iodine compounds, effect of low temperatures on colour, 82, 90—And iodine in mixture, estimation, 3, 191—And iodine, replacement of chlorine by, 74, 27—And iodine, separation, 68, 108—And silver chloride, behaviour, 48, 284—And silver oxide and water, oxidation product of glycogen with, 34, 153—And sodium, volume of, at their boiling points, 42, 287—And toluene, interaction, 66, 292—Application in hydro-metallurgy, assaying, and technological chemistry, 33, 97—Atomic weight, 93, 55, 183; 94, 260, 271; 95, 208, 263; 99, 69; 100, 278—Azo- and hydrazone compounds differentiated by, 81, 11—Behaviour of essential oils to, 5, 62, 117, 131, 148, 189, 211—Behaviour of naphthols and naphthylamines with, 74, 109—Behaviour of toluidine towards, 20, 180—Behaviour towards a solution of permanganate of potassa, 20, 48—Chlor- (see Chlorbromine)—Commercial, bromoform in, 33, 97—Compounds of molybdenum (see Molybdenum)—Crystallisation, 73, 197—Cyanogen in, 28, 51—Derivatives of anthracen (see Anthracen)—Derivatives of benzil (see Benzil)—Derivatives of camphor (see Camphor)—Derivatives of naphthalene (see Naphthalene)—Derivatives of naphthol (see Naphthol)—Derivatives of naphthylamines (see Naphthylamines)—Derivatives of coumarin (see Coumarin)—Detection, 5, 254; 48, 296; 50, 268; 54, 11; 57, 251; 58, 208; 59, 281; 66, 5; 67, 141, 162—Detection by spectrum analysis, 12, 243—Detection of chlorine in presence of, 41, 280—Detection of iodine in, 42, 312—Detection of iodine in presence of, 74, 7—Determination, 47, 248; 57, 233, 245, 251—Determination of chlorine in, 74, 25—Determination of chlorine in presence of, 41, 280; 49, 110—Discovery of, 99, 205—Electric conductivity of solutions in, 90, 269—Estimation, 3, 68; 20, 290; 24, 97; 54, 11; 55, 292; 60, 259; 77, 270—

Experiments with, 67, 288—Extraction from kelp, 38, 146—From seaweeds, 14, 2, 177—Freezing-point, 24, 300—Heat liberated on addition of, to non-saturated substances, 76, 23—Heat value of oils and fats, 73, 87—In analysis of sulphides, 42, 259—In analytical chemistry, 25, 282—In aniline, replacement by chlorine, 83, 274—In chlorides, separation of, 79, 275—In fatty acid series, velocity of substitution, 43, 12—In monobromobenzyl bromides, relative replaceability of, 41, 146—In mother-liquors, estimation, 21, 44—In native phosphates of lime, detection, 26, 312—In organic compounds, 33, 117—In organic matter, 28, 226—In organic substances, 26, 60; 47, 249; 76, 150—In organic substances, determining, 36, 133—In presence of urea, 26, 145—In saline mixture, detection, 76, 265—In saline waters, 76, 293—In sea-water, 58, 190—In solutions of potassium bromide, 92, 9—In testing for alkaloids, 47, 215—Index of refraction and dispersion, 82, 243—Influence of hydrobromic acid on velocity of reaction on trimethylene, 82, 94—Introducing into aromatic hydrocarbons in presence of aluminium bromide, 36, 20—Manufacture, 37, 56—Manufacture, formation of carbon tetroxide in, 42, 288—Molecular action in an atmosphere of, 20, 285—Nascent, action on benzene, 74, 109—Pipette for measuring, 57, 250—Presence of cyanogen in, 28, 51—Production, 22, 178; 23, 77—Products of action on aldehyde of ethyl series, 33, 18—Reaction on benzaldehyde, velocity of, 98, 198—Reactions of quinine, narcotine, and morphine with, 50, 102—Refraction and dispersion equivalents, 14, 149—Refraction, limit of, 58, 252—Replacement of hydroxyl by, 91, 291—Salts, alkaline halogen, and iodine, separation, 89, 12—Separating and distilling, 76, 239—Separation, 77, 276—Separation and estimation of chlorine in, 79, 311—Separation in presence of chlorine, 79, 287—Solidified, use of, 57, 62—Solution, as a reagent, 43, 34—Solution, determination of urea with, 51, 95—Spectral reaction, 43, 25—Substitution compounds of the orceins, 25, 1—Substitution for metals in salts, 3, 225—Substitution, mechanism of, 88, 161—Substitution products of ethan and ethylene, 48, 281—Substitutions, 49, 277—Theo- (see Theobromine)—Vapour densities at high temperatures, 81, 277—Vapour, density at a yellow heat, 41, 151—Vapour pressure, 53, 177—Velocity of addition to cinnamic acid, 95, 36—Velocity of reaction of, with unsaturated acids in aqueous solution, 95, 78—Versus chlorine for gold extraction, 58, 92—Wandering of, in chlorination of bromo-anilines, 96, 232—Wandering of, in transformation of nitroaminobromo-benzenes, 97, 154; 98, 165—Water, action of levulose on, 53, 179—Water, action on meta-isocymol-sulphacid, 54, 226—Water as a test for strychnine, 48, 11—Water, test for phenol, 24, 217; 26, 24

Bromine chloride, behaviour with water, 36, 247—Existence of, 94, 241

Bromine cyanide and cyanamide derivatives, preparation, 97, 168

Bromine fluoride, 92, 257; 93, 33

Brominised apatites (see Apatites)

Brom-iodides, 29, 53

Bromised aldehydes (see Aldehydes)—Apatites (see Apatites)—Collodion (see Collodion)—Ethers (see Ethers)—Phenols (see Phenols)—Styrolen (see Styrolen)

Bromite, hydro- (see Hydrobromite)—Hypo- (see Hypobromite)

Bromites, hypo- (see Hypobromites)

Brommethan, di- (see Dibrommethan)

Brom-naphthalene, 22, 130

Bromnaphthol, di- (see Dibromnaphthol)

Bromnitronaphthol, 30, 65

Bromo-acetal, 91, 190

Bromoacetanilides, chloro- (see Chloro-bromoacetanilides)

Bromo-acetates, rate of hydrolysis by water and by alkali, 97, 235

Bromoacetic acids (see Acids)

Bromoacetylene, di- (see Dibromoacetylene)

Bromo-acids (see Acids)

d-Bromo-acids (see Acids)

Bromoaminoazobenzene, di- (see Dibromoaminoazobenzene)

Bromoaminobenzenes, acetyl, (see Acetyl-bromoaminobenzenes)

Bromoanilines, chlorination of, 96, 86, 232—Nitrochloro (see Nitrochloro-bromoanilines)—sym-trichloro (see sym-Trichlorobromoanilines)

Bromobenzenes, 57, 121—Chloro-di- (see Chloro-dibromobenzenes)—Dichloro- (see Dichlorobromobenzenes)—Nitro-amino (see Nitro-aminobromobenzenes)

Bromobenzoic acid (see Acid)

Bromobenzylacetophenone, $\alpha\beta$ -di- (see $\alpha\beta$ -Dibromobenzylacetophenone)

Bromobenzylcamphor, mono- (see Monobromobenzylcamphor)

Bromoboracites, 68, 26; 70, 50

Bromobutanetetra-carboxylate, ethyl-di- (see Ethyl-dibromo-butanetetra-carboxylate)

Bromobutylenes, mono (see Mono-bromobutylenes)

Bromobutyric acid (see Acid)

Bromocamphoracetic acid (see Acid)

Bromocamphor, 73, 207; 84, 300—Derivatives, 84, 288—Di- (see Dibromocamphor)—Methylmono- (see Methylmonobromocamphor)—Racemisation of, 83, 106

α -Bromocamphor, isomerism of, 91, 199

Bromocamphoric acid (see Acid)

Bromocamphoric acid (see Acid)—Anhydride (see Anhydride)

Bromocamphorsulpholactone, 75, 33

Bromocamphorsulphonate, dextromethyl-ethyl-propyl tin dextro- (see Dextromethyl-ethyl-propyl tin dextrobromocamphorsulphonate)—Methyl-ethyl-thetine dextro (see Methyl)

Bromocamphorsulphonates, benzylhydrindamine (see Benzylhydrindamine bromocamphorsulphonates)—Hydrindamine (see Hydrindamine)

Bromocamphorsulphonic acid (see Acid)

Bromocamphoryloximes, β and π , 87, 246

Bromocarbon, chloro (see Chlorobromocarbon)

Bromocarboxyglutarate of ethyl (see Ethyl)

Bromochloride of phosphorus (see Phosphorus)

Bromocinnamic acids (see Acids)

Bromocinnamylidene chlorides, 87, 274

Bromocitraconic acid (see Acids)

Bromocitraprotartaric anhydride (see Anhydride)

Bromocupric hydrobromate (see Hydrobromate)

Bromocyclohexane, action on sodium derivatives of ethyl malonate, 100, 229

Bromo-derivatives of betanaphthol (see Betanaphthol)—Of camphor (see Camphor)—Of ditolyl (see Ditolyl)

Bromodiazobenzene, *s*-tri- (see *s*-Tribromodiazobenzene)

Bromodiazobenzenes, chloro- (see Chlorobromodiazobenzenes)

Bromodibenzyl, substitution products of, 20, 60

5-Bromo- $\alpha\beta$ -(4)-dimethyl-2: 4-diaminotoluene, 91, 277

3-Bromo-1: 1-dimethylhexahydrobenzene, action of alcoholic potassium hydroxide on, 94, 228

Bromodinaphthoxanthionum, tri- (see Tribromodinaphthoxanthionum)

Bromodinitrotoluenes, di- (see Dibromodinitrotoluenes)

- Bromodiphenylquinone, tetra- (*see* Tetra-bromodiphenylquinone)
- Bromoform, 42, 83—Action of bromine on, 78, 47—Compared with chloroform and chloral, 21, 64—Decomposition, 76, 122—Detection and estimation in toxicology, 80, 83—In commercial bromine, 33, 67—Methylstannic (*see* Methylstannibromoform)—Reactions, coloured, 88, 122—Silici *see* Silici bromoform—Tetrabromide of carbon from, 27, 266
- Bromofulminuric acid (*see* Acid)
- Bromogallanilide, di- (*see* Dibromogallanilide)
- Bromogallic acid (*see* Acid)
- Bromo-gem-dimethylsuccinic acid (*see* Acid)
- Bromoglucoside, phenol- (*see* Phenol-bromoglucoside)
- Bromohydrates of cinchonine (*see* Cinchonine bromohydrates)
- Bromohydrine, dichloro- (*see* Dichlorobromohydrine)
- Bromohydrocarbons, non-saturated, oxidation, 69, 241
- Bromolodides of silicon (*see* Silicon)
- Bromosubtyrate, ethyl (*see* Ethyl)
- Bromosulphomucic acid (*see* Acid)
- Bromo-ketones, 76, 110
- Bromolapachol preparation, 68, 303
- Bromolapachone, di- (*see* Dibromolapachone)
- Bromomethan, phenyltri- (*see* Phenyltri-bromomethan)
- Bromomethylcamphor, 87, 192
- 4-Bromo-1-methylcyclohexane, action on sodium derivative of ethyl malonate, 100, 229
- Bromomethylfurfuraldehyde, 79, 124
- Bromomethylheptylketone, 91, 196
- Bromomethylphenylketone, chlorised and bromised derivatives, action on aniline, 79, 227
- Bromonaphthalenediazonium hydroxide, interchange of halogen for hydroxyl in, 87, 20
- Bromonaphthalene sulphonic acid (*see* Acid)
- Bromonaphthalic acid (*see* Acid)
- 3-Bromo- β -naphthol, 74, 301
- Bromonitrated camphor (*see* Camphor)
- Bromonitride of phosphorus (*see* Phosphorus)
- Bromonitrides of platinum (*see* Platinum)
- Bromonitrobenzol, 22, 84—Action of cyanide of potassium on, 23, 131
- Bromonitrobenzolsulpho acid (*see* Acid)
- Bromonitrocumpane and bromonitrocamphor, comparison, 85, 260
- Bromonitrocumpane anhydrides, action of hydroxylamine on, 83, 222
- Bromonitrocumpane and bromonitrocumpane, comparison, 85, 260
- 3-Bromo- α -nitrocumpane, 87, 246
- Bromonitrocumpane isomeric, 72, 314—Stereoisomeric, 78, 262
- 4-Bromo-2-nitro-1 (α)-naphthylamine, 93, 289
- Bromonitrophenols, 97, 166
- Bromonitrosophenol, di- (*see* Dibromonitrosophenol)
- Bromonitrophenylacetic acids (*see* Acids)
- Bromonitrosophenol from orthonitrophenol, 29, 197
- Bromonitrotoluenes, di- (*see* Dibromonitrotoluenes)
- Bromonitrous acid (*see* Acid)
- Bromoparaldehyde of Wroblewski, nitrophenols derived from, 79, 231
- Bromopentane, di- (*see* Dibromopentane)—1-5-di- (*see* 1-5-Dibromopentane)
- Bromophenes, chloro- (*see* Chlorobromophenes)
- Bromophenol, action of magnesium and organo-magnesium compounds on, 89, 262
- Bromophenol-bromide, tri- (*see* Tribromophenol-bromide)
- Bromophenol-sulpho acids (*see* Acids)
- Bromophenol-sulphonic acid (*see* Acid)
- Bromophenols, ortho- (*see* Orthobromophenols)
- Bromophenolic compounds, action of nitric acid on, 86, 264
- Bromophenylacetone, methyl- (*see* Methylbromophenylacetone)
- Bromophthalic acid (*see* Acid)
- Bromopivalic acid (*see* Acid)
- Bromopropane, tri- (*see* Tribromopropane)
- Bromopropanetetra-carboxylate, ethyl di- (*see* Ethyl)
- Bromo-1-3-propene, di- (*see* Dibromo-1-3-propene)
- Bromopropionate, ethyl- (*see* Ethyl-bromopropionate)
- Bromopropylthiocarbimide, di- (*see* Dibromopropylthiocarbimide)
- Bromopseudocumol, di- (*see* Dibromopseudocumol)
- Bromorcin, penta- (*see* Pentabromorcin)
- Bromo-stannates, 64, 250
- Bromo-strychnine, physiological action, 51, 47
- Bromosuccinic acid (*see* Acid)—Acids (*see* Acids)—Ethers (*see* Ethers)
- Bromosulphobenzoic acids (*see* Acids)
- Bromosulphobismuthite of copper (*see* Copper)
- Bromsulphotolul, 22, 226; 24, 97
- Bromotetrachlorethane, di- (*see* Dibromotetrachlorethane)
- Bromotoluen, 21, 107, 143—And toluidines derived therefrom, 20, 129
- Bromotoluidines, isomeric, 21, 202; 24, 23; 28, 84
- Bromotolunitrosalicylic acid (*see* Acid)
- Bromotolul, 20, 189; 21, 46—Sulpho-acids and sulpho-hydrates derived from, 22, 144
- Bromotolulols, di- (*see* Dibromotolulols)—Nitro- (*see* Nitrobromotolulols)
- Bromotrimethylsuccinate, ethyl (*see* Ethyl)
- Bromotrimethylsuccinic aldehyde (*see* Aldehyde)
- Bromoxaform, identity, 30, 22
- Bromoxyl derivatives of benzol (*see* Benzol)
- Bromoxylol, 49, 287
- Bromophenolbrom, tri- (*see* Tribromophenol-brom)
- Bromophenyl mercapturic acid (*see* Acid)
- Bromoresorcin, penta- (*see* Pentabromoresorcin)
- Bromoresorcinbrom, tri- (*see* Tribromoresorcin-brom)
- Bromoresorcinon from phenolphthalein, 38, 254
- Bromosuccinic acid (*see* Acid)
- Bromsulphobenzoic acid (*see* Acid)
- Bromtolul, 16, 24; 27, 283—Action of sodium on, 15, 201—Meta- (*see* Meta-bromtolul)
- Bromtolulols, 28, 293
- Bromtolulolsulpho acid (*see* Acid)
- Bromtolylhydrazine, derivatives, 77, 56
- Bromurated ether (*see* Ether)
- Bronac and Deherrypon, MM., Desulphuration of native sulphides, 3, 14

- Cadinene, dichlorhydrate and dibromhydrate of, 87, 5
- Cadmiferous-zinc ores, 81, 173
- Cadmium, 6, 135; 15, 166; 49, 20; 64, 64—Action on ammonium nitrate, 52, 47—Alloys, 8, 109—Alloys, easily fusible, 12, 13—Alloys of platinum and palladium with, 80, 185—Alloys with barium and calcium, 85, 263—Amalgam lamp of quartz, 91, 27—Amalgams and Weston normal cell, 100, 242—Anamalgamation, 3, 43—And bismuth, separation, 65, 136; 93, 31—And bismuth and copper, separation, 41, 263—And copper, separation, 2, 159; 45, 57; 51, 45, 280; 52, 321; 59, 222; 63, 193; 71, 262; 81, 53; 83, 221, 230, 247; 85, 300—And gold, isolation of a compound, 65, 289—And iodine, electromotive forces developed during combination of, 54, 10—And iron, separation, 80, 16—And lead, separation, 69, 284, 292—And magnesium alloys, 86, 23, 239—And nickel and zinc, separation and determination, 53, 172, 197—And sals ammoniac battery, 67, 277—And thallium, separation, 7, 145—And zinc, alloys of strontium with, 85, 12—And zinc, phosphuretted combinations, 27, 83—And zinc, separation, 43, 61; 44, 215; 53, 9; 60, 9—And zinc, separation and determination, 53, 172, 196—And zinc, separation and estimation, 41, 28—Arc, method of producing, 100, 161—Atomic weight, 62, 252; 67, 87; 78, 103; 93, 55, 195; 94, 224, 236, 248; 95, 217; 99, 69; 100, 278—Battery (*see* Battery)—Boiling-point, 82, 107—Cell, 92, 264—Cell, report of committee on, 90, 225—Combination-calories of soluble compounds of, 48, 238—Combustion, 93, 210—Compounds, diaminoethenic, 87, 179—Conversion into oxide, 1, 266—Copper (*see* Copper)—Detection, 37, 211—Determination, 39, 185; 40, 109; 52, 42; 64, 242; 75, 28, 40, 54, 61, 77, 91, 101; 77, 93; 84, 312—Electrochemical deposits of, 34, 227—Electrolytic deposition, 97, 137, 149—Equivalent number of, 2, 287—Estimation, 79, 310; 93, 166, 200—Estimation as oxide, 74, 190—Estimation by means of rotating cathode, 94, 296—Estimation, electrolytic, 82, 107—Estimation in volatile or organic salts, 93, 257—In alloys, estimation, 65, 133—In nitric acid, behaviour, 26, 95—In presence of copper, absorption test of, 80, 267—In presence of copper, detection, 47, 13—In same group with the alkaline earths, 90, 271—In state of sulphurets, estimation, 1, 119—Lamp, 75, 203—Lowering the freezing-point when alloyed with other metals, 66, 289—Mirror, 68, 174—Passivity, 26, 217—Potassic reagent, 48, 46—Precipitation by sulphuretted hydrogen, 79, 170—Salts, 89, 71—Salts, basic, 75, 299; 76, 16—Salts, estimation of soluble, 89, 114—Separation, 45, 37—Separation as the oxide, 94, 305—Separation from zinc as sulphide in presence of trichloroacetic acid, 95, 274—Spectrum analysis of, 59, 2, 16, 29—Spectrum of, in vacuo, 77, 71—Spectrum, producing an intense, 100, 34—Taken as the chloride, use of rotating cathode for estimation of, 94, 204—Taken as the sulphate, use of rotating cathode for estimation of, 94, 274, 283—Use as standard in refractometry, 100, 34—Use in assaying gold bullion, 64, 234, 243
- Cadmium acetate, ionisation in aqueous solutions of, 100, 302
- Cadmium ammonium phosphates, double, in analysis, 80, 305
- Cadmium arseniate, 40, 217
- Cadmium arsenide, 89, 167
- Cadmium bromide, action of calcium carbonate on, 57, 258—Precipitation by means of sulphuric acid, 86, 138
- Cadmium chloride, action of calcium carbonate on, 57, 258—Ammoniacal compounds of, 55, 188—Dimethyl-ammonio- (*see* Dimethyl-ammonio-cadmium-chloride)—Dissociation of hexammoniacal, 80, 123—Hexamethylammonio (*see* Hexamethylammonio-cadmium-chloride)—Precipitation by means of sulphuric acid, 86, 138
- Cadmium chlorides, ammoniacal, composition, and tensions of dissociation, 80, 239
- Cadmium chromite, 60, 72—Neutral, 63, 261
- Cadmium ferrocyanide, 84, 170; 86, 101
- Cadmium fluoride, 67, 159
- Cadmium hydrosilicate, 65, 298
- Cadmium iodide, 4, 334; 48, 297—Action of calcium carbonate on, 57, 258—Isomorphism of mercuric iodide with, 94, 71
- Cadmium ion, existence of a univalent, in aqueous solution, 97, 176
- Cadmium oxide and potash, compound, 14, 106—Fusibility of, 5, 97—Hydrated, action on ammoniacal salts, 88, 201—Velocity of reduction by carbon monoxide, 96, 315
- Cadmium phosphates, 59, 313
- Cadmium quadrantoxide, 86, 222
- Cadmium selenide, 4, 116; 82, 303
- Cadmium-silver series of alloys, properties of, 89, 84
- Cadmium suboxide, 88, 244; 96, 315
- Cadmium sulphate, composition, 6, 268—Crystallisation, 44, 295—Isomerism of, 5, 139—Preparing, 5, 311—Solution of, action of a couple of copper cadmium plates on, 26, 240
- Cadmium sulphide, 57, 150; 60, 62—Determination, 56, 57—In fireworks, 6, 36—Preparation in crystalline form, 87, 238—Properties, 36, 109
- Cadmium sulphuret as pigment for colouring soap, 24, 86
- Cadmium tungsto-borate for mechanical analysis of rocks, 48, 83
- Cadmium vanadinites, production, 81, 219
- Ceruleum, a new colour, 6, 119, 203
- Cerulignon, 29, 156
- Cesium, 4, 44, 163, 219, 286; 6, 265; 9, 2; 22, 25, 44, 312; 39, 106; 44, 94; 46, 249; 64, 40; 84, 96—Action of ethylamine and isobutylamine on, 92, 81—Ammonium (*see* Ammonium-cesium)—And rubidium compounds, extraction in a chemically pure condition, 11, 274—And rubidium compounds, extracting from Hebron lepidolite, 49, 253—Atomic weight, 7, 211; 8, 18; 33, 261; 93, 55; 99, 69; 100, 278—Compounds, 83, 179—Compounds, contributions to our knowledge of, 87, 264—Detection, 86, 60; 100, 299—Equivalent and spectrum, 7, 110—Extraction from lepidolite, 36, 246—Fusing-point, 26, 194—In natural and commercial alkaline substances, 5, 8—In water of hot springs, 25, 128—Material, purification, 84, 169—Oxidation, 93, 283—Preparation, 79, 162—Property belonging to, 22, 23—Researches on, 94, 12—Salts, chloride of antimony as reagent for, 29, 288—Salts, double halogen, 76, 37—Salts, precipitation with soluble salts of lime, 22, 150—Salts, prepared by means of lepidolite, 26, 83—Specific gravity, 81, 125
- Cesium amide, 91, 256
- Cesium-ammonium, action of acetylene on, 87, 311—Action of oxygen on, 92, 10—Preparation and properties, 87, 299
- Cesium-antimonious fluorides, (*see* Fluorides)
- Cesium carbide, preparation and properties, 87, 311
- Cesium carbonate, neutral, 100, 172
- Cesium chlorides, 94, 83
- Cesium dicalcium sulphate, 93, 17
- Cesium hydride, preparation and properties, 87, 167
- Cesium methylamide, 91, 95
- Cesium pentasulphide, 91, 106
- Cesium peroxide, properties of, 93, 283
- Cesium phosphate, 86, 270
- Cesium protoxide, 94, 241
- Cesium selenate, 75, 273
- Cesium sub-oxides, 99, 299
- Cesium sulphates, 94, 83
- Cafetannic acid (*see* Acid)
- Caffeic acid (*see* Acid)
- Caffeine, dissociation by hydrate of baryta, 23, 119
- Caffeine, 46, 8, 78; 47, 9; 87, 152—Action of, 54, 238—Action of iodine on, 86, 210—Action of Wagner's reagent on, 75, 80, 90, 98—Amino- (*see* Amino-cafeine)—And its salts, 48, 83—And its solubility, 32, 271—And theine, identity, 67, 34—And theine, non-identity, 19, 288—As antidote to poisonous effects of opium, 4, 47—Constitution, 10, 307—Estimation, 75, 80, 90, 98—Extraction, rapid, 35, 220—In cacao, 50, 68—In coffee, 76, 195—In leaves of tea and coffee grown at Kew Gardens, 48, 224—In tea-leaves, 26, 160—Properties of, 76, 59—Synthesis, 59, 305—Test for, 5, 139
- Cahen, E., G. T. Morgan, and H. F. V. Little (*see* Little, H. F. V.)
- Cahen, M., Absorbing sulphurous acid fumes, 25, 167
- Cahours, Auguste, Certain new derivatives of butyl, 29, 61—Compounds from union of cyanic acid and cyanic ethers with amides, 23, 142—Derivatives of propyl, 27, 59; 28, 6, 239—Iodides of stannopropyls, 39, 238—Obituary, 63, 225, 248—Organo-metallic radicals, 1, 133, 145, 157—Researches on substituted eugenols, 35, 65—Researches on sulphines, 31, 280; 33, 18—Respiration of flowers, 10, 22, 146—Respiration of fruits, 9, 152, 177, 199—Sulphuretted radicals, 11, 274—Vapour densities, 14, 21; 15, 133
- Cahours, A., and M. Berthelot (*see* Berthelot, M.)
- Cahours, A., and E. Demarcay, Action of dried oxalic acid on primary, secondary, and tertiary alcohols, 37, 227—Formation of two bibasic acids, 45, 123—Stannopropyls, and iso-stannopropyls, 39, 277
- Cahours, A., and A. Etard, Bromated derivatives of nicotine, 42, 23—New derivative of nicotine, 39, 252; 41, 133; 43, 279—Nicotine, 43, 117—Oxidation of certain aromatic derivatives, 39, 22—Potassium cyanosulphite, 39, 184—Researches on sulphates, 39, 228
- Cahours, A., and H. Gal, Action of chlorides of platinum, palladium, and gold on phosphines and arsines, 22, 58—New derivatives from triethylphosphine, 22, 22
- Cahours, A., M. Jolyet, and M. Pélessard, Physiological action of ethylconia, iodide of diethylconia and conia, 19, 82
- Cahours, A., and J. Pelouze (*see* Pelouze, J.)
- Cahours Prize in chemistry, 91, 32
- Caill and Co., MM., Newly devised system of purifying the condensation water of low-pressure steam-engines, 26, 23
- Caillaux, A., Metalliferous mines of France, not including iron-mines, 26, 47
- Caille, H., and G. Perrier (*see* Perrier, G.)
- Cailliet, C., Flour mixed with mineral substances, 40, 57
- Cailliet, L., Analysis of gases produced in cementation of iron, 11, 91—Assay of olive oil, 2, 251—Cementation of iron by cast-iron heated below

- its fusing-point, **11**, 152—Collecting air at great heights, **75**, 167—Compressibility of gases, **21**, 262—Compressibility of liquids under high pressure, **26**, 58—Compression of gaseous mixtures, **41**, 101—Condensation of oxygen and carbonic oxide, **37**, 40—Dissociation of gases in metallurgical furnaces, **13**, 201—Gases contained in iron and steel in state of fusion, **12**, 252—Hydrogenised iron, **31**, 119—Influence of coloured light on decomposition of carbonic anhydride by plants, **17**, 34—Influence of coloured rays on decomposition of carbonic acid by plants, **18**, 246—Influence of pressure on combustion, **31**, 149—Liquefaction of acetylen, **36**, 232—Liquefaction of binoxide of nitrogen, **36**, 266—Liquefaction of gases, **37**, 83—Liquefaction of oxygen, **51**, 220—Liquid carbonic acid, **26**, 263—Nature of mineral substances assimilated by fungi, **33**, 251—Production of very low temperatures, **48**, 280—Researches on compressibility of gases, **39**, 64—Resistance of glass tubes to rupture, **29**, 154—Use of formene for obtaining very low temperatures, **50**, 66—Use of gases from metallurgical furnaces, **36**, 256
- Cailletet, L., and L. Bordet (*see* Bordet, L.)
- Cailletet, L., and E. Colardeau, Condensation of the gases of electrolysis, **70**, 260—Condition of matter near its critical point, **60**, 24—Refrigerating mixtures, **57**, 262

- Cairo, mineral springs in neighbourhood of, analysis, **22**, 144—Petrified forest of, **22**, 72
- Caisse, H., Bismuth nitrosalicylates, **70**, 238
- Cajepot oil (*see* Oil)
- Cajori, F., "History of Physics in its Elementary Branches, including the Evolution of Physical Laboratories" (review), **79**, 286
- Cake, Alum. (*see* Alum-cake)—And meal, earth-nut, **48**, 170—Aurine (*see* Aurine cake)—Earth-nut (*see* Earth-nut cake)—Mustard, **19**, 103—Oil (*see* Oil-cake)—Salt (*see* Salt-cake)
- Calabar bean (*see* Bean)
- Calate, **10**, 290
- Calamine, commercial, detection of manganese in, **48**, 193—Constitution, experiments relative to, **85**, 46, 54, 65, 80—Electric analysis, **28**, 272—From Siberia, **54**, 67—Of pharmacy, **14**, 137
- Calaverite from Cripple Creek, **72**, 155
- Calcar, R. P. van (*see* van Calcar, R. P.)
- Calcareous nodules (*see* Nodules)—Phosphates (*see* Phosphates)—Rock (*see* Rock)—Soap (*see* Soap)—Soils (*see* Soils)—Spar (*see* Spar)—Stones (*see* Stones)—Substances, organic, artificial production, **25**, 143
- Calcio hydrates (*see* Hydrates)—Hypochlorite (*see* Hypochlorite)—Sulphate water (*see* Water)
- Calcmeter, **22**, 75
- Calcination furnace (*see* Furnace)—Of magnesias (*see* Magnesias)—Of precipitates (*see* Precipitates)
- Calced manganese (*see* Manganese)
- Calcing bones (*see* Bones)—Furnaces (*see* Furnaces)—Gases (*see* Gases)—Oils (*see* Oils)—Sulphur ores (*see* Ores)
- Calcite and quartz, oxide of iron in, at Mwyndy Mines, **34**, 10—Boro- (*see* Boro-calcite)—Boronatro- (*see* Boro-natrocaltite)—Bromonatro- (*see* Bromonatro-calcite)—Crystals, brown, **33**, 56—Hydroboro- (*see* Hydroboro-calcite)—Natroboro- (*see* Natroboro-calcite)—Reproduction, **46**, 77—Veins and quartz, condition of gold in, **69**, 162
- Calcium, **1**, 191, 195; **39**, 196; **64**, 110; **76**, 253; **96**, 100—Action on alcoholic ammonia, **89**, 263—Alloys, experiments with as reducing agents, **99**, 257—Amalgam, **79**, 11—Ammonium (*see* Ammonium)—And aluminium and magnesium, combinations, **14**, 190—And aluminium and magnesium, heats of combustion, **99**, 81—And barium, alloys of cadmium with, **85**, 263—And barium, separation, **58**, 60; **66**, 3—And barium and strontium, separation, **68**, 213; **75**, 247—And calcium amalgam, physical constants of, **91**, 83—And copper alloys, **93**, 304—And lead alloys, **94**, 96—And lead arsenates, **95**, 104—And magnesium, separation, **29**, 209—And magnesium, separation, reagent for, **11**, 97—And potassium and ammonium, double ferrocyanides of, **96**, 268—And sodium sulphide, manufacturing a double, **9**, 47—And strontium, separation, **47**, 165; **48**, 296; **58**, 60; **65**, 271, 282; **67**, 205—And zinc, alloys, **57**, 143—And zinc, crystalline alloy of, **21**, 273—As an absorbent of gases, and applications in production of high vacua and for spectroscopic research, **94**, 305; **95**, 13, 25, 42, 51—Atomic weight, **87**, 181; **93**, 55; **99**, 60; **100**, 258—Compounds, solubility, **57**, 236—Crystallised preparation, **78**, 37; **81**, 119—Detection, **34**, 16; **95**, 10—Detection in presence of strontium, **54**, 16—Determination, **57**, 221—Discharge of negative electricity from hot, **95**, 277—Effect in developing phosphorescence of rare
- earths, **93**, 143—Effect of blows on, **93**, 200—Electrolytic, properties of, **93**, 117—Group, blowpipe test for, **50**, 214—Group of metals, fourth member of, **3**, 116, 129—In ashes, determination, **81**, 177—In lecture-table experiments, use of, **91**, 87—In pig-irons, **29**, 57, 110—Isomer of, **65**, 73—Light, use of, **21**, 190, 239—Metallic, **91**, 49; **92**, 81—Metallic, action of alcohols on, **99**, 82—Metallic, action on alcohols, **97**, 10—Metallic, action on ketones, **97**, 11—Metallic, applications of, **91**, 244—Molecular compounds, **49**, 258—New qualitative test for, **94**, 195—Preparation, **9**, 140—Rays, **33**, 166, 170—Salts, barium salts, and strontium salts, analytical characters of a mixture, **72**, 27—Salts, basic, **70**, 109—Salts of acids of acetic acid series, solubilities of, **85**, 103—Salts, poisonous properties of, **27**, 94—Test for, **54**, 254—Volatility of, **33**, 256; **37**, 63
- Calcium acetate, ignition of material with, **89**, 55
- Calcium arsenide, preparation and pro-
- Calcium amide, preparation, **79**, 22; **81**, 106
- Calcium-ammonium (*see* Ammonium)—Sulphates, **95**, 103
- Calcium arsenate, **54**, 168, 193; **95**, 104
- Calcium biphosphate, **63**, 189—Action of water on, **69**, 192
- Calcium borate, **54**, 208
- Calcium boride, preparation, **98**, 48
- Calcium bromide, **24**, 166; **26**, 216—Volatility of, **100**, 328
- Calcium butyrate, crystalline water of, **46**, 78
- Calcium carbide, **75**, 2, 109; **76**, 57; **82**, 171—Action of amyl chloride on, **81**, 226—Analysis of samples of, **78**, 316; **81**, 84—And acetylene, synthesis, **97**, 167—And alcohols, **83**, 287—And Petroleum Acids, **76**, 72—As reducing agent in analyses by dry way, **83**, 34—Colour of, **79**, 47; **81**, 67—Decomposition products, **76**, 11—Impurities of, **82**, 78—Manufacture, **75**, 3, 16, 29, 37; **81**, 173—Manufacture, degree of pulverisation of raw materials, **81**, 98—Obtaining, **89**, 238—Preparation, **89**, 191—Reducing action of, **81**, 225—Synthesis of, **97**, 167—Use for preparation of absolute alcohol, **77**, 52—Use in metallurgy, **82**, 69
- Calcium carbonate, acid, preparation and composition, **99**, 212, 219—Action of boric acid on, **51**, 63—Action of manganese on phosphorescent power of, **54**, 321—Action on cadmium chloride, bromide, and iodide, **57**, 258—Action on natural earthy substances, **78**, 316—And alkaline carbonate, composition of a mixture, **90**, 34—And carbonic acid, equilibrium between, **100**, 32—And chlorine water, reaction between, **95**, 236—Determination, **50**, 153—Dissociation, **53**, 297—Forms of, **45**, 130—Fusion, **66**, 282, 305, 307; **67**, 24—In soil, conditions of, **66**, 162—In soils, determination of, **71**, 26—Reaction of amoniacal salts with, **41**, 205—Solubility, **52**, 272—Solution in carbonated water, **63**, 102
- Calcium carbonate, basic, **44**, 60
- Calcium chlorate, **82**, 300—Detection and determination, **72**, 236
- Calcium chloride, **39**, 97, 122, 170—Action on silicates, **81**, 229—And calcium oxalate, double salts of, **11**, 71—And carbonate of lime, double salt of, **3**, 297—And oil of bitter almonds, compound, **1**, 167—And sulphuric acid, reciprocal hygroscopicity of, **11**, 240—At Guy's Cliff, **32**, 277—Basic, **30**, 280—Bulbs, acidity of water in, **21**, 178—Decomposition by water, **39**, 184—Electrolysis, **89**, 297—Hydrates formed by, **43**, 292—Precipitation of solutions of ammonium, carbonate, sodium-carbonate, and ammonium carbonate by, **21**, 247—Properties, **37**, 10—Supersaturation,

- 21, 166—Tube for combustion, new form, 93, 103—Useful applications, 16, 131
- Calcium chloroborates, 92, 116
- Calcium chromate and strontium chromate, different solubilities, 66, 150
- Calcium chromates, 85, 288
- Calcium chromite, neutral crystalline, 72, 276
- Calcium cyanamide, 100, 120—Agricultural use of, 98, 318—Production, utilisation of atmospheric nitrogen in, 97, 289, 303
- Calcium cyanate, 72, 197
- Calcium cyanide, 44, 60
- Calcium dioxide, 27, 291; 28, 322—Anhydrous, 81, 209
- Calcium ethylate, 71, 49
- Calcium fluoride, crystalline, 41, 24—Crystalline, preparation, 63, 189
- Calcium hydride, 78, 157, 243—Heat of formation, 91, 201—Industrial preparation, 93, 196—Methane synthesis with, 98, 234—Preparation and properties, 81, 131—Reduction of metallic oxides with, 96, 245
- Calcium hydrogen orthophosphates, action of ammonia gas on, 95, 21—Hydrates of, 95, 21
- Calcium hydrosulphides, 49, 262
- Calcium hydroxide, and milk sugar, products from, 98, 210
- Calcium iodate, 29, 12—Antiseptic and disinfecting power, 28, 197—As an antiseptic, 61, 166—In sea-water, 25, 190, 231, 241
- Calcium iodide, 5, 337
- Calcium iodomercurates, 93, 127, 147
- Calcium isobutyrate, 4, 128
- Calcium manganite, perpetually regenerated, manufacture of chlorine by means of, 20, 109
- Calcium monophosphate, hygroscopicity of, 28, 98
- Calcium nitrate, basic, 66, 97—Determination, 54, 109—Preparation, 78, 327
- Calcium nitride, formation, 99, 4—Preparation and properties, 81, 131
- Calcium nitrite, heat of formation, 91, 201
- Calcium nitrites, molecular volumes of, 98, 279
- Calcium orthobutyrate, 55, 128
- Calcium oxalate and chloride of calcium, double salts of, 11, 71—Converting into carbonate in course of analytical work, 28, 270—Crystals of, formation in urine, 37, 76—In the bark of the eucalyptus, 92, 226—Precipitation of magnesium oxalate with, 89, 146—Signification in plants, 41, 160
- Calcium oxide, action on hydrazine hydrate, 100, 219—Determination, 70, 278—Heat of formation of anhydrous, 97, 142—Hydrates of, 81, 209; 87, 216
- Calcium oxychloride, formation-heat, 44, 60
- Calcium oxyiodide, 68, 160
- Calcium oxysulphide, experiments relating to, 13, 81
- Calcium oxysulphate, extracting sulphur and paraoxybenzoic acid from, 9, 11
- Calcium paraoxybenzoate, 95, 286
- Calcium peroxide and strontium, barium, magnesium and sodium peroxides, iodometry of, 89, 96—Hydrated, 81, 286
- Calcium phosphate, 55, 70; 64, 287; 82, 171—Acid, magnesium in, 62, 50—Analysis of mineral, 33, 133—Crystalline, 48, 82—Decomposition by water at 100°, 78, 266—In Brabant, 71, 185—In milk, 71, 209—In urine, solubility, 50, 46; 54, 49—Reduction by carbon in electric arc, 79, 202—Tribasic, solubility of, 44, 66
- Calcium phosphates, 13, 221; 33, 130—Contributions to study of, 95, 21
- Calcium phosphide applied to life-buoys, 21, 119—Crystalline, preparation and properties, 79, 190; 81, 87—Preparation, 99, 108
- Calcium pimarate, products of dry distillation of, 37, 274
- Calcium plumbate, dissociation, 68, 73—
- In glass manufacture, 69, 157—Use, 68, 173
- Calcium quinoacetate, 34, 8
- Calcium saccharate, determination of sugar in, 47, 118—Precipitation, 49, 60—Use, 62, 273
- Calcium silicide, 74, 33; 85, 154—Action of nitrogen on, 16, 17
- Calcium sulphate, 34, 256; 76, 254—Decomposition by alkaline chlorides, 36, 262—Double salts of, with other salts, 39, 171—Hydrated, 57, 167—Precipitation of ferric and aluminium phosphate along with, 47, 203—Reduction, 55, 59
- Calcium sulphates, double, 100, 76—Ntrial triple, 98, 5—Rubidium (*see* Rubidium calcium sulphates)
- Calcium sulphide, 22, 24, 36—Anhydrous, crystallisation, 78, 303—Decomposition in soda waste, 19, 287—Determination, 56, 57—Having a violet phosphorescence, preparation, 54, 213—Phosphorescence, 55, 123, 128—Preparation, 58, 305
- Calcium sulphite, 22, 24, 36—As preservative of cider, 76, 220
- Calcium sulphur compounds, 51, 259
- Calcium tartrate, determination, 67, 113, 141

- Camphane, bromonitro- (see Bromonitrocamphane) — Nitro- (see Nitrocamphane)—Series, **84**, **8**; **93**, **77**; **95**, **235**; **96**, **276**; **97**, **68**; **99**, **249**; **100**, 294
- Camphanic acid (see Acid)
- Camphene, **91**, 70 — Action of fuming nitric acid on, **82**, 291—Action of sulphuric acid on, **70**, 50—Active, and ethyl-borneol, **55**, 153—Amino- (see Aminocamphene)—And turpentine, monohydrochlorides from, **54**, 239 — Benzoyl- (see Benzoxycamphene)—Benzyl- (see Benzylcamphene)—Derivatives, **69**, 200 — Derived from camphor, **39**, **84** — Hydro- (see Hydrocamphene)—Hydroxy- (see Hydroxycamphene)—In essential oil of spike, **69**, 26—Is it unsaturated? **79**, 103—Lævo-rotatory action of crystalline acetic acid, **56**, 15—Nitro- (see Nitrocamphene)—1-Nitro- (see 1-Nitrocamphene)—Of borneol (see Borneol)—Oxidation, **82**, 170—Phenyl- (see Phenylcamphene) — Transformation into camphor, **32**, 8
- Camphene carbide and campholene carbide, isomeric, **88**, 35
- Camphenesulphonic acids (see Acids)
- Camphenes, **31**, 209—Hydrazo- (see Hydrazo-camphenes)—Synthesis of camphor by oxidation of, **32**, 18—Transformation of camphor into, **32**, 8
- Camphenic series, **63**, 284
- Camphenol from camphor, **75**, 308
- Camphenylene, **80**, **393**; **91**, 70—Derivatives, **97**, **142**; **99**, **35**
- Camphic acid (see Acid)
- Camphioacetic acid (see Acid)—Acids (see Acids)
- Camphocarbonate, ethylmethyl- (see Ethylmethylcamphocarbonate)
- Camphocarbonic acid (see Acid)
- Camphofornene derivatives, action of acylating agents on, **93**, 111
- Camphole acid (see Acid)
- Camphol, racemic, **56**, 57
- Camphols, acid ethers of, **59**, 133—Isomers (see Isocamphols)—Isomerism of, **54**, **48**, **61**; **55**, **80**—Isomerism of, rotatory power in, **34**, 92
- Campholactone, pseudo- (see Pseudo-campholactone)
- Campholates, metallic, **70**, 26
- Campholene, **89**, **96**; **70**, 13—Synthesis of, **96**, 257
- Campholene carbide and camphene carbide, isomeric, **88**, 35
- β-Campholene lactone, synthesis of, **97**, 119—Synthesis from the lactone of 2,4-dimethyl-2-cyclopentanol 1-acetic acid, **96**, 305
- Campholenes, amino- (see Aminocampholenes)
- Campholenic acid (see Acid)—Acids (see Acids)—Alcohol (see Alcohol)—Amides (see Amides)—Derivatives, **73**, **95**; **89**, **119**; **90**, **244**; **91**, 71
- α-Campholenic acid (see Acid)
- Campholic acid (see Acid)—Acids (see Acids)
- Campholide, **73**, 119—**8**, **92**, 250
- Campholurethanes, **45**, **163**; **49**, **178**
- Campholytic acid (see Acid)
- α- and β-Campholytic alcohols (see Alcohols)
- Camphomethane, diphenyl- (see Diphenylcamphomethane)
- Camphone, pino- (see Pino-camphone)
- Camphonitroketone, amethyl- (see Amethylcamphonitroketone)
- Camphonitrophenates, **59**, 240
- Camphophenol sulphone, amethyl (see Amethylcamphophenolsulphone)
- β-Camphopropionic acid (see Acid)—Acids (see Acids)
- Camphopyric acid (see Acid)
- Camphor, **21**, **120**; **179**; **28**, **99**; **91**, 70—Absorption spectra of halogen, nitro- and methyl derivatives of, **99**, **81**—Absorption spectrum of, **97**, **261**—Acetyl- (see Acetylcamphor)—Action of alcohols on, **64**, 37—Action of caustic potash on, **99**, 216—Action of chloral hydrate on, **36**, **81**—Action of chloride of benzyl on, **29**, 162—Action of iodine on, **37**, 4—Action of monatomic sodic alcohols on, **31**, 239—Action of sodium on, **15**, 174—Action of zinc chloride on, **15**, **201**; **20**, **229**—Alant, **29**, 146—And aldehyd, molecular compound, **45**, 100—And aldehydes, compounds, **79**, 300—And borneol, separation, **60**, 25—And camphoric acid, **18**, 150—And chloral hydrate, compound, **43**, 117—And derivatives, **77**, **79**, **82**—And oxynaphthoic aldehyde, union, **84**, 47—And turpentine, essence of, action of hypochlorous acid on, **17**, 9—Artificial and natural, **1**, 11—Artificial and natural, separation, **4**, 344—Artificial formation, **26**, 60 — Benzenediazo-ψ-semicarbazino- (see Benzenediazo-ψ-semicarbazino-camphor)—Benzoyl (see Benzoylcamphor)—Benzoyliodo- (see Benzoyliodocamphor)—Benzoylnitro- (see Benzoylnitrocamphor)—Benzyl- (see Benzylcamphor)—Benzylidene (see Benzylidenecamphor) — Bichloro ed, isomerism of, **45**, 251—Borneo, **37**, 275 — Borneo, substance homologous with, **19**, 249—Bromo- derivative, **11**, 176—Bromo- (see Bromocamphor) — α-Bromo- (see α-Bromocamphor) — Bromo derivatives, **37**, 4—Bromomethyl- (see Bromomethylcamphor) — Bromo-nitrated, **50**, 105—β-Bromo-α-nitro- (see β-Bromo-α-nitrocamphor)—Bromonitro- (see Bromonitrocamphor)—Camphen from, **39**, **84**—Camphenol from, **75**, **308**—α-Choro- (see α-chlorocamphor)—Chloronitric, **47**, 142—Chloro-nitric, formation, **48**, 171—Chloro-nitric, isomerism of, **49**, 157—Chloronitro (see Chloronitrocamphor)—Chloronitrous, loss of isomerism in, **49**, 286—Chloruration, **45**, 141—Combinations, **63**, 142—Combustion heat of, **66**, 281—Compounds, **62**, 62—Condensation with mercuric iodide, **93**, 314—Constitution, **21**, **203**; **31**, **111**; **37**, **45**; **78**, **250**; **82**, 197—Crystallographic, characters of substituted derivatives of, **52**, 117—Cyanised, **44**, 106—Cyanised, properties of, **54**, 23—Cyanogen (see Cyanocamphor)—Cyanogen derivatives of, **38**, 287—Cymol from, **17**, **57**; **19**, 261—Derivatives, **14**, **68**; **39**, **284**; **67**, **263**; **88**, 46—Derivatives, action of magnesium alkyl halides on, **90**, 278 — Derivatives, halogen, conversion of hydroxycamphene into, **85**, 93—Derivatives, isomeric sulphonic, **93**, 264 — Derivatives, mercury, **96**, 277; **100**, 252—Derivatives, molecular derivatives of, **81**, 95—Derivatives, stereoisomeric and sulphonic, **84**, 22—Derivatives, stereoisomeric halogen, **93**, 124—Derivatives, total synthesis of, **93**, 280—Determination, **64**, 177—Dextro benzylidene, action of hydrobromic acid on, **81**, 299—Dibromo-
- (see Dibromocamphor)—Dichlorated, isomerism of, **46**, 114—Diiodo (see Diiodo)—Dimethyl- (see Dimethylcamphor)—Ethylidene- (see Ethylidenecamphor)—Genesis of new derivatives of, **67**, **273**—Group, **22**, **59**; **83**, **204**; **28**, **294**—Group, combination, **25**, 178, **263**; **26**, 156—Group, compounds, **67**, **80**; **37**, 174—Group, examination of certain bodies of, **28**, 204—Group, researches in, **90**, 46—Group, synthesis in, **93**, 257—Halogen derivatives, **70**, **286**; **74**, **279**—Hydrocarbons from, **47**, 303—Imino- (see Iminocamphor)—In detecting grease, etc., curious properties of, **8**, 13, 47—Iodised derivative of, **38**, 264—Isomer of, **33**, **65**; **65**, 73—Isotroscos- (see Nitroscamphor, iso)—Magnetic rotation, **85**, 94—Maximum vapour-pressure, **79**, 262—Methanol- (see Meta-methol-camphor)—α-Methyl- (see α-Methylcamphor)—Methylene (see Methylene)—Methylmonobromo- (see Methylmonobromocamphor)—Molecular refraction, molecular dispersion, and specific rotatory power of compounds of, with aromatic aldehyds, **80**, 11—Molecule, migration of the methyl group in, **87**, 287—Monobromated, **26**, **83**; **60**, **185**; **76**, **35**—Monobromobenzyl (see Monobromobenzyl)—Monochloric, action of fuming nitric acid on, **48**, 171—Mono-chlorinated, **45**, 276—Monochlorised, **60**, 97—Monochlorised monobromised, **51**, 166, 178—Monochlorised, oxidising action, **76**, 152—Monochlorised, physical isomerism of, **47**, 34—Monopoly in Japan, **89**, 250—Motion towards light, **6**, 187—Motions, **51**, **109**, **129**, **277**; **52**, **23**, **46**, **50**—Motions on water, **8**, **28**, **37**, **96**, **123**; **36**, **191**, **215**, **285**; **37**, 72—New acid from, **39**, 9—New bases from, **61**, 109—New derivatives, **71**, 208—New, pinocamphene, **79**, 179—Nitro- (see Nitrocamphor)—Nitrobenzyl- (see Nitrobenzylcamphor)—Nitroso- (see Nitroso camphor)—Of cubebs, **35**, **85**—Of ethylidene (see Ethylidene)—Of patchouli, **19**, 169; **35**, **44**—Of peppermint, **4**, **315**; **42**, 268—Oil (see Oil)—Optical inversion of, **75**, 200—Oxidation, **81**, 134—Oxymethylene- (see Oxymethylene-camphor)—Phenol acid from, **62**, 296 — Products of reaction of sodium isobutylate and propylate on, at high temperature, **94**, 23—Properties of, **7**, **301**; **8**, **10**, **74**—Pulverisation, **22**, 275—Racemisation, **79**, 263—Radicle, amines enclosing, **81**, 35—Rotatory power of, **62**, **85**—Series, compounds, **23**, 262—Soda- (see Soda-camphor)—Solubility, **79**, 106—Specific volume, **60**, 114—Stereoisomeric derivatives, **76**, **78**; **77**, 259—Storm glass, **15**, 232, 268—Sulpho conjugated compounds, **67**, 168—Sulphonic chloride, dextro-rotatory, **70**, 58—Sulphonic derivatives of, **67**, **80**; **70**, **286**; **77**, 177—Sulphonic derivatives of, absorption spectra, **100**, 23—Synthesis, **88**, 147—Synthetic, chemistry of, **100**, 45—Test for dyed calicoes, **8**, 96—Transformation of camphene into, **32**, 8—Transformation of camphic acid into, **39**, 251—Trichloric, **50**, 213—Water, **20**, 209
- Camphor bichloride, physical properties, **45**, 187
- Camphor carbide, synthesis of a derived aromatic, **87**, 47
- Camphor chlorides, **37**, **238**; **39**, **84**; **40**, **34**; **42**, **210**; **43**, 259
- Camphor cymen, identity with essence of turpentine, **29**, 219
- Camphor cymol, oxidation in animal body, **26**, 299
- Camphor monochloride, action of fuming nitric acid on, **47**, 282
- Camphors, **26**, 180; **64**, 60—Acetylcyanocamphors (see Acetylcyanocamphors)—Anisal (see Anisal camphors)—Benzyl- (see Ben-

- zyleamphors) — Bromo-nitro- (see Bromo-nitrocamphors) — Chloro-nitro- (see Chloro-nitrocamphors) — Crystallographic properties of benzylidene, methyl- and ethylsulfonides, and anisol, 74, 40—Hexahydrobenzylidene- (see Hexahydrobenzylideneamphors) — Isomerism of, 54, 38, 11; 55, 80—Methylcyano-, isomeric, 69, 180—Nitro- (see Nitrocamphors)—Oenanthyldene- (see Oenanthyldeneamphors)—Of anisal (see Anisal)—Of aromatic series, crystallographic properties, 74, 85—Oxy-, *p*-dimethyl-amido-, and diethylamido-benzylidene, and *p*- and *m*-tolylidene, preparation, 100, 48—Synthesis by oxidation of camphenes, 32, 18
- Camphorate, potassium allo- (see Potassium)—Sodic ethylic, electrolysis of, 67, 129
- Camphorates, 61, 180—Nitro- (see Nitrocamphorates)
- Camphoric acid (see Acid)—Acids (see Acids)—Anhydride (see Anhydride)—Mononitrite (see Mononitrite)—Mononitrite (see Mononitrite)—Peroxide (see Peroxide)
- Camphorimide, methyl- (see Methylcamphorimide)
- Camphoro-carbonic acid (see Acid)
- Camphoronic acid (see Acid)
- Camphoroxalic acid (see Acid)—Amines (see Amines)
- Camphoroxime, 80, 253—Amino- (see Amino-camphoroxime) — Benzylidene- (see Benzylidene-camphoroxime)—Conversion into methylcamphorimine and camphenylnitramine, 75, 138—Ethers of, 76, 248—New base from, 74, 104—Resolution of, 80, 264
- Camphorquinone, 91, 277—Dioximes of, 87, 198
- Camphorquinonophenylhydrazone, 91, 277—Properties, 86, 11
- Camphor- β -sulphinic acid (see Acid)
- Camphorsulpholactone, bromo- (see Bromocamphorsulpholactone)
- Camphorsulphonate, dextrolevo- α -phenethylamine dextro- (see Dextrolevo- α -phenethylamine)—Dextromethylpropyl tin dextrobromo- (see Dextromethylpropyl tin)—Methylethylthetine dextro- (see Methylethylthetine)—Methylethylthetine dextrobromo- (see Methylethylthetine)
- β -Camphorsulphonate of methylethyl- β -naphthylamine, rotatory power of 87, 143
- Camphorsulphonates, benzylhydrindamine bromo- (see Benzylhydrindamine bromo- (see Bromocamphorsulphonates)—Chloro- (see Chlorocamphorsulphonates)—Hydrindamine (see Hydrindamine) — Hydrindamine bromo- (see Hydrindamine bromo- (see Bromocamphorsulphonates)
- Camphorsulphonic acid (see Acid)
- Camphor- β -thiol, 87, 139
- Camphorylazoimide, 91, 276
- Camphorylazoimide oxime, 95, 235
- Camphoryl- β -carbamide, nitrogen halides from, 93, 125
- Camphorylcarbinamide, 91, 80
- Camphoryldithiocarbamic acid (see Acid)
- Camphoryloxime, 78, 262
- Camphoryloxime anhydride, formation, 87, 293
- Camphoryloximes, bromo- (see Bromocamphoryloximes)
- Camphorylphenyltriazen, 100, 264
- Camphoryl- β -semicarbazide, 91, 229
- Camphorylsemicarbazide oxime, 95, 235
- Camphorylsulphonium bases and camphor- β -sulphinic acid, 95, 104
- Camphorylthiocarbamide, 96, 279
- Camphosulphonate of benzylquinolinium (see Benzylquinolinium)
- Camphosulphophenols, transformation, 63, 200

Capes, improvements in manufacture, **1**, 81

Capillarity, **20**, 106—Combined with evaporation, frigorific effects, **29**, 11, 159—Experiments on, **38**, 46—Fundamental equations of, **23**, 108

Capillary action, **17**, 8—Action and cohesion of films of water, **34**, 223—Affinities (*see* Affinities)—Affinity (*see* Affinity)—Attraction, separation by, **51**, 51, 82, 141—Chemistry, **16**, 22—Efflux, coefficient of, **35**, 31—Electro- (*see* Electro-capillary)—Multiplier, **50**, 257—Phenomena, **21**, 179; **28**, 9—Separation of substances in solution, **67**, 261—Spaces, metallic reductions produced in, **33**, 95—Tubes, ascent of solution in, **64**, 322—Tubes, efflux of mercury from, **35**, 44; **36**, 121—Tubes, metallic, polarisation of, **51**, 262—Tubes, outflow of liquids from, **29**, 145

Capitane, F., Manufacture of dynamite, **26**, 240—Manufacture of soluble glass from infusorial earth, **36**, 82

Cappa, M., Analysis of two minerals sublimed in eruption of Vesuvius, **2**, 11

Capranica, E., Reactions of bile pigments, **46**, 268

Caprio acid (*see* Acid)

Caproic acid (*see* Acid)—Alcohol (*see* Alcohol)

Caprolactone, iso- (*see* Iso-caprolactone)

Caprolactones, iso- (*see* Isocaprolactones)

Capron, J. R., "Photographed Spectra" (review), **37**, 118

Capronates, **29**, 73

Capronic acid (*see* Acid)

Capronin derivatives, **92**, 46

Caproylactic acid (*see* Acid)—Ethers (*see* Ethers)

Caproylthiocarbimide, **89**, 273

Capryl chloride, preparation, **61**, 254

Capryl iodide, action of, **65**, 96, 156, 239

Caprylic acid (*see* Acid)—Alcohol (*see* Alcohol)—Aldehyde (*see* Aldehyde)—Fermentation (*see* Fermentation)

Caprylidine, **55**, 81—Of caprylene, **57**, 161

Caps, improvements in manufacture, **1**, 81

Capstick, J. W., Ratio of specific heats of some compound gases, **71**, 91—Ratio of specific heats of the paraffins, **68**, 39

Capsuled articles, sale of, **12**, 193

Capsules and funnels of papier-mâché, **47**, 50—Ether, **50**, 174—For necks of bottles and jars, **4**, 174—Gold-lined, **31**, 55—Metallic, **12**, 157—Nickel, **62**, 250, 286—Porcelain, **61**, 192

Caramel brown, manufacture, **15**, 282—Colours, **15**, 242, 252, 254—Detection, **51**, 83—In wines, **74**, 306; **75**, 21—Preparation, **4**, 27—Test for adulteration of beer with, **26**, 157

Caramelised substances, formic aldehyde in, **93**, 141

Caravane Universelle, **26**, 194

Carballylates, **61**, 49

Carballylic acid (*see* Acid)

Carbamate, ethyl- (*see* Ethyl-carbamate)—Formation, **94**, 36—Of ammonium (*see* Ammonium)

Carbamates, **36**, 277—Alkyl iminothio- (*see* Alkyl iminothio carbamates)—Aromatic, **53**, 107—Thio- (*see* Thiocarbamates)

Carbamic acid (*see* Acid)

Carbamide, action of *o*-dinitrochlorobenzol on, **34**, 270—And thiocarbamide, sulphinic compounds of, **56**, 21—Camphoryl- ψ - (*see* Camphoryl- ψ -carbamide)—Dichloro- (*see* Dichlorocarbamide)—Dimethyl- (*see* Dimethylcarbamide)—*as*-Dimethyl- (*see as*-Dimethylcarbamide)—Diphenylsulpho- (*see* Diphenylsulphocarbamide)—Methyl- (*see* Methyl)-Phenyl (*see* Phenyl)—Phenylthio- (*see* Phenylthiocarbamide)—Reaction for, **35**, 185—Reagent for identification, **87**, 18—Seleno- (*see* Selenocarbamide)—Sulpho- (*see*

Sulphocarbamide)—Synthesis of para-razine from, **99**, 80—Thio- (*see* Thiocarbamide)—Vapours, **47**, 117

Carbamides, compounds with acids and salts, **95**, 249—Dinaphthyl- (*see* Dinaphthyl-carbamides)—Dinitrophenyl- (*see* Dinitrophenylcarbamide)—Dinitro-ditoly- (*see* Dinitro-ditoly carbamides)—Dinitrodixyl- (*see* Dinitrodixylcarbamide)—Of methylene (*see* Methylene)—Substituted, chlorine derivatives of, **99**, 80—Thio- (*see* Thiocarbamide)

Carbamidglyoxalyl, **35**, 164

Carbamidsulphonacetic acid (*see* Acid)

Carbamin cyamides, **54**, 110

Carbaminate of phenol (*see* Phenol)

Carbamines, direct hydrogenation, **95**, 263

Carbanil, oxy- (*see* Oxy-carbanil)

Carbanilate of methyl (*see* Methyl)

Carbanilidic acid ether (*see* Ether)

Carbanilide, sulpho- (*see* Sulphocarbamide)

Carbazide, diphenyl- (*see* Diphenylcarbamide)—Phenyl- (*see* Phenylcarbamide)—Phenylsemi- (*see* Phenylsemicarbamide)—Semi (*see* Semicarbamide)

Carbazides, preparation, **81**, 276—Semi-thio- (*see* Semithiocarbazides)

Carbazinate, phenyl- (*see* Phenylcarbazine)

Carbazine, acetone-semi- (*see* Acetone-semicarbazine)

Carbazinocamphor, benzenediazo- ψ -semi- (*see* Benzenediazo- ψ -semicarbazinocamphor)

Carbazol, **25**, 57; **26**, 71; **42**, 51—Action of oxalic acid on, **40**, 264—And pyrrol, corresponding reactions of, **61**, 180—Chlorinated derivatives, **43**, 72—From coal-tar, **40**, 44—Method for nitrates in water analysis, **64**, 197—Phenolnaphthyl (*see* Phenolnaphthyl)—Synthesis, **25**, 286; **27**, 266

Carbazoles, formation, **84**, 26; **87**, 88

Carbazolin, **29**, 73

Carbazone, acetosemi- (*see* Acetosemicarbazone)—Benzalthiosemi- (*see* Benzalthio-semicarbazone)—Diphenyl- (*see* Diphenylcarbazone)

Carbazones, semi- (*see* Semicarbazones)

Carbide, C_3H_4 , **76**, 59—Camphenic, synthesis of, **32**, 19—Hydro- (*see* Hydrocarbides)—Of aluminium (*see* Aluminium)—Of barium (*see* Barium)—Of caesium (*see* Caesium)—Of calcium (*see* Calcium)—Of camphene (*see* Camphene)—Of campholene (*see* Campholene)—Of camphor (*see* Camphor)—Of chromium (*see* Chromium)—Of columbium (*see* Columbium)—Of glucinum (*see* Glucinum)—Of gold (*see* Gold)—Of hydrogen (*see* Hydrogen)—Of iron (*see* Iron)—Of lanthanum (*see* Lanthanum)—Of lithium (*see* Lithium)—Of magnesium (*see* Magnesium)—Of manganese (*see* Manganese)—Of molybdenum (*see* Molybdenum)—Of perseite (*see* Perseite)—Of praseodymium (*see* Praseodymium)—Of rubidium (*see* Rubidium)—Of samarium (*see* Samarium)—Of silicon (*see* Silicon)—Of sodium (*see* Sodium)—Of strontium (*see* Strontium)—Of tantalum (*see* Tantalum)—Of thorium (*see* Thorium)—Of titanium (*see* Titanium)—Of tungsten (*see* Tungsten)—Of uranium (*see* Uranium)—Of vanadium (*see* Vanadium)—Of yttrium (*see* Yttrium)—Of zirconium (*see* Zirconium)—Sulphhydro- (*see* Sulphhydrocarbide)

Carbides, acetylenic, condensation of true, with aldehydes, **85**, 119—Acetylenic, condensation with alcohols, **91**, 153—Acetylenic, condensation with ether salts, **85**, 60—Acetylenic, condensation with formic aldehyde, **83**, 287; **86**, 317—Acetylenic, hydrogenation by contact method, **86**, 79—Aromatic, action of ferric chloride and bromide on, **80**, 47—Aromatic, chlorination, **87**, 23—Aromatic, chlorination of substituted by ammoniacal lead chloride, **87**, 94—Aromatic, condensation of

mesoxalic ethers with, **99**, 191—Aromatic, hydrogenation, **83**, 299—Aromatic, transformation into formic carbides, **34**, 184—Benzenic, oxidation by manganese dioxide and sulphuric acid, **84**, 242—Benzenic, synthesis, **68**, 210—Chlorination of, **53**, 84; **56**, 13;—Classification, **74**, 37—Dissociation by means of a palladium wire, and on connection of the facts with catalytic phenomena, **36**, 43—Ethenic, general reactions of, **77**, 261—Ethylenic, **65**, 178—Ethylenic and aromatic, direct combination of, **68**, 73—Ethylenic, hydrogenation, **85**, 287—Fatty, derivatives produced by hydrogenation by means of ammonium metals, **93**, 69—Formation, **98**, 279—Formenic, preparation, **91**, 222—Formenic, transformation of aromatic carbides into, **34**, 184—Gaseous, **61**, 181—Hydro- (*see* Hydrocarbides)—Incomplete, from American petroleum, **40**, 167—Isomeric with anthracene, and their hydrides, action of heat on, **30**, 108—Metallic, **74**, 15, 37—Metallic, formation of hydrocarbides by action of water on, **84**, 37—Nitroso- (*see* Nitrosocarbides)—Of alkaline (*see* Alkaline)—Of hydrogen (*see* Hydrogen)—Of iron (*see* Iron)—Of neodymium (*see* Neodymium)—Of paraffin (*see* Paraffin)—Of petroleum (*see* Petroleum)—Of platinum (*see* Platinum)—Of praseodymium (*see* Praseodymium)—Of thorium (*see* Thorium)—Of yttria (*see* Yttria)—Oxalocetylthienic, **89**, 119—Preparation, **88**, 46—Pyrogenous, and coal-gas, **33**, 200, 210—Pyrogenous, of American petroleum, **39**, 124—Pyrogenous, thermic formation, **43**, 105—Saturated, action of nitric acid on, **81**, 287—Terphenic, synthesis, **83**, 166—Thio- (*see* Thiocarbides)—Volatile, of essence of valerian, **69**, 217—Volatile, of oil of valerian, **69**, 26

Carbimide, bornyl (*see* Bornylcarbimide)—Camphoryl (*see* Camphorylcarbimide)—Camphorylthio- (*see* Camphorylthiocarbimide)—Caproylthio- (*see* Caproylthiocarbimide)—Cinnamyl- (*see* Cinnamylcarbimide)—Dibromopropylthio- (*see* Dibromopropylthiocarbimide)—Phenylthio- (*see* Phenylthiocarbimide)—Thio- (*see* Thiocarbimide)

Carbimides, acidylthio- (*see* Acidylthiocarbimides)—Carboxyamylthio- (*see* Carboxyamylthiocarbimides)—Carboxymethylthio- (*see* Carboxymethylthiocarbimides)—Dithio (*see* Dithiocarbimides)—Optically active, **89**, 259; **92**, 292; **93**, 124; **94**, 217; **95**, 91—Succinyl dithio- (*see* Succinylthio- (*see* Thiocarbimides)

Carbinol, acetyl (*see* Acetyl)—Allyl (*see* Allyl)—Allyldipropyl (*see* Allyldipropyl)—Allylthiophenyl (*see* Allylthiophenyl)—Allylmethyltertiarybutyl (*see* Allylmethyltertiarybutyl)—Benzoyl (*see* Benzoyl)—Diallylmethyl (*see* Diallylmethyl)—Diaminotriphenyl (*see* Diaminotriphenyl)—Diethylorthoxyphenyl (*see* Diethylorthoxyphenyl)—Dimethylisobutyl (*see* Dimethylisobutyl)—Dimethylisopropyl (*see* Dimethylisopropyl)—Dimethylpseudopropyl (*see* Dimethylpseudopropyl)—Ethylallyl (*see* Ethylallyl)—Ethylidimethyl (*see* Ethylidimethyl)—Methylacetyl (*see* Methylacetyl)—Methylthyl (*see* Methylthyl)—Methylhexyl (*see* Methylhexyl)—Phenylallyl (*see* Phenylallyl)—Propargyl (*see* Propargyl)—Salts and cyclohexanerosanilines, **90**, 221—Tetramethylene (*see* Tetramethylene)—Triethyl (*see* Triethyl)—Trimethyl (*see* Trimethyl)—Triphenyl (*see* Triphenyl)

Carbinols, di- (*see* Di-carbinols)—Diphenyl (*see* Diphenylcarbinols)—Replacement of the hydroxyl of, by the radical, **94**, 304—Tri- (*see* Tri-carbinols)

Carbocaprolactonic acid (*see* Ester)
 Carboxyan ether (*see* Ether)
 Carbodiazine, diphenyl- (*see* Diphenylcarbodiazine)
 Carbidiphenylimid, 29, 155
 Carbogluconic acid (*see* Acid)
 Carbohydrate, capable of fermentation, 58, 13—Contained in acorns, 56, 400—hydrolysis, thermochemistry, 75, 209
 Novel, 57, 111
 Carbohydrates, 31, 110; 41, 48; 54, 178—Acetic derivatives, 23, 300—Action of H₂O on, in presence of ferrous sulphate, 90, 158—Action of hydrogen bromide on, 83, 92—Action of hydrogen bromide in presence of ether on, 77, 282—Action of hydrogen peroxide on, 77, 283; 79, 210; 82, 210; 88, 254—Action of hydrogen peroxide on, in presence of ferrous sulphate, 91, 158—Action of water on, at high temperature, 16, 299, 257—And albuminoids from grain, 54, 270—And alkalis, combinations, 45, 78—Anilides of, 24, 300—Chemical action of bacillus coli communis on, 83, 188—Colorimetric determination, 74, 203—Coloured reactions, 64, 286—Coloured, reactions of phenols with, 53, 15—Combustion, 52, 206—Determining molecular weight of, 97, 143—Formation of fats from, 49, 104—Formula, 40, 237—In animal system, physiology of, 49, 128, 140, 155, 162, 172, 183—In beer, 75, 180—In infants' food, 42, 85—Investigations on, 67, 304—Molecular weights of, 56, 296; 57, 196—Nitration, 77, 152—Of barley straw, 74, 267; 77, 197—Of cereal straws, 74, 177; 76, 68, 188; 78, 164—Of cocoa (*see* Cocoa)—Of *Helianthus tuberosus*, 68, 62—Of Jerusalem artichoke, 40, 191; 68, 160—Of peach gum, 62, 43—Of tea (*see* Tea)—Phenols as reagents for, 51, 114—Publications relating to, 70, 100, 117, 142—Pyrocatechin from, 23, 151—Thermal phenomena attending change of rotatory power of, 75, 203—Transformation of fat into, in certain animals, 73, 280—Use of the term, 67, 177
 Carbolate of soda (*see* Soda)
 Carbolates sulpho- *see* Sulphocarbolates
 Carboic acid (*see* Acid)—Disinfectants, 60, 68—Paper (*see* Paper)—Soap (*see* Soap)—Test for nitric acid, 36, 179; 37, 1
 Carhometer for estimation of carbonic anhydride, 35, 81
 Carbon, 21, 274; 61, 192; 64, 149—Absorption of chlorine by, 50, 70—Absorption of gases by, 55, 65—Acids (*see* Acids)—Action, 65, 73; 67, 112—Action of ammonia on, at a red heat, 11, 255, 266—Action on quicklime at the temperature of fusing platinum, 89, 119—Adsorption of iodine by, 96, 232—Affinities, magnitudes of, 43, 188—Albo- (*see* Albo-carbon)—Amorphous, reducing and catalytic properties, 95, 150—Amorphous, variations in, under influence of rapid variation of temperature, 94, 46—Amorphous, variations in, under influence of temperature oscillations, 93, 304—Analysis, 19, 113, 147, 147, 150, 220; 20, 83—And aluminium powder, interaction, 97, 219, 233, 238—And argon, spectrum of Ramsay's compound, 72, 99—And barium carbonate and nitrogen, influence of addition of chloride to reaction between, 97, 87—And compounds, chemical actions with, 50, 124—And hydrogen and nitrogen, values of atomic weights of, 77, 224—And hydrogen and oxygen, chemical equilibrium between, 21, 113, 169, 214—And hydrogen and oxygen, thermo-chemical relations, 93, 37; 98, 46, 82—And hydrogen, determination, 47, 178; 77, 215—And hydrogen, direct union, 94, 230; 98, 265—And hydrogen, estimation, 77, 140—And hydrogen, union, 73, 151; 74, 268; 84, 6—And iron and phosphorus, mutual

relations when together in cast-iron and steel, 82, 221, 233—And nitrogen, combination in elementary state, 95, 114—And nitrogen in waters, organic, 55, 121—And oxygen, combination heats, 48, 117—And phosphorus, tin, and zinc, equivalents of, 53, 24—And pig-iron, separating, 58, 199—And steel, separating, 58, 199—And sulphur, their oxides and their salts, reactions between, 49, 11—And sulphur compounds, electric resistance, 45, 135—As a means of permanent record, 1, 7—At high temperatures, experiments on, 57, 253—Atom, and nitrogen atom, analogy between asymmetric, 91, 55—Atom, determining relative value of four units of chemical action of, 55, 212—Atomic weight, 23, 72; 62, 283; 69, 27; 70, 80, 121, 147, 172, 247; 72, 164; 75, 163; 77, 224; 89, 207; 91, 210; 93, 55, 184; 99, 69, 72, 306; 100, 278, 299—Atoms, models of tetrahedral, 96, 164—Atoms, optical and magneto-optical influence of ethenoid linkings attached to contiguous, 95, 32—Band spectrum, variation due to pressure, 91, 211—Bath for Eggertz colour test, 50, 25, 56—Black, a specimen, 62, 185—Black, transformation of diamond into, during oxidation, 87, 11—Boiling and melting-point, 92, 148—Boiling-point of, 71, 233—Boron, battery, 71, 2, 87, 135, 160—By combustion, 86, 223—Cathodic precipitation of, 96, 200—Chains, closed, synthetical formation, 56, 19—Chemical, as used in calico-printing works, 27, 70—Chemical changes of, 19, 13, 25, 37, 49, 66, 91, 98, 114, 125, 133, 145, 248—Chemically combined with iron, determining, 20, 65—Chloro-bromo- (*see* Chloro-bromo-carbon)—Closet system, 25, 75—Combined in iron and steel, 22, 101—Combined in meteoric iron, detection and estimation, 25, 285; 27, 59—Combining powers of, 17, 260—Combustible compounds of, in the atmosphere, 50, 272—Combustibility, 25, 33—Combustion by oxygen, 25, 81—Combustion heat of, 51, 235; 59, 312—Combustion in organic incinerations, 47, 165—Compound and diamond, refraction equivalents of, 42, 175—Compound in a meteorite, 7, 130—Compounds, colour of, 57, 217—Compounds, coloured reactions of, 60, 104—Compounds, constitution, 14, 4—Compounds, critical temperature and value of ML/(H) of, 93, 90—Compounds, determination of nitrogen in, 41, 223—Compounds, gaseous, incomplete combustion, 70, 265—Compounds in meteorites, 34, 32, 153—Compounds, nomenclature of, 33, 156—Compounds, poly-oxygenated, volatility of, 57, 181—Compounds, reactions involving addition of hydrogen cyanide to, 88, 9; 90, 251, 253; 93, 201; 94, 264—Compounds, relation between their molecular structure and their absorption spectra, 41, 270; 51, 235; 54, 269—Compounds, ultra-violet, absorption spectra of, 77, 103—Compounds, ultra-violet spectra of closed chain, 81, 307—Conductors for electric light, manufacture, 35, 106—Crystallisation, 40, 306; 41, 13—Crystallised, in abstract, 41, 111—Crystallised, production, 14, 67—Density in its combinations, 11, 8—Deposit in a Blake telephone transmitter, 61, 106—Deposited from coal-gas flames, 65, 152—Determination, 47, 178; 54, 97; 61, 27; 74, 65—Diffusion of, 45, 57—Disaggregation of, 14, 47—Discontinuity of potential at surface of glowing, 99, 57—Dispersion, anomalous, 82, 267—Effect produced by addition of foreign bodies to, in coke pencils for electric light, 35, 86—Electric conductivity, influence of absorbed gases on, 47, 157—Electric resistance under pressure, 45, 98—Electrodes, 81, 75—

Electrodes, accumulator with, 46, 303—Electro-deposition, 50, 113—Elements, manufacture for Bunsen batteries, 1, 135—Employed in manufacture of gunpowder, analysis, 2, 277—Equivalent of, 45, 208, 221—Estimation, 1, 216; 13, 207, 217; 21, 120; 35, 77; 39, 39; 44, 173; 47, 285; 79, 267; 80, 52—Estimation by combustion when sulphur present, 3, 66—Estimation by oxidation with chromic acid, 90, 31—Evaporation, 70, 297—Evolution in natural combustible substances, 91, 118—Filiform, 88, 280—Funnels for filtering, 57, 223—Graphitic, in cast-irons, 97, 35—Graphitoid, preparing, 55, 124, 139—Group elements, action of radium emanation on, 100, 209—Group, tin and lead in, 90, 271—History of, 24, 144; 62, 296—Hydro- (*see* Hydrocarbon)—In aliphatic compounds containing hydroxyl, determination in wet way, 99, 300—In arable soils, determining, 57, 102—In bone-coal, to determine, 25, 271—In cast-iron, 8, 39; 11, 305; 17, 267; 19, 152; 30, 41; 48, 168; 50, 57—In cast-iron, displacement during fusion, 71, 20—In cast-metal for moulding, 70, 269—In cast-steels, estimation, 40, 263—In crude iron and steel, determination, 48, 160—In experimental standard, 64, 43—In ferrochrome, 75, 241, 263, 286, 287, 299, 311; 76, 11—In graphite, determination, 62, 274—In high-speed steels, 87, 65—In iron, 5, 5, 210, 252; 7, 254; 22, 317; 76, 183; 77, 105—In iron, determination, 51, 36; 54, 38; 60, 167; 69, 277; 71, 318; 72, 85, 293; 80, 121, 146, 242, 266—In iron, estimation, 21, 120; 52, 15; 94, 299—In metals, estimation, 84, 23, 46, 59—In meteorites, 33, 106, 204, 215—In organic analysis, 7, 291—In organic substances, 4, 13; 96, 108—In oxygen, temperature of ignition and combustion, 86, 316—In phosphorus, 50, 257—In pig-iron, wrought-iron, and steel, estimation by combustion with oxide of copper in vacuo under Sprengel pump, 25, 301—In pig-iron, estimation, 21, 167; 28, 198, 282; 29, 112, 120—In soils, determination, 41, 290—In soils, estimation, 94, 299—In steel, 7, 254; 30, 41; 41, 17, 152, 229, 250; 79, 169—In steel, condition in which it exists, 42, 88, 131; 47, 200; 69, 251—In steel, determination, 17, 267; 21, 295; 29, 148; 50, 57; 51, 36; 54, 38; 57, 27; 64, 66; 80, 121, 146, 242, 266—In steel, determination by colorimetric method, 26, 139—In steel, determination by direct combustion in oxygen, 87, 289—In steel, estimation, 21, 120; 52, 15; 59, 158; 80, 210; 85, 121; 94, 299—In steel estimating, apparatus for, 48, 200—In steel manufacture, 30, 30—In vacuo, reduction of pure anhydrous sesquioxide of iron with, 27, 313—In volatile organic liquids, 79, 50—In voltaic arc, association of incandescence of magnesium to that of, 17, 252—In wrought iron, determination, 17, 267; 50, 57—Incandescent, existence of two spectra produced by, 22, 172—Inorganic, preparation, 6, 100—Japanese, 21, 11—Line spectrum of, in fused salts, 76, 107—Loss in rusted pig-iron, 63, 73—Melting-point, 94, 314—Mode of burning, 79, 235—Modifications, relative vapour tensions of, 93, 60—Molecule, constitution, 97, 37; 98, 37, 72—Mono- (*see* Mono-carbon)—Musical sounds produced by, 8, 163—Numerical relations between specific gravities of diamond, graphite, and charcoal forms of, and its atomic weight, 2, 1, 18—Of plants, origin, 37, 153—Of white cast-iron, 31, 207—Ordinary, 100, 160—Organic, in air, estimation, 43, 69—Organic, in solids, determination, 53, 251—Organic, in waters, determination, 53, 271—Oxidation, 25, 21—Penta-

- (see Pentacarbon) — Plate rheostat, 99, 144 — Platinic compounds, 85, 132 — Porous, manufacture, 17, 191 — Preparation, 20, 321; 67, 96; 69, 50; 77, 124 — Printing, 9, 176 — Processes, modifications, 28, 60 — Property of, 58, 24 — Pure, preparation for electric lighting, 47, 179 — Purification, 20, 321 — Quantitative determination, 94, 133 — Reduction of magnesia by, 95, 226 — Relations of the different modifications of, to one another, 92, 93 — Repelling power of, 2, 237 — Retort, alteration when used as a positive electrode, 56, 57 — Role played by, in reducing sulphates of alkalis, 37, 271 — Separation, 91, 278 — Silico-carbon (Silico-carbon) — Solubility in barium carbide and strontium carbide, 95, 82 — Solubility in calcium carbide, 94, 71 — Solubility in rhodium, iridium, and palladium, 74, 61 — Specific heat of, 25, 262; 30, 186; 67, 265; 71, 233 — Spectrum, 9, 135, 166; 24, 167; 45, 13; 91, 211 — Steels, composition, 90, 44 — Steels, microscopic analysis, 82, 161 — Study of, 97, 273; 99, 248 — Telephone, 38, 241 — Test, colorimetric, 21, 131 — Thermo electric position of, 52, 22 — Transformation of aromatic monamines into acids richer in, 18, 77 — Trivalency, 91, 58 — Trivalent, 85, 20, 32 — Trivalent, and triphenylmethyl, 95, 48 — Tube furnaces (see Furnaces) — Vapour, 88, 256 — Vapour, electric arc in, 46, 43
- Carbon bichloride, preparation, 78, 47
- Carbon biscuits, 15, 294, 310
- Carbon bisulphide, 36, 24 — Analysis, 43, 138 — Action of iodine trichloride on, 37, 224 — Action of light on, 19, 29, 215, 238 — Congelation by means of, 23, 153 — Decomposition by heat, 19, 287 — Estimation, 81, 169 — Extraction of grease by, 17, 194, 218 — Extraction of oils by, 17, 142 — In gas, 2, 266; 3, 14, 128, 330; 4, 24, 38, 83 — Manufacture, 15, 321, 329 — Nitroformazyl and potassium hydroxide, interaction, 94, 59 — Prism, 13, 28 — Prism, use for spectral analysis, 8, 52 — Purification, 19, 34; 34, 184 — Removal from gas, 2, 77; 11, 65; 12, 277, 301; 13, 8 — Solid, 21, 131, 190 — Solidifying, 35, 214 — Vapour, absorbents for, 52, 184
- Carbon boride, preparation and properties, 69, 183
- Carbon bromide, 4, 21
- Carbon chloride, 22, 70; 69, 284 — Action on anhydrous oxides, 55, 81 — Julius's, 16, 8 — Solid, 20, 156
- Carbon chlorides, 20, 13 — Oxalic acid from, 1, 46
- Carbon chlorobromides, 25, 22; 65, 96
- Carbon chloriodide, 67, 12
- Carbon diiodide, preparation, 66, 97
- Carbon dioxide, 33, 237; 73, 252 — Absorption by blood, 36, 20 — Action of ultraviolet light on, 93, 75 — Action on aqueous solutions of aniline in presence of nitrites, 89, 59 — Action on borates of barium, 87, 28 — Action on metallic phosphates under pressure, 88, 243 — Action on nitrites, 99, 141, 160 — Action on soluble borates, 77, 294 — Action on solutions of sodium nitrite, 89, 130, 155 — And oxygen, simultaneous development among eucataceae, 63, 188 — And potassium hydride, combination, 88, 191 — Apparatus for automatic examination of, 97, 286 — Apparatus for estimation, 78, 293, 326 — Apparatus for generating weak currents, 69, 217 — As a germicide, 69, 30 — Atmospheric, estimation, 82, 238 — Combustion, 79, 234 — Compressibility, 62, 309 — Conversion of carbon monoxide to, 48, 25 — Crystallised, 71, 152; 77, 216 — Decomposition, 84, 8 — Decomposition by silent electric discharge, 98, 316 — Decomposition by ultra-violet rays, 100, 191 — Decomposition under influence of light, 90, 329 — Determination, 62, 254; 72, 194; 74, 65 — Disulphide, and sulphur dioxide, reactions of, 52, 183 — Effect on animal life, 69, 159 — Formation, 73, 139 — Gas, dried, action of dried ammonia on, 63, 138 — In air, causes of variations, 97, 288 — In air, estimating, 70, 111; 90, 217 — In air of sea-coast places, 33, 16 — In aqueous solution, state of, 87, 18 — In vitiated air, estimation, 86, 270 — Influence of colloids and colloid suspensions on the solubility of, in water, 98, 163 — Liquefied, use of, 63, 188 — Liquid, in mineral cavities, presence, 32, 258 — Nascent, as a chemical reagent, 84, 164 — Precipitation, 72, 194 — Quantitative determination, 94, 133 — Reduction, 54, 88 — Reduction to formaldehyde in aqueous solution, 95, 162 — Solid, collecting for lecture purposes, 85, 301
- Carbon disulphide, 23, 288, 300; 47, 11, 52, 169 — Absorption spectrum of iodine in solution in, 47, 63 — Action of iodine trichloride on, 28, 254 — Action on polyvalent aminoalcohols, 86, 47 — Action on silicium, 45, 276 — And alcohol, solidification, 48, 193 — And antimony chloride, reactions, 43, 106 — And carbon tetrachloride, distillation of mixtures of, 43, 193 — And hydrogen and nitrogen combination, 80, 83 — And starch, interaction, 95, 178 — Antiseptic properties, 50, 179 — Coefficient expansion of, 28, 277, 288 — Colouring matter from, 43, 133 — Congelation, 23, 128 — Crystals produced by action of metals sealed up in, 44, 211 — Decomposition, 59, 140 — Detection, 48, 270 — Determination, 46, 2 — Effects of vapour of, 38, 306 — Heat formation of, 42, 270 — Hydrate of, 23, 142, 180 — In air, gases, sulphocarbonates, etc., detection and determination, 50, 67 — In benzene, determination, 97, 119 — In commercial benzol, 43, 148, 250; 44, 105 — Preparation of aqueous solutions of, 52, 106 — Preparation of standard solutions of, 50, 235 — Purification, 32, 163; 44, 69; 65, 180 — Qualitative test for, 44, 221 — Reactions, 50, 284 — Reactions with baric and calcic hydrates, 21, 56 — Slow combustion, 93, 21 — Solidification, 48, 193 — Solubility, 51, 166 — Solution, action of heat and light on mixtures of phosphorus sesquisulphide and sulphur in, 89, 130 — Strength of solutions of sulphur in, 43, 192 — Water, and ether water, variation of capillary constant of surface of, 48, 11
- Carbon fluorides, preparing, 61, 120 — Synthesis, 61, 314
- Carbon hydrates, soluble, in fruits, 19, 143
- Carbon-iron system, chemical equilibrium of, 85, 71
- Carbon monosulphide, experiments for production, 73, 23 — Gaseous, 89, 25
- Carbon monoxide, absorbent for, 36, 2 — Absorption, 62, 213 — Action, 62, 97; 65, 73; 66, 62; 67, 158; 68, 26, 36, 221 — Action of heat on, 63, 177 — Action on ammonia, 91, 196 — Action on chlorides of lead and silver, 52, 183 — Action on chromium, nickel, manganese, their oxides and alloys, 99, 191 — Action on iron and its oxides, 88, 83 — Action on platinum and palladium, 77, 105 — Action on silver oxide, 91, 268 — Action on watery vapour, 47, 223 — And ammonia, dissociation temperature of, 98, 197 — And chlorine, combination under influence of light, 86, 214 — And cobalt, volatile compound of, 98, 195 — And coal gas, 50, 149 — And hydrogen, preparation of ethylene from, 99, 240 — And nitrogen, liquefaction, 48, 193 — And oxygen, action of ultraviolet light on moist and dried mixtures of, 92, 297 — And oxygen, combining volumes of, 89, 223 — And oxygen, influence of nascent state on combination, 81, 114 — And oxygen, union of, 88, 287 — As a product of combustion of the Bunsen burner, 87, 82 — Assimilation by green plants, 88, 1 — Blood, behaviour with hydrogen sulphide, 48, 179 — Combustion, influence of water on, 81, 25 — Condensations, 61, 191 — Conduct of moist phosphorus and air towards, 48, 199; 49, 73, 142 — Conversion to carbon dioxide, 48, 25 — Detection, 47, 166; 59, 129, 313; 62, 285 — Determination, 64, 85 — Dry, influence of nascent state on combination with oxygen, 81, 114 — Evolution of, 72, 288 — Fatal poisoning by, 59, 260 — In air, detection, 35, 184 — In blood, detection, 57, 231 — In confined spaces, estimation, 91, 71 — In gaseous mixtures, difficulties of estimation, 93, 153 — In mine gas, estimation, 100, 191, 197 — In normal blood, and in blood of animals anaesthetised with chloroform, 100, 263 — In vitiated air, estimation, 86, 270 — Liquefaction, 48, 193 — Noack's memoir on a new method of obtaining, 48, 204 — Reaction, 52, 119; 60, 110 — Search for and estimation, 94, 289 — Variation with temperature of surface-tension and densities of, 85, 260 — Volume composition, 79, 232
- Carbon oxide, absorption by the lungs, 21, 274 — Action of chromic acid on, 25, 27 — Action on iron and its oxides, 25, 82, 226 — And protochloride of platinum, 21, 262 — Characteristic of formines and polyatomic alcohols, source of, 33, 149 — Fatal dose, for various animals, 42, 317 — Hemoglobin, test for, 61, 241 — Nickel (see Nickel)
- Carbon oxides, direct hydrogenation in presence of finely divided metals, 85, 191
- Carbon oxychloride, 18, 93; 38, 91 — Action on aromatic hydrocarbons, 22, 48 — Action on carbides of hydrogen, 21, 107 — Action on hydride of acetyl, 22, 48 — Analysis of gases containing, 21, 107 — And aluminium chloride, compounds, 92, 45 — And benzene, reaction between, 21, 287 — Production in chloroform, 45, 234
- Carbon oxysulphide, 17, 143; 19, 273; 26, 59, 83 — Production, 58, 305 — Transformation into ordinary urea and sulph-urea, 45, 198; 47, 154
- Carbon oxysulphides, probable existence of two, 24, 313
- Carbon perchloride, action of anhydrous sulphuric acid on, 20, 81, 202
- Carbon protochloride, action of sulphuric anhydride on, 21, 262
- Carbon protosulphide, 32, 60; 33, 253
- Carbon sesquisulphide, action of sulphuric anhydride on, 21, 262 — Preparation, 20, 173
- Carbon sesquisulphide, 13, 229
- Carbon silicide, crystalline, 68, 185 — In Canon Diablo meteorite, examination, 91, 109
- Carbon suboxide, 93, 141; 95, 107; 97, 96, 311; 98, 281 — Constitution, 93, 305 — Preparing, 99, 96 — Refractometer proof of composition of, 97, 192
- Carbon suboxides, 93, 166
- Carbon sulphide, 24, 230; 31, 269 — Action of amalgam of sodium on, 2, 203 — Action of heat on, 72, 293 — Action of light on, 19, 238 — Action of oxygen on, 77, 248 — Action on charcoal, 21, 153 — Action on methylenic soda compounds, 85, 167 — Action on oxamide and acetamide, 20, 72 — Action on tetrabromide of silicon in presence of bromide of aluminium, 91, 35 — And bromide of aluminium, compound, 86, 197 — And Canada oil, relative value for extracting oil from seeds, 24, 168 — And oxysalts, sulphuretted hydrogen and hydrochloric acid, reactions between at high temperature, 14, 142 — Applications, 24, 194; 36, 152 — Chloridation, 78, 60 — Constants of, 89, 83 — Decomposition, 22, 312 — Derivatives, sulphurised and azotised, 88, 172 — Effects on health, 7, 216 — Effects on the vine, 28, 240 —

- Electrisation by friction observed in, and decomposition of that body by light, **25**, **81**—Extraction of oil by, **18**, **85**—Formation and decomposition, **20**, **34**—Gaseous, described by Deninger, non-existence, **86**, **278**—Hydrate of, **23**, **132**—Hydrogenated derivatives, **21**, **154**—In coal-gas, estimation, **21**, **95**—Light, **19**, **215**—Manufacture, **21**, **11**—Preparation of sulphur soluble in, **5**, **255**—Rendering inodorous, **21**, **22**—Solubility in alcohol, **24**, **34**—Sulphurised and nitrated compounds derived from, **87**, **208**, **312**
- Carbon tetrabromide, **21**, **223**, **273**, **296**—Action of sulphur on, **92**, **202**—From bromoform, **27**, **266**—In manufacture of bromine, **42**, **288**—Producing, **69**, **81**
- Carbon tetrachloride, **14**, **154**, **216**; **35**, **44**; **40**, **35**; **97**, **312**—Action, **57**, **180**—Action of sodium on, **88**, **70**—Action on chlorochromic acid and phosphates of sesquioxide, **55**, **104**—And carbon disulphide, distillation of mixtures of, **43**, **193**—And its use as an anæsthetic, **36**, **32**—And oxides of niobium and tantalum, reaction between, **74**, **33**—Preparing, **14**, **179**
- Carbon tetrafluoride, **61**, **253**
- Carbon triiodide, **30**, **53**; **64**, **49**
- Carbon trichlorobromide, **25**, **95**
- Carbons, asymmetric, superposition of optical effects of, in same active molecule, **70**, **306**—Bromohydro- (see Bromohydrocarbons)—Chloro- (see Chlorocarbons)—From animal tar, **41**, **220**—Graphitic, different states of, **61**, **72**—Hydro- (see Hydrocarbons)—Incandescent, radiations emitted by, **52**, **35**—Of electric furnace, spectroscopic study, **72**, **9**—Of sulphur (see Sulphur)—Oxidising and decolourising properties, **62**, **203**—Positions in electric arc lamps, **44**, **286**
- Carbonaceous dust with metallic iron observed in snow, **28**, **141**—Minerals (see Minerals)—Shale (see Shale)—Substance in grey cast-iron, composition, **5**, **87**
- Carbonado variety of diamond, parallel striae presented by surface of, **36**, **10**
- Carbonaphtholic acid (see Acid)
- Carbonate, ammonio-silver (see Ammonio-silver)—And soda and barium sulphate, reaction under pressure, **52**, **273**—Bi- (see Bicarbonate)—Chloro- (see Chlorocarbonate)—Chromous, crystalline ammoniacal, **73**, **142**—Ethylecano- (see Ethylecanocarbonate)—Ethyl methylcampho- (see Ethyl)—Hydro- (see Hydrocarbonate)—Mono- (see Monocarbonate)—Of alkaline (see Alkaline)—Of alumina (see Alumina)—Of ammonia (see Ammonia)—Of ammonium (see Ammonium)—Of barium (see Barium)—Of baryta (see Baryta)—Of bismuth (see Bismuth)—Of cesium (see Cesium)—Of Calcium (see Calcium)—Of chromium (see Chromium)—Of cobalt (see Cobalt)—Of copper (see Copper)—Of glucina (see Glucina)—Of guanidin (see Guanidin)—Of iron (see Iron)—Of lead (see Lead)—Of lime (see Lime)—Of lithium (see Lithium)—Of magnesia (see Magnesia)—Of Magnesium (see Magnesium)—Of Menthol (see Menthol)—Of nickel (see Nickel)—Of phenol (see Phenol)—Of phenyl (see Phenyl)—Of potassium (see Potassium)—Of propylpyrocatechin (see Propylpyrocatechin)—Of rubidium (see Rubidium)—Of silver (see Silver)—Of soda (see Soda)—Of sodium (see Sodium)—Of uranium (see Uranium)—Orthocresol (see Orthocresol)—Potassic, action on isobutyl aldehyd, **40**, **32**—Silico- (see Silico-carbonate)—Sodic, precipitation of alums by, **45**, **230**—Sodium potassium (see Sodium)
- Carbonated cupric liquid (see Cupric)—Ferruginous waters (see Waters)
- Carbonates, **41**, **80**, **197**—Action on chromous acetate, **78**, **30**—Action on tetra-thionates, **97**, **144**—Alkaline-earthly (see Alkaline-earthly)—Alkaline trisulpho- (see Alkaline trisulpho-carbonates)—Alkalino-cupric, **85**, **276**—Analysis, apparatus for, **21**, **104**—Anhydrous, saponification of fats by, **2**, **310**—Bi- (see Bicarbonates)—Chloro- (see Chlorocarbonates)—Crystalline, preparing, **46**, **67**; **54**, **309**; **55**, **184**—Cupri- (see Cupri-carbonates)—Determination, **74**, **116**, **197**—Determining small quantities, **84**, **299**—Double, experiments with, **69**, **120**—Earthy, action of sulphur on, **30**, **208**—Estimation, **5**, **311**; **70**, **166**, **187**, **209**, **232**, **245**, **257**; **71**, **93**—Estimation in presence of nitrites, sulphides, or sulphites by means of potassium dichromate, **99**, **249**—Hydro- (see Hydrocarbonates)—In living plants, **53**, **109**—In water, estimation, **19**, **190**—Insoluble, decomposition by sulphuretted hydrogen, **34**, **51**—Manufacture, **35**, **188**, **208**—Metallic, decomposition by heat, **27**, **211**; **28**, **44**—Mineral, qualitative and quantitative, **61**, **260**—Mineral, speed of dissolution, **61**, **265**—Mineralogical formula, **21**, **70**—Of alkali (see Alkali)—Of alkaline (see Alkaline)—Of alkaline earths (see Alkaline earths)—Of alkalis (see Alkalis)—Of bismuth (see Bismuth)—Of calcium (see Calcium)—Of cerium (see Cerium)—Of copper (see Copper)—Of dioxybenzenes (see Dioxybenzenes)—Of magnesia (see Magnesia)—Of manganese (see Manganese)—Of sodium (see Sodium)—Per- (see Percarbonates)—Phenolic, action of hydrazines on, **81**, **276**—Phenolic, action of secondary bases on, **90**, **57**—Studies of, **100**, **32**—Sulpho- (see Sulphocarbonates)
- Carbonatopentamine cobaltic salts (see Salts)
- Carbonelli, C. E., Value and variations of chemical valencies, **65**, **244**
- Carbonic acid (see Acid)—Acid ether (see Ether)—Acid gas (see Gas)—Anhydride (see Anhydride)—Disulphide (see Disulphide)—Esters (see Esters)—Ether (see Ether)—Ether of borneol (see Borneol)—Ethers (see Ethers)—Hydrate (see Hydrate)—Oxide (see Oxide)—Oxide gas (see Gas)—Oxychloride (see Oxychloride)—Oxysulphide (see Oxysulphide)—Sulphide (see Sulphide)—Sulphides (see Sulphides)
- Carbonic-oxide-hæmoglobin, behaviour in magnetic field, **84**, **85**
- Carboniferous compounds, oxidation, **33**, **139**—Flora (see Flora)—Substances, determination of sulphur in, **46**, **13**
- Carbonisation of vegetable matter mixed with wool, **37**, **276**—Of wood (see Wood)
- Carbonised wood (see Wood)
- Carbonising, **46**, **48**—Wood (see Wood)
- Carbonium salts, structure of, **96**, **27**
- Carbonophosphates, role in nature of dissociation of, **99**, **156**
- Carbon-unsic acid (see Acid)
- Carbonyl, **66**, **185**—Ferro- (see Ferrocabonyl)—Group, chemical reactivity of, **93**, **77**—Group, compounds containing, action of halogens on, **88**, **9**—Group, hydrates of compounds containing, **94**, **60**—Group in aldehydes, ketones, etc., quantitative determination, **93**, **83**—Of iron (see Iron)—Of nickel (see Nickel)
- Carbonyl chloride, action of, **73**, **83**—Action as an agent for arresting isomeric change, **96**, **290**—Action of metallic thiocyanates upon, **86**, **303**—Sulpho- (see Sulphocarbonyl chloride)
- Carbonylic sulphide (see Sulphide)
- Carbonyls, **30**, **284**—Of iron (see Iron)
- Carbonylferrocyanide of potassium (see Potassium)
- Carbonylferrocyanides, estimation and separation of ferrocyanides from, **81**, **18**
- Carbonylferrocyanhydric acid (see Acid)
- Carbonylferrohydrocyanic acid (see Acid)
- Carboxyprotitric acid (see Acid)
- Carborundum, **68**, **169**, **179**; **69**, **24**, **157**—Production and use, **75**, **288**
- Carbo-silicated compounds, **45**, **244**
- Carbostyryl and alkyl derivatives, absorption spectra, **79**, **101**—Formation, **50**, **116**—Hydro- (see Hydro-carbo-styryl)
- Carbotriphenyltri-amine, constitution, **35**, **124**
- Carbotriethoxyhexabromide, behaviour when heated, **49**, **116**
- Carboxyaconitate methyl di- (see Methyl)
- Carboxyamyl-thiocarbimides and derivatives, **83**, **284**
- Carboxycyanide, preparation, **24**, **313**
- Carboxygen illumination, **22**, **107**; **23**, **287**
- Carboxyglutamate of ethyl (see Ethyl)
- Carboxyglutarate, ethyl bromo- (see Ethyl)—Ethyl sodio- (see Ethyl)—Of ethyl (see Ethyl)
- Carboxyl group, constitution, **99**, **82**—Group, influence on poison action of aromatic compounds, **66**, **168**—Group, instability of, **66**, **98**—Group, molecular transpositions and migration in the dehydration of hydroxy acids, **92**, **260**
- Carboxyl-acid-amide, naphthalin- (see Naphthalin-carboxyl-acid-amide)
- Carboxylate, dimethylpropanetetracarboxylate- (see Dimethylpropanetetracarboxylate)—Ethyl dibromobutanetetracarboxylate- (see Ethyl dibromobutanetetracarboxylate)—Ethyl dibromopropanetetracarboxylate- (see Ethyl)—Ethyl dimethylbutanetri- (see Ethyl)—Ethyl disodioethanetetracarboxylate- (see Ethyl)—Ethyl 6-methyl-2-pyrone-3:5-di- (see Ethyl)—Ethyl pentanetetracarboxylate- (see Ethyl)—Ethyl pentanetetracarboxylate- (see Ethyl)—Ethyl propanetetracarboxylate- (see Ethyl)—Methyl-1:1-dimethylcyclopentan-3:4-dione-2:5-di- (see Methyl-1:1-dimethylcyclopentan-3:4-dione-2:5-dicarboxylate)—Triethyl orcintri- (see Triethyl)
- Carboxylic acids (see Acids)
- Carboxymethyl-thiocarbimides and derivatives, **83**, **284**
- Carbuncular and septicemic affections, causes of death in, **39**, **136**—Disease, **35**, **231**—Disease, etiology of, **42**, **235**—Germs, persistent vitality of, **43**, **04**
- Carburation of gas (see Gas)—Of iron (see Iron)
- Carburets, iron, cause of "rochage" of, **21**, **298**—Of terebic series, **27**, **153**—Polypyropylenic, **27**, **40**
- Carburetted air (see Air)—Gases (see Gases)—Hydrogen (see Hydrogen)—Iron (see Iron)—Water-gas (see Water-gas)
- Carbylamide, ethyl (see Ethyl)
- Carbylamine, ethyl (see Ethylcarbylamine)

- Ceriferous Hainstadt clays (see Clays)
- Cerine and frideldine, 80, 47
- Cerite, 3, 226; 4, 72, 87; 14, 141; 84, 136—And yttria, absorption spectra of metals forming part of groups of, 42, 198—Didymium of, 38, 253—Earths (see Earths)—Group, absorption spectra of metals forming part of, 42, 198—Hydrofluoro (see Hydrofluorite)—Metals, 11, 193; 23, 239; 28, 45; 46, 249; 47, 155, 175; 58, 36; 71, 188, 260, 288; 77, 75—Metals and gadolinite, 14, 141—Oxides in, 69, 9, 17, 46, 55, 66—Preparation of sulphides, chlorides, and bromides of metals from, 83, 23—Yttrio (see Yttrio)
- Cerium, 17, 165; 18, 30; 40, 35; 64, 64; 71, 283; 76, 320; 77, 27; 83, 123; 89, 174; 97, 206—Aluminium and magnesium ferrocyanides, double and triple with potassium and ammonium, 100, 31—And didymium, separation, 9, 301; 16, 259; 69, 54—And didymium and lanthanum, diffusion, 38, 164—And didymium and lanthanum, distribution, 40, 90—And lanthanum, separation, 9, 301; 16, 259; 69, 54—And lanthanum sulphides, 52, 35—And other rare earths in rocks, determination, 99, 96—And phenylhydrazine, 89, 64—And thorium, separation, 50, 201; 51, 141; 86, 218, 229, 242—And thorium, separation by metanitrobenzoic acid, 90, 196, 201—And yttrium groups, earths of, 63, 159, 172, 180; 66, 307, 320—And yttrium groups, separating oxides of, 68, 179—Atomic weight, 50, 251, 271, 284; 54, 229; 55, 261; 74, 318; 76, 23, 137, 153; 77, 45; 93, 55; 99, 60; 100, 278—Bases, salts of, 20, 118—Behaviour towards organic bases, 89, 15—British mineral containing, 12, 121—Chemistry of, 70, 200, 215, 227—Compound nature of, 77, 160—Compounds, 22, 130; 30, 176; 45, 40—
- Determination, 41, 231—Dissolved in alkaline carbonates, peroxidation of, 79, 105—Estimation, 10, 208; 79, 95; 83, 264—Estimation in presence of other rare earths, 98, 106—Estimation, volumetric, 81, 30, 41—Free from didymium, preparation, atomic weight, and determination, 34, 94—Group, bromates of, and yttrium, 100, 85—Group, double sulphates of, 21, 209—Group, earth of, 38, 100, 211—Group, metals of, 65, 205, 219, 233, 243, 255—Group of rare metals, combination of, 93, 122—In coal-measures, 42, 258—In Hainstadt clays, 54, 7—In lanthanum containing didymium and praseodymium, 88, 24—Metals, atomic weight, 27, 117; 32, 176—Metals, salts of, 21, 264—Place in system of elementary bodies, 23, 288—Purification, 75, 292—Salt of chinoline, 58, 199—Salts, 95, 139—Salts, action of fluosilicic acid on, 30, 177—Salts, photographic properties of, 67, 188—Salts, preparation of pure, 100, 64—Separation, 10, 208, 239; 79, 311; 93, 74
- Cerium binoxide, preparation of pure, and reduction by hydrogen, 92, 179
- Cerium bromide, 24, 120
- Cerium carbonates and glucose, oxidation, 85, 263
- Cerium chloride, anhydrous, 52, 265
- Cerium molybdate, 53, 311
- Cerium nitrate and thorium nitrate, double tetratomic, 83, 252
- Cerium oxalate, 2, 27; 16, 78
- Cerium oxide, action of hydrogen peroxide on, 51, 148—Action of peroxide of hydrogen and hypochlorite of sodium on, 88, 249—And oxide of lanthanum, separation, 2, 196—And thorium oxide, separation, 77, 245, 254—Colour of, 100, 64—Crystallisation, 84, 96—In diluvial clay, 53, 136—Neutralisation heat, 29, 155—Preparation, 47, 199—Preparation of pure, 84, 84—Reaction for, 68, 8
- Cerium oxides, 1, 130; 2, 251—Colour of, 54, 229
- Cerium oxyacarbide, 85, 263
- Cerium peroxide, 88, 185—Double carbonate of potassium and, 79, 263
- Cerium phosphate containing fluorine, 29, 133; 30, 21
- Cerium protoxide, salts of, 2, 203
- Cerium sesquioxide, 95, 252
- Cerium silicide, 86, 95
- Cerium sulphate, acid, 61, 109—Isomorphism, 5, 139—Solutions, densities of, 57, 90
- Cerium sulphide, 52, 35
- Cerium sulphides, 98, 280
- Cerium-thorium mixtures, 96, 24
- Cerium tungstates and chloro tungstates, 53, 228
- Cerium-yttrium group of oxides, separation of thorium from, 92, 1, 30

Bibliography (*see* Bibliography)—Calculations (*see* Calculations)—Calculus (*see* Calculus)—Carbon (*see* Carbon)—Chair at South Kensington, **69**, 247—Chair, foundation of a new, **40**, 241—Change, conditions of, **63**, 3; **67**, 286—Change, determination of rate by measurement of gases evolved, **94**, 263; **97**, 93; **99**, 19, 90—Change, gradual, **58**, 308—Change in aqueous solutions, rate of, **59**, 148—Change, influence of moisture on, **99**, 126—Change, nature of, **53**, 253; **99**, 28, 37—Change, observation of course of, **13**, 293—Change, rate of, 171—Change, time needed for completion, **22**, 193—Change under great pressure, **61**, 188—Change, use of electric light to influence, **53**, 177—Changes induced by ultra-violet light, **94**, 77—Changes which are reversible, kinetics of, **91**, 195—Classifications and symbols in antiquity, etc., **71**, 12—Club, co-operative, **16**, 101, 128—Combination, **84**, 9; **91**, 256—Combination and ionisation, **89**, 294—Combination, influence of moisture on, **70**, 147—Combination, laws of, **54**, 285—Combination of wet and dry methods, **64**, 174, 185, 192—Combination, origin of, **83**, 35, 107—Combinations, **5**, 97—Combinations, attempts to make argon enter into, **71**, 151—Combinations, causes and nature of, **21**, 287—Combinations, desulphuration, **19**, 69—Combinations, heat set in motion by, **17**, 120—Combinations, influence of temperature on heat of, **53**, 127—Combinations, relation between the weights, volumes, and specific gravities of the component elements and those of the compounds in, **30**, 199—Compound obtained with a gas battery and effluve apparatus, **50**, 66—Compounds, changes of colour produced in, by heat, **24**, 188—Compounds, colour of, **50**, 193—Compounds, crystal form and atom composition, **53**, 3, 16—Compounds, dissociation, **45**, 31, 43—Compounds, electrolysis, **53**, 110—Compounds, magnetic rotary polarisation, **49**, 284—Compounds, refractive power, **52**, 94—Compounds, specific heat of aqueous solutions of, **22**, 154—Compounds, voltaic energy of dissolved, **59**, 159—Constitution, **94**, 293—Constitution and absorption spectra, relations between, **93**, 77, 80, 152, 240, 263; **95**, 306; **96**, 28; **98**, 22, 254, 266, 278, 315—Constitution and dielectric constant, relation between, **97**, 262—Constitution and optical properties of the aromatic α - and γ -diketones, relation between, **99**, 82—Constitution and physical properties, relations between, **36**, 110—Constitution and physiological action, relation between, in substituted aminoalkyl esters, **98**, 254—Constitution and viscosity, relation between, **96**, 231; **98**, 256, 266—**100**, 241—Constitution, law of colour in relation to, **65**, 203—Constitution, polariscope in relation to, **69**, 1, 18, 28, 40—Constitution, relation of crystal structure to, **90**, 142—Crystallography (*see* Crystallography)—Curves, illustration of, **41**, 191—Decomposition (*see* Decomposition)—Decompositions (*see* Decompositions)—Designations, **57**, 142—Dialysis (*see* Dialysis)—Discoveries during last two years, **12**, 210, 271, 284—Discussion Association, **5**, 138—Dissociation (*see* Dissociation)—Dreams, **15**, 162—Dynamics (*see* Dynamics)—Education (*see* Education)—Electro- (*see* Electro-chemical)—Element (*see* Element)—Elements (*see* Elements)—Energy and luminous energy, relations between, **78**, 266; **79**, 34—Energy, transformation into electrical energy, **78**, 180, 191, 206—Engineering (*see* Engineering)—Equations (*see* Equations)—Equi-

bria (*see* Equilibria)—Equilibrium (*see* Equilibrium)—Equivalence, **40**, 15—Equivalents, **72**, 245—Equivalents and absorbent powers of bodies for heat, relation between, **35**, 95—Equivalents and densities of bodies, relations between, **9**, 168—Equivalents and molecular considerations, statistics of volumes of, **27**, 257—Equivalents compared with corpuscular elements, **36**, 99—Equivalents, volume of, **22**, 107—Evidence, curiosities of, **5**, 182, 238—Examiner to the Government of Burma, notes from laboratory of, **54**, 19—Exchange club, **2**, 226, 262—Experiment, **66**, 271—Experiments, sun as source of heat in, **100**, 208—Facts and changes and atomic hypothesis, relations between, **25**, 67—Fermentation (*see* Fermentation)—Ferments (*see* Ferments)—Force (*see* Force)—Formula (*see* Formula)—Formule (*see* Formule)—Fractionation (*see* Fractionation)—Geology (*see* Geology)—Handicraft, **85**, 312—Harmonica (*see* Harmonica)—Industries (*see* Industries)—Industry (*see* Industry)—Industry, Society of (*see* Society)—Infinity, **19**, 227—Institute of Bonn University (*see* Bonn)—Institute of Geneva (*see* Geneva)—Institute of Griefswald (*see* Griefswald)—Instruction in Germany, **69**, 182—Instruction in the United States, **69**, 301—Integration, **56**, 136, 142—International banquet, **5**, 350—Inventions, field for, **2**, 264—Jottings, **39**, 245—Jurisprudence, **28**, 226—Jurisprudence, experiences in, **29**, 27—Labels (*see* Labels)—Laboratories, **18**, 215, 236; **58**, 149; **62**, 153—Laboratories, what is most needed in, **46**, 188—Laboratory, apparatus for, **35**, 220—Laboratory at Cambridge (*see* Cambridge)—Laboratory at Wiesbaden (*see* Wiesbaden)—Laboratory, ideal, **74**, 312—Laboratory labels (*see* Labels)—Laboratory of the brewer, **74**, 50—Laboratory of Tübingen (*see* Tübingen)—Laboratory, practical use in, of electric arc obtained from low potential alternating current, **74**, 92—Lectures, **84**, 122—Lectures at London hospitals, **48**, 134—**50**, 142; **58**, 148; Literature, **46**, 115, 140, 151, 166; **57**, 142—Literature, abstracting, **90**, 283—Literature, indexing, **50**, 253; **52**, 209; **54**, 175, 183; **56**, 265, 272; **58**, 200; **60**, 224; **63**, 216; **64**, 280; **66**, 145; **68**, 192; **69**, 176; **70**, 116; **72**, 106; **74**, 111; **76**, 75; **78**, 99; **80**, 93; **82**, 27; **84**, 203, 210; **85**, 266; **86**, 13; **88**, 32—Manipulation, **64**, 146—Manipulations, electricity in, **61**, 4, 24—Manuals, Italian, **26**, 203—Manufacturers and their critics, **70**, 110—Manufacturers and their workmen, **61**, 156—Manufactures, German pre-eminence in, **70**, 209—Manufactures, metallurgical and chemical, Irish, **11**, 36—Manufactures of America, **77**, 222—Manufactures of South Lancashire, **4**, 156—Manufactures of South of France, **41**, 273—Manufactures on the Tyne, **8**, 124—Manure (*see* Manure)—Manures (*see* Manures)—Mass of elements, relations between, **42**, 47, 60—Matter, absorption by roots, **77**, 11—Matter, stability in sonorous vibrations, **41**, 171—Measurement, appearance as a standard of, **2**, 178—Metallurgical and Mining Society of South Africa (*see* Africa, South)—Mineralogico- (*see* Mineralogico-chemical)—Names in botany, **84**, 183—Names, report on varieties of, **53**, 102, 114, 126, 140, 150—News, proposed general index, **27**, 33—Nomenclature, **1**, 141, 154, 178, 214; **4**, 281, 317, 332, 338; **5**, 27, 41; **10**, 303; **11**, 42, 43; **12**, 1, 17, 182; **19**, 119, 156; **20**, 204; **21**, 84, 239; **22**, 48; **32**, 248, 270; **40**, 276, 277; **47**, 15, 33; **85**, 118—Nomenclature, fantastic, **57**, 141—Nomenclature,

- agriculture, 23, 73, 108, 273—And courtesy in Germany, 46, 112, 148—And industry, 100, 232—And its founders, 12, 252—And mineralogy, 62, 45, 58—And mineralogy, relation between, 22, 263; 23, 64—And morphology of natural and artificial ulmic compounds, 49, 104—And painting, 8, 171—And Pharmacy, Central School, 66, 137; 68, 125; 70, 136; 74, 137—And Pharmacy, City School of (*see* City)—And Pharmacy Congress, 91, 130—And pharmacy, schools of, 62, 152; 72, 125, 126—And Pharmacy, Westminster College of, 74, 137—And photographic exhibition, 95, 266—And physics, approximations between, 54, 61—And physics, handbook on, 90, 24—And physiology, 14, 130—And therapeutics, 26, 2—Animal (*see* Animal)—Application of Avogadro's theorem to, 21, 47—Application of Blondot rays to, 89, 234—Application of fundamental laws of physics to, 43, 206—Application of hydrogen peroxide in, 57, 70—Application of metallic hydrogen in, 54, 74—Application of microscope to special branches of, 37, 150—Application of photography to solution of problems in, 94, 129—Applied, evolution in, 99, 277—Applied, imperial aspects of, 94, 67, 75—Applied, International Congress of, 68, 302; 70, 6; 76, 322; 77, 24, 214; 85, 159; 87, 103; 93, 6; 184; 95, 34; 98, 24; 99, 204, 265, 277, 288—Applied, problems of, 95, 151, 159, 172—As known to the ancients, history of, 57, 232, 242—At British Association, 86, 125—At Cambridge, 26, 250—At College of Physicians, 9, 228—At Conjoint Board, 69, 60, 72, 83, 95, 108—At Custom House, 9, 132—At International Exhibition, 5, 239, 286, 301, 318—At the 44th meeting of German Natural Philosophers and Physicists, 24, 218—At the 46th meeting of German Naturalists and Physicians at Wiesbaden, 29, 102—At Oxford, 12, 84—At Paris Exhibition, 40, 215—Attempt to apply one of Newton's principles, 60, 1, 15, 30—Bibliography of history of, 32, 36, 56, 68—Biological, and mechanics, 74, 97—Biological, examination in, 93, 302; 97, 96, 108—Biological, Gautier's work on, 64, 260—Blowpipe (*see* Blowpipe)—British, position at dawn of twentieth century, 84, 137—Cahours prize in, 91, 32—Capillary (*see* Capillary)—Celestial, from time of Newton, 45, 74, 82—Centennial of, 30, 17, 31—Chair at Berlin, 8, 214—Chair at Edinburgh (*see* Edinburgh)—Chair at King's College, 56, 260—Chair at Royal College of Science, 69, 129—Chair, St. Bartholomew's Hospital, 22, 299—Chinese (*see* Chinese)—City School of, 58, 148—Classification, 80, 1—Coefficient of mineral condensation in, 62, 302, 317—College of (*see* College)—Colloidal, 98, 152, 167, 175—Commercial, principles of, 38, 89, 111, 139, 163—Cultivation of, 39, 48, 57—Demonstration of, King's College, 18, 34—Electro- (*see* Electro-chemistry)—Evening instruction in, 9, 167—Evolution in last twenty years, 80, 197, 227, 235—Examinations in, 23, 111—Excise, 2, 161, 171; 10, 168; 14, 35—Extraordinary, 33, 41—Female students of, 21, 165—Forensic, 74, 110—Forensic, lectures on, 98, 241—Forensic, of vegetable alkaloids, 179—Foundations of, 58, 193, 204, 212—General, outlines of, 63, 9—Gmelin's, 18, 284—High and low, 23, 202—Higher researches, 70, 281—History of, 32, 144; 35, 76; 44, 104—History of, Berthelot's contribution to, 73, 214—History of, new work on, 21, 24—History of, outlines of a bibliography of, 32, 56—History of the word, 42, 68, 244—Hysterical, 77, 3, 16—Ideal, 15, 269—Importance of study of, 4, 7, 34—In Australia, 39, 207—In examinations of Department of Science and Art, 18, 205; 19, 15—In Finland, 71, 270—In France, 22, 191—In France, encouragement of, 16, 281—In India, 26, 195, 230—In Italy, 26, 105—In living cell, 70, 49—In relation to brewing and malt-liquor, 100, 195—In relation to cosmetics, 2, 287—In schools, 15, 308—In service of public health, 52, 222—In University of Virginia, 42, 180, 193—Industrial, 48, 50, 67—Industrial, progress of, 28, 249—Influence of quantitative method in the development of scientific, 5, 206—Inorganic, 3, 69, 118, 132, 190, 185, 201, 215, 291, 377; 4, 51, 65, 93—Inorganic, examination questions on, 93, 93—Inorganic, Journal of, 64, 237; 65, 85—Inorganic, Sexton's, 59, 48, 72—Inorganic, systematic of, 27, 117—Inorganic, teaching, 68, 223, 237, 247, 260—Inorganic, twentieth century neglect of, 87, 217—Law of volumes in, 54, 206—Mathematics of, 2, 33, 71—Mechanical, verification of a law of, 84, 11—Medical, blunder in, 70, 99, 120—Medical, laboratory for, 21, 191—Medico-legal, 17, 263—Meta- (*see* Meta-chemistry)—Mineral, 47, 169, 202—Mineral, task and scope of, 21, 180—Mineralogical (*see* Mineralogical)—Modern applications of, 1, 17—Modern, doctrines of, 20, 312—Modern methods, 24, 229—Modern, relation to metallurgy, 26, 107, 157—National value of, 74, 174—New works on, 22, 166—Nobel prize for, 90, 300—Novelist's, 71, 64—Odling's, 9, 300—Of agriculture (*see* Agriculture)—Of bile (*see* Bile)—Of brewing (*see* Brewing)—Of copper (*see* Copper)—Of future, 15, 295—Of gall (*see* Gall)—Of hay (*see* Hay)—Of indigo (*see* Indigo)—Of mercury (*see* Mercury)—Of Middle Ages, 67, 288—Of rare earths (*see* Earths)—Of United States (*see* United States)—Old and new, lectures on, 94, 1, 15, 25, 37, 57, 70—Optical, 54, 323—Organic, 6, 206; 13, 14; 25, 71, 287—Organic, applications of electrolysis to, 76, 95—Organic, difference of reaction in, 59, 313—Organic, elements of, 24, 160—Organic, generic reactions in, 20, 49—Organic, handbook of industrial, 64, 178—Organic, in the Royal Institution, 12, 68—Organic, nomenclature of, 69, 241—Organic, notices of foreign researches in, 48, 182, 214—Organic, present problems of, 90, 212, 228—Organic, professorship of, 12, 110—Organic, reactions in, and their ultimate bearings, 35, 37—Organic, seven fundamental types of, 39, 37, 47, 59—Organic, Sexton's, 59, 48, 72—Organic, use of ammonium metals in, 91, 222, 260—Organic, use of magnesium amalgam in, 88, 281—Origin of the word, 40, 309—Part played by, in perfumery, 76, 150—Pathological, 33, 221—Phenomena in, 25, 302—Photo- (*see* Photochemistry)—Phraseology employed in teaching fundamental facts in, 28, 25—Physical, methods and researches of, 45, 13—Physical, of the blood, 48, 226—Physical, progress in, 79, 138—Physical, what it has done for chemistry, 89, 90, 105—Physiological, at St. George's Hospital, 24, 196, 219, 233, 249, 259, 271, 292; 25, 26, 49, 77, 89, 103, 110, 126, 138—Physiological, discoveries in, 12, 271—Picture, 8, 7, 15, 29, 41—Popular, 29, 151; 81, 203—Popular lectures on, 63, 25—Position in medical curriculum of the University of London, 89, 65—Practical, 78, 250—Practical, evening instruction in, 11, 201—Practical, in University of Virginia, 25, 258, 270; 34, 147, 168, 179, 190; 44, 189, 203, 207; 46, 194, 204, 215; 50, 207, 218—Private teachers of, 8, 156; 10, 138; 12, 142; 28, 134—Problem in, 23, 311—Professor of, at Aberdeen University, 62, 237—Professor of, to the Royal Academy, 9, 257—Professorship at Royal School of Mines, 51, 298—Professorship at University of Cambridge, 4, 279—Progress in, 94, 53—Progress in Great Britain and Ireland during the 19th century, 81, 222, 233, 246, 255—Progress of, 67, 271, 281—Pure, annual review of, 62, 110; 76, 107—Pure, retrospect of progress in first quarter of 1880, 43, 197—Russian, 24, 300—Scholarship in, at Owens College, 34, 196—Schools of (*see* Schools)—Service, 60, 160—Solar, physical basis of, 4, 61—South London School of, 28, 134; 45, 198; 46, 48—Spectro- (*see* Spectrochemistry)—Stereo- (*see* Stereochemistry)—Study of, 26, 131—Synthetical, in its relation to biology, 96, 207, 212—Teaching, 75, 166, 190—Teaching, report on, 58, 157, 167; Chloral alcoholate, 36, 61; 43, 232; 44, 251—Acetyl (*see* Acetyl-chloralalcoholate)

Chloral ammonia, 78, 46—Action of aldehyds on, 40, 156—And aldehyde ammonia, 35, 84

Chloral ammonium, constitution, 35, 264—Derivative of, 40, 90

Chloral bornylates, 63, 83

Chloral cyanhydrate, 25, 131—Butyl (*see* Butyl-chloralcyanhydrate)

Chloral-cyanide, tri- (*see* Trichloral-cyanide)

Chloral cyanide-cyanate, 33, 210

Chloraldehyde, di- (*see* Dichloraldehyde)

Chloral ethylalcoholate, action of pentachloride of phosphorus on, 23, 275—Vapour-densities, 54, 10

Chloral hydrate, 21, 76; 23, 106, 113, 288, 300; 24, 120, 130; 40, 99, 108, 143; 51, 178; 74, 95—Action of metals on, 51, 37—Action of oxidising agents on, 52, 24, 272—Act on camphor, 36, 81—Action on phenylhydrazine, 76, 35—And bichromate of potash, oxidising value, 41, 21—And camphor, compound, 43, 117—And hydrogen phosphide, compound of, 53, 275—And phenol, molecular combination, 52, 189—And sulphide of ammonium, reaction, 25, 37—Anhydrous, 36, 54—Butyl (*see* Butyl-chloralhydrate)

Chloralhydrate, chemical nature, 22, 45—Combination heat of, 41, 159, 171—Condensation, 54, 109—Condensation with orcinol, 77, 207—Crystalline shape, 26, 94—Crystals, deliquescence in, 75, 45—Decomposition by caustic soda, 95, 210—Decomposition by sodium hydroxide and by certain salts, 90, 253—Detection, 46, 13—Dissociation, 39, 104—Dissociation-tension of, 41, 70—Heat

of formation of gaseous, 41, 47, 79—

In animal fluids, detection, 55, 260—

In milk, detection, 51, 37—Magnetic

rotation produced by, 55, 269—Molecular weight at temperature of ebullition, 84, 184—Poisoning with, 23, 119—Preparation and properties, 20, 285; 21, 22, 46, 167, 227; 25, 257—

Purification, 22, 23—Reactions, 55, 249—Solutions, anti-fermentescible and antiseptic properties of, 29, 165—

Splitting into two by joint action of glycerine and heat, 26, 300—Testing, 21, 179—Transformation into chloroform within the animal body, 20, 249; 21, 82—Trichloracetic acid from, 25, 214—Vapour of, 36, 54—

With ammonium sulphide, 76, 41

Chloral hydrates, polymorphism, 74, 95

Chloral sulphhydrate, 25, 285; 26, 107

Chlorallic acids (*see* Acids)

Chloralide, reduction, 35, 141

Chloralose, 68, 294; 69, 85, 181, 313; 73, 281

Chloralum, 22, 165; 23, 20; 25, 143—As a disinfectant, 23, 44, 69

Chloral-uric acid (*see* Acid)

Chloraluminium used at cloth works, 42, 210

Chloramine, ethylid- (*see* Ethyldichloramine)—Phenylacetyl- (*see* Phenylacetylchloramine)

Chloramines, 67, 228

Chloraminobenzene, acetyl- (*see* Acetylchloraminobenzene)

Chloranhydrides of sulphonic acids, formation of sulphonic acid in fatty series from, 35, 241

Chloranil, 20, 259—Action of potassium iodide on, 91, 223

Chloranilic acid (*see* Acid)

Chloranilines, 39, 163—Di- (*see* Dichloranilines)

Chloranisidines, 81, 226

Chloranisol, 81, 226

Chlorate, chlorides, and nitrates, detection of alkaline perchlorates in presence of, 74, 38—Hydro- (*see* Hydrochlorate)—In bleaching chlorides, determining, 44, 290—Nitrosyl per- (*see* Nitrosyl)—Of alumina (*see* Alumina)—Of barium (*see* Barium)—Of baryta (*see* Baryta)—Of calcium (*see* Calcium)—Of copper (*see* Copper)—Of lead (*see* Lead)—Of lime (*see* Lime)—Of potash (*see* Potassium)—Of potash, aluminium (*see* Aluminium)—Of potassium (*see* Potassium)—Of quinine (*see* Quinine)—Of silver (*see* Silver)—Of soda (*see* Soda)—Of sodium (*see* Sodium)—Of thallium (*see* Thallium)—Per- (*see* Perchlorate)—Potassic, and manganic peroxide, liberation of chlorine during heating of a mixture of, 74, 95—Potassic, decomposition, 59, 63—Potassic, decomposition by heat, 53, 145—Potassic, equations expressing the decomposition of, 56, 277—Potassic, use in qualitative blowpipe experiments, 16, 105—Silver per- (*see* Silver)—Trimethylamine hydro- (*see* Trimethylamine)

Chlorates, action of oxalic acid on, 40, 168—Action of salts of chrome on salts of aniline in presence of, 38, 287—Alkaline earthy (*see* Alkaline)—And chlorides, and hypochlorites, analysis of a mixture, 73, 157, 169—Decomposition, 80, 8; 81, 201; 82, 300; 83, 295; 86, 9—Detection, 53, 25; 64, 165—Diphenylamine as reagent for, 91, 155—Electrolysis of, 89, 106—Electrolytic production, 79, 110—Estimation, 64, 318; 68, 216; 89, 95—Estimation of halogens in, 92, 58—Estimation, use of ferrous sulphate in, 90, 195—Formation, 81, 19—Hydro- (*see* Hydrochlorates)—Hypo- (*see* Hypochlorates)—In solution, detecting, 50, 235—Metallic, hydrated, 71, 13—Of alkaline (*see* Alkaline)—Per- (*see* Perchlorates)—Preparation by aid of chlorate of alumina, 27, 70—Productions by electrolysis from solutions of

chloride of calcium, 79, 86—Reduction, 56, 277—Transformation of hypochlorites into, 88, 149

Chlorated acetyl (*see* Acetyl)—Benzene (*see* Benzene)—Ethers (*see* Ethers)—

Explosives (*see* Explosives)—Hydrobenzamide (*see* Hydrobenzamide)—

Propylen (*see* Propylen)

Chloration of toluol (*see* Toluol)

Chloraurates of organic bases with abnormal compositions, 83, 144

Chlorazide, N₃Cl, 99, 59

Chlorazophenol, di- (*see* Dichlorazophenol)

Chlorbenzene, mono- (*see* Monochlorbenzene)

Chlorbenzil, 18, 151

Chlorbenzols, penta- (*see* Pentachlorbenzols)

Chlorbenzoyl, action on glycochol silver, 44, 304

Chlorbenzylchloride, para- (*see* Parachlorbenzylchloride)

Chlorbrombenzene, 77, 103

Chlorbromine compounds, 22, 84

Chlorcitramalic acid (*see* Acid)

Chloreumarine, 21, 275

Chlorcyanhydrogen, 22, 178

Chlordinitrobenzene, action on benzoate of potassium and on acetamide, 82, 160

Chlordinitrophenol, mono- (*see* Monochlordinitrophenol)

Chlordiacrylic acid (*see* Acid)

Chlorethane, dibromotetra (*see* Dibromotetrachlorethane)—Dithymyltri- (*see* Dithymyltrichlorethane)—Hexa- (*see* Hexachlorethane)—Penta- (*see* Pentachlorethane)—Per- (*see* Perchlorethane)

Chlorether, tetra- (*see* Tetrachlorether)

Chlorethyl, action on tetrachlore sulphuric acid, 27, 394

Chlorethylacetamide, mono- (*see* Monochlorethylacetamide)

Chlorethylsulphuric acid (*see* Acid)

β-Chlorethylketones, 95, 155—Acyclic, 93, 88

Chlorethylenchloride, mono- (*see* Monochlorethylenchloride)

Chlorfulmaric acid (*see* Acid)

Chlorfumaryl ester (*see* Ester)

Chlorgualcol, tri- (*see* Trichlorgualcol)

Chlorglycid, di- (*see* Dichlorglycid)

Chlorhydrate of aniline (*see* Aniline)—Of cyanhydric acid, 17, 143—Of ethylen (*see* Ethylen)—Of hydroxylamine (*see* Hydroxylamine)—Of narcaine (*see* Narceine)—Of rosaniline (*see* Rosaniline)

Chlorhydrates of allylene (*see* Allylene)—Of hydroxylamine (*see* Hydroxylamine)

Chlorhydric acid (*see* Acid)—Glycide (*see* Glycide)—Glycol (*see* Glycol)

Chlorhydride of cyanogen (*see* Cyanogen)

Chlorhydrine, aceto- (*see* Aceto-chlorhydrine)—Butylene mono- (*see* Butylene)—Di- (*see* Dichlorhydrine)—Epi- (*see* Epichlorhydrine)—Ethylen (*see* Ethylen)—In tanneries, use of, 37, 22—Mono- (*see* Monochlorhydrine)—Propylene (*see* Propylene)—Tri- (*see* Trichlorhydrine)

Chlorhydrins or basic chlorides of polyatomic radicals, 29, 155

Chlorhydrol, propylene (*see* Propylene)

Chlorhydroquinine, tetra- (*see* Tetrachlorhydroquinine)

Chlorhydrose, aceto- (*see* Aceto-chlorhydrose)

Chlorhydrosulphate of quinine (*see* Quinine)

Chlorhydroxypropylsulphonic acid (*see* Acid)

Chloric acid (*see* Acid)

Chloriacetic acids (*see* Acids)

Chloridation method, 52, 297

Chloride, acetic, and chloral, compound of, 34, 206—Acid, measure of heat of etherification by action on sodic alcohol, 74, 37—Aluminium (*see* Aluminium)—Anhydrous, action of chloride of aluminium on, 78, 60—Anti- (*see* Antichloride)—Argentine and gold, separating, 27, 121—Argen-

tic, occlusion of dissolved substances by, 93, 118—Argentite, solubility in solutions of sodic thiosulphate, 79, 108—Argentous, 63, 281—Auric, and platonic chloride, combinations, 16, 24—Auric, decomposition, 77, 74—Auric, reduction, 42, 13—Azocumyl (see Azocumyl)—Benzhydroxamic, and sodium azide, interaction, 99, 91—Benzoic, action, 68, 275—Benzodisulpho acid, 23, 83—Benzotri- (see Benzotrichloride)—Benzoyl monomethyl- (see Benzoyl)—Benzoylpara-nitrated, action on monosubstituted orthodiamines, 77, 96—Benzyllic, 15, 215—Benzyl magnesium (see Benzyl)—Benzylquinolinium (see Benzylquinolinium)—Bichlorbenzol—Bichlorbenzochloride—Brombenzolsulpho- (see Brombenzolsulphochloride)—Butyl (see Butyl)—Butylic, 24, 45, 181—Butyryl (see Butyryl)—Capryl (see Capryl)—Carbon tetra- (see Carbon)—Chloracetyl (see Chloracetyl)—Chromic, 22, 83—Chromic, action of liquefied ammonia on, 87, 269—Chromic, action of methylamine on, 87, 269—Chromic, transformation heat of chromous chloride into, 52, 117—Chromous, hydrochlorate of, 51, 310—Chromous, preparation and properties, 43, 222—Chromous, transformation heat of, into chromic chloride, 52, 117—Cobaltous, analysis, 95, 76—Cobaltous ferrous, and ferric, compounds of ethyl carbylamine with, 96, 221—Cobaltous, spectroscopic observations on dissolved, 51, 259—Copper potassium (see Copper)—Chrom-oxy- (see Chromoxychloride)—Cupric, action of aluminium on, 40, 62—Cupric, action of hydrochloric acid on, 58, 232—Cupric, action on mercuric sulphide, 31, 116—Cupric, colour of, 30, 272—Cupric, crystalline sublimed, 29, 90—Cupric, hydrochlorate of, 58, 220, 232, 245—Cupric, precipitation with sulphuric acid, 86, 95; 87, 203—Cuprous, 30, 233; 37, 6; 40, 169—Cuprous, and aniline, compounds, 57, 219—Cuprous, and compound acetylene, 78, 196—Cuprous, and hydrogen, combinations, 39, 162—Cuprous, and hydrogen phosphide, compounds, 39, 263—Cuprous, dissolved in potassium chloride, action of acetylene on, 82, 29—Cuprous, formation heat of, 41, 251—Cuprous, hydrochlorate of, 58, 12, 36—Cuprous, in copper liquors, estimation, 49, 161—Cuprous, preparation, 30, 84; 59, 68—Cuprous, preparation of ammoniacal solution of, 81, 290—Cyanuric, action of naphthylamine on, 53, 129—Cyanuric, history of, 53, 129—Diazobenzene (see Diazobenzene)—Diazobenzo- (see Diazobenzoehloride)—Dibromochromic, 96, 55—Dichlorochromic, products of dehydration, 96, 50—Diethylammonium (see Diethylammonium)—Dimethylammoniocadmium (see Dimethylammoniocadmium)—Diphenylurea (see Diphenylurea)—Ethyl- (see Ethylchloride)—Ethylene ferro- (see Ethylene)—Ethylic, chlorine substitution products of, 25, 155—Ethylalxalyl (see Ethylalxalyl)—Ferric, action, 73, 24—Ferric, action of juice of beet-leaves on, under influence of light, 38, 240—Ferric, action of watery vapour on, 67, 85—Ferric, action on aromatic carbides, 80, 47—Ferric, action on orthophenyldiamine, 50, 189—Ferric, and nitric oxide addition derivatives, 71, 204—Ferric, and oxalic acid, experiments with mixtures, 72, 217—Ferric, as an exciting agent for voltaic batteries, 55, 49—Ferric, cell, 56, 64—Ferric, chloridising action in aromatic series, 77, 285—Ferric, chloridising action on ethereal salts of ketone acids, 77, 149—Ferric, decomposition, 54, 47—Ferric, detecting free

hydrochloric acid in a solution of, 41, 196—Ferric, in aqueous hydrochloric acid, separation from other metallic chlorides by ether, 83, 124—Ferric, molecular weight, 69, 168—Ferric, reaction of, 60, 87—Ferric, separation from other metallic chlorides, 83, 153—Ferric, solutions, reduction, 53, 269—Ferric, volatility, 16, 37; 75, 227—Ferric, with potassium ferriocyanide as a reagent, 53, 155—Ferrous, 58, 83—Ferrous, action of ammonia on, 82, 245—Ferrous, action of nitrogen oxides upon, 75, 143—Ferrous, compounds, 72, 97—Ferrous, estimation of nitrites and nitrates by, 79, 102—Ferrous, extraction of copper by an acid solution of, 36, 90—Glucio-platino- (see Glucio-platino-chloride)—Gold phosphorus (see Gold)—Hexa- (see Hexachloride)—Hexachlorobenzene para- (see Hexachlorobenzene)—Hexamethylammoniocadmium (see Hexamethylammoniocadmium)—Hydro- (see Hydrochloride)—In commercial bromide of potassium, 18, 58—Influence of addition of, to reaction between barium carbonate, carbon and nitrogen, 97, 87—Isobutylene (see Isobutylene)—Manganic, from residues of chlorine, purification with hydrochloric acid and native peroxide of manganese, 35, 196—Margaric, and derivatives, 34, 238—Menthyl (see Menthyl)—Mercurethyl (see Mercurethyl)—Mercuric, 68, 306; 69, 265—Mercuric, action of acetylene on solutions of, 91, 3, 33, 196—Mercuric, action of arseniuretted hydrogen on, 78, 256—Mercuric, action of chromate of strontium on, 75, 276—Mercuric, action of gaseous PH_3 on, 97, 35—Mercuric, action of heat on, 45, 39—Mercuric, and organic bases, compounds, 38, 35—Mercuric, aqueous solutions of, hydrolysis, 72, 62—Mercuric, aqueous solutions of, stability, 69, 313; 70, 109—Mercuric, compounds formed by, 63, 261—Mercuric, reactions, 45, 233; 50, 67—Mercuric, stability of certain solutions of, 69, 25—Mercuric, toxicological search for, 60, 133—Mercurous, 71, 269—Mercurous, molecular weight, 70, 198—Mercurous, preparation, 23, 238—Mercurous, vapour densities of, 81, 152—Metaiodotoluene di- (see Metaiodotoluene)—Methyl ethylthine platin- (see Methyl)—Molybdenum penta- (see Molybdenum)—Monochloroethylen- (see Monochloroethylenchloride)—Of acetyl (see Acetyl)—Of acetylene (see Acetylene)—Of acid (see Acid)—Of allyl (see Allyl)—Of alumina (see Alumina)—Of aluminium (see Aluminium)—Of ammonium (see Ammonium)—Of amyl (see Amyl)—Of Antimony (see Antimony)—Of antimony (see Antimony)—Of arsenic (see Arsenic)—Of barium (see Barium)—Of benzal (see Benzal)—Of benzenediazonium (see Benzenediazonium)—Of benzenyl (see Benzenyl)—Of benzol (see Benzol)—Of benzophenone (see Benzophenone)—Of benzoyl (see Benzoyl)—Of benzyl (see Benzyl)—Of benzylidene (see Benzylidene)—Of benzylquinolinium (see Benzylquinolinium)—Of bismuth (see Bismuth)—Of boron (see Boron)—Of bromine (see Bromine)—Of cadmium (see Cadmium)—Of calcium (see Calcium)—Of carbon (see Carbon)—Of carbonyl (see Carbonyl)—Of cerium (see Cerium)—Of chromium (see Chromium)—Of chromyl (see Chromyl)—Of cinnamylidene (see Cinnamylidene)—Of cobalt (see Cobalt)—Of cobaltammonium (see Cobaltammonium)—Of copper (see Copper)—Of cyanobenzyl (see Cyanobenzyl)—Of cyanogen (see Cyano-

gen)—Of diazobenzene (see Diazobenzene)—Of dimethylammoniocadmium (see Dimethylammoniocadmium)—Of ethoxalyl (see Ethoxalyl)—Of ethylalxalyl (see Ethylalxalyl)—Of ethylene (see Ethylene)—Of ethylenide (see Ethylenide)—Of gadolinium (see Gadolinium)—Of gallium (see Gallium)—Of glucinum (see Glucinum)—Of gold (see Gold)—Of hexamethylammoniocadmium (see Hexamethylammoniocadmium)—Of hydrogen (see Hydrogen)—Of iodide (see Iodide)—Of iodine (see Iodine)—Of iridium (see Iridium)—Of iron (see Iron)—Of isopropyl (see Isopropyl)—Of lead (see Lead)—Of lime (see Lime)—Of lithia (see Lithia)—Of lithium (see Lithium)—Of magnesium (see Magnesium)—Of manganese (see Manganese)—Of mercury (see Mercury)—Of methyl (see Methyl)—Of methylene (see Methylene)—Of molybdenum (see Molybdenum)—Of molybdenyl (see Molybdenyl)—Of neodymium (see Neodymium)—Of nickel (see Nickel)—Of nitrogen (see Nitrogen)—Of nitrosyl (see Nitrosyl)—Of oxalyl (see Oxalyl)—Of palladium (see Palladium)—Of parastannyl (see Parastannyl)—Of phenylpropargylidene (see Phenylpropargylidene)—Of phenylpropargyl (see Phenylpropargyl)—Of phosphonium (see Phosphonium)—Of phosphonyl (see Phosphonyl)—Of phosphorus (see Phosphorus)—Of phosphoryl (see Phosphoryl)—Of platinum (see Platinum)—Of potassium (see Potassium)—Of praseodymium (see Praseodymium)—Of propionyl (see Propionyl)—Of propyl (see Propyl)—Of pyrosulphuryl (see Pyrosulphuryl)—Of radium (see Radium)—Of samarium (see Samarium)—Of selenium (see Selenium)—Of selenyl (see Selenyl)—Of silicon (see Silicon)—Of silver (see Silver)—Of soda (see Soda)—Of sodium (see Sodium)—Of sulphur (see Sulphur)—Of sulphuryl (see Sulphuryl)—Of tantalum (see Tantalum)—Of tetrazodiphenyl (see Tetrazodiphenyl)—Of thallium (see Thallium)—Of thionyl (see Thionyl)—Of thorium (see Thorium)—Of tin (see Tin)—Of titanium (see Titanium)—Of tollylen (see Tollylen)—Of tungsten (see Tungsten)—Of uranium (see Uranium)—Of uranyl (see Uranyl)—Of vanadyl (see Vanadyl)—Of ytterbium (see Ytterbium)—Of yttrium (see Yttrium)—Of zinc (see Zinc)—Orthiodotoluene di- (see Orthiodotoluene)—Orthionitrobenzoyl (see Orthionitrobenzoyl)—Oxi- (see Oxichloride)—Oxy- (see Oxychloride)—Pallorous, carbonic oxide on, 27, 140—Parachlorbenzyl- (see Parachlorbenzylchloride)—Paraiodoacetanilide di- (see Paraiodoacetanilide)—Paraiodoacetic di- (see Paraiodoacetic)—Penta- (see Pentaldehyde)—Perchlorophenyl- (see Perchlorophenylchloride)—Phosphoryl sulpho- (see Phosphoryl)—Phosphoric, action on chlorides and anhydrides, 25, 106—Phospho-platinous, 55, 117—Pinene nitroso- (see Pinene)—Platin- (see Platinichloride)—Platinic, 59, 277—Platinic, and auric chloride, combinations, 16, 24—Platino-potassic, determination of potassium as, 41, 11—Platinous, 65, 213—Platinous, preparation, 67, 116—Plumbic, 16, 129—Plumbic, crystallisation and solubility, 16, 69—Plumbic, solubility in glycerine, 29, 169—Plumbic, solubility in water, and in water containing hydrochloric acid, 17, 198—Plumbico-ammoniacal, preparation, 87, 179—Potassium platinum (see Potassium)—Propylic, 24, 45, 181—Pyrophosphoric acid, 24,

217.—Radium-barium (*see* Radium).—Rubidium-thallium (*see* Rubidium-thallium).—Silicon tetra- (*see* Silicon).—Silver sub- (*see* Silver).—Sodic, and potassium bromide, double decomposition, 36, 86.—Sodic, supersaturated solutions of, 25, 88.—Stannic, 13, 53.—Stannic, action of water on, 60, 174, 317.—Stannic, action on benzene, 35, 40.—Stannic, temperature of solidification, 61, 11.—Stannous, action of iodine on, 24, 49.—Stannous, action of nitric acid on, 52, 87.—Stannous, ammonium molybdate as reagent for, 80, 282.—Stannous, as a disinfectant, 54, 166.—Stannous, as a reducing agent in the technical analysis of iron ores, 31, 63.—Stannous, behaviour towards nitric oxide, 52, 8.—Stannous, behaviour with potassium chlorate, 42, 210.—Stannous, behaviour with essential oils, 75, 71.—Stannous, methods of volumetric estimation by, of copper, iron, antimony, powdered zinc, sulphur in sulphides, glucose and sugar, 85, 71.—Stannous, preparation of solution of, 69, 121.—Stannous, preservation of standard solutions of, 45, 288.—Stannous, reaction with potassium chlorate, 42, 166.—Stannous, reduction of nitro-compounds with, 37, 161.—Stannous, vapour-density of, 41, 35.—Sulpho- (*see* Sulphochloride).—Sulphocarbonyl- (*see* Sulphocarbonylchloride).—Sulphoselenoxytetra- (*see* Sulphoselenoxytetra-).—Sulphotetra- (*see* Sulphotetra-).—Sulphuric, 13, 151.—Sulphurous, behaviour of silver cyanide with, 52, 309.—Sulphurous, derivatives, 17, 39.—Synthesis with aluminium, 67, 266.—Tetrazodiphenyl (*see* Tetrazodiphenyl).—Thallic, 87, 11.—Thallous, action of bromine on, in presence of organic solvents, 86, 40.—Thallous, action of bromine on, in presence of water, 86, 15.—Thorium tetra- (*see* Thorium).—Tin tetra- (*see* Tin).—Titanium tetra- (*see* Titanium).—Titanium tri- (*see* Titanium).—Titanous, formation, 51, 260.—Toluene nitrosulpho- (*see* Toluene).—Toluene parasulpho- (*see* Toluene).—Toluene sulpho- (*see* Toluene).—Toluol- (*see* Toluolchloride).—Toluolsulpho-acid, action on acid amides, 25, 46.—Trichloroacetyl (*see* Trichloroacetyl).—Trichloromethyl sulphonic, preparation, 54, 79.—Urea palladium- (*see* Urea).—Zincobaric, 27, 271.—Zincomagnesian, 28, 186.

Chlorides, aci- (*see* Aci-chlorides).—Acid, action of mercaptans on, 100, 265.—Acid, action on aldehydes in presence of zinc chloride, 84, 36.—Acid, action on ether oxides in presence of chloride of zinc, 83, 263.—Acid, action on ether oxides in presence of zinc, 83, 287.—Acid, action on methanal, 84, 60.—Acid, action on methyl and ethyl sodacetylacetates, 84, 292.—Acid, action on nitrates and nitrites, 27, 180.—Acid, action on tertiary bases having an aromatic radicle, 90, 117.—Acid, action on thioureas, 95, 33.—Acid, and analogous compounds, action of oxygen on, 37, 203.—Acid, and methanal, mutual action, 85, 264.—Acid, and nitrates, interaction, 69, 36.—Acid, interaction of ketones and aldehydes with, 86, 280.—Acid, ketones from, 29, 37.—Acid, products obtained by action of tertiary bases on, 90, 182.—Action of ammonia on, 4, 135.—Action of phosphoric chloride on, 25, 106.—Action on aniline colours, 43, 71.—Action on glucose, 24, 35.—Alcoholic, action of phenylhydrazine on, 80, 7.—Alcoholic, preparation, 37, 21.—Ammoniacal, derivatives, 36, 241.—Ammoniacal, dissociation, 18, 46.—And bromides and alkaline iodides, separation of iodine in the

form of cuprous iodide from a mixture, 88, 293.—And bromides, quantitative separation, 96, 183, 210.—And chlorates and nitrates, detection of alkaline perchlorate in presence of, 74, 38.—And hydrochlorates, 45, 164.—And hypochlorites and chlorates, analysis of a mixture, 73, 157, 169.—And iodides, double, 30, 205.—And perchloride of phosphorus, compounds, 7, 72.—And sulphates in aqueous solution, is there a constant relation between the heats of formation? 57, 36.—Anhydrous, action on tellurium and tellurium dioxide, 98, 4.—Anhydrous metallic, method of preparing, 55, 192.—Anhydrous, of rare earths, preparation, 91, 256.—Anhydrous, of rare earths, properties, 91, 280.—Anhydrous, preparation, 89, 179.—Anhydrous, producing, 28, 307.—Are combinations of two, salts, 1, 310.—Auri- (*see* Aurichlorides).—Bis-diazoic (*see* Bis-diazoic).—Bromocinnamylidene (*see* Bromocinnamylidene).—Chromous, isomeric, 98, 256.—Conversion of alkaline sulphates into, 26, 147.—Cupric, anhydrous ammoniacal, 86, 149.—Decomposition, 54, 83.—Detection in presence of bromides, 89, 229.—Detection in presence of bromides and iodides, 52, 107.—Detection of free hydrochloric acid in admixture with, 36, 166.—Dextrolimonic nitroso- (*see* Dextrolimonic).—Diazo- (*see* Diazo-chlorides).—Diazoic, action of acetylacetylacetate ethers on, 83, 239.—Diazoic, action of acetylmalonic ethers on, 83, 312.—Diazoic, action of methylacetylacetate and ethylacetylacetate on, 83, 60.—Diazoic, action of monochlorated ethylacetylacetate on, 85, 312.—Diazoic, action on oxalacetic ethers, 90, 70.—Diazoic, action of substituted malonic ethers on, 86, 256.—Diazoic and tetrazoic, action of acetylacetone and derivatives of substitution on, 86, 256.—Diazoic and tetrazoic, action of acetylacetylacetates on, 85, 257.—Diazoic and tetrazoic, action of malonic ethers on, 86, 257.—Diazoic, in alkaline solution, action on oxalacetic ether, 40, 70.—Dimercurammonium (*see* Dimercurammonium).—Dissolved, influence of pressure in the modification of, 55, 223.—Double, 66, 84; 74, 161.—Double, molecular volumes of, 49, 273.—Estimation, 32, 6; 59, 109.—Estimation in presence of sulphocyanates, 96, 209.—Estimation, modification of Volhard's method, 96, 264, 274.—Estimation of iodides in presence of, 85, 287.—Estimation, use of the chromates of barium and of silver in, 91, 3.—Fluo- (*see* Fluochlorides).—Formed by cinchonamine, 76, 195.—Hydrochlorates of, 56, 23; 60, 121.—Iimid- (*see* Iimid-chlorides).—Imino- (*see* Imino-chlorides).—In animal liquids, estimation, 52, 118.—In sea air, 80, 41.—In urine, estimation, 91, 163.—In wines, estimation, 62, 256.—Influence on nitrification, 70, 30.—Isomeric, of sulphobenzoic acid, 79, 251.—Manufacture of soda and potassa from their, 37, 52.—Mercuric and other, properties of alcoholic and other solutions of, 65, 93.—Mercury ammonium (*see* Mercury).—Metallic, action of hydrochloric acid on, 43, 36, 94.—Metallic, action of hypochlorous acid on, 86, 179.—Metallic, action of nitrogen sulphide on, 94, 230.—Metallic, action of phosphorus on, 74, 37.—Metallic and acetamide, compounds, 53, 60.—Metallic and unsaturated ketones, compounds, 90, 257.—Metallic, catalytic decomposition of monochloroformic derivatives in contact with anhydrous, 92, 91.—Metallic, decomposition, 82, 24.—Metallic, electrolysis, 31, 49; 67, 78.—Metallic, experiments on, 57, 16.—Metallic, hydro-

chlorates of, 43, 46.—Metallic, reaction of lead sulphide on, 47, 305.—Metallic, united with ammonia, heat of formation, 37, 217.—Of acetyl (*see* Acetyl).—Of acids (*see* Acids).—Of alcohol radicals, action on primary monamines, 32, 146.—Of alcoholic radicals, action on secondary monamines, 31, 140; 32, 146.—Of alkaline (*see* Alkaline).—Of alkaline earths (*see* Alkaline).—Of alkylsilicon (*see* Alkylsilicon).—Of aluminium (*see* Aluminium).—Of ammonium (*see* Ammonium).—Of benzile (*see* Benzile).—Of benzoyl (*see* Benzoyl).—Of bibasic acids, 58, 25; 62, 202.—Of bibasic acids, action of, 66, 302.—Of bromocinnamylidene (*see* Bromocinnamylidene).—Of cadmium (*see* Cadmium).—Of caesium (*see* Caesium).—Of camphor (*see* Camphor).—Of carbon (*see* Carbon).—Of chlorocinnamylidene (*see* Chlorocinnamylidene).—Of chromium (*see* Chromium).—Of cobalt (*see* Cobalt).—Of copper (*see* Copper).—Of earthy metals (*see* Metals).—Of fatty acids, action on soda derivatives of the acetylacetyl ethers, 87, 203.—Of gallium (*see* Gallium).—Of gold (*see* Gold).—Of hydrobenzoin (*see* Hydrobenzoin).—Of indium (*see* Indium).—Of iodide (*see* Iodide).—Of iodine (*see* Iodine).—Of iron (*see* Iron).—Of lithium (*see* Lithium).—Of mercury (*see* Mercury).—Of metals (*see* Metals).—Of molybdenum (*see* Molybdenum).—Of naphthalene (*see* Naphthalene).—Of nitrogen (*see* Nitrogen).—Of non-metals and metalloids, replacement of chlorine in, by bromine and iodine, 74, 27.—Of phosphorus (*see* Phosphorus).—Of propylene (*see* Propylene).—Of rare earths, preparation of anhydrous, 91, 256.—Of rare earths, properties of anhydrous, 91, 280.—Of rubidium (*see* Rubidium).—Of selenium (*see* Selenium).—Of silicon (*see* Silicon).—Of silver (*see* Silver).—Of sulphur (*see* Sulphur).—Of sulphuryl (*see* Sulphuryl).—Of thorium (*see* Thorium).—Of tungsten (*see* Tungsten).—Of uranium (*see* Uranium).—Of uranyl (*see* Uranyl).—Of zirconium (*see* Zirconium).—Organic, action of hydriodic acid on, 19, 203.—Organic, action on diphenyl, 54, 73.—Organic, action on glycol, 1, 167, 204.—Organic, conversion into iodides, 18, 21.—Organic, conversion of iodides into, 19, 69.—Organic platinum double, analysis, 47, 249.—Organic, production, use of molybdenum pentachloride for, 34, 271.—Organic, which contain nitrogen, action of sulphuric acid on, 22, 213.—Platini- (*see* Platinichlorides).—Platino- (*see* Platinochlorides).—Precipitation, 68, 209.—Preparing, Grove's method, 30, 291.—Separation of bromine in, 79, 275.—Sodio-gold, action of sulphocyanates on, 33, 243.—Solubility, 53, 167, 312; 54, 108.—Soluble, determination, 65, 101.—Sulpho- (*see* Sulphochlorides).—Sulphonic, chloro-derivatives from, 71, 254.—Tetrazoic, action on oxalacetate of ethyl, 87, 143.—Transformation of oxides and oxygen salts into, 89, 203.—Trichloro-phenyl-acyl-nitrogen, 80, 202.—Violet flame of, 7, 67.—Volatile, 44, 205.

Chloridine, cyan- (*see* Cyanchloridine).
Chloridine mannite, hexa- (*see* Hexachloridine).

Chlorimetric degrees (*see* Degrees).

Chlorimetry, 17, 85; 22, 274; 24, 75; 26, 25.

Chlorinated aldehydes (*see* Aldehydes).—Derivatives, double refraction in, 80, 305.—Derivatives of benzole series, preparing, 1, 4.—Derivatives of carbazol, 43, 72.—Phenols (*see* Phenols).—Phenylhydrazines (*see* Phenylhydrazines).—Quinones (*see* Quinones).—Toluidine (*see* Toluidine).

Chlorinating apparatus, 79, 217
 Chlorination, 92, 9, 235—And oxidation, 61, 262; 76, 34, 82—Electrolytic, of salts of organic acids, 98, 32—Influence of light and heat on, 56, 23—Of acetanilide (*see* Acetanilide)—Of acetylene (*see* Acetylene)—Of aniline (*see* Aniline)—Of anthracene (*see* Anthracene)—Of benzene (*see* Benzene)—Of bromoanilines (*see* Bromoanilines)—Of carbides (*see* Carbides)—Of methyl derivatives of pyridine, (*see* Pyridine)—Of para-nitroaniline (*see* Para-nitroaniline)—Of pyrogallol (*see* Pyrogallol)—Of toluene (*see* Toluene)—Studies in, 91, 128
 Chlorine, 33, 244, 253; 47, 39; 58, 60; 61, 102; 64, 184—Absorption by carbon, 50, 79—Action of fluorine on, 94, 194—Action in presence of H_2SO_4 , 69, 232—Action of light on, 24, 229; 25, 22; 89, 152—Action of silent discharge on, 63, 67; 89, 296—Action of silent electric discharge on, 92, 46—Action on absolute alcohol, 23, 22—Action on acetamide, 31, 276; 33, 256—Action on alcohol, 21, 94—Action on aldehyde, 24, 156—Action on aldehyde of ethyl series, products of, 33, 18—Action on amylene, 15, 3—Action on anhydrous acetic acid, 6, 120—Action on anhydrous chloral, 52, 313; 53, 96; 78, 71—Action on arsenious acid, 11, 138—Action on barium acetate, 88, 269—Action on boiling toluene, 92, 9—Action on carbonate of silver, 16, 79—Action on carbonates of lime and baryta, 1, 107—Action on chloral, 76, 227—Action on chloride of ethylene, 78, 196; 79, 59—Action on chloroform, 78, 47—Action on chromium sesquioxide, 42, 24—Action on dimethyl, 97, 239—Action on ethyl chloride, 24, 23—Action on ethyl sulphocyanide, 51, 73—Action on hæmatoxylin and extractive matter of logwood, 61, 160—Action on iodine, 39, 41—Action on isobutyl aldehyde, 57, 282—Action on isobutylhydriodic ether, 32, 62—Action on isobutylalcohol, 70, 174—Action on isodipropylthyl, 29, 282—Action on isopropyl chloride, 25, 33, 107—Action on lignocelluloses, 58, 215—Action on metallic gold, 58, 25—Action on metallic oxides, 5, 131—Action on metals, 47, 70—Action on methyl cyanate, 55, 67—Action on methyl ethyl acetone, 63, 186—Action on mixture of silicon, silica, and alumina, 80, 123—Action on mononitrate veratrols, 86, 317—Action on nitroaminobenzenes, 86, 46—Action on nitroprussides under different circumstances, 38, 105—Action on organic iodo-derivatives, 94, 229—Action on organic sulphocyanides, 56, 260—Action on oxide and salts of silver, 1, 241—Action on pentachlorethane, 76, 313—Action on perchloride of acetylen, 31, 140—Action on phosphonium iodide, 70, 8—Action on piccarpines, 52, 58—Action on products of aldehyde, 22, 227—Action on pyridine, 77, 236—Action on pyrogallol, 31, 253—Action on ruthenium, 65, 107—Action on secondary alcohols, 71, 49, 234—Action on sugar, 10, 253—Action on sulphone compounds and organic oxysulphides, 48, 22—Action on sulphonic compounds and heptylic oxysulphides, 58, 12—Action on tetrabromide of acetylene, 76, 313—Action on tetrachloride of acetylene, 79, 50—Action on trimethylen, 70, 210—Action on urea, 98, 285—Action on valeric aldehyde, 2, 35—Action on various bodies of the C_3 series, and substances isomeric with trichlorhydrine, 24, 240—Action on water, 61, 212—Active, 90, 170—Affinity of hydrogen for, 25, 34—Alkali, cell (*see* Cell)—And allyl-alcohol, compounds, 23, 22—Amount in the drainage through uncropped and un-

manured land, 85, 225—And acylanilides, primary interaction, 100, 32—And ammonia, reactions between, 85, 14—And benzene, chemical dynamics of reactions between, under the influence of different catalytic agents and of light, 87, 248—And bismuth compounds, 1, 154—And boron, combinations, 11, 281—And bromine and iodine compounds, heat of solution, 35, 263—And bromine and iodine, detection in same mixture, 67, 141, 162—Bromine, and iodine, differences of affinities of, 38, 47—And bromine and iodine, estimation, 77, 67, 276—And bromine, and iodine, estimation in presence of one another, 49, 3—And bromine and iodine, estimation when mixed, 80, 167—And bromine, and iodine, separation, 2, 325; 40, 168; 65, 263, 276; 77, 67, 276; 80, 6—And bromine mixtures, density curve of, 96, 165—And bromine, Polizin's law of mutual displacement, 57, 88—And bromine, relative orienting effect, 65, 138—And bromine, separation, 70, 31; 75, 236; 76, 151—And bromine, separation in acid solution with hydrogen peroxide, 94, 286—And bromine, spectral reaction, 43, 25—And carbon monoxide, combination under influence of light, 86, 264—And carbon monoxide, experiments with, 70, 58—And compounds, 28, 32, 108—And Eau-de-Javelle liquors, 21, 215—And fluorine and molybdenum, compound of, 2, 99—And gold, compounds, 84, 201—And hydrochloric acid, 67, 240—And hydrochloric acid, action on lead chloride, 42, 294—And hydrochloric acid, method of producing, 60, 221—And hydrogen, cause of period of chemical induction in, 91, 49—And hydrogen, combination in darkness, 27, 46—And hydrogen interaction, 99, 81—And hydrogen interaction, influence of gaseous oxides of nitrogen on rate of, 100, 251—And hydrogen interaction, retarding effect of oxygen on rate of, 99, 247—And hydrogen, union, 83, 31; 85, 103; 86, 44; 89, 152, 296; 90, 265; 93, 900—And iodine, separation, 51, 84; 68, 108; 82, 108—And metallic sodium, 20, 271—And metals, combination, 64, 261; 65, 101, 118—And other reported monads, quantivalence of, 16, 43—And oxygen, heat evolved when boron combines with, 21, 70—And oxygen, heat evolved when silicon combines with, 21, 82—And soda, separation, 69, 205—And sulphur chloride, action on oxides, 96, 70—And sulphur, effects on plants, 49, 235—Antidote for, 1, 257—Atomic weight, 76, 119; 91, 263; 93, 55, 170, 175, 181, 192, 202, 218, 228, 237, 253, 260, 276, 287; 95, 208; 96, 70; 97, 135, 146, 159; 98, 97, 256; 99, 69; 100, 240, 278—Behaviour at a high temperature, 40, 49, 263, 265—Behaviour of fluorine towards, in arc and induction spark, 99, 240—Behaviour of pure, towards hydrogen, 86, 34—Behaviour towards a solution of permanganate of potassa, 20, 48—Combined, origin, 83, 214—Compounds of cyanogen, 15, 133—Condensation, new apparatus for, 30, 166—Constitution, 40, 262—Contribution to knowledge of, 41, 135—Conversion into hydrochloric acid, 73, 197—Decomposition, 40, 60—Decomposition in sunlight, 51, 118—Density, 58, 83; 89, 58—Density at high temperatures, 40, 142; 41, 92; 48, 236—Derivatives, 67, 110—Derivatives of acetone, 26, 252; 27, 22—Derivatives of acetophenone, 35, 141—Derivatives of benzene, 35, 105—Derivatives of chloroacetate and diacetate, 88, 46—Derivatives of naphthalene, 38, 35—Derivatives of naphthylamines, 77, 21—Derivatives of pyridine, 81, 70,

260; 83, 285; 98, 285—Derivatives of strychnine, 43, 36—Derivatives of substituted carbamides, 99, 80—Derivatives, preparation, 57, 151—Detection, 48, 296; 50, 268; 54, 11—Detection and determination in presence of bromine and iodine, 41, 280—Detection by spectrum analysis, 12, 243—Detection in presence of iodine, 66, 6—Detection of iodine in presence of, 74, 7—Detection of traces, 56, 13; 70, 30—Determination, 47, 248; 50, 175; 52, 107; 57, 251; 58, 229, 281; 89, 55—Determination, defect in Mohr's process, 53, 67—Determination in presence of bromine and iodine, 45, 258—Determination in presence of bromine, 49, 110; 51, 285—Determination in presence of sulphurous acid, 29, 27—Determination in presence of volatile organic compounds, 49, 213—Determination with standard silver solution of potassium chromate, 29, 150—Detonating gas, influence of radium rays on, 91, 225—Development of, 59, 205; 62, 274—Discharge, 28, 326—Displacement of sulpho-group by, 48, 238—Dissociation, 40, 141, 155, 213, 225, 232, 292; 45, 85, 226—Dry, action on dried nitrate of silver, 21, 46—Effect on electromotive force of a voltaic couple, 57, 184—Effects on plants, 49, 265—Electrolytic, application to sewage purification, 99, 95—Estimation, 3, 67; 17, 179, 206; 21, 264; 24, 97; 45, 193; 48, 41; 54, 11; 55, 292; 68, 115; 77, 276—Eu- (*see* Euclyrine)—For bleaching purposes, early use of, 33, 131—Free, detection, 61, 106—Identifying, 63, 153—Function in acid chlorides, 63, 210—Gas, action on chloronaphthalene, 22, 23—Gas, application to toughening and refining of gold, 18, 234—Gas, colour, 25, 143—Gas, generating, 57, 82—Gas, gold refining by, 21, 229, 241—Gas, manufacture, 22, 145; 31, 208—Gas, method of obtaining, 22, 157—Gas, preparation, 59, 230—Gas, utilising residue from, 14, 287—Gas, volatility of platinum in, 40, 244; 41, 81—Gaseous, decay of activity of, 90, 265—Generated by potassium permanganate, 99, 115—Generating, 18, 200; 70, 153, 172—Hypo- (*see* Hypochlorine)—In anilines, replacement of bromine by, 83, 274—In animal and vegetable bodies, 30, 145—In ash of plants, determination, 61, 229—In blanching powder, estimation, 23, 293; 24, 5; 47, 51, 83—In bromine, determination, 74, 25—In bromine, separation and estimation, 79, 311—In caoutchouc, estimation, 1, 300—In coal, 2, 218—In gastric juice, 82, 158—In mixtures of alkaline chlorides and iodides, determination, 61, 235, 280, 358—In organic compounds, detection, 59, 281—In organic compounds, determination, 33, 117—In organic matter, detection, 28, 226—In organic products, determination, 74, 109—In organic substances, 76, 150—In organic substances, detection, 26, 60—In organic substances, determining, 36, 133—In oxygen gas prepared from potassium chlorate, causes of, 47, 83—In plants, 89, 55—In potable waters, determination, 94, 258—In potassium bromide, determination, 42, 283; 43, 60—In rain water at Cirencester, 82, 265—In rain water collected at Rothamsted, 85, 225—In river and rain waters, 99, 253—In saline waters, 76, 293—In urine, determination, 52, 118; 69, 145—In water, estimation, 21, 217, 237—In West Yorkshire, 82, 162—In Yorkshire, distribution, 84, 185—Industrial manufacture, 26, 304—Inverse relation to rainfall, 84, 176—Liberation during heat-

- ing of a mixture of potassic chlorate and manganous peroxide, **69**, **80**; **74**, **95**—Liquid, **68**, **13**; **69**, **109**—Liquid, properties of, **83**, **134**—Liquid, reactions of, **94**, **107**—Manufacture, **23**, **210**; **27**, **168**; **34**, **70**—Manufacture by Deacon's process, **36**, **11**—Manufacture by means of manganite of calcium, **20**, **109**—Manufacture, denaturation and utilisation of residues, **24**, **182**—Methods for, **89**, **56**—Molecular action in atmosphere of, **20**, **285**—Obtaining, **8**, **168**, **299**; **63**, **201**—Of gastric secretion, **70**, **293**—Of sulphur (*see* Sulphur)—Organic elementary analysis of substances containing, **15**, **63**, **73**, **98**—Oxygen acids of, **48**, **106**—Photochemically active, **89**, **152**; **90**, **21**—Preparation, **3**, **12**; **24**, **205**; **25**, **307**; **26**, **169**; **30**, **176**; **42**, **132**; **62**, **298**; **64**, **189**—Preparation by means of chlorate of sodium, **85**, **273**—Preparation by means of permanganates, **87**, **48**—Preparation from chloride of lime, **46**, **255**—Preparation from hydrochloric acid **23**, **71**—Preparation of pure, **86**, **34**—Process, Deacon's, **29**, **155**—Production, **4**, **246**; **17**, **142**; **18**, **76**; **28**, **45**; **57**, **41**; **65**, **34**—Production, Greenwood process, **65**, **5**—Purification, **30**, **177**—Quantivalence of, **16**, **43**—Reaction on sulphur salts, **21**, **121**—Reaction under influence of porous carbon, **34**, **63**—Refraction and dispersion equivalents of, **14**, **149**—Replacement by bromine and iodine, **74**, **27**—Residues, utilisation, **13**, **27**, **40**, **111**, **134**—Salts, alkaline halogen, and iodine, separation, **89**, **12**—Smelting with electrolysis, **88**, **34**, **63**, **73**—Soap, **8**, **242**—Solution in water, **42**, **110**; **44**, **195**—Specific gravity, **19**, **251**—Substitution compounds of the orcinis **23**, **230**; **25**, **1**—Substitution for metals in salts, **3**, **225**—Substitution products of ether, **23**, **226**—Substitution products of ethylic chloride, **25**, **155**—Substitution, study of, **34**, **11**—Substitutions, method of effecting, **5**, **52**—Test, **54**, **289**; **84**, **13**—Vapour, poisoning by, **16**, **92**—Water, **12**, **295**—Water, action of metals of platinum group on, **13**, **207**—Water and calcium carbonate, reaction between, **95**, **236**—Water apparatus (*see* Apparatus)—Water, decomposition in sunlight, **53**, **48**—Water, distillation, **87**, **91**—Water, rate of decomposition by light, **60**, **271**
- Chlorine aldehyde, **21**, **286**
- Chlorine ether, substitution products of, **23**, **126**
- Chlorine heptoxide, **82**, **272**
- Chlorine hydrate, **47**, **145**—Action on phenylhydrazinediphenylglyoxazol, **75**, **299**—Composition, **85**, **251**—Crystallisation of, **47**, **9**—Dissociation, **37**, **122**—Heat of formation, **85**, **47**
- Chlorine monoxide, **53**, **37**
- Chlorine oxides, **84**, **234**
- Chlorine peroxide as a sterilising agent for potable waters, **84**, **316**—Explosion, **73**, **139**—Explosion with carbonic oxide, **75**, **259**
- Chlorine sulphur, action of, **62**, **189**
- Chlorinide, trichloroquinone- (*see* Trichloroquinonechlorinide)
- Chlorinised xylidin (*see* Xylidin)
- Chlorinide, methyl- (*see* Methylchlorinide)
- Chloridopropylene, **24**, **157**
- Chlorised aldehydes (*see* Aldehydes)—Ethers (*see* Ethers)
- Chlorite, hypo- (*see* Hypochlorite)
- Chlorites, hypo- (*see* Hypochlorites)
- Chloromaleic acid (*see* Acid)
- Chlormethane, triphenyl- (*see* Triphenylchlormethane)
- Chlormethyl sulphate, **96**, **280**—Action on amino groups, **98**, **11**
- Chlormethyl sulphon chloride, tri- (*see* Trichlormethyl)
- Chlormethylsulphurous acid (*see* Acid)
- Chlornaphthaline, penta- (*see* Penta-chlornaphthaline)
- Chlornaphthylamine, **38**, **211**
- 4-Chloroacene, **98**, **279**
- Chloroacetate of methylene (*see* Methylene)
- Chloroacetates, rate of hydrolysis by water and by alkali, **97**, **235**
- Chloroacetylhydrazines, phenyl- (*see* Phenylchloroacetylhydrazines)
- Chloroacetic derivatives, variation of physical properties in, **52**, **82**
- Chloroaldehyde, mono- (*see* Monochloroaldehyd)
- Chloroalkylamines, sulphon- (*see* Sulphonchloroalkylamines)
- Chloroaluminic ferments (*see* Ferments)
- Chloroamines, sulphonphenyl- (*see* Sulphonphenylchloroamines)
- Chloroaminobenzenes, acetyl- (*see* Acetylchloroaminobenzenes)
- Chloroaniline, ortho- (*see* Orthochloroaniline)
- Chloroanilines, formation, **89**, **287**
- Chloroarsenide of tungsten (*see* Tungsten)
- Chloroauric acid (*see* Acid)
- Chlorobenzene, metadi- (*see* Metadi-chlorobenzene)
- Chlorobenzeneazosalicylic acids (*see* Acids)
- Chlorobenzene hexachloride, modifications, **65**, **48**
- Chlorobenzene parachloride, hexa- (*see* Hexachlorobenzene)
- Chlorobenzenes, di- (*see* Dichlorobenzenes)
- Chlorobenzile, condensation, **66**, **258**
- Chlorobenzoate of methylene (*see* Methylene)
- Chlorobenzoic acid (*see* Acid)
- Chlorobenzol acid (*see* Acid)—Dinitro (*see* Dinitrochlorobenzol)
- Chlorobenzolsulphuric acid (*see* Acid)
- Chlorobenzoyl, action, **63**, **249**—And nicotine, compound, **5**, **42**
- Chlorobenzyl, **3**, **223**
- Chloroboracites, **69**, **301**
- Chloroborate of iron (*see* Iron)
- Chloroborates of calcium (*see* Calcium)
- Chlorobromacetone, **29**, **51**
- Chlorobromated compounds, organic, **22**, **22**—Ethylenic (*see* Ethylene)
- Chlorobromide of ethylene (*see* Ethylene)—Of lead (*see* Lead)—Of methylene (*see* Methylene)—Of propylene (*see* Propylene)—Of silicon (*see* Silicon)—Of silver (*see* Silver)
- Chlorobromides of carbon (*see* Carbon)—Of lead (*see* Lead)—Of thallium (*see* Thallium)—Of tungsten (*see* Tungsten)—Stannic, **75**, **191**
- Chlorobromocetanilides, chloro- and bromoamino- derivatives, **83**, **273**
- Chlorobromoanilines, nitro- (*see* Nitrochlorobromoanilines)—Sym-tri- (*see* sym-Trichlorobromoanilines)—Sym-try- (*see* sym-Trichlorobromoanilines)
- Chlorobromobenzenes, di- (*see* Dichlorobromobenzenes)
- Chlorobromobenzoic acids (*see* Acids)
- Chlorobromocarbon, **35**, **185**
- Chlorobromodiazobenzenes, replacement of halogen by hydroxyl in, **98**, **241**
- Chlorobromohydrine, di- (*see* Dichlorobromohydrine)
- Chlorobromophenes, **80**, **59**
- α -Chlorocamphor, isomerism of, **91**, **199**
- Chlorocamphoric acid (*see* Acid)
- Chlorocamphorsulphonates, **81**, **128**
- Chlorocamphorsulphonic acid (*see* Acid)
- d -Chlorocamphorsulphonic acids (*see* Acids)
- Chlorocarbamide, di- (*see* Dichlorocarbamide)
- Chlorocarbonate, ethylic, action on sodic cyanide, **36**, **277**—Of phenyl (*see* Phenyl)
- Chlorocarbonates, action of lead thiocyanates on, **83**, **284**—Phenolic, preparation, **81**, **46**—Phenyl, preparation, **80**, **47**
- Chlorocarbonic acid (*see* Acid)—Ether (*see* Ether)—Oxide (*see* Oxide)
- Chlorocarbons, aromatic, reactions of, **48**, **295**
- Chlorochromic acid (*see* Acid)—Acids (*see* Acids)
- α -Chlorocinnamic acids (*see* Acids)
- Chlorocinnamylidene chlorides, **87**, **274**
- Chlorocodon, isomeride of vanillin in root of a species of, **97**, **154**
- Chlorocurarine, composition, **65**, **299**
- Chlorocyanamide, **77**, **10**
- Chlorocyanide of hydrogen (*see* Hydrogen)
- α -Chlorocyclohexanone and derivatives, **93**, **280**
- Chloro-derivatives of xylol, **15**, **253**
- Chlorodibromobenzenes, **84**, **265**
- Chloro-1,3-dicetotetrahydronaphthalene 2,4-tetra- (*see* 2,4-Tetrachloro-1,3-dicetotetrahydronaphthalene)
- Chlorodinitrotoluene, **91**, **164**
- Chlorodyne, **11**, **84**
- Chlorodynes, battle of, **9**, **35**
- Chloroethoxyethene, tri- (*see* Trichloroethoxyethene)
- Chloroferric colloids (*see* Colloids)
- Chloroform, a test for sugar in urine, **10**, **74**—Action of an alcoholic solution of potassa on, **37**, **52**—Action of ammonia and water on, **53**, **155**—Action of chloride of iodine and bromine on, **26**, **83**—Action of chlorine on, **78**, **47**—Action of light on, **15**, **294**—Action on Frommherz's fluid, **20**, **60**—Action on hydrazines, **61**, **23**—Action on iodoform, **29**, **208**—Action on naphthol, **46**, **47**—Action on naphthol- β , bodies formed in, **87**, **47**—Action on orthoamidobenzoic acid, **81**, **11**—Action on phenate of potassa, **28**, **181**—Action on phenylhydrazine, **59**, **141**; **78**, **24**—Alcohol in, detection, **2**, **138**; **20**, **191**—Alcohol in, estimation of quantity, **27**, **95**—And air, determining relative proportions of, in a mixture of the two, **80**, **251**—And alkaline hydroxides, action on nitrobenzoic acids, **77**, **58**—And iodoform, action of quinoline on, **48**, **106**—And its behaviour towards light and air, **20**, **240**—And potash, action on metamidobenzoic acid, **74**, **254**—As an anæsthetic agent, **13**, **69**—Boiling-point of, influence of moist alcohol and ethyl chloride on, **90**, **21**—Contributions to history and discovery of, **25**, **227**—Decomposition, **67**, **60**; **76**, **326**; **77**, **165**—Detection, **46**, **243**; **47**, **119**—Detection, reactions for, **47**, **178**—Determination, **88**, **95**—Duty on, **1**, **156**, **168**—Ethyl tartrate in, **91**, **128**—For improving taste of cod-liver oil, **23**, **119**—For removing paint stains, **13**, **72**—Formation, **27**, **107**; **42**, **294**; **63**, **120**—From chloral and from alcohol and bleaching powder, distinguishing, **23**, **287**—From pure methylic acid, **26**, **118**—Impurity in, **57**, **102**—In air, in blood, or an aqueous liquid, estimation, **93**, **80**—In animal fluids, detection, **48**, **170**—In blood of an anæsthetised animal, **48**, **203**—Influence on nitrification, **39**, **26**, **41**, **53**—Methyl (*see* Methyl)—Methylstanni- (*see* Methylstannichloroform)—Miscibility, **1**, **44**—Oxygen as antidote for, **2**, **72**—Post-mortem detection, **55**, **149**—Preparation of pure, **69**, **121**—Preservation, **51**, **24**—Purity, estimation of, **5**, **286**—Purity, test for, **34**, **101**—Reactions, coloured, **88**, **37**—Reactions of metallic sodium on, **31**, **121**—Rectification and preservation, **80**, **183**—Silico- (*see* Silicochloroform)—Solubility, **51**, **166**—Solubility of alkalis in, **1**, **268**—Solubility of carbonic acid gas in, **60**, **49**—Solution, molecular complexity of acetic acid in, **85**, **162**—Splitting up of, **57**, **101**—Syrup of, preparation, **9**, **237**—Testing for presence of alcohol and ether, **19**, **287**—Vapour in air, estimation, **88**, **22**
- Chloroform hydrate, **51**, **61**

- Chloroformic solution of gutta-percha, **6**,
295
- Chlorofulminuric acid (*see* Acid)
- Chlorofumarate of ethyl (*see* Ethyl)
- Chlorofumaric acid (*see* Acid)—Ether
(*see* Ether)—Ethers (*see* Ethers)
- Chloroglucosane, mono- (*see* Monochloro-
glucosane)
- Chlorohydrate of cocaine (*see* Cocaine)—
Of hydroxylamine (*see* Hydroxyl-
amine)
- Chlorohydrates of fatty amines, action
of gaseous ammonia on, **84**, **84**
- a*-Chlorohydrin, rate of hydrolysis by
water and by alkali, **97**, **235**
- Chlorohydrines, constitution, **85**, **215**
- Chloroimide, dibenzoyl- (*see* Dibenzoyl-
chloroimide)
- Chloroiodide of carbon (*see* Carbon)—
Of ethylene (*see* Ethylene)—Of propy-
lene (*see* Propylene)—Of tin (*see*
Tin)
- Chloroiodides, amido- (*see* Amidochloro-
iodides)—Of silicon (*see* Silicon)
- Chloroiodomercurate, monomethylamine
(*see* Monomethylamine)
- Chloroiridate of potassium (*see* Potas-
sium)
- Chloroketodimethyltetrahydrobenzene,
condensation with primary amines,
93, **66**, **104**
- 5* Chloro-ketone : 1-dimethyl- Δ -4-tetra-
hydrobenzene, action of reducing
agents on, **94**, **301**
- Chloromaleic acid (*see* Acid)
- Chloromelanite, **22**, **119**
- Chloromesol, per- (*see* Perchloromesol)
- Chloromethane, tetra- (*see* Tetrachloro-
methane)
- Chloromethenedioxypropylbenzene, di-
(*see* Dichloromethenedioxypropylben-
zene)
- Chloromethylether, mono- (*see* Mono-
chloromethylether)
- Chloromethyltetrahydrofurfuran, *a*-tri-
(*see* *a*-Trichloromethyltetrahydrofur-
furan)
- Chloronaphthalene acid (*see* Acid)—
Action of chlorine gas on, **22**, **23**—
Di- (*see* Dichloronaphthalene)—New,
26, **242**—Tri- (*see* Trichloronaphtha-
lene)
- 3*-Chloronaphthalene, preparation, **70**
254
- Chloronaphthalenediazonium hydroxide,
interchange of halogen for hydroxyl
in, **87**, **29**
- Chloronaphthalenesulphonic acid (*see*
Acid)
- Chloronaphthalenes, di- (*see* Dichloro-
naphthalenes)—Tri- (*see* Trichloro-
naphthalenes)
- Chloronaphthylamine, **82**, **106**
- Chloronitrate of palladium (*see* Pallad-
ium)
- Chloronitric camphor (*see* Camphor)
- Chloronitride of phosphorus (*see* Phos-
phorus)
- Chloronitriles, volatility in, **52**, **47**
- Chloronitrised camphor (*see* Camphor)
- Chloronitrite, potassium iridio- (*see*
Potassium)
- Chloronitroaminobenzenes, trisubstituted,
86, **46**
- Chloronitrobenzenes, isomeric, chlorina-
tion, **91**, **128**
- Chloronitrobenzoic acids (*see* Acids)
- Chloronitrocumpher, decomposition, **73**,
207
- Chloronitrocumphors, stereoisomeric, **78**,
262
- Chloronitrophenol, isomeric, **24**, **265**
- Chloronitrophenols, **21**, **252**—Constitution,
27, **118**
- Chloronitrotetramminecobaltic salts, **96**,
305
- Chloronitrous acid (*see* Acid)
- Chlororthoxyene, di- (*see* Dichloro-
orthoxyene)
- Chloropal in Cornwall, **14**, **71**
- Chloropentanol-1,5,4-, methoxytri-
(*see* Methoxytrichloropentanol-1,5,4-)
- Chlorophane, **94**, **290**
- Chlorophenates, penta- (*see* Pentachloro-
phenates)
- Chlorophenol, hexa- (*see* Hexachloro-
phenol)—Ortho- (*see* Ortho-
nitrodichlorophenol)—Penta- (*see*
Pentachlorophenol)—Tetra- (*see*
Tetrachlorophenol)—Tri- (*see* Tri-
chlorophenol)
- Chlorophenols, constitution, **27**, **118**—
Nitro- (*see* Nitrochlorophenols)—
Octo- (*see* Octochlorophenols)
- Chlorophenolsulpho acid (*see* Acid)—
Acids (*see* Acids)
- Chlorophenylacetone, methyl- (*see* Methyl-
chlorophenylacetone)
- Chlorophenylchloride, per- (*see* Perchloro-
phenylchloride)
- Chlorophosphamide, action of ammonia
on, **97**, **310**
- Chlorophosphure of nitrogen (*see* Nitro-
gen)
- Chlorophthalic acid (*see* Acid)
- Chlorophyll, **18**, **58**; **27**, **46**; **30**, **195**; **38**,
168; **40**, **276**, **300**; **49**, **124**, **237**; **53**
95, **180**; **76**, **23**—Absorption bands of,
classification, **27**, **295**—Action of light
on, **26**, **145**—Action on carbonic acid,
53, **23**—And its relation to light, **26**,
132—And xanthophyll, **35**, **210**—
Chemical properties, **12**, **110**—Chemis-
try of, **82**, **23**; **85**, **1**—Colouring-
matter of, **59**, **278**—Composition and
properties, **2**, **310**—Constitution, **49**,
2—Crystalline, **40**, **287**, **299**; **41**, **11**—
Crystalline secondary pigments
accompanying, **49**, **104**—Development
of, **52**, **263**—Globules under influence
of light, **21**, **45**—Grains of, conditions
determining movements in cells of
Elodea canadensis, **29**, **206**—Granule,
51, **13**—Instead of salts of copper in
preparation and preservation of
green fruits and vegetables, **35**, **188**
—Iron in, **49**, **265**—Manufacture and
use, **38**, **24**—Modified, from eucalyptus
globulus, **42**, **31**—Nature of, **65**, **275**—
Of geranium (*see* Geranium)—Pig-
ment, determination in leaves, **55**, **12**
—Preparation of pure, **48**, **302**—Pres-
ervation during decomposition of
leaves, **13**, **124**—Separation, **54**, **49**—
Solutions, supernumerary bands pro-
duced in, under influence of sulphur-
dized agents, **29**, **154**—Spectra of blue
and yellow, **62**, **280**—Spectroscopic
study of, **45**, **250**—Spectrum, **27**, **234**,
244; **28**, **195**; **90**, **291**—Vegetation of
plants not endowed with, **33**, **210**
- Chlorophylls, plurality of, **71**, **113**, **125**—
Several in same vegetable species,
70, **98**—Spectrum, **74**, **293**—Splitting
up fundamental band of, **76**, **35**
- Chlorophyllian assimilation of trees, **62**,
166
- Chlorophylline blue, **82**, **291**
- Chloropierin, **26**, **35**—Guanidine from, **19**,
69—Preparation, **9**, **3**
- Chloroplatinate, dimethylamine, dimer-
phism of, **67**, **145**—Nitroso- (*see*
Nitrosochloroplatinate)—Of potassium
(*see* Potassium)—Tetra- (*see* Tetra-
chloroplatinate)
- Chloroplatinates, **36**, **183**—And quantita-
tive of rare metals, **35**, **108**—Deter-
mination, **73**, **87**; **74**, **38**—Extracting
platinum from, **35**, **134**
- (Chloroplatinous acid (*see* Acid))
- Chloropropionic acid (*see* Acid)
- a*-Chloropropionic ether (*see* Ether)
- Chloropropionitrile, di- (*see* Dichloro-
propionitrile)
- Chloropropylene, *aa*-di- (*see* *aa*-Dichloro-
propylene)
- Chloropyridine, 3,5-di- (*see* 3,5-
Dichloropyridine)—Dimethyl- (*see*
Dimethylchloropyridine)—2,3,5-Tri-
(*see* 2,3,5-Trichloropyridine)
- Chloropyridine carboxylic acids (*see*
Acids)
- Chloropyridines, amino- (*see* Amino-
chloropyridines)—Tetra- (*see* Tetra-
chloropyridines)
- Chloropyrocaccol, tri- (*see* Trichloro-
pyrocaccol)
- Chloroquinon, tetra- (*see* Tetrachloro-
quinon)
- Chloroquinenechloride, tri- (*see* Tri-
chloroquinenechloride)
- Chlororthoxylenes, di- (*see* Dichloro-
orthoxylenes)
- Chlororuthenate of potassium (*see*
Potassium)
- Chloroselenate, luteo-cobaltic, crystalline
form, **83**, **47**
- Chloro-selenides of lead (*see* Lead)
- Chlorosis as affecting men and women,
25, **310**
- Chlorosulmates, nitrilopenta- (*see* Nitril-
lopentachlorosulmates)
- Chlorostannates of rare earths, **39**, **228**
- Chlorosulphate, luteo-cobaltic, crystalline
form, **83**, **47**—Of aluminium (*see*
Aluminium)
- Chlorosulphide of antimony (*see* Anti-
mony)—Of arsenic (*see* Arsenic)—
Of lead (*see* Lead)—Of mercury (*see*
Mercury)—Of nitrogen (*see* Nitrogen)
—Of phosphorus (*see* Phosphorus)—
Of silicon (*see* Silicon)
- Chlorosulphoanhydride, action on phenol
and phenolsulpho-potassium, **20**, **24**
- Chlorosulphobismuthate of lead (*see*
Lead)
- Chlorosulphobismuthite of copper (*see*
Copper)
- Chlorosulphonic acid (*see* Acid)
- Chlorosulphuric ether (*see* Ether)
- Chlorothallate of ammonia (*see*
Ammonia)
- Chlorothiocyanate, mercuric, **58**, **200**
- Chlorotoluene, di- (*see* Dichlorotoluene)
—Nitration, **83**, **131**
- Chlorotoluenes, di- (*see* Dichlorotoluenes)
—Tetra- (*see* Tetrachlorotoluenes)—
Tri- (*see* Trichlorotoluenes)
- Chlorotulidine, para- (*see* Parachloroto-
luidine)
- Chlorotulidines, isomeric, **20**, **323**
- Chlorotrinitrotoluene, **91**, **164**
- Chlorotungstates and cerium tungstates,
53, **228**
- Chloro urea, di- (*see* Dichloro)
- Chlorous acid (*see* Acid)—Anhydride (*see*
Anhydride)
- Chlorovanadates, **28**, **279**
- Chloroxy-carbonic ether (*see* Ether)
- Chloroxylonine from East Indian satin-
wood, **99**, **247**
- Chloroxyaphthalic acid (*see* Acid)
- Chlorozone, **53**, **109**
- Chlorophenol and nitro-derivatives, **26**,
230—Di- (*see* Dichlorophenol)—Mono-
(*see* Monochlorophenol)—Nitro- (*see*
Nitrochlorophenol)—Per- (*see* Per-
chlorophenol)
- Chlorophenols, disinfective action, **43**, **196**;
Chlorophenol sulpho-acids **23**, **135**
- Chlorophenyl, mono- (*see* Monochloro-
phenyl)
- Chlorosalicylic acid (*see* Acid)
- Chlorostannic acid (*see* Acid)
- Chlorosulphobenzid, di- (*see* Dichloro-
sulphobenzid)
- Chlorosulphoform, **14**, **247**
- Chlorotols, **28**, **84**
- Chloruration of camphor (*see* Camphor)
- Choay, E., Activity of the pancreatins,
78, **47**
- Choay, E., and A. Béhal (*see* Béhal, A.)
- "Choc en Retour," phenomenon of, **22**,
118
- Chocolate, analysis, **48**, **305**; **52**, **117**—
Copper in, **25**, **126**—Detection of
wheat starch in, **55**, **177**—Estimation
of sugar in, **79**, **110**—Examination,
47, **249**—Extraneous starch in, **38**,
174—Manufacture, **20**, **70**—Nickel
ores of New Caledonia, **70**, **279**
- Chodzko, M., Preparation of manure, **2**,
311—Prevention of epidemics, **28**,
110

- Chromates, 20, 250; 22, 35, 95; 23, 191; 47, 128; 49, 35—Amido- (*see* Amidochromates)—And free chromic acid, detection, 39, 135—And molybdates, ammoniacal double, 89, 235—Crystallisation, 15, 254 Di- (*see* Dichromates)—Double, 61, 277—Double, series of, 87, 21—Electrolytic estimation of lead in, 81, 226—Estimating, 12, 82—Hexahydrated double, 89, 235—In nature, 30, 196—In paper, appearance of, 70, 140—Manufacture, 11, 72—Of alkaline (*see* Alkaline)—Of ammonium (*see* Ammonium)—Of aniline (*see* Aniline)—Of calcium (*see* Calcium)—Of iron (*see* Iron)—Of polyatomic acids, 90, 95—Of rare earths, 72, 69—Of silver (*see* Silver)—Of sodium (*see* Sodium)—Of thorium (*see* Thorium)—Per- (*see* Perchromates)—Phospho- (*see* Phosphochromates)—Thermic researches on, 38, 33, 46
- Chromatim meta- (*see* Metachromatism)—Thermo- (*see* Thermochromatism)
- Chromatoscope, mono- (*see* Monochromatoscope)
- Chrome amalgam, 39, 84—Ammoniacal compounds, chemistry of, 50, 164—And iron, separation, 36, 100—And manganese in their fluorescent compounds, at what degree of oxidation? 57, 32—And manganese, rapid preparation, 67, 137—Atomic weight, 65, 179—Blacks, action in wool, 40, 24—Blue, 37, 133—Blue, artificial production, 62, 296—Colour, 21, 264, 276—Compounds, inactivity in comparison with vanadium in forming aniline-black by means of aniline salts in presence of chlorate, 39, 53—Determination, 50, 175; 53, 195—Echino- (*see* Echinochrome)—Ferro- (*see* Ferrochrome)—Green, 1, 94, 228; 4, 253; 7, 64, 180; 8, 278; 19, 131—Green, economical, 31, 197—In chrome iron, determination, 29, 285—Metallic preparation, 63, 305—Mordant, 29, 243—Mordants in dyeing, 55, 35—Mordanting, 60, 209—Ore, 76, 48 — Ore, decomposition, 64, 218—Ore, estimation of silica in, 80, 235—Ores, analysis, 5, 199, 254; 24, 286, 304—Ores, oxidation, 63, 273—Paints, analysis, 54, 329—Preparation, 69, 50—Residues, 37, 196—Salts, 71, 269—Salts, action on salts of aniline in presence of chlorates, 38, 287—Salts, reactions of, 31, 269—Uro (*see* Urochrome)—Yellow, 3, 13—Yellow and red, preparation, 8, 78—Yellow, test for, 28, 265—Yellows, determining, 64, 160
- Chrome alum (*see* Alum)
- Chrome ammonium compounds, 44, 227
- Chrome iron, alloy, 32, 136—Analysis, 61, 65—And steel, analysis, 35, 151—Attack of, 36, 153—Breaking up, 49, 201—Determination of chromium in, 47, 177—General reaction yielding compounds analogous to, 36, 81—Ore, 5, 56; 35, 39—Ore, analysis by borax method, 82, 97—Ore, ferro-chromium and chrome steel, analysis, 73, 1—Ore, assaying, 33, 53—Ore, composition, 20, 96—Ore, determination of chromium in, 44, 43—Ore, estimation of oxide of chromium in, 24, 305—Ore in Australasia, 57, 1—Ore of Japan, 44, 217—Ore, opening up, 44, 293—Ores, analysis, 6, 30
- Chrome oxide as a mordant, 30, 286—Changes of colour in solutions of salts of, 44, 24—Magnetic, 4, 111
- Chrome oxides, action of oxygenated water on, 54, 98
- Chrome peroxide, 29, 176
- Chrome phosphate, 32, 62
- Chrome selenides, 41, 219
- Chrome sesquioxide salts, 35, 253
- Chrome steels, analysis, 83, 67; 84, 75—Manganese in, 79, 157
- Chrome sulphides, 41, 219
- Chromisen and other alloys, 32, 265
- Chromic acetate (*see* Acetate)—Acid (*see* Acid)—Anhydride (*see* Anhydride)—Chloride (*see* Chloride)—Hydrate (*see* Hydrate)—Hydroxide (*see* Hydroxide)—Oxalates (*see* Oxalates)—Oxide (*see* Oxide)—Oxides (*see* Oxides)—Phosphate (*see* Phosphate)—Salt (*see* Salt)—Salts (*see* Salts)—Sulphate (*see* Sulphate)—Sulphates (*see* Sulphates)
- Chromiferous iron (*see* Iron)
- Chromism, meta- (*see* Metachromism)
- Chromite, analysis, 63, 241; 66, 17—Decomposition, 64, 241—Nodule in compact meteoric iron, 43, 283—Of cadmium (*see* Cadmium)—Of calcium (*see* Calcium)—Of magnesium (*see* Magnesium)—Phospho- (*see* Phosphochromite)
- Chromium, 20, 105; 70, 93—Amalgam, 72, 317—Ammonia salts of, 14, 246—Ammoniacal compounds of, 65, 273—And alloys, action of carbon monoxide on, 90, 101—And aluminium, separation, 11, 101; 76, 65—And boron compounds, 95, 22—And cobalt, separation, 11, 101; 76, 65—And iron, separation, 11, 101; 59, 232; 70, 310; 76, 65; 80, 284—And iron, separation by fused potassium nitrate, 89, 183—And magnesium, separation, 11, 101—And manganese, separation, 11, 101; 76, 65—And nickel, separation, 11, 101; 76, 65—And uranium, separation, 28, 63—And vanadium in solution together, volumetric estimation, 90, 237—And vanadium, separation, 89, 182—And

- zinc, separation, **11**, 101; **76**, 64—Atomic weight, **5**, 126; **49**, 42; **59**, 103; **93**, 55; **99**, 101; **100**, 180, 189, 213, 228, 278—Blue glasses with a base of, **78**, 85—Cast steel, **66**, 260—Compounds, **24**, 229; **53**, 23; **99**, 59—Compounds, absorption spectra, **67**, 207, 210, 231, 245, 255—Compounds, chemistry of, **44**, 24—Compounds, constitution, **87**, 61, 95—Compounds, containing pentavalent chromium, **92**, 34—Compounds—molecular transformation, **69**, 276—Crucible cast-steel, **36**, 198—Crystallised, preparation, **24**, 228—Detection as chromic acid, **47**, 248—Detection by peroxide of lead, **1**, 287—Determination, **39**, 131, 276; **40**, 31; **41**, 122; **43**, 233; **54**, 200; **96**, 260—Determination by standard liquids, **35**, 213—Determination, indirect titrimetric, **100**, 208—Double and triple oxalate containing, **44**, 187—Ebullition and distillation, **93**, 140—Electro-deposition, **81**, 16—Electromotive properties, **80**, 225—Estimation, **28**, 63; **47**, 293; **48**, 41; **77**, 156—Estimation as silver chromate, **98**, 100—Estimation by a mixture of iodide and iodate of potassium, **85**, 232—Estimation, colorimetric, **78**, 227, 239; **89**, 268—Extracting, **18**, 233—Extraction from iron-ores, **55**, 74—Ferro- (see Ferro-chromium)—In alloys, **96**, 1—In alloys, determination, **50**, 210—In chromate of iron, estimation, **35**, 107—In chrome iron, determination, **47**, 177—In chrome iron ore, determination, **44**, 43—In chrome iron ore, estimation, **77**, 141—In chrome iron ores, **21**, 266—In ferro-chromium, **79**, 158—In iron, **49**, 179; **82**, 292—In iron and steel, determination, **77**, 187—In iron and steel, estimation, **42**, 285; **57**, 153—In precipitate produced by ammonia, detection, **52**, 109—In presence of iron, detection, **1**, 253, 265, 301; **79**, 203—In siderurgical products, **78**, 11—In steel, **82**, 292—In steel, determination, **90**, 320; **91**, 3; **98**, 28—In steel and in iron alloys, **41**, 31—In tungsten alloys, estimation, **82**, 209—Melting-point, **86**, 13, 35, 60—Metallic, crystalline form, **2**, 305—Micro-chemical analysis, **64**, 150—Oxy-haloid derivatives of, preparation, **69**, 184—Pentavalent chromium compounds containing, **92**, 303—Pentavalent, compounds of, **95**, 47, 200—Preparation and properties of a new variety of, **95**, 251—Products of higher oxidation of, **92**, 31; **93**, 129—Qualitative test for, **65**, 221—Reduction, **14**, 143—Salts, **15**, 312; **93**, 128—Salts, action of heat on solutions of, **65**, 61—Salts and mercury salts, **45**, 61—Salts, experiments with, **21**, 143, 274—Salts, formic and acetic, **98**, 282—Salts, green, **64**, 25—Salts, variations of basic function in, **92**, 103—Stereochemistry of, **91**, 9—Sulphur, compounds of, **42**, 186
- Chromium acetate, **97**, 276—Behaviour of, **48**, 114, 119
- Chromium ammonia bases (see Ammonia)
- Chromium arsenic, compound of, **34**, 229
- Chromium binoxide and bichromate of potassa, combination, **25**, 214; **26**, 30
- Chromium boride, **95**, 107
- Chromium bromide, **1**, 82—Hydrated, **44**, 273
- Chromium carbide and iron carbide, preparation of double, **78**, 316—And tungsten carbide, double, **88**, 137
- Chromium carbonate, **7**, 112, 122
- Chromium chloride, convenient preparation, **60**, 82—Hydrates of, **93**, 200—Solutions of green, **72**, 138—Violet and green, **95**, 59
- Chromium chlorides, **58**, 183
- Chromium chromate, and analogous chromates, **6**, 121, 136, 145, 157, 169, 182, 207, 217
- Chromium dioxide and constitution of chromic acid, **94**, 265
- Chromium fluorides, **67**, 96
- Chromium formate, **70**, 210
- Chromium hydrate, **79**, 10
- Chromium molybdate, **3**, 223
- Chromium monochloride, transformation into sesquichloride, **53**, 225
- Chromium monosulphide, double compounds of aluminium sesquisulphide with, **95**, 286
- Chromium nitrate, **1**, 215
- Chromium oxalate, blue potassium, absorption-spectrum of, **51**, 152—Potassium (see Potassium)
- Chromium oxide, **3**, 223—Action of carbon monoxide on, **99**, 191—And sodium carbonate, behaviour of manganese peroxide and chloride of lime on ignition with, **45**, 80—Brown, **29**, 52—Estimating, **24**, 286—Hydrate of saline, **79**, 218—In chrome iron ore, estimation, **24**, 305—Influence on composition of pig-iron, **19**, 164—Magnetic, **4**, 111—Molecular conditions, **53**, 214—Preparation of spongy, **19**, 190—Reduction by boron, **94**, 303—Solvent for, **25**, 215
- Chromium oxides, magnetic, **98**, 78
- Chromium oxychloride, **13**, 156; **20**, 245—Action, **61**, 92—Action on pinene, **58**, 299
- Chromium phosphate, **45**, 243
- Chromium phosphide and manganese phosphide, **75**, 95—Preparation, **81**, 154
- Chromium pig-iron, **35**, 122
- Chromium protoxide and carbonate of soda, **77**, 177—Salts, decomposition of water by, **88**, 244—Salts, action of nitrogen dioxide on, **80**, 72
- Chromium selenite, **47**, 164
- Chromium sesquibromide, isomeric states of, **61**, 277
- Chromium sesquichloride and other metallic chlorides, compounds formed by, **50**, 80, 260—Crystals of a persistent green colour, **42**, 209—Hydrates, **51**, 61, 108
- Chromium sesquioxide, **1**, 110—Action of chlorine on, **42**, 24—Action of hydrochloric acid on the sulphate of, **86**, 95—And aluminium, compounds, **85**, 228—Black modification of, **94**, 229—Carbonate, **1**, 110—Change of colour in solutions of, **8**, 182—Crystallisation, **85**, 110—Determination, **50**, 18; **51**, 83—Salts, **65**, 107; **68**, 209—Sulphate, green, **91**, 58—Sulphates, action of hydrochloric acid on, **86**, 95; **87**, 74
- Chromium sesquisulphate, green solid, **65**, 11—Isomeric states of, **65**, 36—Pure, preparation, **49**, 125
- Chromium silicide, **77**, 188
- Chromium silicides, **88**, 11, 213—Preparation, **78**, 318
- Chromium steel, **19**, 72
- Chromium steels, preparation and properties, **90**, 160—Production and constitution, **38**, 8
- Chromium sulphate, **97**, 47—Conversion into bichromate of potassa, **1**, 119
- Chromium sulphates, double, production, **81**, 225
- Chromium sulphide, **4**, 125—Crystalline, properties of, **73**, 35
- Chromium sulphocyanide, **16**, 221
- Chromium sulphocyanides, double, **17**, 32
- Chromium tetroxide compounds, **98**, 282
- Chromium trioxide, action on iodine, **26**, 245—Experiments with, **95**, 100
- Chromium tungstate, crystalline, **68**, 68
- Chromium tungsten, preparation, **78**, 318
- Chromocyanide of potassium (see Potassium)
- Chromides, **55**, 309
- Chromometer for moderately deep tints, **57**, 77—Helio- (see Heliochromometer)—Rotary, Riddale's, **55**, 125
- Chromometrical analysis (see Analysis)
- Chromometry, **42**, 48
- Chromo-organic acids (see Acids)
- Chromopyrosulphuric acid (see Acid)
- Chromosphere, new method of viewing, **27**, 25—Photography of, **42**, 60
- Chromosulphates, **65**, 147
- Chromosulphochromic acid (see Acid)
- Acids (see Acids)
- Chromosulphuric acid (see Acid)
- Chromotropic violurate (see Violurate)
- Chromous acetate (see Acetate)—Bromide (see Bromides)—Carbonate (see Carbonate)—Chloride (see Chloride)—Chlorides (see Chlorides)—Salts (see Salts)—Sulphate (see Sulphate)
- Chromoxychloride chromate, **24**, 133
- Chromyl amide, **80**, 114
- Chromyl chloride, action on stilbene, styrene, and phenanthrene, **90**, 250—Action on terpinene and on limonene, **99**, 248—Oxidation of pinene with, **88**, 22
- Chromyl dichloride, action of ammonia on, **53**, 165—Action on iodine, **28**, 138—Preparation, **95**, 68
- Chromyl subchloride, **100**, 36
- Chronographs, electric, **30**, 20
- Chronometers, employment at sea, **28**, 106—Spiral regulator, **29**, 196
- Chrostchoff, P., Barium salts, **56**, 22—Contributions to knowledge of ethylphenol and ethylbenzol sulphonic acids, **31**, 41—Cryoscopic researches, **82**, 303—Electro-conductivity of saline solutions, **59**, 301, 312—Heat of solution of some mixtures, **46**, 103
- Chrostchoff, P., and A. Martinoff, Coefficients of chemical affinity, **55**, 140
- Chryptidine, **48**, 204
- Chrysammates, **25**, 244
- Chrysammic acid (see Acid)—Ether (see Ether)
- Chrysaniline, **20**, 178; **51**, 24—Colouration of maccaroni, etc., with, **45**, 221—Methylation of, **93**, 125
- Chrysanic acid (see Acid)
- Chrysanthemum, essence of, **82**, 67
- Chrysanthemums, culture, chemical study of, **89**, 60
- Chrysazin and anthraquin from anthracene, synthesis, **39**, 42—Series, anthracene compound belonging to, **40**, 32
- Chrysen, **10**, 243; **15**, 175; **24**, 34—And pyren, relations of fluorescence between, **31**, 219—And pyrene, fluorescent relations of, **31**, 35, 45
- Chrysenine, **30**, 69
- Chryseazarin, **31**, 269
- Chrysin and its haloid derivatives, **28**, 97—Azobenzene derivatives of, **78**, 20—Synthesis, **81**, 276—Tecto-chrysin, and higher homologues, **35**, 85
- Chrysic acid (see Acid)
- Chrysochinon, **30**, 109
- Chrysocolia, **74**, 114—From Peru, occurrence of diaptase on, **37**, 223—Specimens, **36**, 18
- Chrysogen, **13**, 202—And anthracene, fluorescent relations of, **26**, 199
- Chrysoidin, **35**, 64, 105, 163
- Chrysolin, a yellow derived from resorcin, **36**, 136
- Chrysophanic acid (see Acid)
- Chrysophenol, methylation of, **94**, 218
- Chrysorobin and alleged chrysophanic acid in goa-powder, **39**, 42—Constituents of commercial, **86**, 265
- Chrysotile, analysis, **51**, 203; **52**, 30
- Chrystal, G., address to Physical and Mathematical Section of British Association, **52**, 157
- Chrystal, W. J., analysis of German muriate of potash, **44**, 80

 Discovery in Algeria and Turkey, **21**, 35—
 Distillation, **65**, 11—
 Distillation, apparatus for, **8**, 229—
 Distillation, by-products of, **53**, 204—
 Distillation, collecting and utilising products resulting from, **8**, 181—
 Distillation, residual product from, **48**, 229—
 Dry, carbonisation of, **21**, 119—
 Dust, **74**, 51—
 Dust and fire-damp, ignition of, **64**, 24—
 Dust explosions, phenomena of, **65**, 164—
 Dust, gases "enclosed," **68**, 187—
 Dust, influence in colliery explosions, **44**, 16—
 Dust, part played by, in producing explosions, **38**, 139—
 Dust, substances to agglutinate, **21**, 71—
 Dyes derived from, colouration of wines with, **35**, 31—
 Dyes in 1818, **20**, 284—
 Experiments on, **70**, 161—
 Extracting oils from, **1**, 227—
 Field of Ballycastle, geological age of, **23**, 32—
 Fires, blue flame in, **41**, 22, 47—
 Formation, **22**, 72; **25**, 82; **39**, 262; **57**, 263; **60**, 263, 275—
 Formation, chemistry of, **70**, 91—
 Formation in Banate, Hungary, **22**, 202—
 From Cape Breton, **29**, 81—
 From Saarbrück, **20**, 287—
 Gases from, **82**, 24—
 Gases occluded in, **24**, 271—
 Heating with, **48**, 57—
 Humic matter in, **99**, 23—
 In Algiers, **46**, 232—
 In Brazil, **21**, 119—
 In California, **4**, 84—
 In Chili, **25**, 47—
 In Eastern Hemisphere, **17**, 50—
 In Holland, **7**, 131, 190—
 In Island of Sudera, analysis, **32**, 8—
 In Norway, **24**, 134—
 In Russia, **31**, 133; **32**, 79—
 Iowa, pyrites of, relative proportion of iron and sulphur in, **25**, 71—
 Japanese, **74**, 76—
 Lignite, from Devonshire, gases enclosed in, **35**, 249—
 Limed, employment in gas making, **48**, 173—
 Malowka, **20**, 106—
 Measures at Westville, water from, **23**, 189—
 Measures, cerium in, **42**, 258—
 Measures, fossil resins from, **59**, 1—
 Mechanical preparation, **27**, 22—
 Mine, burning, utilising, **22**, 94—
 Mine, explosion of carbonic acid in, **40**, 276—
 Mine of Ballintoy, **27**, 116—
 Mines, explosions in, **15**, 58; **39**, 191, 222, 233, 249—
 Mines, fire-damp in, **34**, 110—
 Mines, fire-damp in, diffusion of, **38**, 59—
 Mines, fire-damp in, preventing explosion of, **26**, 196, 238, 250; **36**, 248—
 Mines, probable exhaustion, **17**, 226, 236—
 Mineral, soot from, composition, **82**, 6—
 Mining, **25**, 203—
 Moistened, **29**, 134—
 Nitrogen in, **47**, 8—
 Nitrogen in, estimation, **46**, 209—
 Non-caking, carbonisation of, **21**, 120—
 Obtaining products from, **5**, 236—
 Of Bonchamp, heat of combustion, **51**, 190—
 Of Muaraze, analysis, **47**, 11—
 Of South Wales, geological survey on, **98**, 12—
 Of Upper Silesia, **21**, 192—
 Old and new, **20**, 204—
 Phosphorus in, **82**, 8—
 Pits, minerals and salts found in, **8**, 209—
 Pits, preventing explosions in, **20**, 177—
 Pre-carboniferous, analysis, **76**, 186—
 Properties of, **2**, 51—
 Purifying, **8**, 33—
 Question, Royal Commission on, **14**, 12—
 Red colouring matters of, **53**, 155—
 Small, used on the Tyne, quality of, **39**, 30—
 Soda in, **7**, 145, 168, 180—
 Soot, metals in, **26**, 205—
 Spontaneous ignition, **64**, 155—
 Steam-generating power, **21**, 264—
 Substance resembling artificial tannin from, **14**, 206—
 Substitute for, **8**, 146—
 Sulphur in, **41**, 201—
 Sulphur in, estimation, **5**, 245; **24**, 76; **26**, 145; **27**, 53; **30**, 211; **31**, 261; **40**, 237, 253; **43**, 50; **59**, 168; **63**, 192; **78**, 254; **82**, 296—
 Tanning,

- alkaline extract for, 56, 239—Treatment for obtaining solid and liquid hydrocarbons, 4, 68; 7, 199—Valuation for steam boilers, 64, 209—Value of, 2, 48—Vanadiferous, analysis, 68, 234—Volatile combustible matter in, 94, 308—Volatile constituents, 47, 214—Waste, utilisation, 27, 47, 40—Winding machine, atmospheric, 27, 84
- Coal gas, 3, 83, 91, 68, 83, 98; 15, 127, 143, 155—Action on caoutchouc, 75, 24—Action on iron pipes, 2, 93—Analysis, 55, 297—And carbon monoxide, 50, 189—And pyrogenous carbides, 33, 200, 180—Apparatus for showing combustion of air in atmosphere of, 58, 35—As a labour-saving agent, 49, 74, 80—As a possible source of contaminating substances to be tested for ammonia, 17, 164—At Munich, bicarbonate of ammonium in, 21, 227—Behaviour with fatty oils, 1, 167—Benzol, 35, 155—Carbonic oxide in products of combustion of, 41, 146—Carburisation, results of experiments on, 11, 126—Combustion, heat of, 68, 62—Combustion, incomplete, 30, 229—Combustion of air in, 47, 55—Combustion of detonating mixtures formed with, 51, 248—Combustion, production of ozone during, 41, 98—Combustion, products of, 41, 169; 70, 83—Combustion, sulphuric acid a product of, 24, 192—Combustion, sulphurous and sulphuric acids in products of, 74, 24—Composition, 33, 200; 34, 145—Constituents, 18, 37; 27, 106—Detection of bisulphide of carbon in, 2, 266; 3, 14, 128, 330—Detection of sulphur in, 22, 203, 307; 23, 311—Development of light from, 66, 1, 14—Discovery of, 15, 109—Estimation of benzol in, 81, 247—Estimation of hydrogen sulphide in, 47, 174—Estimation of naphthalene in, 96, 292—Extraction of benzol from, 20, 34, 235—Flames (*see* Flames)—Free nitrogen in purified, 75, 239—Heating power, 41, 41; 51, 142—Igniting-point, 6, 2—Influence of caoutchouc tubing on its illuminating power, 26, 229—Influence on vegetation, 26, 83—Iron in, 66, 54—Manufacture, 5, 355—Manufacture of alcohol from, 7, 1, 17, 169—Manufacture, utilisation of by-products from, 23, 203—Manufacture, utilisation of waste products of, 16, 31, 44, 55, 68, 91, 95, 106—Of Metropolis, 34, 223—Oxygen in, 80, 56—Part played by benzene in poisoning by, 89, 74—Photometry of, 24, 37—Preparation of hydrogen sulphide from, 47, 145—Product from, 37, 95—Products, examination of soil for, 42, 97—Proposed substitute for, 27, 86—Purification of, 1, 94; 2, 58; 5, 96, 112; 11, 23; 20, 192; 28, 17—Purifier, 28, 262—Purifying, 7, 215; 8, 229; 24, 218, 230—Purifying and drying, 67, 216—Removal of bisulphide of carbon from, 2, 77; 13, 8—Soda in, 10, 20—Sulphide of carbon in, 21, 95—Sulphur in, 21, 204; 22, 203, 307; 33, 210—Sulphur in, estimation, 7, 73; 17, 89, 259, 292—Sulphurous impurity in, 26, 267—Sulphuric acid in, estimation, 83, 217—Synthesis of trimethylamine and pyrrol from, 51, 15, 146—Test for ammonia in, 22, 120—To burn oxygen or air in, 19, 154—To detect presence of atmospheric air in, 18, 175—To replace, 50, 273—Valuation, 21, 228, 240
- Coal gases, condition of impurities in, of high and low illuminating power, 30, 4
- Coal naphtha, action of sulphuric acid on more volatile portion of, 13, 73—Pure benzole from, 1, 85
- Coal oil in S. Paulo, 14, 72—Light, 15, 242—Manufacture in America, 1, 180—Manufacture of gas from, 4, 317
- Coal oils, clarifying, 1, 192—Oils, product from, 3, 342—Oils, use in preparation of alkaloids, 31, 261
- Coal pyrites, examination for arsenic, 2, 201
- Coal tar, 27, 35—Acids (*see* Acids)—Action of high temperatures on, 39, 137—Analysis, 51, 283, 296—And ammonia, 56, 37—Anthracene from, 27, 114—Anthracene in, 34, 94—Benzenes (*see* Benzenes)—Carbazol from, 40, 44—Chinoline, 49, 94—Colour industry, jubilee of, 93, 88, 302; 94, 34, 42, 56, 226—Colouring matters from, 3, 346; 8, 4—Colouring matters from, history, 10, 8, 266—Colouring matters, influence of time on transformation of, 55, 82—Colours, 15, 252; 20, 250; 22, 17, 29, 40, 53, 64, 79, 92, 100, 324; 23, 52, 296, 307; 24, 5; 27, 75; 39, 189, 218—Colours, absorbent power of starch for, 9, 38—Colours, destructive distillation, 53, 102—Colours, distinguishing, 31, 229—Colours from a sanitary point of view, 54, 62—Colours, identification, 42, 191—Colours in artificial flower trade, 51, 275—Colours in white wines, 75, 264—Colours in wines, detecting, 53, 63—Colours, reaction for, 54, 213—Composition and physiological properties, 30, 262—Coumarone in, 63, 248—Cresol, 29, 282—Cresol, nature and derivatives, 27, 318—Cresols, 23, 262—Cresols in isomeric, 28, 215—Cumol of, 13, 267—Distillation, 38, 288, 307; 39, 172; 46, 36—Distillation products, 21, 203; 22, 213—Dyes, 7, 292—Higher phenols in, 51, 118—Hydrocarbides from, autoxidation, 88, 67—Hydrocarbons, 10, 82; 13, 253—Industry in England and Germany, relative progress, 84, 185, 197—Industry, progress, 41, 283—Lutidine of, 49, 148—Naphtha, adulteration, 58, 235, 247—Oil products burning between 161° and 169°, 25, 71—Oils, aniline and its homologues in, 29, 284—Oils, isomeric xylenes and cumens met with in, 21, 154—Oils, solubility of sulphur in, 19, 262—Oils, treatment of violet colours from, 9, 82—Oils which boil at about 200° C., 20, 12—Physiological properties of, 30, 262—Pitch, 27, 35, 83—Preparation of artificial colouring matters with products extracted from, 2, 123, 148, 172, 196, 221, 281, 291—Preservative properties of, 8, 190—Products, 18, 238—Products in wines, detection, 50, 187—Products, lecture on, 61, 38—Products, testing, 39, 173—To prevent potato disease, 5, 42—Synthetical and analytical studies on, 15, 227—Xylol in, 21, 191
- Coates, J. E., Examination of the lighter constituents of air, 95, 16
- Coates, J. E., and J. K. H. Inglis (*see* Inglis, J. K. H.)
- Coates, J. E., K. J. P. Orton, and Frances Burdett (*see* Orton, K. J. P.)
- Coats, manufacture, 1, 81
- Cobalt, 41, 74; 67, 310—Action of acetylene on, 74, 1—Action of antimony trichloride on, and its alloys with antimony, 99, 23—Action of arsenic chloride and of arsenic on, 98, 179—Action of haloid compounds of phosphorus on, 74, 84—Action of silicon chloride on, 93, 178—Action of zinc on, 33, 231—Action on acetylene and ethylene, 82, 91—Alkaline (*see* Alkaline)—Amalgam, 39, 84—Ammonio-salts of, 14, 265—Analysis, electrolytic, 90, 307—Analysis, microchemical, 64, 52—And aluminium, separation, 57, 125; 75, 193; 76, 68—And ammonia compounds, 4, 290—And arsenic, separation, 35, 141—And bismuth, separation, 72, 61—And boron compounds, 96, 107—And carbon monoxide, volatile compound of, 98, 145—And chrome iron, manganese, etc., amal-
- gams of, 39, 84—And chrome salts, 71, 262—And chromium, separation, 11, 101; 76, 65—And copper alloys, 52, 116—And iron, relation, 59, 93—And iron, separation, 36, 40; 44, 76; 56, 64; 57, 125; 58, 208; 63, 194; 64, 165; 76, 65, 248, 279, 302; 88, 232; 89, 280—And manganese alloy, 22, 34—And manganese and their alloys with copper, 21, 153—And manganese, separation, 11, 147; 13, 45, 133; 57, 125; 76, 65—And nickel alloys, 52, 116—And nickel and manganese, separating, 13, 45, 133—And nickel and zinc, separation, 47, 273—And nickel, colour relations, 42, 56—And nickel, detection when present together, 32, 44, 102; 45, 46; 90, 109; 98, 24—And nickel, distinction in mixed solution, 41, 74—And nickel, estimation and separation, 22, 96—And nickel, fusion, 35, 166—And nickel, nitrous acid compounds of, 14, 33—And nickel, physical properties of pure, 91, 162—And nickel, researches on, 66, 84, 258—And nickel, separation, 2, 85; 11, 125; 13, 45, 133, 299; 20, 154; 22, 96; 34, 255; 36, 150; 40, 268; 43, 7; 48, 262; 49, 150; 51, 72; 52, 301; 57, 125; 58, 244; 59, 208; 60, 54; 63, 254, 264, 280, 293; 64, 224; 69, 112, 128, 142; 71, 45; 75, 193; 76, 65; 78, 323; 85, 117, 269; 88, 184; 96, 298—And nickel, separation by electrolytic method, 84, 24—And nickel, separation from iron, 44, 76—And nickel, separation from their ores, 2, 85—And nickel separation, qualitative, 82, 207—And silicon, compounds, 86, 197—And tin alloys, 96, 47, 161, 186—And zinc, separation, 1, 95; 29, 193; 47, 273; 55, 236; 57, 125; 76, 65—Atomic weight, 7, 43; 16, 25; 310, 20; 24, 86, 234; 53, 287; 62, 40, 52, 109; 69, 179; 74, 110; 77, 20, 30; 79, 199, 208, 219; 81, 112, 125, 139; 93, 55; 95, 76, 86, 209; 99, 69; 100, 278—Bases, ammoniacal, 35, 84—Bases, ammoniacal, modes of formation, 16, 65—Colours, 70, 62—Compound, 73, 228—Compounds, analysis, 87, 201—Compounds, spectra of, 27, 241—Constitution, 77, 213—Decomposition, 59, 29, 39, 64, 72, 149—Depositing on metals, 35, 166—Detection, 65, 289—Detection in presence of iron and nickel, 47, 94—Detection of nickel in presence of, 96, 257—Determination, 14, 33; 41, 15, 25, 184; 42, 75; 47, 248; 63, 254, 264, 280, 293; 87, 201; 88, 184—Determination, indirect titrimetric, 100, 208—Electrochemical reduction, 6, 126—Electrometallurgy of, 38, 70—Equivalents, 15, 240—Estimation in presence of arsenic, 18, 235—Estimation in presence of nickel, 10, 215; 56, 27—Estimation in presence of nickel, manganese, and other metals, 59, 51—Estimation, phosphate method, 83, 37—Glass, change in absorption spectrum of, 63, 105—Green compounds produced by oxidising agents, 82, 266—In Cleveland ironstone, 8, 136—In manganese ores, determination, 65, 75—In New Caledonian ores, 82, 66—In nickel, determination, 32, 266—Magnetic hysteresis of, 79, 310—Magnetisation of, 33, 266—Magnetism of, 36, 166—Metallic, solution for depositing, 59, 64—Metallurgy of, 38, 268—Nature of, 60, 8—New locality of, 21, 237—Ores, analysis, 29, 193; 30, 16—Ores, Chinese treatment of, 58, 100—Passivity of, 60, 157—Poisonous nature of, 28, 214—Precipitation by sulphuretted hydrogen, 20, 276—Precipitation, influence of ammonia and its salts on, 4, 156—Pure, thermal expansion, 79, 220—Purposes, 21, 100—Reaction, 12, 58—Report on, M. Gaiffe's galvanic deposits of, 40, 73—Rosen, 21, 106—Salts, 71, 260; 74,

- 212—Salts, absorption spectra, **43**, 27—Salts, action of sulphuretted hydrogen on, **56**, 253—Salts, dehydration of, **29**, 183—Salts, oxidation in alkaline solution, **78**, 254—Salts, photographic properties, **68**, 13—Salts, sulphuretted hydrogen for purifying, **57**, 55—Salts, reaction of, **94**, 306—Salts, triamine (*see* Triamine)—Separation in presence of nickel, **82**, 73—Separation of nickel in presence of, **45**, 240—Solutions, anodic decomposition, **88**, 282—Tests for, **15**, 111, 137, 328; **23**, 290; **39**, 66; **70**, 36—Xantho, **21**, 106—Xantho-compounds, **10**, 250
- Cobalt acetate, oxidation by chlorine, **87**, 118
- Cobaltamine compounds, **97**, 8
- Cobaltamines, **43**, 25—Anhydroxy- (*see* Anhydroxycobaltamines)—Oxy- (*see* Oxycobaltamines)
- Cobaltammonium chloride, **36**, 115
- Cobalt arsenates, ammoniacal, **82**, 243
- Cobalt boride, **73**, 141
- Cobalt bromides, **29**, 161
- Cobalt carbamate, **3**, 125
- Cobalt chloride and alcohol compounds, **85**, 155—Hydrates of, **64**, 286—Hydrochlorate, **58**, 36, 59—Solutions, colour changes in, **87**, 115—Vapour tensions of solutions of, **64**, 320
- Cobalt chlorides, colour changes exhibited by, **86**, 33
- Cobalt fluoride, **66**, 2
- Cobalt fluosilicate, crystalline, **34**, 184
- Cobalt hydrate, spontaneous oxidation in an alkaline medium, **95**, 276
- Cobalt iodates, **85**, 287
- Cobalt iodides, **29**, 161
- Cobalt monosulphide, double compounds of aluminium sesquisulphide with, **95**, 286
- Cobalt oxide and nickel oxide, complex **39**, 81—And nickel oxide, separation, **43**, 106—And nickel oxide, and peroxide of iron, separation, **1**, 4—Estimation, **10**, 91—Higher, **87**, 201
- Cobalt oxides, **75**, 161; **87**, 131—Hydrated, **80**, 264
- Cobalt peroxide, **10**, 189; **51**, 72—And nickel peroxide, **59**, 183, 205—Formula of **82**, 179
- Cobalt phosphate, **3**, 342
- Cobalt phosphide, preparation, **81**, 154
- Cobalt sebate, **33**, 39
- Cobalt selenides, **82**, 255
- Cobalt silicide, **72**, 281; **83**, 154; **86**, 197
- Cobalt steels, constitution and properties, **92**, 45
- Cobalt sulphide, **75**, 11; **87**, 131
- Cobalt sulphides, **71**, 49
- Cobalt thiocyanate, hydrated, **85**, 180
- Cobalt ultramarine, **24**, 73
- Cobalt xanthanate, **82**, 94
- Cobalt xanthate, **82**, 94
- Cobalt yellow, lead salt corresponding to, **2**, 331
- Cobaltic acid (*see* Acid)—Ammonio- (*see* Ammoniocobaltic)—Dioximes (*see* Dioximes)—Dioximines (*see* Dioximines)—Molybdates (*see* Molybdates)—Nitrites (*see* Nitrites)—Pentamins (*see* Pentamins)—Sulphide (*see* Sulphide)
- Cobalticvanide compounds, **42**, 185—Of potassium (*see* Potassium)
- Cobaltivanides, **81**, 280—Of potassium (*see* Potassium)
- Cobalting by wet way, **24**, 168
- Cobaltinitrite method, application to estimation of potassium in soils, **99**, 7
- Cobaltinitrites, studies on, **98**, 255
- Cobaltinoxalates of alkaline (*see* Alkaline)
- Cobaltisation of iron (*see* Iron)—Of steel (*see* Steel)
- Cobaltite, **75**, 161—Of magnesium (*see* Magnesium)
- Cobaltites of barium (*see* Barium)
- Cobaltammonium compounds, **36**, 213
- Cobaltous chloride (*see* Chloride)—Hydrates (*see* Hydrates)—Salts (*see* Salts)
- Cobb, B. G., Account of influence of high potential discharge on amorphous gold, **99**, 209—Account of some phenomena observed during the electrolysis of concentrated sulphuric acid, **90**, 26
- Cobb, J. W., Formation of silicates, glasses and glazes, **99**, 297
- Cobenzl, A., Separation of tungsten from antimony, arsenic, and iron, **46**, 13
- Coblentz, W. W., "Investigations of Infra-red Spectra" (review), **93**, 56
- Cobley, T., Manufacture of fluosilicates and silicates of lead and baryta, etc., **6**, 129—Manufacture of fluosilicates of tin, zinc, and baryta, etc., **6**, 130—Manufacture of white-lead, zinc-white, and glazier's or potter's lead, **4**, 200—Olive oil residues, **25**, 35—Preserving and indurating timber, wood, and other vegetable matters, etc., **6**, 130
- Cobra-poison, action of reagents on, **54**, 197, 209—Poison immunity against, **72**, 12
- Coca, **4**, 127—Alkaloid of, **2**, 83—Erythroxylon, **4**, 127—Erythroxylon, group in India, **58**, 249, 260, 273—Leaves, alkaloid and other constituents of, **4**, 47—Leaves, chemical constituents, **4**, 113—Leaves, nutritive properties of, **23**, 167
- Cocaine, **11**, 190; **51**, 72—And stovaine, comparative action, **100**, 325—Assay of, **54**, 137—Chemical constitution, **51**, 249—Estimation, **83**, 222—Reaction, **62**, 153, 322; **67**, 254—Separation from animal remains, **60**, 110—Test for, **81**, 134
- Cocaine chlorhydrate, rotatory power of, **77**, 109
- Cocaine hydrochlorate, **51**, 90, 98, 112—Melting-point, **72**, 25—Rotatory power, **87**, 143—Testing, **54**, 85
- Cocainum hydrochloricum, ammonia test of, **77**, 183
- Cocculus indicus, **23**, 46
- Cochenhhausen, F. v. (*see* von Cochenhausen, F.)

- Colour, 5, 13 — A forgotten, 33, 118 — And constitution, 74, 300 — And fluorescence, relationship to constitution, 94, 227, 205; 95, 68; 98, 253 — And light, unit of measurement of, 65, 250 — And structure, 93, 68 — And visible motion, music of, 38, 262 — Bases from furfural, 42, 24 — Blender, gradational, 57, 238 — Blind, spectrum of, 43, 47 — Blindness, 40, 240 — Blindness, application of diagram of colours to, 53, 167 — Blindness, experiments in, 60, 247 — Blue (see Blue) — Change, 34, 75 — Change in solutions of sesquioxide of chromium, 8, 185 — Changes exhibited by the chlorides of cobalt and other metals from standpoint of theory of electro-affinity, 86, 33 — Chrome (see Chrome) — Comparator for quantitative analysis, 37, 229 — Cross atomic, 65, 205 — Dove, 29, 81 — Green (see Green) — In organic compounds, origin of, 96, 283, 295 — In water, estimation, 31, 133; 34, 77 — Indian red (see Indian red) — Indicators, theory of, 87, 299 — Industry, coal-tar, (see Coal-tar) — Influence on reducing action of light, 33, 285 — Lakes, 56, 240 — Magenta (see Magenta) — Manufactory, explosion at, 31, 22 — Map (see Map) — Mixtures, law of, 30, 152 — Mixtures, lecture experiments on, 52, 22 — Murexide as a printing, 97, 191 — Of certain precious stones, 46, 33 — Of distilled water, 47, 72 — Of ions as a function of the atomic weight, 73, 198, 221 — Of light, 14, 34 — Of Nankin cotton, 29, 5 — Of oil, 18, 11, 24 — Of organic compounds, 91, 134 — Of soils, influence on their temperature, 38, 298 — Of stars, influence of aperture in diminishing intensity of, 17, 53 — Of vermilion, degradation by contact with copper and brass, 31, 86 — Origin, 57, 106; 65, 285; 66, 288, 298, 299, 311; 67, 27, 64, 111, 143, 147, 155; 68, 255; 73, 126; 91, 277 — Perception spectrometer, 100, 268 — Phenomena in photometry, 93, 266 — Photograph of solar spectrum in, 63, 120 — Photographic reproduction of, 63, 111 — Photographs (see Photographs) — Photography (see Photography) — Photometry (see Photometry) — Pigments (see Pigments) — Quinonoid theory of, 96, 266 — Reaction (see Reaction) — Reactions (see Reactions) — Relations of nickel and cobalt, 42, 56 — Reproduction by photographic methods, 75, 95 — Sensation, 47, 211 — Sensations of the eye, theory of the three fundamental, 44, 23 — Sensibility of eye to, 4, 49 — Sensitive plates (see Plates) — Sensitometers, calculation of colours for, 89, 242 — Standard, requirements of, 99, 130 — Terms used to denote, 45, 170 — Test by Eggert, 69, 259 — Tests for strychnia, 3, 301; 4, 113 — Theory of, chemical structure and physical properties associated with, 91, 266 — Tints, apparatus for comparison, 56, 275 — Violet, in ergot, chemical character and detection in flour, 48, 118
- Colours, action of daylight and electric
- are light on, 49, 51 — And absorption-spectra, and thin metallic films, 66, 163 — And incombustible paper, 48, 164 — And pigments, 21, 84, 120 — Angular distance of, 44, 150 — Aniline (see Aniline) — Applied to arts and industry, theory of, 36, 174 — Arsenic in, evil effects of, 26, 29, 39, 52, 68, 90, 102, 105 — Arsenical, 2, 83 — Azo (see Azo-colours) — Biliary, modifications of Gmelin's test for, 49, 218 — Blue (see Blue) — Calculation for colour sensitometers, 89, 212 — Caoutchouc, preparation, 1, 106 — Caramel (see Caramel) — Classification of, 39, 73 — Coal-tar, (see Coal-tar) — Cobalt (see Cobalt) — Complementary, 37, 272 — Complementary, application of law of, 46, 243 — Complementary, influence in decoration, 38, 306 — Corresponding to fundamental sensations, 43, 94 — Derived from coal, progress effected in preparation of, 39, 127 — Diazo (see Diazo-colours) — Distinction by artificial light, 38, 26 — Dyed, action of light on, 64, 110; 68, 155, 170; 70, 154, 169, 183; 74, 205, 218; 78, 175, 192, 205, 215 — Electro-chemical deposits of various, 46, 290 — Fixation by silica, 42, 49 — Fixed upon tissues, use of hydrosulphite of soda as a reagent in analysis of, 34, 154 — Fixing, in connection with printing and dyeing of woollen fabrics and yarns, 5, 97 — Fixing on fabrics and yarns, 3, 221 — For dyeing and printing, 2, 321; 3, 180; 7, 155, 239, 250; 9, 271 — For leather-staining, 49, 94 — For toys, inoffensive, 38, 233 — From caramel, 15, 242, 254 — From carboic acid, 7, 198 — From coal-tar, (see Coal-tar) — Green (see Green) — In metal glasses, in metallic films, and in metallic solutions, 92, 37 — Incombustible, applications of, 48, 182 — Insoluble, valuation, 38, 154 — Madder, detection, 21, 275 — Manufacture of, regulations for, 95, 72 — Mineral, manufacture in the United States, 53, 197 — Mixed, composition, analytico-synthetic, 23, 108 — Mixed, composition apparatus for, 23, 108 — Murexide, production of purple and rose-red in cotton printing, 1, 17 — Naphthaline (see Naphthaline) — Natural, photography of, 10, 276 — Natural, photography in, 71, 233 — New applications of, 48, 182 — Newton's, demonstrating by transmitted light, 87, 196 — Non-poisonous, 41, 282 — Numerical determination of power of distinguishing, 38, 154 — Of bodies (see Bodies) — Of certain insects (see Insects) — Of Flames (see Flames) — Of leaves (see Leaves) — Of substances of unalterable constitution, alteration in, 95, 47 — Oil, for printing, 28, 10 — On metals, preparation for obtaining, 23, 214 — Paris blue (see Paris blue) — Physical theory of the perception of, 72, 103 — Pigment, 19, 110 — Poisonous, 35, 135; 39, 253; 40, 144 — Preparation of, 3, 14, 180 — Primary, theory of three, 3, 387; 4, 187 — Process of applying to tin-foil for covering walls, 26, 277 — Produced during the tempering of steel, 60, 190 — Production, 8, 83 — Purple (see Purple) — Red (see Red) — Resin (see Resin) — Resorcine (see Resorcine) — Rhamnoxanthine (see Rhamnoxanthine) — Signification of, 29, 187 — Solid, found at Pompeii, 33, 130 — Spectral, combination by a second prism inverted, 44, 207 — Spectrum, change in hue by dilution with white light, 100, 297 — Spectrum, influence on development of animals, 39, 22 — Subjective phenomena of, 23, 59 — Supplementary, 65, 103 — Tar, and the electric light, 40, 47, 53 — Tar, determination, 61, 258 — Tar, noxious effect on human organism, 25, 71 — Tar, poisonous action of, 22, 107 — Theory of, 21, 238, 286 — Theory of,

- applied to Arts and Industry, 36, 174—Visibility and photographic activity, 20, 81—Vision of, 37, 203, 227; 42, 60; 46, 290—Water, arsenic in dark, 39, 263—Water, fading of, 54, 263, 279—Water, moist, for students, 39, 74
- Colouration, heat, 34, 108, 132—Of glass (see Glass)—Of glasses (see Glasses)—Of turmeric (see Turmeric)—Of water (see Water)
- Coloured acids (see Acids)—Cements (see Cements)—Derivatives of naphthalene (see Naphthalene)—Fires (see Fires)—Flames (see Flames)—Gases (see Gases)—Glasses (see Glasses)—Indicators (see Indicators)—Inks (see Inks)—Light (see Light)—Lights (see Lights)—Liquids (see Liquids)—Reactions (see Reactions)—Salts (see Salts)—Solutions (see Solutions)—Surfaces, Measurement of luminosity of, 58, 265
- Colouring cochineal (see Cochineal)—Electrochemical, 4, 5—Material, blue (see Blue)—Materials, compounds of basic with acid, 82, 279—Materials of benzene series, new diazo primary, 80, 41—Materials with acid function, 82, 183—Of confectionery (see Confectionery)—Power of lead chromate, 100, 12—Power of litmus, 74, 297—Principles, determining nature of mixture of, 6, 160—Principles in madder, 17, 141—Principles of Rubia sikkimensis, 68, 253—Principles of stones and rocks, 2, 59—Properties of picric acid, 99, 252
- Colouring-matter, 1, 233; 38, 200, 232, 72, 57—Blue (see Blue)—Extraction from rags and vegetable textile fabrics, 3, 125—Ferruginous, of red wines, 38, 55—For dyeing textile materials and fabrics and other substances, 2, 321—For glass, tungstic anhydride as, 91, 211—Forming in starch-paste, 45, 119—Found in the vase of St. Ambrosius, at Milan, 27, 76—From *Bignonia toecoma*, 83, 58—From cresylol, 35, 59—From dissymmetric tetramethylethylenephthylmethane, 88, 148—From lentise or mastio tree, 3, 180—From *Nyctanthus arborescens*, 96, 241—From refuse of ironstone, 6, 69—Green, of leaves, 1, 228—In bark of *Myrica nagi*, 74, 104—In British plants, 74, 278—In shell-fish, 65, 253—In wine, detection, 52, 261; 63, 106—In wine, detection of foreign, 12, 260—In wine, determination of nature of, 34, 238—Of blood, absence of iron in, 30, 252—Of chay root, 72, 57—Of cotton flowers, 100, 313—Of crude nitriles, 30, 196—Of digitale, 80, 304—Of flowers of *Butea frondosa*, 90, 32—Of fustic, 11, 126—Of Indian dye-stuff, "Tesu", 69, 71—Of indigo, constitution, 89, 238—Of Persian berries, 2, 307; 18, 194—Of rocks, 2, 71, 94—Of wine, 20, 279; 29, 274; 38, 33; 47, 60—Of wine, test for, 29, 84—Patents in Berlin, 55, 12, 59—Red, 8, 252; 9, 272—Red, found in ordinary and secondary pinion feathers of Cape Lory, 16, 299—Sulphuretted, from paraphenyldiamin, 41, 81—Yellow, 37, 56—Yellow, from dinitrofluoresceine, 75, 239—Yellow, from rosaniline, 11, 218—Yellow, of leaves of *Arctostaphylos ura ursi*, 77, 208—Yellow, of *Sophora japonica*, 70, 303
- Colouring matters, 4, 39, 135, 156, 162; 7, 203; 29, 113; 64, 12, 38; 84, 12; 88, 137—Action of micro-organisms on, 58, 132—Alizarin, 37, 254—Analogous, 42, 166—And colours, 45, 209—Aniline, 3, 78; 4, 156, 196, 209, 220; 5, 140, 141, 151, 155; 7, 274; 25, 215—Aromatic, structure and generation of, 35, 76—Artificial, 11, 118—Artificial, applied in industry, 54, 61—Artificial, applied in manufactures, 53, 288—Artificial, composition of blue colours derived from tertiary monamines of chinoline series, 7, 85—Artificial, fixed on wool, silk, and cotton, effect of reagents on, 30, 54—Artificial, manufacture, 33, 118, 221—At the 1889 Exhibition, 61, 49—Azo, 41, 283—Azo, reduction of nitrated, 83, 239—Azoic, derived from chlorinised, bromised, and nitrated derivatives of phenetides, 80, 159—Azoic, reduction of ortho-nitrated, 85, 166—Azoic, rules of substitution in formation of, 80, 11—Basic, absorption, 76, 194—Belonging to azoic bodies, 39, 137—Berlin patents, 57, 41—Blue, for fibres and fabrics, 3, 11, 175, 255, 259, 349—Brown (see Brown)—By decomposition of nitronaphthalene and dinitronaphthalene, 5, 73—Chinoline (see Chinoline)—Chromised violet derived from diphenylcarbazide, 85, 166—Constitution, 57, 106—Cresol, 29, 197—Derivatives of substances allied to the natural, 94, 250—Derived from tar, treatment for purpose of making them applicable for painting, 10, 117—Developments in, 86, 16, 27—Dyeing and fixing, 4, 277, 306—Fixation, 1, 35—Fixation by means of metallic mordants, 46, 179—Fixed on tissues, resistance to light, 58, 60—For dyeing and printing, 8, 181, 192; 10, 118—Foreign patents for preparation of, 50, 225, 236—From aniline, 4, 156, 196, 209, 220; 5, 140, 141, 151, 155; 7, 274; 25, 215—From aniline and salts of similar nature, manufacture of, 3, 78—From coal, 40, 46—From coal oil, raw naphthalene, and from waste lime from gasworks, 4, 55—From coal-tar, 3, 140; 8, 4—From coal-tar, history of, 10, 8—From coal-tar, influence of time on transformation of, 55, 82—From diphenylethane, 100, 286—From naphthalene, 4, 197, 304; 5, 60, 97—From orcin, 18, 150—From oxidation of phenic acid, 6, 85—From oxy-compounds, 31, 31—From phenols, 42, 39, 44, 60—From phenylisoxazolone, 99, 156—From vegetable kingdom, 44, 94—Geranicin, 40, 277—In solution, 98, 258—In wines, determination of nature of, 34, 238—Lefevre's treatise on, 74, 74—Lichen, 36, 53—Madder, 21, 227; 30, 243; 35, 82, 176, 185; 37, 271; 48, 82—Manufacture, 3, 126; 9, 272—Method of distinguishing, 83, 216—Naphthol (see Naphthol)—Natural, 89, 18—New, 38, 232; 40, 169, 301; 42, 109, 304; 43, 12, 27; 44, 268—New class, 34, 143; 39, 202; 48, 105; 53, 24—New series, 71, 50—Obtained with protochloride of tin, 1, 228—Obtaining, 9, 272—Of decaying wood, 57, 122—Of diazo group, 48, 173—Of *Drosera* Whitakeri, 68, 134—Of Dyer's broom and heather, 80, 33—Of eosine group, manufacture, 56, 160—Of flowers of *Delphinium consolida*, 82, 265—Of flowers of *Hibiscus sabdariffa* and *Thespesia lampas*, 100, 265—Of green ebony, 85, 68—Of Indian dye-stuff, *Delphinium zailii*, 77, 126—Of leaves, 8, 32—Of New Zealand dyewood "Puriri", 78, 272—Of oxazine series, reaction of, 95, 92—Of safranin series, constitution, 80, 60—Of stilbene group, 90, 253, 254; 94, 229; 96, 316; 98, 243—Of triphenylmethane, 83, 142—On cotton fabrics, combination of, 4, 277—On tissues, resistance to light, 59, 313—Organic, action of reagents on, 34, 144—Patents for, 11, 130, 304; 50, 116; 54, 165—Pathological, in urine, 31, 41—Phenolic, reaction of, 79, 141; 86, 200—Preparing, 1, 81; 8, 181, 252; 14, 58—Preparing from aniline, 9, 50—Preparing with products extracted from coal tar, 2, 123, 148, 171, 194, 221, 281, 201—Red (see Red)—Soluble, produced by bacteria, 65, 88—Sulphonated, from triphenylmethane, 72, 109—Sulphonic, from triphenylmethane, 71, 161—Sulphurised, 76, 229—Testing, 17, 286; 18,
- 250—Transformation of spectra of different, 38, 10—Triphenylmethane (see Triphenylmethane)—Vegetable, 1, 228; 2, 60; 76, 286—Yellow (see Yellow)
- Colourless bile (see Bile)—Globuline (see Globuline)
- Colson, Albert, Acetates of the alkaline earths, 89, 34—Action of bases and acids on amine salts, 84, 36—Action of carbon disulphide on silicium, 45, 276—Action of chlorine on barium acetate, 88, 269—Action of free bases upon salts, 75, 167—Action of hydrochloric acid on alkaline sulphides, 75, 35—Action of phosphorus perchloride on the aromatic ethers, 50, 295—Action of temperature on rotatory power of liquids, 67, 110—Alcohols derived from xylenes, 51, 49—Application of Blondlot rays to chemistry, 89, 234—Application of thermochemistry, 59, 282—Applications of Watts' principle to the dissociation of carbonates of lead and silver, 91, 201—Approximations between chemistry and physics, 54, 61—Butylenic base, 56, 269—Causes of the allotropic transformation of yellow phosphorus dissolved in essence of terebenthene, 97, 179—Causes of reciprocal displacement of two acids, 77, 188—Certain conditions of reversibility, 83, 142—Certain derivatives of metaxylene, 50, 79—Certain derivatives of residues of compressed gas, 55, 272—Change of sign of rotatory power, 70, 49—Chlorination of carbides, 56, 13—Chromic sulphates, 92, 65—Class of nitriles, 71, 76—Colouring matters from tetrahenzyl ether of benzidine, 59, 206—Combination of plumbic acid with the organic acids, 87, 178—Condensed chromic sulphates, 95, 83—Constitution of chromic sulphates, 93, 127—Cryosecopy of sulphates, 91, 118—Cyanic ethers, 71, 38—Cyanic ethers and nitriles of the alcohols, 71, 294—Decomposition of metallic sulphates, 75, 59—Derivatives of erythrite, 56, 269—Derivatives of plumbic acid, 87, 238—Diffusion of solids into solids, 45, 22, 56—Dilution constants of saline solutions, 85, 35—Diquinolic base, 59, 11, 120—Displacement of mercury by hydrogen, 79, 263—Displacement of metals by hydrogen, 79, 47—Displacement of sulphuric acid in alkaline bisulphates by water, 87, 118—Erythrite, 55, 81—Existence of a green sulphate of chromium sesquioxide, 91, 58—Formula of ordinary tartaric acid, 67, 168—Formula of M. Guye, 72, 49—Importance of temperature in direct decompositions, 99, 203—Impossibility of foretelling by thermochemistry the relative stability of corresponding compounds of silver and lead, 99, 252—Inversion-points of dilution, 84, 231—Irreversibility in chemical reactions, 77, 23—Laws of Berthollet, 62, 62; 63, 153—Limited reaction, 66, 257—Manufacture of phosphoric acid, 42, 282—Method of preparing ethylene hydrocarbons from ether salts, 99, 34—Neutral salts of amines of fatty series, 63, 177—New carbo-silicated compounds, 45, 244—New method of determining sulphur in certain native sulphides, 40, 205—New plumbic derivatives, 88, 59—Non-existence of a common solvent for yellow and red phosphorus, 97, 35—Origin of the Blondlot rays emitted during chemical reactions, 89, 274—Phenomenon observed with regard to a dissolved chromic salt, 95, 106—Physical researches on isomerism of position, 55, 128—Rarefied gases, 83, 35—Reaction of green chromic sulphate, 91, 304—Reactions of organic alkalies, 62, 321—Reciprocal displacement of metals, 80, 202—Report on researches of, 55, 207—Researches on alkaloids, 59, 193—Researches on xylenes, 50, 45

- Reversion of phosphates soluble in ammonium citrate, **41**, 173—Rotatory power of cyclic bodies, **67**, 25—Rotatory power of salts of diamines, **66**, 209—Salts of alkaloids, **62**, 68—Saponification of simple aromatic esters by neutral bodies, **50**, 232—Semicatalysis, oxidation of hydrocarbons in presence of phosphorus, **97**, 24—Stereochemistry of malic compounds, **67**, 13—Study of organic alkalies, **62**, 61—Synthesis of hydrochlorates of amides, **73**, 48—Temperature in chemical reactions, **77**, 274—Transformation of solutions of yellow phosphorus into red phosphorus, **97**, 118—Variations of the basic function in chromium salts, **92**, 105—Volumetric estimation of hydrogen and chemical tensions, **81**, 105
- Colson, A., and G. Darzens, Thermic constants of certain polyatomic bases, **69**, 85

- Composition for preserving metals, woods, etc., **14**, 203—For protecting and preserving metals used in construction of ships, **11**, 263—For rendering unflammable linen, flax, silk, cotton, woodwork, etc., **8**, 180—To be used in process of boiling,

preparing, or bleaching vegetable substances, 8, 84
 Compound $\text{Al}_2\text{Cl}_6\text{IHS}_6$, dissociation and thermic examination, 83, 179— $\text{C}_{24}\text{Cl}_{16}$, 59, 262— NH_2 , 46, 35—Or simple? 54, 239—Organic, containing boron, 2, 18—Organic, of great double refraction, 80, 291
 Compounds and mixtures, distinction between, 70, 90—Aromatic, action of sulphur dioxide and aluminium chloride on, 93, 180—Aromatic, containing bismuth, 78, 24—Aromatic, formation from ethyl glutaconate, and its derivatives, 83, 139, Aromatic, hydrogenation, 26, 232, 277—Aromatic, influence of carboxyl group on poisonous action of, 66, 168—Aromatic, magnetic rotatory power of, 73, 304—Aromatic, molecular volumes of, 61, 55—Aromatic, obtained from hydroaromatic series, 89, 93; 93, 264—Aromatic, reduction, 15, 188—Aromatic, ultra violet absorption spectra of, 92, 7, 9—Azoic, 89, 22—Azoic, examination, 87, 118—Azoic, with ortho-substituted alcohol functions, transformations into indazolic derivatives, 89, 311—Constitution of co-ordinated, 97, 236—Formation by slow reactions, 14, 20—Gaseous (see Gaseous)—Halogen (see Halogen)—Homologous, boiling-points, 69, 308; 89, 265—Homologous, laws deduced from boiling-point temperatures of organic, 26, 287—Homologous, regularity in melting-points of, 36, 52—Hydroxyazo (see Hydroxyazo-compounds)—Hypobiotic (see Hypobiotic)—Inorganic, 55, 110; 72, 221—Inorganic, action on optically active polyvalent alcohols and oxyacids, 92, 58—Inorganic, constitution, 77, 213; 78, 160—Inorganic, influence of living matter on, 54, 292—Inorganic, molecular properties of, 43, 191—Inorganic, molecular properties and action of, 59, 60—Inorganic, nomenclature for designation of, 94, 297—Inorganic, properties of, 78, 68, 74—Inorganic, systematic classification of, 89, 120—Iodoso (see Iodoso-compounds)—Metallic (see Metallic)—New class of, 66, 117—Of aromatic series, decomposition by potassium chlorate and hydrochloric acid, 22, 61—Olefinic ketonic (see Ketonic)—Organic, 26, 241—Organic, action of bromine on, 80, 239—Organic, action of magnesium on, 35, 117—Organic, action of oxidising agents on, in presence of excess of alkali, 17, 127—Organic, action of zinc ethyl on, 51, 51—Organic, action on alkaline sulphohydrates, 64, 202—Organic, action on ultra-violet rays, 62, 309—Organic, analysis, 3, 67; 16, 50; 90, 250—Organic, analysis and determination of constitution, 99, 100—Organic, and metallic halides, molecular combinations of, 95, 119—Organic, as solvents of salts, 65, 73—Organic, catalytic dehydration of, 98, 23—Organic, change and interaction in, 83, 223—Organic, chemical action exercised by electric discharge on, 77, 140—Organic, colour and absorption spectra, 91, 154—Organic, colour reactions of, 94, 297—Organic, combustion heat of, 42, 222; 43, 188; 51, 235; 59, 301; 60, 161—Organic, composition and absorption spectra, 60, 240; 61, 200—Organic, constitution and representation of, 14, 17—Organic, containing four atoms of oxygen, synthesis, 8, 111—Organic, containing halogens, action of zinc on, 35, 113—Organic, containing silicon, 80, 31—Organic, containing sulphur, formation, 83, 71—Organic critical constants and molecular complexity of, 85, 83—Organic, determination of halogens in, 35, 64; 50, 68; 95, 47; 99, 6—Organic, determination of halogens in chlorobromated, 97, 275—Organic, deter-

mination of latent heats of vaporisation of, 83, 72—Organic, determination of sulphur in, 18, 7—Organic, dispersion in, 61, 289; 62, 74, 85, 249; 63, 11—Organic, equivalent of, 36, 43—Organic, estimation of halogen bodies in, 87, 299—Organic, estimation of halogen elements in, 81, 162—Organic, estimation of hydroxyl derivatives in mixtures of, 99, 115—Organic, estimation of phosphorus in, 80, 180—Organic, estimation of simple bodies in, 80, 316—Organic, formation, 43, 187—Organic, formation, calorific phenomena which accompany, 11, 170, 182—Organic, halogen, and sodium thiosulphate, chemical dynamics of reaction between, 91, 197; 99, 20—Organic, halogens in, 79, 67—Organic, heat of combustion, 87, 238; 88, 233—Organic, heats of formation, 50, 15, 32, 283—Organic, importance of formic aldehyde as product of partial combustion of, 84, 15—Organic, in vegetable tissues, detection, 36, 101—Organic, isomeric, 2, 335—Organic, isomeric, antiseptic powers of, 61, 286—Organic, isomeric, combustion heat of, 48, 270—Organic, isomeric, physical and chemical properties of, as a function of their chemical structure, 100, 293—Organic, isomeric, solubility of, 56, 145; 58, 22—Organic, metamorphism in, 84, 196, 197—Organic, new class, 85, 180—Organic, nitrated, heat of combustion, 89, 237—Organic, nitrogenous, action of chlorocarbonic ether on, 50, 206—Organic, of addition, 87, 112—Organic, on iron plates, action of, 62, 264—Organic, origin of colour in, 96, 263, 295—Organic, oxidation of, 66, 222—Organic, plea for empiric naming of, 52, 181, 203, 216—Organic, reactions of iodine on, at elevated temperatures, 50, 104—Organic, real types of, 49, 115—Organic, reduction, 15, 137—Organic, refraction equivalents of, 49, 233—Organic, refractive power of, 64, 19—Organic, relation between boiling-point and composition in, 2, 122—Organic, relation between crystalline form and chemical constitution of, 22, 60—Organic, simple, decomposition by zinc dust, 42, 210—Organic, solid densities of, 40, 301—Organic, sulphur in, determination, 18, 7—Organic, sulphur in, estimation, 27, 53—Organic, sulphurised, critical temperature of, 83, 180—Organic, synthesis, 8, 19, 25; 45, 231; 46, 25; 50, 177—Organic, synthesis by means of ferric chloride, 81, 306—Solid, atomic volumes of, 22, 190—Unsaturated, addition of bromine to, 95, 273—Unsaturated, configuration of, 100, 250—Unsaturated, stereochemistry of, 77, 7—Usually considered stable, constancy of composition, 15, 1
 Compressed air (see Air)—Asphalt (see Asphalt)—Gas (see Gas)—Gases (see Gases)
 Compressibility of gases (see Gases)—Of liquids under high pressure, 26, 58

- from, 74, 162—And iron, incandescence of, 52, 261—And iron, limits of sensitiveness of reactions for, 45, 35—And its alloys, estimation of cuprous oxide in, 100, 233—And its ores, separating, 4, 39; 6, 68—And lead and antimony alloys, experiments with, 45, 105—And lead and tin, soluble compounds of, in newly distilled alcoholic spirits, 4, 117—And lead and zinc smelting works, injurious constituents of smoke of, 46, 208—And lead, separation, 59, 222; 69, 7—And magnesium alloys, 86, 281; 88, 11—And manganese alloy, Manhès', report on, 51, 106—And manganese and silicon, equilibrium between, 87, 94—And mercury alkaline solutions, behaviour of sugar with, 42, 96—And mercury, separation, 73, 28, 38; 74, 145; 79, 194; 85, 280—And microbia, 48, 238—And nickel alloys, assay, 76, 241—And nickel, separation, 7, 40—And nitric acid, interaction in presence of metallic nitrates, 97, 306—And nitric acid, reactions between, 59, 303—And palladium, separation, 15, 40—And phosphorus compounds, 12, 172—And silver alloys, distillation, 95, 46—And silver, atomic weights, relation of, 58, 69—And silver compounds of acetylene, 65, 169, 295—And silver group alloys, 75, 300—And silver in the same solution, determination, 50, 236—And silver, separation, 6, 42; 78, 101—And thallium, separation, 7, 133, 278—And tin alloys, 56, 275—And tin, separating, 71, 104; 83, 221, 230, 247; 85, 300—And yellow phosphorus in aqueous solution, reaction between, 91, 190—And zinc alloys, 2, 303; 3, 22, 37, 51, 70, 149, 164; 4, 91; 72, 208; 73, 168—And zinc alloys, analysis, 61, 136; 71, 92—And zinc alloys, thermochemistry of, 83, 49—And zinc, determination of equivalents of, 48, 243—And zinc, estimation, 8, 38—And zinc, heat of combination, 80, 255—And zinc industries of United States, 36, 205—And zinc, separation, 19, 156—And zinc, separation by sulphuretted hydrogen, 47, 244—Anode, electrolysis of alkaline and alkaline-earth chlorates with, 89, 293—Antiputrescent effects of, 100, 321—Antiputrescent effects of, 41, 284—Arsenic in, detection, 8, 27—Arsenic in, determination, 46, 46, 77—Arsenic in, estimation, 45, 136, 255; 70, 207—Arsenic, purifying, 45, 34—Articles from Ancient Egypt, 69, 205—Articles from Chaldaea, 71, 13—Articles of very ancient date, 67, 84—As a reducing agent for ferro salts previous to their estimation volumetrically, 99, 273—As iodide, 76, 243—Assay by iodide method, 74, 52—Assay, electrolytic, 62, 25; 63, 261—Assay, loss through volatilisation, 26, 243—Assay, wet, 72, 70—Atomic weight, 32, 9; 58, 55; 60, 110; 63, 43; 65, 236, 244, 260, 265, 281, 293, 302; 66, 7, 20, 29, 47, 57, 74, 82; 68, 171; 93, 195; 95, 217; 99, 69; 100, 278—Blowpipe reaction of, 9, 73—Bronzing, 20, 225—Bronzing articles of, 8, 181—Casting in sand, 88, 221—Castings, non-porous, 20, 203—Catalytic oxidation of hypophosphorous acid by, 99, 168—Chemistry of, 21, 22, 202, 219—Coating cast-iron objects by electrolysis with, 21, 246—Coating wire with, 6, 191—Coating with antimony, 11, 300—Colorimetric tests for, 76, 184—Complexes in ammonia and pyridine solution, optical investigation of, 99, 56—Compounds, complex, 91, 161—Compounds, effect on the soil, 71, 293—Compounds of dicarboxyl-glutaconic ester, 77, 165—Compounds, toxicity, 53, 155—Compounds, toxicity or non-toxicity of, 54, 166—Conglomerate, 4, 268—Con-

- taining pyrites, extraction of precious metals from, 26, 133—Carnish, assay, loss through volatilisation in, 26, 233—Covering with lead, 6, 133—Cuprous oxide in, estimation, 36, 241—Delicate colour reaction for, 94, 18—Density of, change on hammering, 3, 177—Depositing on cast iron, 21, 47—Depositing upon glass from aqueous solutions in a thin brilliantly reflecting film, 97, 19—Detection, 34, 16; 70, 206, 221, 232; 83, 143—Detection of cadmium in presence of, 47, 13—Determination, 16, 267; 65, 225; 70, 206, 221, 232—Determination by battery, 24, 100, 17—Determination by converting the sulphide into oxide, 61, 193—Determination by oxide process, 58, 177—Determination by means of potassium cyanide, 48, 111—Determination, colorimetric method, 32, 308—Determination, electrolytic, 41, 25; 44, 279; 45, 101; 50, 67; 94, 243—Determination, electrolytic, apparatus for, 53, 216—Determination, indirect titrimetric, 100, 208—Determination, iodometric, 97, 79, 87—Determination, volumetric, 30, 241; 44, 82; 46, 284; 47, 248; 77, 31, 32; 80, 22—Distillation, 92, 302—Distillation of alloys of gold with, 93, 22—Effect of arsenic on, 83, 3—Effervescence, 66, 97—Elasticity, 23, 177—Electro-deposited, crystalline structure of, 92, 204—Electro-deposition on cast-iron, 20, 300—Electro-deposition on iron, 22, 1, 181—Electro-deposition, rapid, 92, 32—Electrolytic deposition, 97, 137, 149—Electrolytic refining works, 82, 150—Electrolytic separation, 74, 50—Electrotyping, 16, 18—English method of arranging in dry way, 13, 288, 290, 232, 205—Engraving on, 30, 177—Equivalent of, 8, 104—Estimation, 1, 61, 73; 9, 103; 26, 155; 33, 7, 11, 111; 58, 131—Estimation and equivalent, 8, 300—Estimation as oxalate, with separation from cadmium, arsenic, tin, and zinc, 83, 221, 230—Estimation by cyanide of potassium, 25, 275, 285—Estimation by cyanide of potassium, interference of certain metals with accuracy of, 33, 152—Estimation by cyanide of potassium, Parkes's method, 1, 25—Estimation by stannous chloride, 85, 177—Estimation by sulphuretted hydrogen, 20, 118—Estimation by titanium trichloride, 94, 210—Estimation, colorimetric, 79, 77—Estimation in biological researches, 84, 220—Estimation in presence of other elements, 76, 201, 303—Estimation in state of oxalate, 85, 300—Estimation, iodometric, 89, 288—Estimation, quantitative, 25, 156—Estimation, volumetric method, 2, 35; 8, 38; 21, 226; 43, 35, 49; 45, 167—Estimation, volumetric and gravimetric method, 87, 06—Etching, acid for, 66, 62—Extraction, 21, 264; 37, 80—Extraction by an acid solution of ferrous chloride, 36, 90—Extraction from its ores, 6, 226; 21, 300—Extraction from its sulphide ores, 88, 5—Fillings, electric radiation in, 68, 219—For coating brass, 23, 215—For destroying typhoid organisms and effects on man, 92, 43, 54—For precipitation of silver, 26, 135—From ores used in sulphuric acid manufacture, 6, 8—From a sanitary point of view, 50, 47—Glance, 65, 53—Gold in, 72, 76—Hydrolytic acid as a reagent for, 43, 177—Hydrolytic acid as a test for, 42, 8—Hydrometallurgy of, 44, 177—Impurities in, 77, 17—In pyrites of oxide, 76, 133—In mineral water, 31, 77—In soda ash from near Lautoka, Fiji, 96, 133—In Bath waters, 10, 158—In beer, 11, 206—In brandy, 32, 313—In brass, 24, 13—In bread, 3, 111, 127, 142; 33, 7; 45, 164; 46, 92—In cacao beans, 25, 150—In cast-iron, 34, 78—In cereals, prevalence of, 62, 247, 261—In Chaldea, age of, 75, 109—In chocolate, 25, 156—In complicated organic salts, determination, 97, 192—In distilled water, detection of traces, 64, 190—In dung, 32, 313—In feathers, 28, 212—In flour, 3, 111, 127, 142—In food, 47, 308—In human organism, 31, 92—In iron pyrites, 12, 231—In juniper liqueur, 32, 315—In mineral waters, 3, 251—In olive oil, 41, 160—In "ore-reducer" slag, 35, 250—In ores, estimation, 6, 220, 264, 275; 19, 185, 207, 211; 20, 167—In plant world, 79, 44—In primitive rocks, distribution, 40, 156—In pulverised iron, 23, 119—In pyrites, determination, 60, 133—In same group with the alkaline metals, attempt to explain, 90, 271—In sea preservation, 10, 38—In silk, 41, 284—In sulphate of soda crystals, 42, 241—In urine, 43, 233—In water, determination of small quantities, 94, 212—In waters, 24, 205—In wine, 63, 37—Incandescence of, 52, 261—Industrial, analysis, 75, 11—Industrial, of electrolytic process, 75, 11—Industry in Japan, 75, 24—Industry of United States, 36, 205—Influence of ammonium sulphide in preventing action of various solutions on, 35, 82—Influence of bismuth on quality, 2, 170—Influence on determination of iron, 59, 207—Influence on estimation of sulphur, 54, 206—Influence on fermentation, 97, 79, 87—Influence on silvering of glass, 89, 23—Iodometric determination of arsenic and antimony associated with, 98, 51—Lake Superior, smelting, 2, 228—Limits of sensitiveness of some reactions for, 45, 35—Liquid and ammoniacal, solution of, 56, 1—Liquors, estimation of cuprous chloride in, 49, 161—Localisation in organism after ingestion of a salt of that metal, 35, 106—Loss through volatilisation in Cornish copper assay, 33, 77—Manufacture from copper ores, 9, 47—Manufacture on the Tyne, 23, 26—Melted, absorption of hydrogen and carbonic oxide by, 15, 31—Melted, removal of oxide from, 75, 97—Metallic, 8, 133—Metallic, action of fatty oils on, 34, 176, 200, 213—Metallic, action of sulphur vapour on, 57, 95—Metallic, action of water on, 78, 209—Metallic, as a test for sulphurous acid, 5, 126—Metallic, as absorbent for oxygen gas, 45, 287—Metallic, electro-crystallisation, 57, 184—Metallic, estimation of suboxide of copper in, 19, 238—Metallic, precipitation by poor copper matt, 39, 204—Metallic, preservative against cholera, 48, 260—Metallic, process for obtaining finely powdered, 7, 123—Metallic, production of pure, 61, 308—Metallic, solubility in hydrochloric acid in absence of air, 14, 34—Metallurgy, 73, 117—Mine, Cap Garonne, minerals found in, 21, 226—Mines of Lake Superior, 20, 278—Mines of Sinai worked by the ancient Egyptians, 74, 121—Minerals, formulae for, 11, 191—Mirror, producing, 97, 19—Mirrors, 93, 301; 95, 231; 96, 85—Modification of cyanide titrations of, 76, 189—Molten, action of salt on, 45, 80—Moss, formation, 35, 117, 141, 154, 186, 195—Native, composition, 7, 164—Native, occurrence of, 23, 0—Native, from Yunnan, 68, 307—Native, of Belgium, 20, 71—Nitro, (see Nitro-copper)—Non-poisonous character, 40, 11—Objects from Egypt, 71, 13—Objects, slow changes in, 69, 205—Obtaining from copper pyrites with aid of two waste products, 37, 65—Occlusion of hydrogen by, 37, 271—Occurrence of, 42, 259—Ore from Corsica, analysis, 14, 23—Ore of Stolzenbourg, analysis, 50, 187—Ore, treatment, 5, 125—Ores and zinc ores, estimation, 20, 242—Ores, atacamite in, 98, 132—Ores, calcining and smelting, 11, 105—Ores, determination of rich, 57, 102—Ores, electrolytic treatment, 52, 202—Ores, extracting, 25, 228—Ores, manufacture of copper from, 9, 47—Ores, origin, 36, 281; 37, 215—Ores, smelting, 2, 18—Ores, sulphur in roasted, 74, 62—Ores, treatment, 9, 201; 31, 168—Ores, weathering of, 15, 209—Oxidation, 50, 234, 248—Oxygen in commercial, estimation, 83, 203—Oxygen in, determination, 54, 38—Oxygen in, estimation, 80, 86—Paragenesis and derivatives of, 24, 229—Phosphor, (see Phosphor-copper)—Phosphuretted, 33, 75—Photography, 10, 144—Pipes (see Pipes)—Plates, corrosion by nitrate of silver, 24, 70—Plates for engravers, salts of iron for steeling, 36, 11—Platinising, 19, 220—Position and character founded on atomic weight, 32, 151—Precipitation and preparation in alkaline sodic solution, 82, 282—Precipitation as metal by titanium sesquisulphate, 97, 168—Precipitation by alkaline carbonates, 17, 172—Precipitation by electrolysis, 11, 174; 46, 150—Precipitation by iron, 64, 153—Precipitation by hypophosphorous acid, 17, 160—Precipitation by magnesium, 76, 30, 59—Precipitation by zinc, 81, 134—Pretended wide distribution, 14, 81—Process, humid, 21, 177—Products resulting from simultaneous action of air and ammonia on, 5, 41, 113—Pure, effect of presence of metals and metalloids on electric conducting power of, 2, 217—Purification, 8, 04—Quantity produced in year 1866, 20, 132—Reactions, micro-chemical, 81, 59—Reagent for, 20, 228—Reds, 58, 25—Reduced, combined hydrogen in, 87, 311—Reducing agents in refining and obtaining copper alloys, 41, 272—Reduction at low temperature, 80, 24—Refined, influence of foreign bodies on, 56, 228—Refined, non-metallic impurities of, 9, 124—Rough, 56, 190—Salts, action of peroxide of manganese on, 14, 107—Salts, action of phosphuretted hydrogen on ammoniacal, 80, 11—Salts, action of radium emanation on solutions of, 98, 157—Salts and hydrogen sulphide, interaction, 76, 231—Salts and lead salts, behaviour with soda lye, 46, 120—Salts, basic, 20, 35—Salts, basic, action of water on, 64, 85—Salts, basic, formation, 89, 279—Salts, bivalent, 10, 178, 221—Salts, hydrobromic, reaction of, 71, 50—Salts instead of chlorophyll in preparation and preservation of green fruits and vegetables, 35, 188—Salts, poisonous character of, 35, 95—Salts, preservation of stone by means of, 20, 130—Salts, preservation of wood by means of, 20, 180—Salts, reaction, 59, 168—Salts, reaction in presence of cyanogen compounds, 21, 95—Salts, reagent for, 56, 160; 58, 184, 293—Salts, reduction, 59, 85—Salts, reduction by hydroxylamine, products of, 87, 142—Selenium in commercial, 21, 178—Separation and estimation in presence of other metallic salts, 19, 200—Silver in, 72, 76—Smelting, 2, 70; 4, 112; 7, 34—Smelting, American method, 58, 76, 108, 131—Smelted, comminution of sulphurous acid in, 16, 150—Smoke, 15, 36—Smoke question, 12, 96, 277—Solubility in alkaline solution of gold, 32, 1—Solubility of silk in an alkaline-glyceric solution of, 36, 63—Solution, ammoniated, effect on vegetable fibre, 15, 1—Solutions, ammoniacal (see Ammoniacal)—Solution, Fehling's, experiments with, 25, 140—Solutions, reductions by glucose, 44, 262—Spectra of, 75, 2—Sphere, rotation of, 56, 258—Stable solution of, for determination of

- sugar, 50, 34—Structure, 6, 143—Subsals of, and salts of silver, reciprocal action, 7, 218—Sulphur in, determination, 62, 239—Tellurium in, 47, 51—Test, 36, 240—Test, ammoniacal, 40, 139, Test for sugar, 4, 286, 290—Tinning without apparatus, 23, 21—Toxicological significance, 68, 286; 69, 25—Trade, 38, 242—Trade in 1880, 44, 225—Transfer of, 53, 90—Treating substances containing, 8, 21—Tubes made by galvanic process, 1, 276 — Tubes, seamless, 6, 156 — Uses of precipitating reagent of, 24, 91—Variation with temperature of thermo-electromotive force, and of electric resistance of, 84, 217—Voltmeter (*see* Voltmeter)—Weight of, alteration in, 10, 240—Welding, 19, 156—Wire ropes for lightning conductors, 34, 9—Work, foreign elements contained in, 47, 18—Zinc deposited on, 22, 108
- Copper acetate, decomposition, 46, 292—Preparation of neutral, 19, 273
- Copper acetylide, constitution, 98, 218—In gas tubes, 7, 3—Mode of forming, 13, 171
- Copper-aluminium alloys, 84, 256—Alloys, combination, 71, 269—Alloys, constitution, 92, 168
- Copper antimonates, 83, 160
- Copper antimonide in nature, 57, 138
- Copper antimonuret, 22, 83
- Copper arseniate, basic, 54, 50
- Copper arsenides, 88, 297
- Copper arseniuret, 22, 83
- Copper bichloride and orthotoluidine compound, 55, 117
- Copper binoxide, action of ether on, 30, 144—Ammoniacal, oxidation of alcohol by, 41, 47
- Copper borate, behaviour of boracic acid towards, 20, 166
- Copper bromide, hydrated, 81, 216
- Copper bromosulphobismuthite, preparation and properties, 85, 300
- Copper bronze for paper hangings, 9, 49
- Copper cadmium plates, action of a solution of sulphate of cadmium, 26, 240
- Copper carbonate, 3, 125—Action of phosphuretted hydrogen on, 80, 123—Blue, 23, 179
- Copper carbonates and cupricarbonates, 100, 21—Basic, 2, 279
- Copper chlorate, 23, 95—Crystalline basic, 79, 172
- Copper chloride, action of aluminium on, 45, 209—And lithium chloride, double, 64, 273—Basic, 89, 293—Reduction by means of calcium, 93, 68—Spectral reaction of, 61, 120
- Copper chlorides, action on metallic sulphides, 51, 238
- Copper chlorosulphobismuthite, preparation and properties, 85, 300
- Copper chromate, 15, 12
- Copper cyanide, 73, 24—Ammoniacal, 11, 21—And ammonium cyanide, double, 65, 36
- Copper cyanides and their combinations, 9, 225
- Copper dichloride, determination of iron with, 21, 235
- Copper ferrocyanide, osmotic pressure across membrane of, 83, 263
- Copper ferrocyanides, crystalline, 72, 293
- Copper fluorides, 68, 26
- Copper fluosilicate, 6, 301
- Copper glucoate, 31, 218
- Copper glycerolates, double, 79, 215
- Copper glycochol sulphates, physico-chemical study of the complex, 97, 11, 37, 51
- Copper haloids, photographic properties of, 10, 221
- Copper hemi-sulphide, behaviour with solution of nitrate of silver, 31, 72
- Copper hydrate, action of phosphuretted hydrogen on, 80, 123—Action on aqueous solutions of metallic salts, 85, 06—Displacement of soda of sodium chloride by, 43, 144
- Copper hydride, 41, 22, 47, 58, 70; 64, 60—Hydrated, 81, 216
- Copper hydrophosphite, double salts of, 36, 231
- Copper hydroxide, action on sugars, 45, 288; 51, 35
- Copper hypophosphite, 80, 195
- Copper hyposulphite, double salts of, 36, 231
- Copper iodide and ammonium iodide, double, 54, 37; 55, 295
- Copper iodides, 92, 245
- Copper iodomercurate, 21, 227
- Copper iodosulphobismuthite, preparation and properties, 85, 300
- Copper isosulphocyanide and sulphocyanide, ammoniacal compounds, 86, 233
- Copper matte, 50, 273—Gold and silver in, 72, 76—Precipitation of metallic copper by, 39, 204
- Copper molybdate, 3, 223
- Copper nitrate, action on benzene, 87, 155—Crystalline basic, 62, 49—In a state of tension, action of oxygen on, 25, 193
- Copper nitride, 64, 313
- Copper oxalate, composition and properties, 2, 191
- Copper oxamate, 3, 253
- Copper oxide, 7, 81; 86, 223 — Action of ammonia on, 46, 103 — Action of ammoniacal salts on, 21, 154 — Action of organic matter, not sugar, on alkaline solution of, 44, 99—Action of phosphuretted hydrogen on, 80, 123—Action on alkaline solution of glucose, 9, 241—Action on protein compounds, 2, 324—And amylaceous bodies, combinations, 60, 209—And peroxide of iron, separation by ammonia, 1, 119 —And soda, double phosphate of, 22, 288 — Battery (*see* Battery) — Behaviour of boracic acid towards, 20, 166—Black, preparation by humid method, 2, 295—Colloid, 92, 83—Decomposition of grape-sugar by, 19, 250—Determination of copper as, 47, 248—For organic analysis, 1, 23 — Palladised, oxidation of some gases with, 73, 22, 52, 78—Preservation of stone by means of, 20, 130—Reduction to the state of metal by inverted sugar, 18, 180—Solubility in alkaline solutions of amido-acids, 35, 163—Solvent for, 25, 215
- Copper oxides, 51, 213—Action of acetylene on, 81, 7—Higher, 55, 263—Reduction by metallic copper in organic analysis, 14, 18
- Copper oxybromide, analogous to atacamite, 60, 49
- Copper oxychloride and acetylene, combination, 78, 243—As a paint, 50, 152—Crystallised, and analogous compounds, formation, 22, 58
- Copper oxychlorides, 62, 12
- Copper perchloride, 10, 199
- Copper periodate, 87, 287
- Copper peroxide, hydrated, 14, 166
- Copper phosphates, 62, 74
- Copper phosphide, applications of, 34, 217—Crystalline, 65, 36
- Copper phyllocyanate in preserved green vegetables, 70, 292
- Copper polysulphite, 81, 299
- Copper potassium chloride, influence of heat on, 62, 203
- Copper protochloride, 41, 11—Behaviour when electrolytically decomposed, 22, 167—Formed by combustion of copper in chlorine gas, 25, 156
- Copper protoxide, crystallised, expansion under influence of heat, 11, 286; 12, 27—Detection in presence of bin-oxide, 1, 191
- Copper pyrites, 44, 208; 65, 51—Copper from, by aid of two waste-products, 37, 65—Estimation of sulphur in, 5, 45
- Copper quadrantoxide, preparation, 8, 206
- Copper seleniate, 78, 243
- Copper selenides, 83, 35
- Copper selenite and its use in preparation of selenic acid, 78, 165
- Copper silicide, 73, 119; 93, 80—And platinum silicide, double, 96, 138
- Copper steels, 94, 36, 134, 160
- Copper subchloride, 17, 242
- Copper suboxide, action of phosphuretted hydrogen on, 80, 11—For colouring glass, 25, 214—In metallic copper, 19, 238—Preparation, 9, 217—Yellow, 87, 179
- Copper subphosphide, crystalline, 79, 215
- Copper sulphate, 5, 278; 63, 25—Action of pure sulphuretted hydrogen on, 78, 279—Action on normal urine, 26, 118—Ammoniacal, 51, 244; 56, 231—Ammoniacal, action of, 60, 246—Analysis, 23, 290—And ferrous sulphate, interaction in solution of, 96, 291—And other salts of, manufacture, 7, 142—And sodium sulphate, solubility of mixtures, 84, 96—Arborisations produced in solution of alkaline silicates by, 11, 120—Basic, 52, 47—Battery (*see* Battery) — Basic, 1, 263 — Crystallisation, 84, 42 — Crystals, optical property of, 30, 177—Decomposition by methylic alcohol, 94, 12—Decomposition of an aqueous solution of, by aluminium alloys, 93, 106—Disengagement of hydrogen during action of zinc on, 35, 76—Dissociation, 46, 123—Double, 4, 264, 331—Electrolysis, 60, 24; 70, 97—Greening vegetables with, 63, 119—Hydrates of, 34, 238—In anti-phyloxeric mixtures, estimation, 79, 280—Manufacture, 8, 180; 88, 54—Microbicidal action of, 48, 292—Pile, hydro-electric, 29, 92—Preparation, 7, 263—Reducing action of phosphorus on, 36, 34—Reduction, 54, 273—Solubility, 53, 63; 56, 12—Solution and magnesium, interaction, 77, 127, 139—Solutions, 62, 250—Solutions of, as regards their influence on germinating power of wheat, 31, 208—Solutions, specific heat of, 92, 237—Spurious, 14, 179—Titration of alkaline ferrocyanides with, 49, 214—To preserve wood, 29, 104 — Uses of, 48, 270 — Voltaic element, 26, 50
- Copper sulphates, action of acetyl and benzoyl chlorides on, 80, 198—Basic, formation, 66, 198—Dissociation, 54, 23—Double, with magnesia, potash, and ammonia, 4, 264, 331—Hydrated, 54, 261
- Copper sulphide, action of hydrosulphate of ammonia on freshly precipitated, 11, 196—And iron sulphide, double, 1, 103; 5, 122—Colloidal, 57, 111—Crystallised, formation, 27, 44—Formed in moist way, composition, 39, 185—In a colloidal condition, 48, 101—Reduction, 74, 18—Solubility in alkaline sulpho-molybdates, 47, 304 —Thermo-electric piles of, 12, 57
- Copper sulphides, 43, 267—Basic, 47, 181
- Copper sulphocyanide, 91, 23—And copper isosulphocyanide, ammoniacal compounds, 86, 233—In gravimetric analysis, 83, 258
- Copper telluride, 12, 108
- Copper tetrasulphide hydrogen acid (*see* Acid)
- Copper thiocyanate in gravimetric analysis, 85, 300
- Copper-tin alloys, constitution, 88, 2—Alloys, tensile strength of, 94, 280
- Copper-tin-aluminium, liquidus curves of ternary system, 99, 295
- Copper vanadate from Laurium, 44, 23
- Copper-zinc alloys, 100, 47—Alloys, action on nitric acid, want of uniformity in, 81, 230—Couple, action, 32, 150—Couple, action on nitrates, 43, 69—Couple, action on organic bodies, 27, 103; 29, 117, 212; 51, 235—Couple and its effects, 32, 75—Couple and occluded and nascent hydrogen, 37, 245—Couple, nature of black deposit in, 27, 103—Couple, reaction on nitric oxide, 47, 277—Couples, preparation, 35, 131—Element, action on alkaline oxy-salts, 38, 34

- Copperas, influence in manure on germination of seeds and growth of plants, **35**, 220
- Coppering cast iron, wrought iron, and steel, **45**, 22—Processes, **45**, 87—Wooden ships, alteration which the metal employed undergoes, **24**, 21
